The investment fund – backed by XRPL

My name is TommyonXRP, I am the founder of **xTREME**.

This project is made on the XRP LEDGER.

With over 10 years of stability, the XRPL is one of the fastest, greenest and most efficient blockchains out there.

xTREME was launched 1st of March. These bearish times were used to invest heavily in the TOP PROJECTS of the XRPL on a huge discount. Over 260k XRP have been invested, making **xTREME** the biggest INVESTMENT FUND on XRPL.

The investment fund:

xTREME is invested in these coins:

xTREME sells 2.5% of the fund monthly for the PASSIVE INCOME and 2.5% for the developers. These sells will continue till January. Than there will a community vote how to continue with the Investment fund. The investment fund will be allways a 50/50 between development and holders and cannot be changed.

The STAYKX FUND:

xTREME is also heavily invested in the OCW/xBLADE stayking pool on staykX.

The pool generates daily rewards paid in STX and is running for the next 100 years.

StaykX soft stayking is a very popular method of staking, which allows staykers to keep their holdings in their wallet.

This guarantees a lot of trust. The staykX fund belongs 100% to our holders. This is a lifetime stayking pool.
