

EURO AUTO

SERVICE

Cantitati Ulei si Refrigerant Auto 2020

Pentru a garanta o igienă optimă în interiorul mașinii tale nu este insuficient doar să înlocuiești din când în când filtrul de polen, este recomandat ca cel puțin o dată pe an să se inspecteze și sistemul de aer condiționat.

Va oferim servicii complete pentru reparatia și intretinerea instalatiei de aer condiționat, de la incarcarea instalatie de aer condiționat cu freon până la inlocuirea compresorului AC, conductelor sau a senzorilor.

Euro Auto Service va ofera și urmatoarele servicii:

- **Service Aer Conditionat Auto**
- **Incarcare Freon Aer Conditionat**
- **Reparatii Aer Conditionat in Constanta**

Safety precautions and notes

The information in the following tables has been compiled from the vehicle manufacturers' specifications and is applicable only to original equipment air conditioning system versions. All work on air conditioning systems should only be carried out by technically competent personnel, taking the respective safety regulations and country-specific legislation into account.

All rights reserved, including the translation. No part of this table may be reproduced in any form whatsoever, whether mechanically, electronically, via photocopy, microfilm or other method, even in extracts, without our written consent. The information has been compiled carefully. We disclaim liability for errors on account of the extent of the material.

PAO-Oil 68 – Universal compressor oil

PAO-Oil 68 is an air conditioning compressor oil for universal use, available exclusively from Behr Hella Service.

In the past, garages have had to stock up with different oils for servicing air conditioning systems.

Thanks to **PAO-Oil 68** this is no longer necessary.

This high-quality multigrade synthetic oil has been developed for universal application in all car and truck air conditioning systems, as well as for air conditioning systems installed in construction and agricultural machinery.

PAO-Oil 68 is suitable for all refrigerant types and does not accumulate in evaporators and condensers, which often resulted in a reduction of cooling performance when other oils were used.

PAO-Oil 68 forms a thin film on the surface of the system components, thus ensuring that the oil stays where it is needed – in the compressor.

This makes a significant contribution to operational safety and noise reduction.

PAO-Oil 68 is extremely suitable for conversion from R12 to R134a refrigerant.

Since **PAO-Oil 68** is compatible with all other lubricants, it is sufficient to drain the old compressor oil off when converting.

PAO-Oil 68 has a very large operating range (-68 to 315 °C) and is non-hygroscopic, which means it doesn't absorb moisture, unlike other oils.

PAO-Oil 68 does not attack fluoroelastomer materials such as tubes or seals.

PAO-Oil 68 contributes to the improved performance of the air conditioning system and is recommended by leading air conditioning specialists.

PAO-Oil 68 - Universal compressor oil, PAO-Oil 68 Plus UV - Universal compressor oil with dye

Application	Compressor type	Refrigerant	PAO-Oil type	PAO-Oil type Plus UV

Vehicle A/C systems* * PKW, LKW, Land- und Baumaschinen	Rotary vane compressors	R134a, R413a	PAO-Oil 68 AA3 8FX 351 214-081 1.0 l	PAO-Oil 68 AA3 Plus UV 8FX 351 214-281 1.0 l

PAG oils are divided into the following viscosity classes

PAG ISO 46	low viscosity	Behr Hella Service part no.:	8FX 351 213-031	240 ml
PAG ISO 100	medium to high viscosity	Behr Hella Service part no.:	8FX 351 213-051	240 ml
PAG ISO 150	ultra-high viscosity	Behr Hella Service part no.:	8FX 351 213-041	240 ml

Which compressor oil to use for a specific application depends on the type of compressor and the refrigerant used. The wrong selection of oil can lead to damage. Vehicle or manufacturer-specific instructions must be considered separately.
