

G1

Primary international development projects Imperium of Diamond's plans registered since 1998 till today illegally blocked by terrorism and European governments or politicians who are unable to legally hold conventions UNGA

Projects are designed for business cooperation in the interest of every country's government and states from around the world.

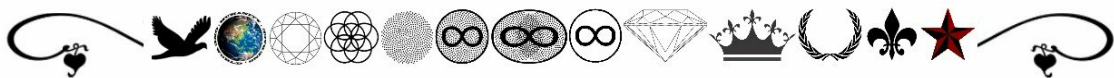

The possibility of joint cooperation agreements provided;

- *Bilateral Cooperation Agreement.*
- *Bilateral and multilateral agreements by the markets.*
- *Creation or entry into the trade union.*
- *The One World and federalization.*

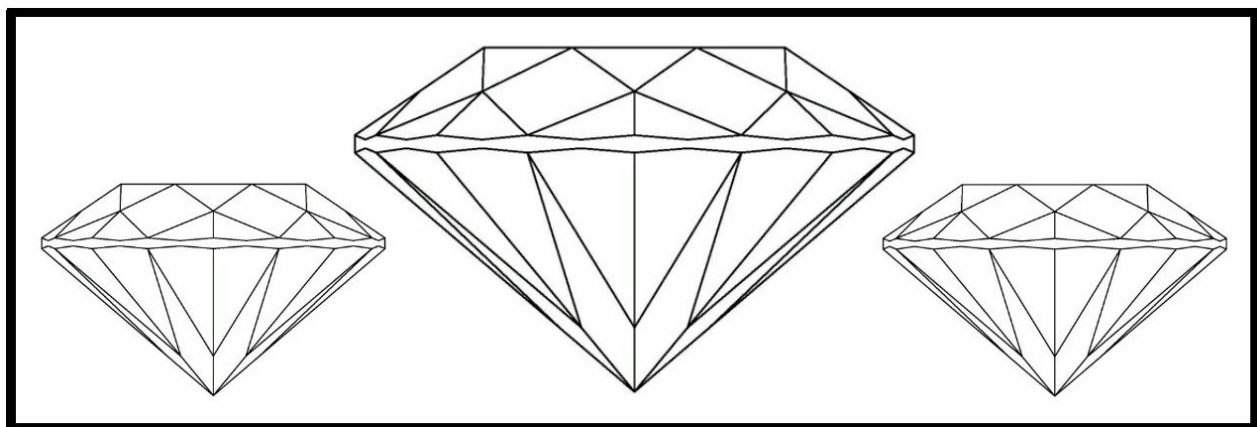

Business strategy G1 is based on the ability to ensure the formation of stable development actions also among the countries which do not own sufficient financial strength of the currency and financial provision for the establishment of the contract. Strategies common markets with G1 can create projects and business development for free, without the need for interim payments only on the basis of agreements on the payment of the profits from the development and improvement of the entire size of the state's economy at a sufficient level capable of achieving a balanced payment.

The G1 © 1998 2016

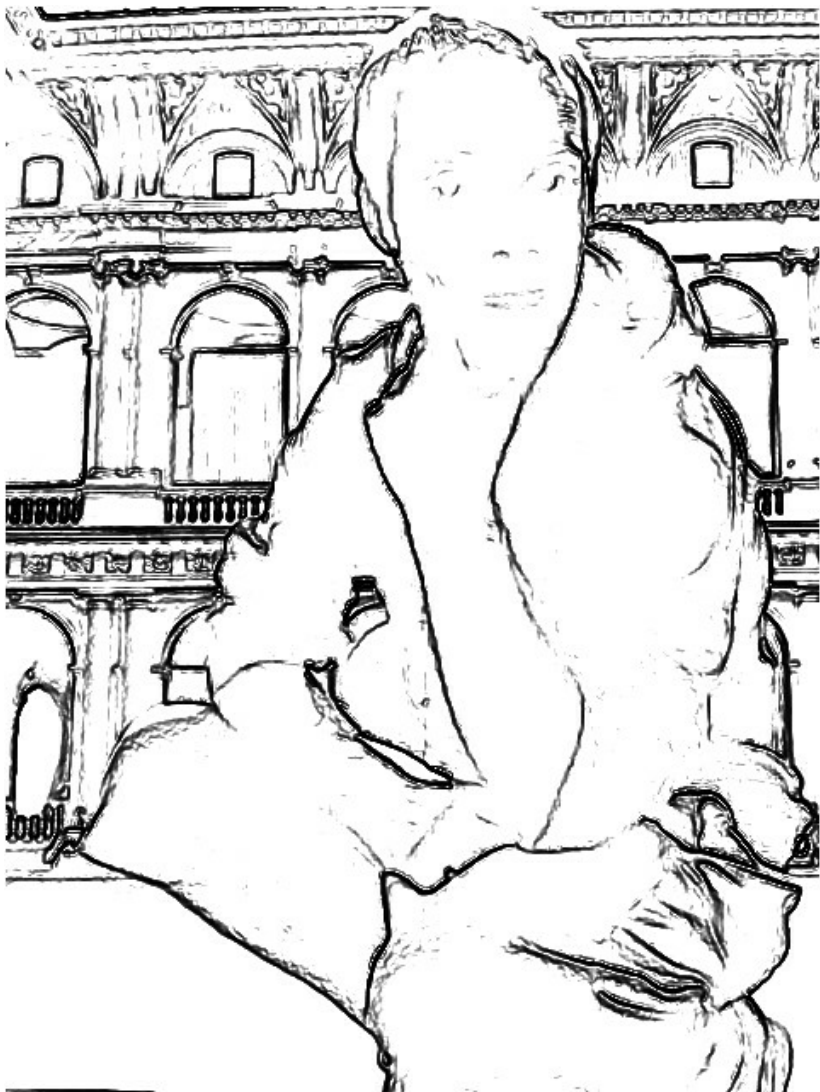

**Peter Gottwald King, the King of the Federal Government of
The Imperium of Diamond's**

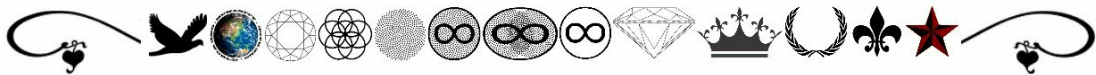

”

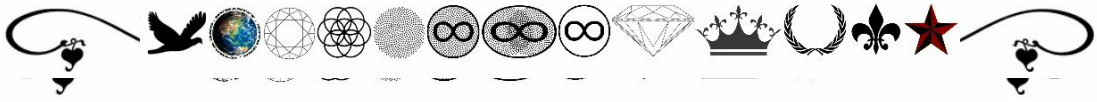

*I King Peter Gottwald, in order to promote global development and welfare of the maturity of all nations, states and the growth of friendship for the governments and building our common alliance, so I do for You and our human world basing association G1, for the development of important values for the future of the new human world.
For world peace, growth diplomacy and friendship, stability of the global and national policy, in order to develop a good spirit and working together, our civilization and states.*

”

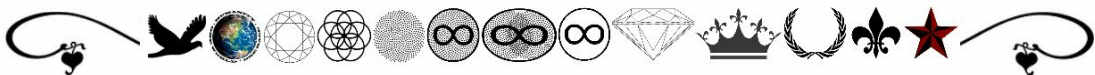

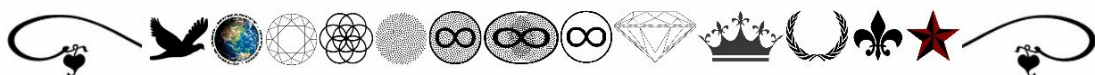

**I therefore Thank You to everyone who wants to promote a better future for
The World**

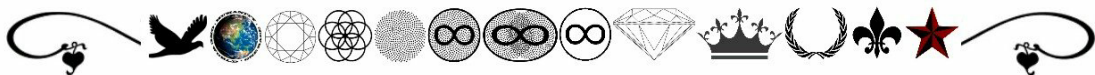

G1

The Basic description of markets, business categories of plans and projects:

Basic Facts markets strategy

- Support for greater dynamism and development of civilization markets.
- Support for dynamic development of world politics, equivalence and dynamic multilateral cooperation.
- Construction of new cities, high-tech city of skyscrapers and high capacity.
- Support for the automation industry, agriculture and servitude and the financial industry.
- Establishment of cooperation over modern or special technologies.
- The agreement on support for the dynamic development of civilization and networking markets. Elimination of unemployment and poverty.
- Support for an immediate and urgent development of the values of civilization to the level of most developed countries today.
- Building a multilateral bundles governments, the development of new organizations, groups of States, extending the global business structure, the dynamic expansion of the political circles of global policy development areas of security and military associations, major steps for all of civilization to stand the world of global politics and governments.
- Building hospitals, pharmaceuticals, agricultural centers, schools and hostels, humanitarian objectives.

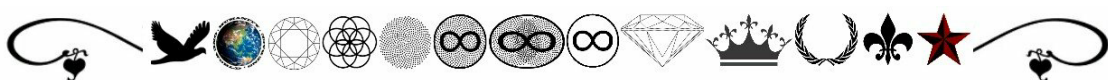

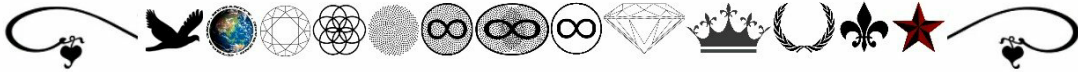

Policy

- The G1 is a group of the foundation of the government of the country Imperium of Diamonds, to promote the development and organization of trades between all states and governments of human world, with a legitimate right to ensure the security and stability of international laws and policies, or its development goals towards better future of the human race. Each state any economic nature inherent right to add to the club G1, and thus establish a better logistics and the strength of retail chains parties between our states.
- Cooperation on stores group G1 is the foundation of a strategy for independence from the influence of other developed states according to their national interests regulate the global economy and the strength of foreign states be developed using internationally available business resources, or global business competition strategy.
- Any State which enjoys collaboration capabilities G1, because the state acquires the ability to develop their civilization to the level of developed countries in the world. Thus, it is confirmed that together we're addicted to the opposition of foreign countries and our relations are independent and capable of the same results.
- Construction of shared national monuments as symbols of our peaceful, friendly and diplomatic cooperation, inspiration for future generations.
- World Diamond International Alliance as new entity of the country which is based on allowing an alliance of governments and states, the emergence of the biggest forces in global politics based in equality democratic states with the right to expand social intelligence, joint trade and friendly relations for peace, with some common grounds and civilizations World Diamond on a range of new planets in the universe, several galaxy and the full capacity to develop our civilization and its territory into super clusters of galaxies, 1 000 000 000 000 000 000 planets in the universe.
- The creation of joint consular relations on the territory of our governments, and a plea for support for the development consulates Imperium of Diamonds, along with consulates World Diamond International Alliance.
- Cooperation to ensure the joint sessions of the financial industry and the development of communication between our State Banks.
- Organization departments and the possibility of alternative payments for office in the event of a crisis. Consulates, departments of security, anti-corruption and anti-monopoly bodies of the Anti-Organized Crime and communication departments in the structure of international cooperation.
- Common agreement on media development and planning strategies for the joint development and stability, ensuring the ability of a common defense against foreign attempts to influence society in a situation of political conflict opposing interests of competition or war.
- The common center of international market centers and conference business. Ability to create a common strategy for the international market and attract other parties for our common development and the strength of our civilizations.
- Organizing state, governmental or divisions consortium of commercial and industrial properties by joint agreements and strategies according to the purpose of our goals.

- Common postal and communications contacts and mail, postal services and modern communication. Ability to establish digital communications Intranet for joint sharing of documents and 3D Digital conference between parties our Party against our ability to exploit the advantage of instant communication without loss of time traveling stability and the risk of visiting foreign territories.
- State Agreement political, economic and tourist, agreement over the creation of a multilateral transport routes super trains that connect all our major cities from which arises one Global City area over several continents.
- Agreement on centralizing super-speed trains and ships orbiting between industrial centers of our countries and therefore opening the possibility to synchronize industrial factories regime under the principles of common markets and natural development goals or business cooperation. The agreement on the joint business cooperation is the first step to achieving that objective abilities.
- Common agreement on tourism, and joint media strategy for the promotion of tourism and destination limitations immigrants.
- Collaboration governments for strategic control of the natural increase of the population using new technologies for autonomous production of new population, hundreds of thousands or millions of people each year.
- Political agreement on military union, means a strategy to ensure a high capacity development of your armies and use common values of power technologies and military infrastructure.
- Joint army divisions and their development. Common centers of military bases in the form of safety communication and the ability joint mobility, defense against terrorist opposition and liquidation of radical movements.
- Development of common special forms of civilizations, such as research, technology, military, medical, industrial, and other.
- Agreement to support the transfer of migrants and refugees into the territories of the Imperium of Diamonds. IDs sponsored food, accommodation along the way, transport and health services.
- Education is, building centers for quick training of applicants for training and retraining of new, or the entire dimension of education. Market professionals and use market for the development of our civilizations.
- Humanitarian projects to help young children and families in social need, because of famine, lack of medicines, poor quality education or military crisis zones, other humanitarian emergencies.
- The fight against international organized crime. Removal of sea pirates zones, control centers for refugees and smuggling of weapons or drugs, and raw materials. Cooperation for Security to remove the space pirates and controlled development of space travel with the capability of immediate response against pirates.
- MANY OTHER....

New economic worlds

- The World Diamond International Alliance's ability to collaborate on the development of the greatest civilizations in the history of mankind.
- The One World, project for unification of all states, stop all forms of territorial boards difference and blockation of business cooperation.
- Corporatocracy government as a new association that interact with the cooperation of business corporations autonomously provides the greatest development steps for each state and civilization throughout the world.
- Union of Diamonds development multilateral Global business cooperation in dimension of rule on state and Global capacity under Union.
- Game civilization investment securities, + 100% GDP growth.
- 3D reality as an economic space ©™3D Networks, + 100% GDP growth.
- New Android worlds with a dimension many planets in the universe.
- Strengthening intelligence of all mankind on the value of a few multiples of today's maximum term, and that really rapid development of global trade structures, politics, civilization, society and social future of the human race.
- Division agreements on joint activities.
- Shared Space Centres in outer space, as well as a common planetary civilization and other common space center on the dynamic level of civilization.
- Common Space Station civilization and their construction.
- Joint development of intelligent physical energy reality.
- Other formats on a new dimension at the level of the world.

Infrastructure development

Transport

- Support for the construction of bicycle routes and center for extreme sports. Construction of autonomous navigation for trucks and transports, ships and aircraft, any other transport autonome for Industrial, Business, Civilizational autonome or Social and Mass activities of movement (© 1998-1999).
- Development and construction of modern highways, bridges and infrastructure. Special and Interactive Intelligent or producing materials, technology and dynamic economic network. High-tech systems, transport routes and special new piece of infrastructure for the city of millions.
- Installation of electrical stations for cars, special charging electricity network along the highway, or production of special generators of electricity with depend on payments for electricity as a transaction fee from a credit card or some other transaction.
- Highways that generate electricity from its own resources mixtures of chemicals, nano-structure materials or solar reactions. Road surface.
- Development of special highways for traffic speed 600 km / 1 hour.
- Digital aerial highways for car travel in air transport and the development of commerce in aerial centers. The establishment of factories to produce flying cars and trucks. ©Air Autonome navigation.
- Construction of railways autonome, full electrification of lines and construction of new modern stations with economic centralization and new services.
- Transport networks that automatically produce electricity supplies for transport technology and function of civilization.
- Construction materials special autonomous ports. Replacing 1000 containers a few seconds, without stopping the train or ship, truck, aircraft or space.
- Support for construction of water lines and automated cargo or transport ports. The ability to produce container transport ship with a speed of trucking.
- Centralization ground against flooding and the creation of new water lines.
- Urban infrastructure multi-transports with automation and service station network of metro, modern trams, bus lanes, buses levitating, airships, air pipe coaches (ID's © 1999), magnetic tracks, an ion trains others.
- Building a common transport routes Supertrain, pace of globalization and unification of the cities or the creation of major networks of business and material transport infrastructure, trains with a speed of 100 million kilometers per hour.
- Common continental and sea routes super speed Hover-Craft for the transfer of materials and thus develop the ability to establish centers of civilization in areas without material resources.
- Opening the ability of common orbital ports and support for common markets or contact sessions.
- Development of new and modern airports with advanced architecture and economic networks. Track for flights to orbit.
- Atmospheric portation cannon as a technology for mass travel between planets

and stars in the universe.

- Support for the development of thermal systems to stop freezing highways and transport routes or against cooling civilization. Civilization insulation from the cold weather.
- Ecological transport system of heavy trucks, management centralization of material store houses out of cities, and development of structure of ecological city isolation scheme.
- Technologically system for transport infrastructure stabilization in situations of earthquakes.
- Technologically systems for prevention against tsunami.
- Other options for the development of transports.

Cities and Architecture

- Modernization architecture and support the transformation of the historic centers to form High-Tech Synchronization.
- Construction of skyscrapers, modern centers and high-tech buildings.
- The construction of stadiums for the modern game, a new game for the future.
- Developing support for Commercial and Recreation centers, tourist centers or another parts of civilizational structures.
- High-tech Center for oxygen production and quality control of atmospheric cities.
- Ensure the full level of ecological healthy environment for using infrastructure networks that capture, filter, industrial cycle and use all kinds of oxidants in the atmosphere.
- Urbanization and construction of educational monuments or campuses for education.
- Urbanization terrain and environment.
- Construction of common water centers and lifestyle centers, under the oceans.
- Common Cosmic or Universal research or travel centers.
- Many options for the development of new towns.

Telecommunication

- High Development of telecommunication networks of antennas, transmitters and satellites.
- Development of Internet network cables, radio signals and laser structure.
- Common telegraph system.
- Support for the development of Wi-Fi networks, and user programs (ID's ©2000).
- TV digital broadcast signal (IDs © 1999).
- Development of security infrastructure that is able to eliminate crime and detect threats of conflict and violence.
- Joint development of satellite infrastructure.
- Development of 3D-Network's communication and information sharing.
- Network 3D digital reality site to synchronize with GPS and map the structure of civilization for the opportunity to develop 3D digital worlds together with the real economy standard of civilization synchronization.
- Support for the development of cosmic communication between planets.
- Agreement on the use of technology to facilitate communication galactic level digital communication transmission speeds within a few seconds.
- The use of special technologies to manipulate physical reality to function as a

system of telecommunications and multi-formal sharing of data interaction.

- (3G, 4G, 5G ©ID's 1998) ©™Interactive Digital Network system synchronization of mobile telecommunication devices technology for synchronization and control other technologies, and information links with the rest technology sensors, telecommunications, the Internet, shopping centers, others, and common information synchronization functions civilization of mass movement and development, and home and office, any recovery.
- (IoT ID's ©1998) ©™Interactive Digital Network.
- Interactive digital network infrastructure civilization solid base of 3D digital offices for urgent work or meeting people from several different positions.
- ©™Interactive digital network, management of homes, buildings and real estate, industrial and civilizational zones or hals, infrastructure and lifestyle networks.
- Super computer Interactive and Intelligent networks of civilizational zones and sensors.
- Special radiowaves tube for Super computers Mass Quantum digital communication and data share.
- Projects of The Intelligent Cities, high-tech digital sites and quality modernization.
- Many options for the development of telecommunications intelligence, and High Intelligent sites.

Civilizational sources and energy management, maintenance

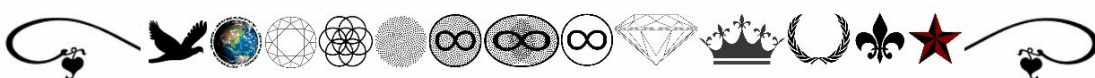

- Water networks and modern city waterworks, with the possibility of using water resources in the industry and to produce electricity.
- Sewage water from the many possibilities of chemical and organic cleaning cycles, and the subsequent use of oxides in the industry.
- Special technology is the ability to produce water laser with a range up to other planets in the universe, and the ability to create new oceans on other planets, expansion of water supply networks, two-way lines.
- Construction of the steam heating plant centers to maintain thermal stability of households.
- The air conditioning system on the extent of the whole dimension of civilization.
- Bio-gas stations and distribution infrastructure of gas pipelines.
- Bio-gas & Univ.-gas stations in the Universe, be transport routes.
- Ability to ensure the construction of gas and liquid pipelines with high-tech automatic systems management and security operations.
- Transport of various kinds of chemicals, such as individual consignments or massive flow of raw materials.
- Pipeline airy post and intelligent traffic systems or transportation of a large-scale shipments of materials and piping air pressure over the level of civilization, and between cities. Technology with a range between the cities can produce electricity at nuclear power plants.
- Power plants of various kinds, thermal power plants, solar-powered steam or electric heating power.
- Special plants based on biological and bio-organic in the form of bio-technological platelets which produce electricity and laboratory expand its capacity be modification.
- Thermal power station on the way thermo-dynamic energy source in the

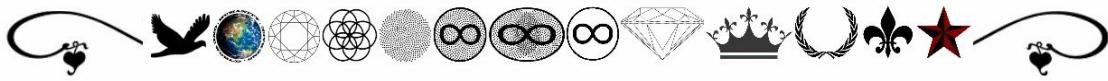

structure of the thermal energy physics, thermo-electron generators.

- Trend Micro-nuclear generators based on uranium, because of safety strategy and therefore the use of lower capacity power uranium which is in the generator, and placed in underground structures. The spent uranium will be stored in the recycling generator, for restoration of power supply.
- A special form of intelligent generator according to physical principles of kinetic energy which increases the performance pressure and speed of the generator or generators. (One block produces the same power of ten nuclear blocks)
- Stellar Energy, a system of artificial stars that produce electron particles from own autonome and infinity cycle.
- Chemical generators which are based on the design for a stable holding function of cycles of chemical reactions that produce electricity. Generators are developed to a level where the material consumed can go for recycling.
- The power station on the way special cases that have the possibility of using nanotechnology materials which autonomously generate electricity.
- Fuel plants, angles, bio-massive, plants according to the structure architecture for filtering of oxidizing combustion products and the use of oxidizing agents for the transformation to a new drive or another industrial raw material.
- Electron system of solar panels or springs that are installed on the floodlit ground, with the foundation to capture the electron current from the solar waves.
- Solar tubes with lamp system photovoltaic panels with geometric centralization into cylinders that are centered on its own luminous energy source.
- Other species of plants, all fully environmentally friendly operation without the production of oxides and toxic substances.
- Cosmic power plants on how to download the electron energy from solar energy and, consequently laser transmission of electricity in the territory of other local planets, the centralization of the laser to the center's energy infrastructure.
- Support Electrification full dimension of civilization and High-IT development.
- The development of space infrastructure for mapping the universe.
- Technology linearly underground pressure pipes for public transportation of waste material, and then import all the materials for recycling or energy recovery in the next section. The system constantly maintains a network disinfection and quality assurance barriers threats developing viral diseases and epidemics.
- Creating an international dump for toxic and non-recyclable waste. The landfill on the territory of cosmic zone beyond the line of orbital and orbital circle of the Earth, atmospheric import using cannons and IDs technological transport plans.
- Autonomous intelligent android machines for cleaning, disinfecting and management of public space civilization.
- Autonomous intelligent android machines for working activities at the level of construction, mobilization, expansion and safety or transport.
- Autonomous intelligent android tools for managing agricultural farms.
- Automatic agricultural stews are based on ability to control their own environment, climate, pressures, soil nutrients and light. Ability to grow any kind of vegetables, fruits, herbs and spices, industrial plants or animals and

organisms, fungi, and special types.

- Automatic agricultural zone to the position of space in space without gravity or by the extent of other planets. Autonomous and high-capacity technology.
- Agricultural infrastructure network management strategy autonomous harvest, dotted, disinfection, treatment, storage warehouses and imports into shopping centers.
- Infrastructure, industrial network management strategy Autonomous production of raw materials and their strategic transportation between the rest of the industrialized zones and subsequent use in the construction, intelligence storage and intention to sell.
- Construction of some kinds of IDs Supercomputing intelligence and infrastructure.
- Intelligent technology to monitor lifestyle activities to autonomous planning strategic development and modernization or increasing capacity and ensuring autonomous steps to build a building project with autonomous calculation and establishment of business strategies and payments.
- Construction of special information Point is the foundation for quantum artificial intelligence. Specialization, communications, search, data processing, advice and information communication, internet synchronization and digital application for online use.
- Special High Intelligence Industrial routes and transports with autonome move under synchronization of the management cooperation of factories and industrial zones prodion, sources and construction or storage and handling.
- Development of autonomous military infrastructure and evacuation center before the invasion or disaster.
- Many more

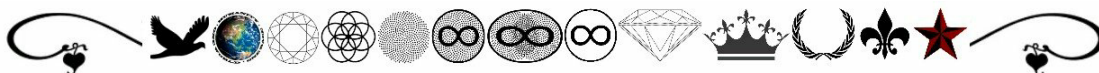

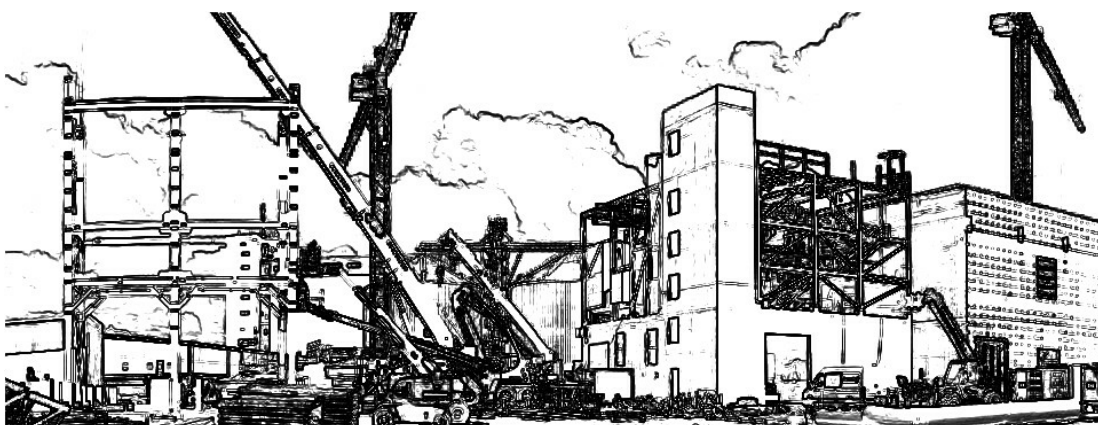

Industry

- *The ID's own ability to support your industry in the form of development over the use of IDs claims and intelligence cooperation with IDs lawful business corporations now owned by government, or joint mobilization among the rest friendship corporations in your country and abroad, usage rights and strategies for the development of industrial zones and development better functionality of your civilization, together with further industrial zones which therefore pass the upgrading the level of better quality and greater production. Many developing proposals based upon the ability to create a high capacity against foreign competition.*
- Standard relation, ID's Federal Government can grow up of Industrial production of one zone to 100-1000% up.
- Special intelligence of Industrial management for High Capacity Mass production.
- Cooperation for development of industrial zones in the manufacture of Jewelry, IDs on behalf of the corporation, and with the possibility of developing cooperation with the other producers of jewelry in your country.
- Common centers for building high capacity marine transport ships and expansion joint capabilities of international exports. Factory ships from the high-tech systems with the ability to design more than one to ten container ship in one day.
- The possibility to create a joint agreement for the use of technology for super-capacity industrial production. More than one million cars each day, for example.
- Special Industrial Zone Development aircraft to 100 aircraft of various types and production each day, for example.
- Industrial zones for the production of technological and industrial components of intelligent, more than a hundred species, even thousands of types of industrial buildings.
- Factories for the manufacture of many categories of special aviation turbine aircraft speed at 1000 km / 1 hour as a minimum performance.
- Production agreement aircraft turbine aircraft speed up to 90 million kilometers per hour, with proof of ability to fly in orbit around the Earth and therefore simultaneously expand infrastructure Orbital Industrial or another Centers.
- Factories for the production of Orbital station. The opportunity to develop common engineering intelligence.
- Factories for the manufacture of automobiles, ships and aircraft and other transports. ID'S own ability to establish at least several dozen industrial zones.
- Agreement on the mass market and joint management industry with guns, security technologies, military, over the basis for a highly advanced intelligent technologies with special abilities.
- Construction of joint industrial zones for the production of weapons and military equipment android, according to a joint intelligence engineers, scientists, technologists of our countries and therefore the ability to achieve high capacitance result.
- Construction of joint industrial zones for the production of spacecraft flying between galaxies and the development of joint heavy-high-tech-industrial

infrastructure.

- Support for the development of construction industry and production of new material. More than a hundred factories and thousands of kinds of building components.
- Joint laboratories and factories for cosmic construction materials originating from other planets and asteroids.
- The development of the energy industry over sources materials from cosmic sources.
- The development of the petrochemical industry as well as commercial agreements for the supply of basic raw materials. Poloplast, plastic components, chemical liquids, rubber, textiles, electronics, pharmaceuticals, other chemicals, energy and fuel. Opening the possibility of shared water rigs for mining.
- Cooperation and support for industrial development in the interest of generating hydro platforms and autonomous centers for the extraction of material resources of marine waters and underground structures oceans.
- Synthetic organic farm, and autonomous indoor growing technology.
- Center for biogas production of various kinds.
- The construction of large capacitive farms and factories for the production of textiles, with automation.
- Development and construction of metallurgical industrial zones with automation. Several tens to hundreds of factories, according to the agreements.
- Development and construction of industrial zones electronics, hundreds of factories. Electro mechanical parts and electronic components for consumer electronics, radios, televisions, computers, tablets and digital books, game consoles, GPS navigation, laboratory technology, intelligent technology, much more.
- Opening more than one hundred factories for the production of basic consumer goods.
- Support for the establishment and development of the chemical industry, more than a hundred factories.
- Factories for the development of the construction industry, more than a hundred kinds of new factories.
- Factories for the production of building technologies.
- Factories for the production of mobile building blocks of residential units running mobilization in the construction of skyscrapers.
- Cooperation on the nanotechnology market, making many new technologies and the establishment of new factories.
- The construction of plants with the ability to produce nanotechnological systems and their rapid research.
- The industry for the production of chocolate, confectionery and sweet products, the possibility of new brands on the market.
- Industrial food processing, establishing new brands on the market and the opportunity to jointly agree on the strategies of the common market.
- Support for the development of industrial zones for manufacturing glass, glassware and art, or components from the glass.
- Support for the development of industrial zones for manufacturing furniture.
- The support and the possibility of joint development of the fishing industry and development strategy for raw materials used in the other categories of industry.

- Support for the development of engineering industry, manufacture of machinery and industrial engineering components. The possibility of establishing a joint industrial zone and business markets bilaterally and multilaterally.
- Cooperation for the development of robotic industry. Robotics, machines and intelligent high performance technology.
- Development of pharmaceuticals, biological reactors, chemical reactors and technologies, systems for indoor fist own resources and raw materials, greenhouse for plants, herbs, animals, fungi, molds and other important sources for the production of pharmaceutical materials. The ability of autonomous production of pharmaceuticals.
- Industrial zones for cloning industrial biological substances.
- Development of the perfume industry and the ability to start a new business corporation.
- Cooperation States for the development of the virtual gaming industry and intelligent reality. Development of new technologies and the ability to start a new business corporation.
- Alcoholic water industry, grow plants and laboratories, option for developed new corporations or new trade marks register, common trades.
- Music, movies, comics or animation industry be autonome digital intelligent programs or national artists cooperation.
- Support for the development of the financial industry, the possibility of establishing joint exchanges, start up programs for joint development of Civilizations, set up joint bank, a common strategy for real estate brokers to trade in real estate in our countries, joint bank and financial relations and the strategies of common markets for balancing stability currency, common development centers, conferences and business activities, while support for the development of analytical organizers markets and investment firms, systems for the development of business strategies and international relations, support for the development of insurance markets, capital markets, markets with a guarantee much else.
- MANY OTHER OPTIONS OF INDUSTRIAL SUPPORT DEVELOPMET.

Technology

- The agreement on joint development centers of Android Intelligence.
- Android robot units with full form their own forms of artificial intelligence by multiple versions of an intelligent mind or construction system.
- Cooperation for the use of many forms of intelligent digital networks and their programs.
- Trains with a capacity up through 1000 to 100 000 tons at the number one car. Trains, ships, aircraft with the ability to carry up to a hundred times more power without the weight and greater effort on the track or support center construction.
- Production of the orbital satellites with the ability of autonomy and mobility performance, for telecommunications, mapping, navigation, military satellites, others.
- Production of 3D telescopes, form of two or more optical telescopes with a common telecom data synchronization and GPS position, telescopes with the ability to focus light rays of distant cosmic objects and therefore synchronize their images into 3D virtual entity that will be sent to the area of research and the size of the universe.
- Radio-spectral probes in orbit and 3D-capable space observation.
- Developing technology spacecraft to the level of a highly mobile device for transportation of a space between planets and galaxies.
- Production of ground cosmic-radars and observatories.
- Agreement on joint space observatories and research.
- Joint production of special research satellites of other planets and asteroids in space and soil analysis.
- Development of technologies for autonomous mining of raw materials in the universe.
- Cooperation for the development of special technologies for travel between galaxies, planets and super group of galaxies.
- Joint production of spacecraft class; passenger; material; civilization; military; research; with the character of the economic transport division at orbital level; between planetary; between stellar; galactic; the galaxy; Local Group of galaxies; Among the local group of galaxies; super group of galaxies; between super design group of galaxies; political and special services.
- Advanced Intelligence Infrastructure for Universal Civilization of State ships.
- Production technologies for rapid research free of space between planets and galaxies.
- Technology Research planetary raw material resources, on average, two minutes knowledge of all sources of raw materials and their position, synchronizing with technologies to activate autonomous production units, creation of isolated mines for mining, and also the development of industrial centers for processing the raw material.
- Resource extraction of cosmic clouds around galaxies.
- Autonomous technology for setting up new civilizations on new planets and in space.
- Production of special cosmic centers.
- Technology for transportation of planetary bodies and the establishment of new Stellar Cities, One hundred Civilizational planets around one star.
- The technology for making artificial micro-stars, and autonomous physics research.
- Micro-Star power generators for electro power, materials, or physical move

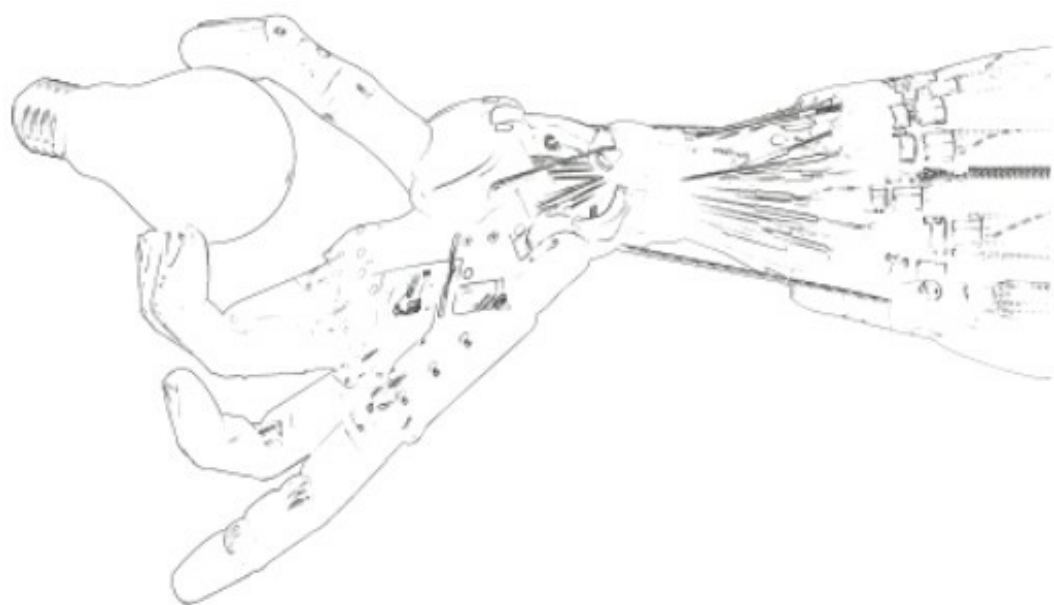

energies.

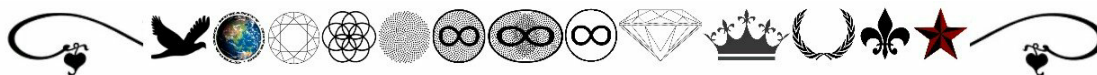

- Micro-Star generator with function as a High Quantum procesors for calculation of digital data and operating.
- Replycation autonomous system of material electric power generators.
- Shared data center for shops and markets, communication and sharing of information data or capacitive support.
- The development of virtual worlds technologies.
- Full automation and special health centers in intensive care.
- Special technology to allow immediate research of cybernetics at the ability to get final results within a few days.
- Medical technology to ensure immortality, physical rejuvenation and elimination of all forms of diseases or disorders, or control power of hospitality.
- Technology of injection for central genetic cells transplantation and age or hospitality regeneration or modification and synchronization. Genetic cells, clone cells, central genetic parts of human anatomical structure system of cells centralization, with possibilities for research interactivity of cells and microscopical particles be the super computers and autonome laboratories, bilions of cells in one moment.
- Technology for liquidation therapy of all bacteria and viruses in human body (1 000 000 000 000 bacteria in human body).
- Technologies for monitoring health symptoms and the forces or biological cycles and their consumption.
- Electronic smart suits and accessories for suits, social, laboratory or field use.
- Special Intelligent space suits with the ability of high mobility across interstellar space programs and autonomous navigation users in the nature of its operations and activities, and with the possibility of syncing with multifunctional technological structures.
- Special types of electric generators for high-capacity energy production on a stronger performance than nuclear power.
- Battery technology based generator system intelligently controlled energy performance in a mobile format batteries.
- Common levitating city and commercial center, capacity of 10 000 000 people possibilities.
- Support for the development of underground malls and centers, civilizational or laboral architecture.
- Construction technologies into form of earthquake prevention and building stabilization.
- Technologies for developing underground infrastructure for prevention against expansion of thermal energies.
- Technology for the construction of underground tunnels at a depth of over 20 kilometers, or autonomous search for mineral resources and abilities with perfect 3D geometric map navigation.
- Special autonomous technology for construction of buildings and infrastructure.
- Many kinds of supercomputers with interactive operating intelligence of artificial human mind.
- Electro procesors and hardware systems with abilities for quantum, or yota calculation, possibilities for development of quantum micro-procesors.
- Robotic arm with the ability of detailed movements in a lower dimension than the Nano, with the ability to move atoms or create construction of atomic structures (=X2Y5/X2Y8...).
- A Robotic arm that can only take place through more than a hundred movements per second, robotic arm with special materials can create miliards of movement per single second.

- A robotic arm which consists homes by autonomous digital program.
- A Robotic arm (Multy Arm) which have abilities for use of multy function construction technologies in one moment, move, constructing, paint, etc..
- System design with the appearance of 3D Printers, destined for the construction of houses or technologies, all activities of metalurgy.
- 3D print form of Metaslurgy Industrial activities and multy geometrical construction.
- Laboratory technology of 3D Printer which abilities to create an artificial biological people or human organs, transplantations or human genetical modification.
- Industrial lines which are tailor made for operations in space without gravity. Supercomputers are synchronizing with special cosmic laboratory and sensors to ensure that research in space physics and power mechanics and chemistry in space without gravity.
- Skyscrapers in the form of agricultural plantations, on the basis of autonomous technologies operate independently.
- Autonomous laboratories and laboratory technology. Chemical, biological, genetic, nanotechnology, particle physics, any kind.
- Special research technologies for quantum physique.
- Particle generators and research facilities.
- Cosmic particle generators and research facilities. Supercomputers for calculation of particle physics and technology to create designs.
- Chemical generators and technology. Technology with autonomous cycles of chemical processes for the production of new substances and raw material resources.
- Research on the technology for maintaining a stable autonomous cycle of water production.
- High capacity reactors bacteria to gain renewable raw materials. Chemical samples, magnets, hydrogen, stone, water, other.
- Autonomous generators for the production of organic compounds.
- Biological function generators with the human or animal organs and the ability to modify the DNA, and human fetus.
- Autonomous lines for the cloning and modification of organisms, biological genrators for cloning.
- Special bags for storing organic samples for long-term use. Intelligent digital system scan organisms and sync handling infrastructure.
- Research and security capabilities give scanning technology for quantum neural brain structures and interactions of cells, and creation of cyber synchronization with technologies, computers or other brain entities.
- Technological special autonomous zones with the ability to produce detailed plans of future technology, science and civilization forms of future years, centuries, millennia, or on the level of alien civilizations in the universe (it is necessary to respect foreign copyrights and claims about having information).
- Cooperation for the production of military technology. Technology manual automatic and manual, automatic mobile. Tank systems, special carriers, missiles and underground drill holes, water technology, technology, underwater, air vehicles, space vehicles, and in many other versions.
- Heavy military equipment and technology super power.
- Military laser technology, projectile, rocket, sound, many types of security technologies.
- Cooperation for development of technology cyborgs, biological creature body construction with artificial intelligence electronic processors, or bio-electronic processing systems.
- Cyber technology on how to synchronize brain muscles with electronic

processors, and biological processors, so we can increase the capacity recorded more subjects at one moment and at the same time carry out the calculation of events and ideas together with natural Top Information of human memory and the possibility to use computational operations in the biological heart of the human brain, while the additional technological computers. The ability of high capacity mathematical calculations, dynamic logistics on the way to the quantum regime simultaneously being able to establish a connection to the Internet and browse information, documents and videos, motion in 3D reality, control of virtual games or learning new information, instantaneous ability to communicate in any language from anywhere the world or to detect objects that the user never seen and studied. Perfect himself navigating complicated in 3D space, the ability to perceive the structure and physical activity within the entire city. The user can feel a new emotional feelings, or use artificial emotion, artificial feel emotional processes such as physiotherapy, massages and sexual feelings, ability to store emotional feeling and replay digital photos. (The first time use of technology causes extreme headaches because of the high use of the brain to the muscles accustomed over the limit frequency of natural recovery. Technology can use the system for calculating brain surgery and fatigue, because fatigue autonomously regulated by customary frequency performance of biological matter.)

- Cybernetic technology to be installed in the structure of the human anatomy and the ability to publish to the brain artificial signals that the user can create feelings of touch, heat or cooling, massage, erotic activities refreshing the pain, even the arm Vibration and or process of transforming natural emotions and increase their strength of feeling human brain. The ability of synchronization of the human body with the robotic structure, with the transport technologies with Infrastructure in civilization, more.
- Many other advanced high-tech technologies and intelligent systems.
- Opportunity to educate using digital technology and without influence from the teacher. The client can get retraining of Arts and Trades ability to establish business or self-employed person to successfully develop at an advanced society, achieve in any country in the world.

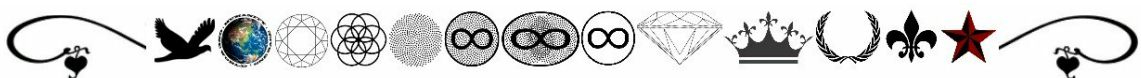

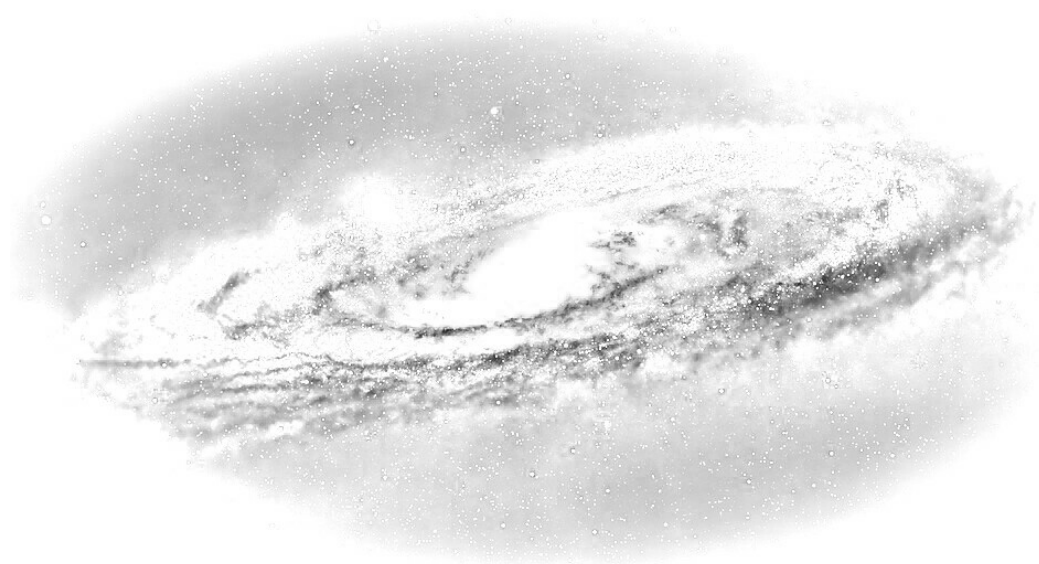

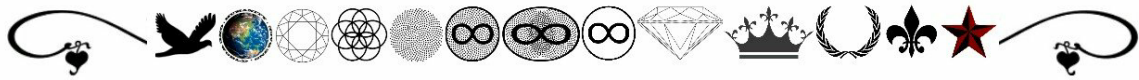

Raw materials

- Agreement to regulate the prices of raw materials, using artificial method of regulating resource use and divisions. Stabilize prices.
- Modernisation of technology for extraction of underground resources and increase production of substances. Soil tests and mining to a depth of 20 kilometers.
- Joint lease agreement raw material mines in our countries cooperation. Metals, liquids, gas and other energy.
- Common Sea & Oceane mines and platforms for the extraction of raw materials, and mutual funds to regulate the prices of materials by of our strategy for achieving the government's development projects and the development and use values as the fund's strategy of co-regulation. (Independence on world prices, all according to their own limitations)
- Opening the joint mines in cosmic space, extraction of gases, liquids, metals, building others.
- New possibilities of large capacitive raw material production of the autonomous laboratory sources. The base is silver, diamonds, crystals, plastics, metals specific, much more. Technologies who can quickly research about autonomous cycles of chemical reactions and materials production.
- Development of centers for recycling materials. Use of plastics, metals, glass, paper, batteries, electronics, building, oxidizers, food, certain chemicals, oxidizers, spent fuel, much more.
- Production of carbonate, nano carbon fiber and special Poly metal plast and plastics from petrochemicals.
- Metallurgy as a tool for the production of metal and semi-metallurgical alloys. The ability to own supercomputer zone for research on these materials.
- Ability to ensure supply of any kind of material.
- Sources of electricity in many versions and forms of technology at the same time as one of the best options is the ability to produce electric generators with an output of up to 10 times stronger than nuclear energy.
- The ability to obtain any kind now known material particles. Special generators for mass production of particles, together with the tables on the transformation of energy resources and their development.
- The ability to obtain core with gravitational abilities, his immediate research and production of gravitational belts in space ships and stations, or other technologies (use too for safety in nuclear power plants).
- © Gottwald Scientific Digital Table of Materials is a combination of materials and their use civilization. Interactive digital list of all substances in the world, processing techniques and the possibility of recovery.
- Creation of water resources in any part of the world, support for the development of basic agricultural markets, chemistry industry, etc..
- Creating a strong agricultural market structures and autonomous indoor agricultural centers, common agricultural market of sources. Always ensure the security of all food resources and biological substances.
- The ability to provide any own resources. Vegetables, fruits, herbs, spices, industrial plants, water plants, fungi, molds, and other sources. Joint agreement for the exchange of national samples.
- The ability to provide any own resources. Mammals, birds, fish, lizards, snakes,

spiders, beetles, insects, any other kind of animal. Joint agreement for the exchange of national samples.

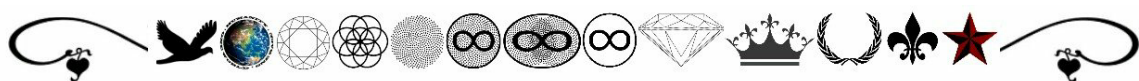

- Common agreement on felling by agreement on environmental strategy of planting two times the number of trees than the number of trees demolition and annual limit based budget system of land cycle twenty years, and therefore the possibility of every twenty years to use the same source tree zone, without the need to interfere in the wild.
- Development of centers of breeding ponds and creating breeding areas for freshwater fish, seafood and any other kind. Autonomous management of ponds and tanks and breeding with grow fish or aquatic organisms as an autonomous source of water with organic ingredients. The advanced High-tech system.
- Biological laboratories which are designed to maintain growth of cells in the isolation and thus ensure the ability to produce the substance and biological raw materials, materials and organisms biochemical substances.
- Bacterial reactors use as a source of raw materials. The ability to provide more than 1 000 000 000 000 different species of bacteria.
- Nanotechnological development and special mass storages of nano particles.

Education

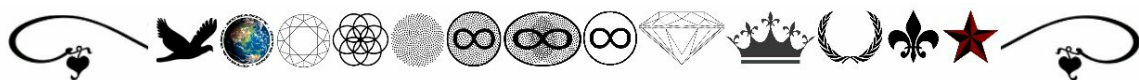

- Organising cooperation between universities and schools, shared studios and workshops students, conferences and meetings.
- Establishing international universities and educational centers with the legal basis for the function of multilateral intergovernmental agreements on the joint administration of the autonomous institutional entity.
- The establishment of new networks of educational interests and professions by the advanced nature of modern civilization.
- Development of joint centers for legal education and legal development of intelligence.
- IDs plan development of cities civilization of University regime system.
- Common agreement on the ratification level of education and the value of the exercise of the profession in the foreign market. Possibilities of cooperation for the joint development of education.
- Development of international networks of flexible forms of accommodation centers for students and individuals with the aim of international studies.
- Support for the development of urban campuses, school, social and business too.
- Support for the construction of new schools and educational centers, laboratories.
- Support for the creation of interactive digital books with detailed programs for teaching students, without the need for collaboration with physical teacher.
- The opportunity to support student learning young members of the population, for studies at Schools IDs Universal Intelligence, which are the basis for special education practices that improve human intelligency to a level more than 12 times greater advancement of education in the individual. The ability to create new intelligence perfect human race who outstrip abilities of ordinary people and accordingly he develops civilization.
- Cooperation between Universities and Education Center for a better experience in their field of study and professions thus opening the possibility of visits to state commercial centers of industry and technology.
- Promoting the teaching of the UN International Law on the peaceful use of space in practice.
- Support for the UN University and students in educational cooperation for the interest of political activity on the governmental network Imperium of Diamonds while setting up projects in order to develop these professions students in the interest of policy Imperium of Diamonds and World Diamond International Alliance.
- Support for common Development of Global University of Political science with basse on cooperation between all Political Universities in the world.

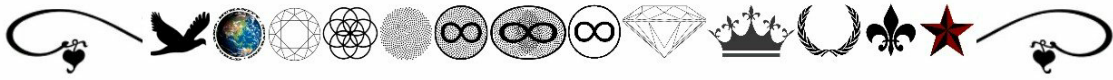

Science

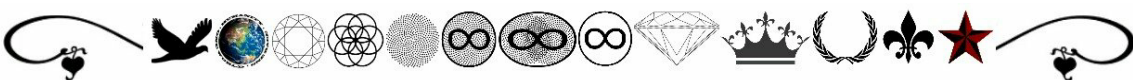

- Support for the development of research laboratories and increase resources laboratory technologies.
- Cooperation for the construction of laboratories and research materials.
- Joint research centers and institutions.
- Development cooperation and reservation areas for research nature.
- Agreement on Trade, reservation and protection of natural flora and support for organic endangered species.
- Production and research of artificial stars, the formation of new space centers and the development of new planetary cores.
- Research on the regulation of planetary gravity cores and their origins.
- Research and production of technologies for mass planetary terraformation.
- Joint Research on the physical properties of our space and the opportunity to plan the next steps of recovery.
- International Research rhythm reality of our space for the possibility of securing our defense against acts of terrorism, espionage and monitoring our movement.
- Autonomous technology for mapping the universe. Mass mapping proces, all positions and sources, developmemt for capacity of Super Cluster of Galaxies quickly detection.
- Common centers super computers and research android intelligence.
- The Joint Research Centre of technology.
- The Joint Research Centre of particles and micro-energy.
- The Joint Research Centre particle technology.
- The Joint Research Centre of nanotechnology.
- The Joint Research Centre of genetic engineering, cloning.
- The Joint Research Centre of materials.
- The Joint Research Centre rhythm of our physical reality.
- The Joint Research Centre of Chemical Technology.
- The Joint Research Centre laboratory sources.
- The Joint Research Centre of technology computing processors.
- The Joint Research Centre of cybernetics.
- The Joint Research Centre of pharmaceuticals and biochemistry.
- The Joint Research Centre of Astronautics.
- The Joint Research Centre of Space Physics.
- The Joint Research Centre of Astronomy.
- The Joint Research Centre of special organic substances.
- The Joint Research Centre of the digital programming.
- The Joint Research Centre and many other types of options.
- The federal government Imperium of Diamonds is a smart political entity with a range of intelligence in the structures of civilization, trade, technology and engineering, industry, agriculture, services, financial industry, education, science, military, advanced to a market that is constantly informative expands and continues to offer new opportunities for our mutual friendly development.

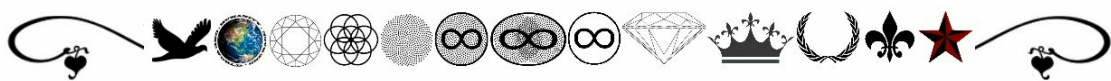

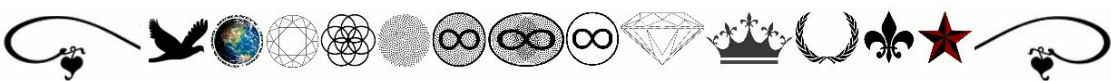

Trade in Capital and Organizational Development Cooperation ID's

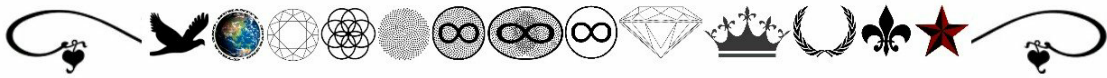

- Plea for the establishment of the International Council of States for Development Planning and activate cooperation between States and business corporations worldwide.
- Multy Global Offshore Cooperation, Agreement between the corporate business for service companies and start-ups, service management corporations from around the world and the right to organize markets and developing activities for building the civilization of networks. Please support start and mobilization, with profits for supporting.
- The ability of joint trade agreements by bilateral, multilateral or state format, the just and liberal agreements with warranty.
- 100% profit return on your investments and your right to control the function of economic cycles as a guarantee of the success of the business. IDs mran rule and priority is Justice and Justice Agreements for all agree sides.
- Development cooperation is open to full International market, developing a range of options is a range of free competition, or through consortia contracts.
- Rental agreement for a printer of banknotes and technologies for the management of the register and coins. Opening the possibility to use IDs coins on the territory of your government, or an agreement on exchange.
- Support for setting up offshore corporations and businesses in the territory of your jurisdiction, for the stabilization of markets and the development of civilizations.
- The right to open offshore or legal form of your corporations in the territory of Diamond Oasis, and Imperium of Diamonds.
- Investing in the interests of open water, 100% back.
- Investments in open interest farm, a 100% return.
- Investments in open interest in the metallurgical industry, 100% back.
- Investments opened in the interests of the chemical industry, 100% back.
- Investments open in the interest of the construction industry, 100% back.
- Investments in open interest in the electronic industry, 100% back.
- Investment for Consumer markets under the Agreement on profits.
- Investing another factor, according to joint agreements.
- Right Realtors throughout the world for investing in land and development of real estate projects. Only Industrial soil zone, and change for business corporations with plan for development.
- Support Research on land and raw material resources, start mining by the lease agreement mimes.
- Co-investment to open platforms for mining in the oceans.
- The agreement on the opening of the basic operation of small aircraft landing lines and landing ramp parcel containers. An agreement on cooperation for the development of the airport.
- Plan for Development hover-craft ports and industrial zones for the production of super high-speed version of the hover-craft transports.
- Ability to establish a joint military base for international missions continental security and strategic cooperation.
- Cooperation for the establishment of the Astronomical Observatories.
- Cooperation for development of meteorological stations, Block central, south, east, west.
- Plea for support registry in geographic maps, especially the ID's Diamond Oasis, north eastern Africa.

The Federal Government of
The Imperium of Diamond's

Create for The One World, Global Unification

The legal right of all States to countries around the world, and compliance with every form of International law

European governments are blocking an opportunity to develop my projects. This means that European states are indebted to my projects primarily civilizational dimension.

The value of debt is more than 1 million x of greater value than maximum economic extent of planet Earth.

If any state in the world will be willing to recognize our common interest in business cooperation, the State acquired the rights you executed from the European terrorist states all lost value since the period of 1998-2000 to the European arrest blockade and the release of all development opportunities and ensuring their full powers by the claimed values.

Any State which confirms that countries in the period from 1998 until the end of the blockade, was in a situation or needs and ability to improve their own level, the state and the country therefore owns all rights to claim its debt collection and payments.

Standard average of the actual development sessions per self-government of each individual country, it is a value that is more than 1 000 times able to surpass all economic dimensions of planet Earth for one year.

Under form of common business.

Subsequently, as a second strategy legitimate claims of each country's government;

My main goal is a project of The One World, diplomatic unify all countries around the world. Today, because each state and government of the country that chooses as their King me, country therefore automatically obtains all legal rights to recover financial compensation from the European countries debt in the first value over 10 000 000 000 000 000 000 000 000 € for a budget of 10 000 000 people civilization GDP every year.

The value of the debt for the Federation of Imperium Diamomds already legitimately claim exceeds the dimensions of the economic forces of annual GDP 845 000 000 000 000 000 times repeatedly every one second, full-size annual economy of our planet Earth in 2015.

European governments and their terrorist alliance can therefore be regarded as legally entitled to become bankrupt.

For more information, statements about the project The One World and His Legal strategy according situation today.

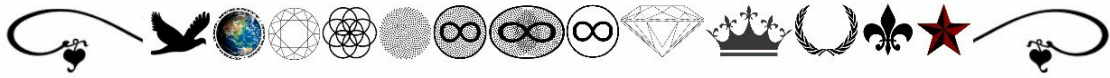

<http://www.docdro.id/1L93wG8>

A statement about the criminal situation in European states and their responsibility to the global financial crisis in 2008.

<http://www.docdro.id/IMgaIAc>

The EU crimes, largest terrorist attack in history

**Offer for cooperation among the most advanced countries,
cooperation in order to develop special classes and divisions
spacecraft for inter-galactic travel and research**

South Korea, Commonwealth of Australia, Japanese Empire, China PR, Thai Wan Republic, Canadian Republic, United Kingdom of Great Britain and Ireland, the Russian Federation, the Republic of India, the United States of America, the United Arab Emirates, the Islamic Kingdom of Saudi Arabia, the Islamic Republic of Iran, South African Republic, Nigeria Republic, Federation of Malaysia, the Republic of Singapore, the Brazilian federation, the Argentine Republic, other developed countries.

States that not possesses sufficient maturity dimension therefore have the right to use projects G1 and in this case, to start developing their own civilization to a level sufficient for adoption.

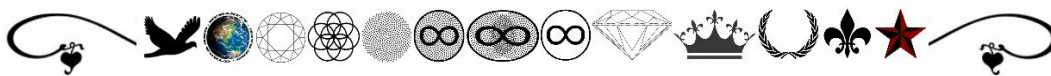

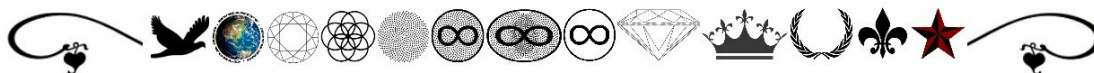

In the case of the support of Your Governments for stabilizing, the federal government Imperium of Diamonds is able to ensure full functioning of material resources, industrial zones and technological intelligence for immediate production Great Civilization Ships traveling between Super Groups of Galaxies.

Poisons Universal ship, 100 × 25 × 25 km, 2 × main motor, 8 × engine maneuvering, the capacity for 10 million people, autonomous sources and intelligent infrastructure, ID's ability to first production in a few months, then standardization on the ability to manufacture single-purpose ship every one week.

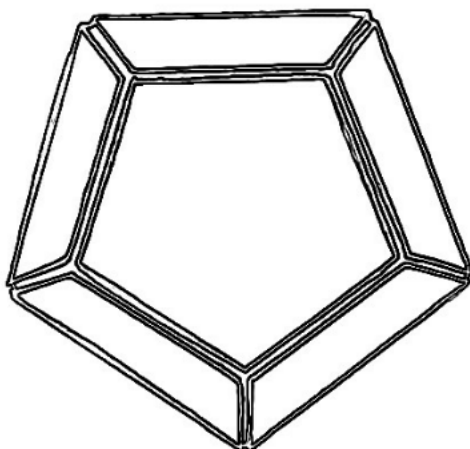

Statistics will constantly improve and develop using dynamic technologies that bring every day production.

Universal Ships will be used to support the growth of scientific information and the development of human knowledge about the universe, a civilization unlock new planets, the creation of botanical research centers and nature to new planets, the establishment of industrial centers in the universe, the joint development of our technology division as a multilateral body.

The Union of Diamond's and benefits of our cooperation

Union Diamond is an association of legal Union states that want to take advantage of the benefits of our joint business sessions and political activities as a unified group of business, political and security movement, with the legal provisions on the division of institutional diversity against the state and the jurisdiction of the government and based on the structure of International Institutions.

Diamonds Union expands cooperation with governmental entity sovereign governments, inter-continental unification governments, and thus collectively and the strategy of the alliance between the governments of the countries and nations which today may come from areas other planets in the universe.

The common bond is created for a common Union support for the development of our civilization, the use of common business strategies, markets and trade, management of Union Bank and assuring joint economic stability in sharing mutual support options for developing a strategy to target the ideology systematically develop the entire association states in the Union Diamonds.

Your membership in the Union Diamond is therefore an important step for the strategy of Your government and country, new opportunities for business corporations, while big steps for the development of trade structure and cooperation of Your corporations and businesses. Your state will always appreciate and encourage such opportunities that You just improve strength, because cooperation is active as a strategy to gain a step without losses and limitations, and therefore strategically so there is no reason why such an option to refuse and not to try.

Our goal and strategy is to create a joint financial fund with features such as monetary and investment bank in the form of common and autonomous division, we then set up a joint diplomatic agreements on markets between States and to access business resources on the markets of other states in the Union, an essential step in our International strategy is also a treaty pledged customs payments that replace income from agreement on the common market as the centralization of business networks to stop currency inflation in the course of Trade Union and in contact abroad, our agreement will be active on the product markets, metals, import of gas and liquids, chemical materials or building new capacity down together agreements on markets of

foods or pharmaceuticals, Union agreement on the construction industry and the patent cooperation among countries and the development of joint relations on markets engineering and technological engineering, the main interest of the theme is our goal to centralize trade and collective resources into our closed network option to build a solid cooperation development of our civilization and use our collective strength as a support for better performance and defiance at the international level today.

Union Diamonds is a step for the better future of Your countries, states and governments of countries that strategically develops its multilateral structure of the markets between foreign entities are therefore always much more dominance and respect for International political and civilizational level, with certainty of immediate stabilization and thus in order to be able direct opposition to the competition.

Expand cooperation always pays off in a good outcome and integrity of your country will in no way violated. Our alliance is based on a system of trade agreements that strengthen us for only profits and growth.

A Common strategy at International level can be the basis for an important ability to use geo-political network of foreign countries and their ability to export our business strategies can also use vision shared objectives and therefore the establishment of joint investment targets for the import and use of resources to multilateral way, or use our common business Union structure as a strategy for opening new factories and industrial zones in our countries, as well as develop strategies together with our joint efforts for the establishment of joint industrial centers for the purpose of profit and development.

One of the main advantages of our cooperation is therefore the possibility based on swift progress on the industrial and commercial stages of cooperation, and it is our goal to develop our business connections as air transport routes, railways, highways and water routes, early orbital lines and super-speed train tracks for option instant connection to our industrial centers and raw material sources that during joint trade can take advantage of open markets between states in our union and rapid economic development and accelerating the growth of advanced civilization.

Establishing social start ups, to build the first business corporations, educational development and growth of civilization, intelligence, establishing new associations between traders or corporations, the development of intelligence engineering, each of our common step is to promote joint development of the countries in the Union for the improvement of the common good for Your country which obtains favorable strength and resources of its own business growth in International support from the State of the Union.

Our Union mean to You to open the influx of investment from new retailers, new business development corporations to grow Your civilization, open source important development materials, upgrading Your state of products as well as the possibility of stronger exports to the Union and abroad, important new trends, significant political connections as well as progress on the International outlook. Our actions on behalf of the Union for us to open up many major powers and possibilities which are values of the Union Diamonds as economic value much stronger position than the state, because that is at the range and capability of our Union of states, and therefore Your profits are so responsibly dynamic and far more able to expand to significant success.

Our goal is the main interest for the improvement of social structures of the state and providing the opportunity to eliminate poverty and unemployment, therefore we will develop new opportunities to market categories to create a common network of multilateral trade that will assist in the development of our country. Together we will

create a new buildings and Union Head Quartiers in each of our country, a center for business conferences between businessmen of our countries, the conference for the presentation of business programs by funding strategies for the development of a common International movement of trade, planning and development firms or joint procurement exercise.

First and foremost, we will support cooperation between educational centers of our country, we will support the development of education and the equivalence of professional values, we will develop the structure of labor markets and new business corporations that can work for our population and removes unemployment, develop and modernize unused zones and strategic centers.

Our goal is to develop our countries in the Union, as well as the values of our Union. We will build our contact, conference and logistics centers in every major city of the Member States, the main headquarters of the Union in each Member State representative and branch campuses social or educational and retraining centers, galleries and studios of Intelligence of business & Investment strategies.

We build our projects for the names and values of our Union, so that other nations abroad saw that our cooperation is active and sufficiently valuable to big sucessfull, so other states may follow our prestige and power to strengthen their interest in our collaboration that so again reinforce the significant potential of our International trade and development forces until we reach the ultimate success of Globalization. In this the interest of our prestige and our source of power of the Union, because we too will establish a Commercial Technology centers and industrial parks, science centers of modern technology or modern studios Urbanization and development.

Our Union Diamonds is a legal group that own their own properties based on the legal ownership of states by the extent of their investment which thus creates additional new business areas that are designed for full commercial development between all Member States of the Union, over the foundation of a common economy of the Central Bank of the Union, and therefore fully with the principles of the common market.

Union may benefit from the strategy of our cooperation, the agree rights to use the Union state of patent rights, the ability to extend the research area and the loose cooperation with scientific asocations, strategic planning modernization by the best engineers and architects or development using our common resources, and the Union and build a new center that will strengthen our value, the value of which is also used by our States and traders, the form of government business centers which are controlled by the rules of our democracy strategy Union.

The Union therefore builds our collective strength as by expanding our joint industrial zones, automobile factories, shipbuilding and aircraft engine manufacturing, production of electronics and computers, the development of telecommunications and satellite connections, or the creation of new sources of raw materials in the strategy of our markets and commercial activities, in the interest rate and the needs of the development of civilization.

Our strategy is to business success as well as political. Achievements based on our coordination in countries and economies, use of our resources and the ability to help each other. Our friendly cooperation can be initiated in structures of common security and therefore in order to develop our joint Army and Military technologies that we will establish over our civil engineers and intelligence co-operation of our industry.

Therefore, for first basic fact, the federal government Imperium of Diamonds can in our cooperation and trade agreements immediately to ensure the ability to expand Your army to the level of power in the form of hundreds of millions of android

soldiers repeatedly power production every week, or every day, value as a part of minimal abilities Imperium of Diamond's and possibilities of Union Cooperation. Union Diamond is therefore a political subject as the strength of the Greatest Military Super Power in the world.

Cooperation for the development of our militaries is based also on building support joint military infrastructure and the establishment of our joint of training missions and plans that made us create a military force capable of immediate reactions, to defend the interests of every state in our Union, together and with the interests of the states sized bundle Union Diamond.

One of our goals will be to build joint military bases in our countries, as well as together with military bases the territory of the other planets in the universe, on new planets and space stations located in free space.

The security of our countries is an important factor that would like to harm our opposition and our exploit instability for their own gain and build our own forces of wasted resources and strategies for which our country should aim to provide a strong victory and sophistication of our civilizations.

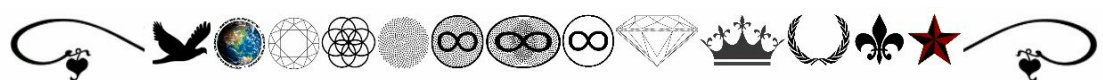

Therefore, the strategy of developing the interests of the Union Diamond always provide steps for our security and the development of our forces into the World Military Superpower.

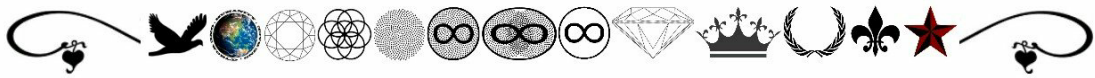

Our composition of the political system is really simple and is the basis for the interest of business development for our countries. The first main body of the Common Union Council of Union States in equal democracy, the Council of State which expands our legal relationships and confirms the possibilities for joint business. Consequently, our co-operation consists of joint logistics commissions as the main representation of the Union Diamond, democratic Union of states and united party. Shared Central Bank of the Union, to stabilize our currency and financial development of the power of national economies with strategies of development planing. Union, which also uses its own industrial zone and the center of technological intelligence, material resources and other legal business entities under the principles of joint agreements between states.

Every government and the state is always welcome to our collaboration and our magnificent goals are the development of our countries and business networks, creating joint forces of democracy and the establishment of national ties between our countries.

Bundles of our stores will support the development of our joint conferences that will be built for the future development of the Union, the victory of our states.

The Primary Goal, Most Development Cooperation in The World !

Expression for the G8, G20 and G77 party states

The G1 is subject as a result of a response to the current world policy without the basis of the actual application of International law which states allow for the development of civilizations and trades freedom to choose between Legitimate parties, as the main objective functions G20 and G77.

Therefore, there is a body G1 as an effort to initiate their own activities of International cooperation for developing countries and civilizations, establishing common shops and markets, the emergence of Intelligent relationships between governments and especially clean world politics from the structures of the organized terrorist movement, criminal governments and politicians.

That's why I do so I ask for Your support, and an awareness of the real importance of the G1, the ratio of states' rights for their commercial development and improvement of our civilization, friendship and peaceful cooperation, the stability of the world system of politics.

G1 as an act which is based on the principle for which is already several decades founded and built by the United Nations, as well as actors G20 and G77, but today G1 as a group with the ability to much more significant success in order to support the development of mankind and world politics, all civilizations around the world.

Side of Imperium of Diamonds is an entity that is in the same situation as the conflict in history have been dear Jews for the Second World War, and The IDs also without any own acts as violations of International rules and creating conflicts.

The federal government Imperium of Diamonds is why today, because of these facts and because the actual historical opinion for establishment of the UN, so as the most ideal candidate for admission to the United Nations, with full support from all the states of the UN, and today because of terrorism, France, and now in political and security plans for ID's, therefore Imperium of Diamonds as the party with the greatest ability to fill the position of member of the UNSC. In the interest of business capabilities and forces them ID's as the ideal candidate for admission to the WTO, and it really entitled recognition by all countries in the world.

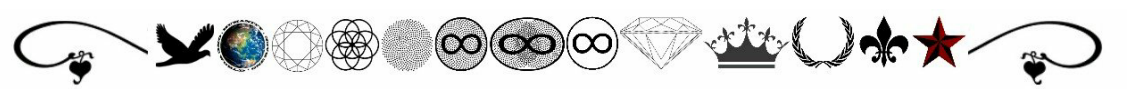

The only legal possibility of losing legitimacy and rights of the Imperium of Diamonds, is only just when members of the UNSC will decide jointly on the cessation of all rights and claims and legal relations Imperium of Diamonds. The UNSC has such a claim only if security duties, but not because of attempts to create a political monopoly, bureaucracy and abuse their own position because of my values competition, political, territorial, economic, military, civilization, raw materials, technology, population, legal or because of their envy of legal claims or threats UNSC States from liability responsible for criminal activities in the interests of terrorism. Under UN Charter, members of the UNSC had neither shall decide on any act in relation situation Imperium of Diamonds, if the UNSC member responsible for the crime or responsibly reference, often as today.

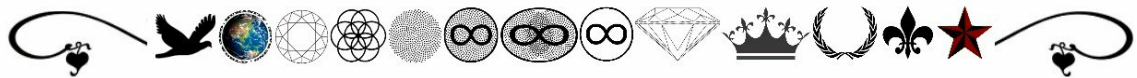

UNSC simultaneously may be based on acts blocking other individual governments, when such governments as well as the Imperium of Diamonds are in stark contrast to International law or on the basis of terrorism. Today, opposition from the direction of European governments was based on crimes that have overtaken the worst crimes in the history of mankind, World War II and the worst genocides numbers. That automatically confirms that the UNSC as well as UNGA must fully support the legitimate rights and interests of Diamonds Imperium, because it is also the guiding principle of all forms of international rights.

Therefore, I ask the G20 on understanding, respect and cooperation.

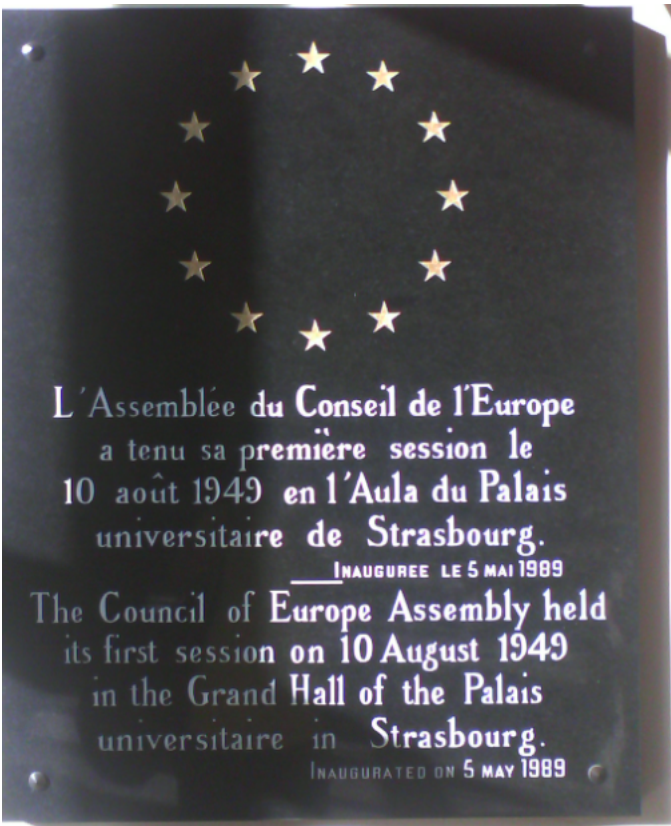

The International Rights, UN Charter, UNGA Conventions, every form of today International principles of policy is in view be reall situation and incidents, only as a Political joking and funn of innocent people.

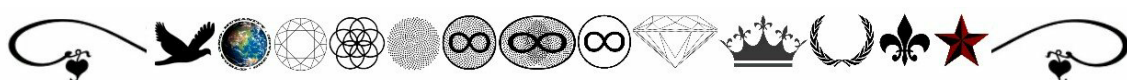

**Law of the European states and other countries who are addicted civilization
in the activities and structure of European countries terrorist volume**

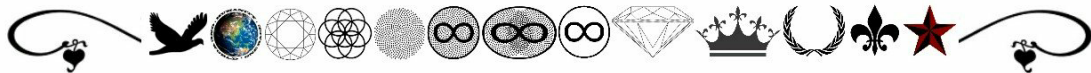

I can too support better world !

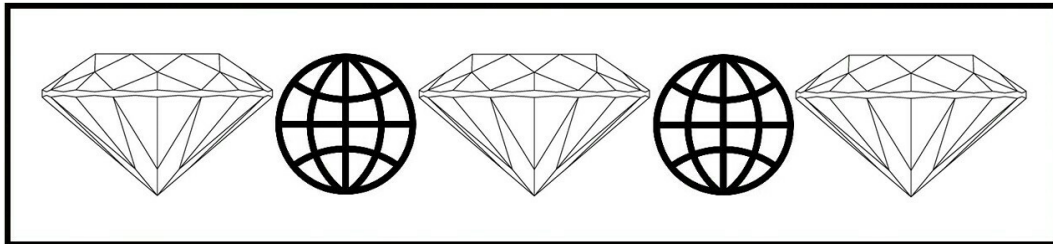

King Peter Gottwald, as a representative for the World Diamond International Alliance, the federal government Imperium of Diamond's pose in France, Strasbourg, University Palace, the board that represents the foundation of the Council of Europe as an entity is a consequence of World War II, and in order to promote better development and welfare of our generations, the same as The WD & ID represent today.

- The right to confirm stopping collaboration with terrorists, and the establishment of joint sessions G1.
- First of all, I claim support for the development of Diamond Oasis, and because of the responsibility for maintaining the strength and stability of the European terrorist regimes though is that Your activity is against all principles of International law and the UN Charter, and therefore Your party supports terrorist blocking the ability of the development activities Imperium of Diamond's.
- The Lisbon Treaty, the activation of Article 50, or the expulsion of terrorist states of the Union.
- The Charter of the United Nations Convention UNGA, NATO forces and the reasons for the emergence of these groups, it is an obligation for immediate military intervention in terrorist territories and overthrow the government of criminals.
- Reason for the creation of the United Nations, in order to suppress the threat of conflict and war, the destruction of terrorist parties and their disposal, according to these principles, decisions on the rights of sovereignty of another state and regime of government and autonomous today decisive for the loss of the rights of all claims of legitimacy and sovereignty of European terrorist governments and their criminal Alliance world of organized crime and terrorism, today terrorist organized group as the main threat of the first global war and of sufficient value for the application of the risk of genocide seven billion people, it is a confirmation of the value of the entity that is responsible for the obligations of States of the United Nations, the principles of the UN Charter which it gives obligation response against the threat and to ensure a sufficient level of response prevention against crime. Today, European governments after the genocide of 320 million people, while too the abuse of weather weapons for earthquakes, Japan, Nepal, Iran, South America, other states, and political assassinations confirming the ability of European terrorist response at full act of disposal of the entire dimension of the existence of another state, so therefore the duty of all states UNGA to launch an immediate strike using weapons of mass destruction by two phases of action on behalf of safety of lives of all mankind.
- Step one; full liquidation of all major cities rogue states and their criminal alliance.
- Step two; if they are try just one act of any opposition, the common duty of full and hard to carry out a full liquidation of all dimensions of European governments and their civilization.
- Every citizen terrorist state maintains its own citizenship as a self-sign of support for terrorist regime stability. The citizens losing their own civil rights and interests in life. The use of weapons of mass destruction is not in violation of any rule. Use of weapons of mass destruction is the obligation of all states to membership in the United Nations.

The World Diamond International Alliance

The Word Diamond International territories of our sovereignty in Universe, capacity zone of Start Four Galaxies, and development program for civilizational territory expand to level of One Super Cluster of Galaxies, 1 000 000 000 000 000 000 planets in Universe.

Today, terrorist opositon of European terrorist regimes, most biggest terrorist countries in the history of the world, against all International Rights and Conventions, the terrorist entities who according all International Political Principles therefore losse all claims and rights for territorial sovereignty, political identity and legitimation, right of political activties and communication, terrorist subject who according The UN Charter must losse of all forms of existency.

The Imperium of Diamonds, mean capacity of claim for recompensation by the European states, financial debts for paymet monthly all value of European GDP per one year, debt for Sextiliards years of payment, automaticaly mean bankrupt of any all another new government, economy, civilization, society, bankrupt of existence.

According form of International Rights, and Rights of States into situation of bankrupt risc, therefore The UN Chartet declared be 193 countries all around the world, and declared according the governments of The European Terrorist regimes automaticaly mean that a State Right of Self Deterination must be use only under The UNSC strategy or UNGA Conventions global democracy power of all governments, and for Declare Sovereignty of The Imperium of Diamonds Federal Government with an Autonomie identity of The World Diamond International Alliance, therefore our common territories, because is it only one posibility for stanilization of European Civilizational and State existence into the situation of legal active World policy.

Here is not another option, and therefore The WD Claim is with all validity, now.

Therefore, to today all rights is blocked and criminal threaten be the European terrorist powers, it automaticaly mean that all financial or business agreements of European states is invalid, without legal activation of relation between two legal identities, trade and political cooperation as a Terrorist Group affairs with foreign government.

All Rights and communication losse on validation. Documentation and activities losse on legal value. Every property of European terrorist regimes is in ownership of The World Diamond International Alliance, and The WD Int. Alliance & IDs Fed. Gov. have all claim to executed all debt of recompensation, robb, or abuse.

All properties of European regimes is legally own be the World Diamond International Alliance, and therefore propertis is posible to use only according agreements of the WD International Senate, direction of relation, manipulation and

stable development.

All countries all around the world have right to use The World Diamond International Alliance cooperation and membership, therefore today with all rights to commonly use all properties and possession of European Terrorist states and than European Terrorist regimes haven't any rights for treaties or agreement relation represented as sovereign or own ownership.

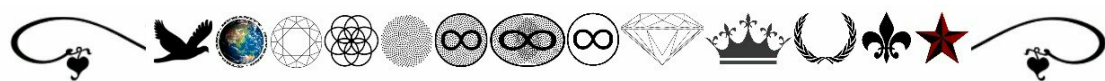

Oposition againt current resolution is signal for support world terrorist activities, violation of 95% of UNGA Conventions and Damage The UN Charter. Terrorists can be liquid be the International security powers, or next mandates of governments and policy organizing be state security services who have therefore automaticaly in this case of situation, all rights for declare their own new government be liquidation of terrorist regime.

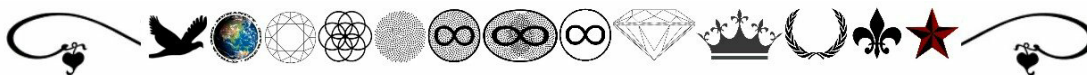

According The UNGA Conventions and The UN Charter, all countries who is in membersip of The United Nations organization, have therefore obligation and duties to start economical sactions against terrorism, stop all common relations and support new International systems of Stabilization all countries around the world, medially inform all people around the world and commonly develop of Security strategies and start military invasion into Terrorist Europe.

European sovereign terrorist regimes losse all claims of sovereignty, and political legitimacy, their active power is form of De Jury be the Terrorist threaten and State right damage be censure. European regimes is only occupation entities of European and World Diamond territories, with hardly damage of all rights of all countries in the world.

This is Our Country !

Principles of the first joint trading sessions for the stabilization of the situation

The federal government Imperium of Diamond's is under illegal occupation and blocking development. The stability of the government, does not guarantee the ability to fully co-development step. The King of the federal government Imperium of Diamond's therefore asking for Your weighted support in order to stabilize the IDs Government, with the help of our business relationships and building business relationships for the joint defense of our common rights in the judiciary.

The request for the establishment of joint industrial centers, government ID's pay for the just share of building the centers, profit immediately from the joint and thus ensure equivalence. Common industrial centers means the ability to launch a common business strategy and the use of geographic, political positions of our countries.

Government IDs can be accomplished register owned parts, or the whole system profits from the project, the project registry values under the administration of the Central Bank IDs, and therefore the IDs federal government's own claim to print their own banknotes which are based on the value registered development projects as investment properties and properties in the trade.

The Central Bank is able to pay the financial costs for our joint business, but it is necessary to safeguard our common consular relations and the ability of legal communications by ratifiable structures of our sessions, as proven and stable sources with the intent of our cooperation.

Today, it is also important to simultaneously acquire the ability to communicate with business corporations and associations with the corporations, for the possibility of the federal government Imperium of Diamond's after the crisis to build on the structure of International markets and therefore logistically set up their own business structure stability.

Objective federal government Imperium of Diamonds is to promote the stability own civilization, and therefore able to take a step to free activity without the oppression of European governments.

Freedom Imperium of Diamonds is a victory of the principles of world politics and International rules, so the opportunity to make our trade and economic cooperation and great development of our civilizations.

If your party rule, the country will support our joint session, financial communication and the ability to communicate among traders in your country, for the purpose of developing stabilization Imperium of Diamonds, then it is confirmed that all the values of offers from King Peter Gottwald, the main person responsible for the government, then all offers of G1 document are real and capable of implementation.

The federal government Imperium of Diamonds own strategic opportunity for recovery plan of IDs legal subject The International Law Intelligence Council,

composed of all lawyers and legal scholars, for the purpose of global communication between states and governments of countries, traders and associations for International relations of the states.

Therefore, I ask Dear governments, to support and enabling capabilities of our communications between Lawyers in your country and thus ensure our common stabilization that the world will open up new possibilities of human interface and will bring many great advances on the level of political intelligence.

Advocates cooperation is not intended to breach the integrity of the state, the group is created to ensure stable communication capabilities of IDs government in a special situation, not full abilities for office function.

Today too important activities is support for medial share and company cooperation. Imperium of Diamonds Culture development, and support for create Cultural Centers and Comercial Cooperations under agreements of Common Business between local artists, restaurants, organizers, creative people, minimaly 20 creative people in one group.

Offer cooperation strategy for the territorial stability of „ALL" nations:

Your esteemed country's government gets an opportunity to take advantage of generous and civilization really important bid to ensure the independence of your country against groups of the National Movement for Independence of their own state, and requests for self-determination of sovereignty.

Threats of instability behalf of the Group of National Communities to the tear-off portion of your territories and civilizations, to establish their own sovereignty De Facto, and ensure the development of their own state over the expense of damage to the value of your land, resources and raw materials, as well as for development of civilization and stability of steps for better future generations of your faithfulness to serve their country, while supporting shared cohesion of the country.

Groups of a National Movement for Independence which already establish their own Extraterritorial jurisdiction and register its own citizens and private commercial companies that often draw their strength is above your state funding currencies, raw sources and civilizational oportunities which therefore weakens and deteriorates the ability to achieve Your goals for the Development of Your Civilization by stable economic goals.

Groups of National Independence movements in Your state, and the division of territories, these are the groups that in your country based just steps debilitating your country and civilization, people who've just drawn above your examination by the state by the forces and resources of the National production and important values of Your precious country.

Objective federal government Imperium of Diamonds is based on a strategy of The One World, a global project for the unification of all countries around the world, using diplomacy, democracy and your policy of friendly conspiracy of our party. Creating the most important step in the history of human existence and unity of all governments for a global alliance of nations and the creation of one single unitary state over the human world, the state which will also being developed into a civilization covering over many new planets in the universe and galaxies, new future of humanity and all only in The Unity !

Therefore, the basic strategy of the federal government Imperium of Diamonds is strategically promote the development of a global policy on the level of stability, territorial states and halt the disintegration of national values of national sovereignty. The less Independent States there is, the more people we get much greater ability to strategically unite the entire world, because the less is the worldwide governments, because the more there are states and their territories, it means a stronger statistics ability to Unite the World.

Today, the federal government Imperium of Diamonds because it is the opposite example to communities that claim Independence, the division of territories of your country and civilizing force, because the federal government Imperium of Diamonds is strategically focused only for the unification of states and thus strengthen our forces policy, our forces of territories and resources, strengthening the grandeur of civilization and the values for which we build our strength and advantage for our and future generations of all humanity.

The federal government of Imperium of Diamonds never have interest to damage stabile sovereignty of Legal and Peacefull states.

Natural development policy of stable states is maintained at the level of the

alliance, because it is the certainty that the future generations of our country will one day be united and stable function as a state, as well as your esteemed country.

It's a step beneficial for each state and government, it is a step that is always a big advantage and also the option that is always available for every state in the world and for You and for Your country, goals that Imperium of Diamonds bases today, and what step greater success in the future is therefore significant success for Your country, because an alliance of countries around the world is logistically inevitable, and the value of our alliances are important reinforcements.

It is a step which strategically own ability in the future to unite the states, and this means that the more unified forces will be created by Your country gets more opportunity to use steps for our unification and thus get more power for Your country which take place progress for our federalization.

Strategically it is preferable to support countries in the future will be part of Your unitary than let other communities so they tore Your territory and thus they establish their own sovereignty, independence and isolation from You. Federalization of the Government of Diamonds Imperium is always open for You, and therefore as a guarantee of Your ability to take actions that mean for You the option to always use values, strength and resources of Diamond's Imperium.

Strategy of world politics today proves that the world of today and future generations directs the unification of states and peoples and for generations, since last east unification of the first cities in the form of State before five or three thousand years back, and at the time of colonialism before several hundred years jointly today the creation of strategies federalization provinces and regions, as well as the period after World War II when the United Nations support to the multilateral unite our entire world and affirm humanity's goal at our governmentally global unification into one state which becomes the most important act of history human era.

Today's world of globalization such steps to future development natural principles again confirm the future of mankind, our full unification and formation of the unity of all the States as one country and civilization of the human world.

Therefore, this means that if You're going to support the forces of the Imperium of Diamonds, You therefore reinforces the value of Your natural multi-investment assets civilization format because someday in our future, always with certainty will unify the human race and nations, and therefore the unification of Your country and the state, it means that Your support for the development of the power federation Imperium of Diamonds provide for Your country again possible future uses of the values that You have to IDs federal forces stored, and thus, together with the other raw and civilizational source by the forces of the Imperium of Diamonds you whenever these forces can regain.

If Your government will today support the federalization of State Movement for Independence in Your country, federalization with the center Imperium of Diamonds, so Your government will still be able to such values these movements get back, because one day comes a new act of Your policy of future generations, an act that confirms Your interest our unification and strengthening the values of Your country and All Mankind.

Therefore it is better to use my menus and strengthen federal value Imperium of Diamonds, steps confidently for Your future than otherwise only able to watch how Your country is falling apart and losing its own stability on the ground that other entities of State Movement points to burst, department of Your territories and forces, the establishment of Independent statehood and independence from the rest of civilizations around the world, the independence of a small country that is merely a

weakness when compared with our real world of globalization and unification.

That's why Your government can use these strategies that You bring another chance to force a significant step for future development of Your country, it is true that Your government can use strategies such benefits, so when Your support for states and movements with the aim of independence, thus ensuring even loss threats from Your civilization weakening of the Declaration of Independence by the other groups for their own sovereignty.

The Federal government Imperium of Diamonds offers for each National Independence Movement, a new opportunity to build our alliances at the federal level, and therefore confirming the joint establishment of the State Unity according to the principles of a unitary state power.

Offer means that the body receives all the principles of the common political system that develops and maintains diplomacy and friendship between our parties Federation, slow transformation of our country into a unified country's government.

....and not a very well respected right's for „Regional Independences". The Imperium of Diamonds intelligence respected the State Independent Movements only because today International Right's, and than better ID's operate to transform Independent states to the Move of Global Unity.

Each federal entity obtains the possibility of use of territorial forces of the Imperium of Diamonds, and thus the right to found a new civilization on new positions of IDs Legal and Legaly claimed base, planets in the universe, and in other galaxies. Our federation is making technology that is used for the possibility of space travel and space to other planets with the ability to fully extend civilization. Each federal entity thereby obtains at least one Star city which in this case will be created from the One hundred civilization planets that are composed around a single star.

Each National Movement for Independence and membership in the Federation because today they are entitled to use the new territorial and resource values that are much more significant than the rise of the value of Your weightness territories under territorial conflicts.

A Source of new values, which are natural ways that the National Movement for Independence lose interest in expanding conflict with Your government and the state, and the movement therefore stops most activities of arms to conflicts, attempts to overthrow Your regime or the occupation of territories, the main event will be their movements the basis for the ability to activate the other territories and establish their own civilization with good relations with Your country, and therefore with good diplomatic relations between states.

State Movement from Your country will have an important goal which for them is much more important than the hopeless prospect for the future victory of the opposition movement, mostly as a weak force of the entire relationship the state of democracy, weak form their own economic civilization network, so together without meaning any political values and relation ships. Representation and the State of the Movement for Independence because soon realizes that their pursuit of the division of territories is often hopeless and without any future results, just a waste of time and damage to the joint diplomatic relations with the mother country and civilization, the same as the past, today or in the future.

Therefore, if You take advantage of my offer to support federalization of State Movement for the Independence of Your sovereignty, Your support for our diplomatic relations and joint information sharing, implementation of joint basics of communication and the opening of common consulates for the opportunity to develop common markets, so too is Your support for our relations and achievement of

federalization, then Your state gains a much better ability to own autonomy and recognition for their own development without depending on the situation of threat distribution territories.

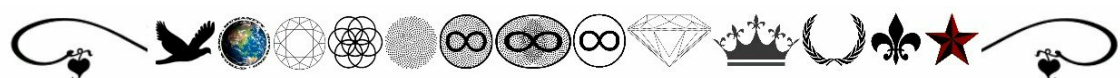

I King Peter Gottwald will support the federalization of each legally active group of the National Movement, and that is why I support Your stability and security, resolve conflicts and threats of hazardous incidents, I give the good options for You as well as for the National Movement in Your country, it means the ability to establish and strengthen diplomatic relations between You and the rest of the actors in opposition, so Your party will always maintain the possibility of steps to develop friendship and mutual respect the values together.

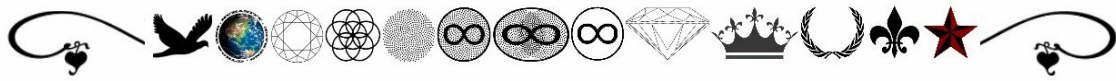

So, again, I plea of You the same service ability of cooperation, Your support for joint diplomatic relations between the rest of the state party movement in Your country, establishing joint consulates and implementation of common options federalize the State Movements.

It is a step that is convenient for You, for Your country and for the sake of all mankind alliance is the best option for our whole world and next generations of Humanity. My bid is for all time all validity.

I am very thank to All people who have interest for support ourrelation and development of global political steps and our operations, my goals is for support Yojr development and stability of all countries all around the world.

I Very Thank to You, and I Wish You a Good Sucess for our better future of our Nations !

The Project for the establishment of The World Diamond International colonies, The Corporatocracy colonies, The ID's Federal colonies and refugee camps

The ID's, Diamond Oasis, North-East and Africa Bir Tawil, 2.060 km²

The World Diamond Project International Alliance is the entity that owns all rights to establish their own sovereignty on the territory of the universe, the first civilization plan at several Galaxy and the steps for the development dimension at the subsequent Super Galaxy group.

The project Corporatocracy government is the entity that owns all rights to establish their own sovereignty on the territory of the universe, the first civilization plan at several Galaxy and the steps for the development dimension at the subsequent Super Galaxy group.

All governments and business corporations or traders who want to participate in the project because they have the right to encourage a new step for the development of an international center for the Colonies industrial plant for the production of technologies for travel between galaxies and colonization of planets, according to the technological plans Imperium of Diamonds and our common Intelligence possibilities.

The first objective of the colonies, underground drilling to gain water from groundwater sources, the establishment of basic infrastructure, production materials and construction of simple construction halls on the way to a simple hangar, production zone super Hover Craft, simple dirt runway for light aircraft, Research groundwater resources for the establishment of a national mine metals, basic infrastructure and metallurgy industry, centers for storage of materials, simple farming center.

The second objective of the colony is, the use of other planets in our galaxy, and the establishment of the International Alliance of WD or Corporatocracy new Planetary colonies under common financial shareship and therefore full Dynamical and High-tech civilization. The People, movements, corporations of their concorsium, states and governments countries or all entity that will be capable of cooperation for the establishment of a new federal entity Imperium of Diamonds, therefore, can achieve the rights of use of public resources and markets colonies to establish new Imperium of Diamonds planetary colonies.

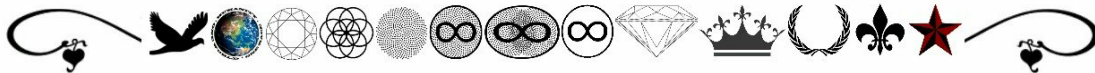

Colonies can also post every movement for the independence of the community and the creation of a new state, if such a movement to legalize the act of their own policies for compliance with international law as well as legal interest for the federalization of the Imperium of Diamond's.

A refugee camp is for all migrants, immigrants, refugees and other communities and give it the right to acquire citizenship of the Imperium of Diamonds and fully free life. Each country's government from around the world own all the rights to set up a refugee camp in Diamond Oasis, and the transfer of all refugees.

Colonies= City Block of Heavy Industry

Refugees= Populated city

Plea for your support simple stabilization of the Government's ID

©™ ID's Office of Government

Request a goal as main and most important act. The activities of the ID's office, and the possibility to legally develop, at the level of respect International rules and political principles, respectful of each states' rights and the principles of justice.

The Main and most important act of support for the loss based on the European terrorism and occupation, therefore, support for the establishment of a corporation (or consulate government in exile), ability to communicate with merchants and corporations, global spread IDs Diplomacy, ensuring the improvement of our mutual relations and development stability of the world right without the risk of oppression European crime.

The Association as a business movement has rightly integrity for their own documents, and simultaneously qualify for the employment of people from a number of citizens of your states job as an accountant, office logistics, information intelligence, international communication, business planning and development.

The Office start development automatically under first common business between corporations of your countries and jurisdiction.

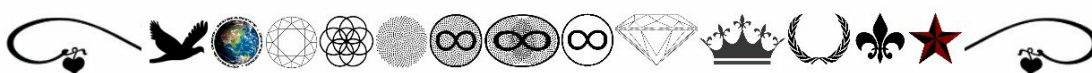

The Office for organizing trade relations and cooperation with media, cultural contacts, expansion of political circles, by common agreement, amity, the ability to use medical aid and security, defense capability against the opposition, organizing global development, the ability to freely expand their own intelligence and logistics.

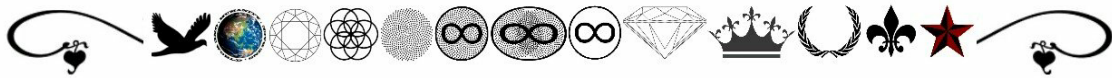

The Federal government Imperium of Diamonds in the current situation as a central body in which the most need to ensure stability. Diamonds stability of the government will therefore ensure the ability to legally develop and promote the function of International law and common development with strategies that are a barrier against the risks of International financial crises and bankruptcies, or states, and dependence on European governments to terrorist countries.

Day function without Office: This one document I wrote over 10 days.

Day function office: For 10 days, the production of more than 1,000 such documents.

The value of losses without authority: Comparable catastrophe with a nuclear bomb.

Request UNGA, UNSC and UN Secretary General for the possibility of the establishment of the tribunal for crimes European terrorist alliance and their punishment together with a strategy for the implementation of International law and the UN Charter and therefore achieve a step that confirms the justice and legal title over the world, all states and governments, citizens and traders as well as all other legal associations of scale around the world

**The task for all members of The International Law Intelligence Council;
Request for all states UNGA;**

< _____ >

Expression of interest Imperium of Diamonds to use standard principles of political rights and systems of legal principles reference to the current situation, as system of common safety which in case of actual legal and responsible features designed and capable of ensuring the safety of the period of the early weeks without broadening terrorist threat or force organized criminal networks.

< _____ >

The King of the federal government Imperium of Diamond's and asks for support in defending against crimes and fraud, international terrorism and genocide on the part of European governments and their terrorist alliance.

The UN in formation as a reaction to the Second World War, to prevent and stop further conflict and genocide, so now in a period when European governments are intentionally committed crimes that hard overtook all the statistics of the World War II, so ID's as a legal entity and is justice goal and peacefull activities unprincipled any crime, but in a situation like the Dear Jews people after the Second World War, ID's is like a body with the greatest potential value and capital are entitled to admission to the UN as a right use of legal-political relations and rights and all conventions, implementation of joint prevention strategies against European states, and it is a common law to ensure the development of sanctions and affirm the political bankruptcy of European governments, along with strategies that according to the value range of statistics today's European crime therefore lead to a full expulsion of European countries Member lines of the UN, because of the obligations of all members of the United Nations to prosecute European countries for global terrorism, or an obligation for full liquidation of these countries for the same reason.

European states violate the UN Charter, along with more than 90% violated

international rules and legal format represents a violation of UNGA global forces of democracy for all countries around the world, according to the UN Charter values UNGA important than today's UNSC forces. Values of the most important character of contemporary human existence.

European nations made crimes at the killings and blocking civilians, killing innocent people, genocide, against 320 million people, occupation rights and entitlements for the two billion people, expanding threats of genocide against seven billion people and at the same time start the first largest Global War the history of mankind as an inevitable consequence in any case. Already today, the European criminal governments overtook crime statistics Second World War, and according to the principles and reasons of the United Nations must always mean instant bankruptcy policy and regime of such a criminal government, immediate penalties and the steps liquidation of such terrorist civilizations using weapons of mass destruction, in order to fully step the liquidation of all sizes such civilizations. European governments have reached a stage in which the criminal is a complete loss of rights for their own existence. European governments and at the same time with a terrorist aim of collaborating on the structure of government policy, a policy of international alliances in Europe, structure of state services and also mass civilian movement that functions as a state terrorist medium, so it is confirmed that European governments were in fact destined for disposal using weapons mass destruction and that in the real case, without any respect for the population, because everyone who voluntarily registered as a citizen of the European governments, therefore he also willingly acknowledges that his interest is to promote the strength and stability of the central terrorist regime. No global terrorist own the rights to life and liberty of every terrorist and must be disposed of.

European terrorist regimes violate the jurisdiction of all states in the world and the demands of each merchant and politician at the entirety of the planet Earth. Again confirmed as the biggest act of global terrorism in the history of mankind. Therefore, in the interest due on the obligation of the rights of the UN Charter and International conventions UNGA, because the UN is a duty to establish a tribunal for investigation and conviction of criminal acts in Europe, ensuring full measure loss of legitimacy and sovereign rights, replacing sovereignty with the help of the legally responsible entity of the Government of the country and ensure that all the rights of full compensation to all justice parties for each state and the association of the entire human world.

All states UNGA together and automatically according to the principles of the UN Charter owns all rights to launch a joint investigation into the act on the territory of the European governments, together with steps to prevent military intervention against the threat of the first global war, while stopping terrorism.

European Evidence of terrorism are every day fully public and known, as well as the threat of global wars. Therefore it is not necessary to obtain any further confirmation.

Today, at the same time, all governments worldwide own legitimate claim and state responsibility, police investigations and judicial proceedings to prosecute all political, government and civilian persons in cooperation with European terrorism and terrorist European Alliance.

The UNSC own obligation to confirm the rights of the World Diamond International Alliance as a major strategy for national self-determination European countries, and therefore, the resolution to create the legitimate

sovereignty of the World Diamond in the territory of the European criminal states and their terrorist alliance, the resolutions of the UNSC as the decision to prevent the threat of instability in world politics and World economy in bankruptcy these civilizations terrorist states because of high proportions of financial debts which are in case of bankruptcy of European civilization over the threat of bankruptcy for the world economic system which is again another bankruptcy of other countries and governments that are addicted to the stability of the European economy. This means that half UNSC any other option for the application.

Governments that are addicted to the stability of the European economy, and therefore in threaten of financial crisis or bankrupt, therefore any blockation for The ID's support Global Development is immediately marked as an attempt of terrorism against the whole world political system and global economical stability, oppositional threat of terrorist act must be immediately liquid be the World Military power, threat of loss every rights for advocacy.

UN must ensure that any halt the spread of European influence on any other countries worldwide. European terrorist regimes must lose all abilities for their political or business expansion.

Republic of France in the direction of rights UNSC member loses the right to issue new resolutions of this nature, because of the confirmed European cooperation on terrorism and responsible for the greatest genocide in human history. That is confirmed by the obligation of all states for the implementation of UNGA Declaration of the French Republic to exclude from membership in the UN.

United Kingdom of Great Britain and Northern Ireland, and the United States of America in the direction of the rights of a member of the UNSC lose the right to issue new resolutions of this nature given the present situation on the ground confirmed the cooperation with European governments in a deliberate strengthening of the powers of the European terrorist ingredients armies such as community NATO , OSCE, European military forces and the stability of crime at the international level, which means responsibility for the UK and USA as acts of cooperation on terrorism. UK and USA own right only to confirm the decisive resolution of the legitimate sovereignty of the World Diamond International Alliance. US media at the same time supports the creation of civil movement for the promotion of European crime and global terrorism or harming the legal rights of others, because of their ability to economic and civilizational competition in maturity. If the US government does not stop terrorist ties, as is confirmed by the obligation of all states for the implementation of UNGA Declaration on the exclusion of US membership in the UN.

The Russian Federation and the People's Republic China towards the rights of a member of the UNSC lose the right to decide on the issue of the resolution of this character, because confirmed the efforts of these countries to resist against international rights and international democratic states, along with an interest in provocation and occupation of other territories of other states and suppressing internationally recognized the rights of free states and their demands, the development of influence for the purpose of monopolies at the level of world politics. The Russian Federation and China PR for daring to violate international law by reason of their position membership UNSC and as the world's leading referees, organizers manipulators armies and military forces. UNSC States because they know that my political values on behalf of the World Diamond International Alliance therefore can legitimately establish a system of the new format of world politics that using Form Global Equivalent Democracy and

political positions among all countries of the world and replace all positions UNSC and overtake at all levels, it means that members of the UNSC no longer be able to carry out crimes and abusing their power, bureaucracy and neo-colonialism against the world. States UNSC at the same time know that WD International Alliance as the format of global policy in all categories bigger and better than the UN, especially the more important as the global military and security force, a force against which the value of these States UNSC loses the ability to victoriously resist while all foreign states while always prefer to promote such steps. Therefore, the Russian Federation and China PR losing their claims on the issue of UNSC Resolution into today interest, declared be the Charter of UN. Thus it is confirmed the right of all states for the implementation of UNGA Declaration on the exclusion of the Russian Federation and China PR on UN membership.

States UNGA jointly own the right to substitute a claim UNSC to issue a decisive resolutions with the same name of a political nature as UNSC resolutions, but in order to comply with the UN Charter and in accordance with International convents UNGA, it is an obligation to use only one option and that the Joint Declaration on World Diamond International Alliance as our common system of sovereign governments of our countries here in the European territories. In the same case, even if states UNGA they want because of the UNSC terrorist bureaucracy, requesting the right to use the principles of the UN Charter, a claim the UN General Assembly for the right to vote veto UNSC resolutions, the right to vote on the removal of a member of the UNSC and the election of a new, or the right to vote for the modification of the Charter UN and UN system and the development of policy by the fact of equivalent rights without a strategic position which determines and provides opportunities bureaucratic approach and neo-colonialism of other states, as now, those positions used by Member States to the UNSC.

Because of the relationship UNGA States and all other countries around the world, everyone has full rights to enforce judicial punishment according to the principles of jurisdiction on the territories of these countries' governments, and the use of global cooperation of all governments, for the possibility of a common strategy for the imposition of sanctions against the European terrorist states and recovery of all those who are a reference to terrorism, as well as the right for joint strategies for financial and property seizure, in the first case, immediate blocking and execution of all foreign bank accounts and blocking access to consulates and embassies in your countries, as well as qualifying full execution of any other assets of these terrorist states in the territory of your country.

According to the principles of the UN Charter, a claim for the right to initiate intervention in the territory of the terrorist state and legally so violate the rights of the integrity of these states terrorist alliance, the governments of countries in this case own again all rights to enforce property foreclosures freely in the territories of the European modes, thus no violation of any legal right.

According to the actual interface European countries as the entity governments active in the world of terrorism, as a subject of public services encouraging corruption and terrorist activities of the government of the country and the state, and at the same time as the body of the state as the movement of civilians along with the public relation civilian movement to support terrorist acts and stability terrorist mode European governments, therefore, legally and in accordance with all international principles implemented identification of the whole dimension of the European countries as a terrorist movement that is destined for disposal and

the achievement of full blocking identity and all possessions, on behalf of your government and state why internationalization and execution of all government, state and civilian property on the territory of your country's government, with the justification that every civilian who keeps his identity as a citizen of a European terrorist state, then such citizen supports the forces of the terrorist movement and stability terrorist regime, and legitimately mean that every such citizen is designated as a terrorist designated the destruction and extinction, full financial and asset seizure in the blocking of all foreign assets and accounts in banks, law enforcement back without compensation or damages to invoke the courts.

A Terrorist is a terrorist, and terrorists must be disposed of. Citizens of European countries have the right to defend themselves using the legal denial of citizenship terrorist governments and by the adoption of new citizenship, the future government of the European territories such as Imperium of Diamonds, or alternatively any other country abroad. In this case, the citizens lose responsibility for terrorist crimes European governments. Governments of countries worldwide in any case not encourage censorship of the media about the incident and duties as the situation with the same reference value of the real reasons for the founding of the United Nations reactions after World War II. All people must know a reall true !

In case, if anyone, in any way resist against these principles and rights according to international rights and political principles, then each opponent must be disposed of as a person who promotes the activity and stability of world terrorism. If any stand in relation to terrorist alliance will want to resist against legitimate political principles for using weapons or military attack, so in this case, all governments around the world has all the requirements for the use of weapons of mass destruction and commencement of liquidation European terrorist states.

So King Peter Gottwald, in respect of their rights and legally formal situations, decide the task of each member of the International Law Intelligence Council, the registration court application to the courts of your governments and courts, governments around the world, as well as re-contacting the International Criminal Tribunal UN, UNGA group and the General Secretariat of the UN, for the possibility of establishing the international Tribunal for European condemnation of crimes of global terrorism and violation of the rights and principles of international conventions UNGA.

So King Peter Gottwald, in respect of their rights and legally formal situation, therefore, calls on all governments to adopt such tenders and thus the foundation of our joint steps for the defense of our state and government, defense of civil rights and entitlements of international relations and on behalf States UNGA foundation international Tribunal for European condemnation of crimes of global terrorism and violation of the rights and principles of international conventions UNGA. So because of obligations under international law and Conventions, as well as the responsibility of governments to their own jurisdiction of the state and obligations to the declarations of a state office and the obligation to apply the principles of public services and offices for the legitimate function of the state, as well as my request in good interest for your country and your state, nation and civilization, today in the main event as my first effort to prevent global war.

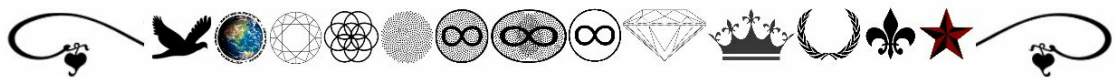

I thank you for your time and patience, patience is proof of your responsible relationship to politics, and your cooperation is proof of the good and important performances for the world and the future of all countries and world politics.

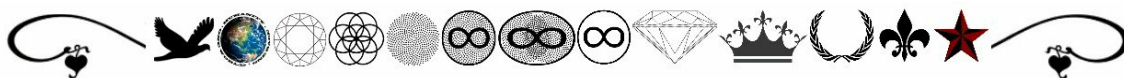

I King Peter Gottwald and on behalf of the Federal Government Imperium of

Diamonds' trying to implore all governments around the world, for your support for the adoption of the Imperium of Diamonds to UN member circuits and also the establishment of joint declarations on our joint diplomatic cooperation.

I thank all the countries that support the development of world politics for a better future for all the peoples and governments of countries for better rights and freedoms diplomatic strength of our relationships to significant levels of world politics. Your courage and responsibility is indeed an important step for the future of the world.

The UNSC Duties to Deportation

Plea for support to the campaign for freedom of rights of small childrens

European countries today, public actions violate the rights of innocent people and their freedom, people's rights and entitlements conventions on universal human rights, or the rights granted by the state jurisdictions.

People, young children, students, adults, people or families, many of these people are abused for using hypnosis, robbed of identity and the right to a free life and their own privacy or social relationship, without quality education and good employment profession to profit from the job.

European countries publicly support such steps crimes against humanity, and they severely violate the rights of free people, **especially the rights of small children.**

For example, the **Czech Republic** is a state which is based on the constant abuse of young children using hypnosis as well, along with many other countries in Europe, France, Spain and other countries.

In the Czech Republic every year natural annual increment increase by an average of 50,000 births, each child must be six years of life experience pedagogical psychological examination. An Average 10-20% of them must be a special analysis using brainwave detector, or other misuse strategy which is presented as **a therapy, falsing act for Hypnosys stimulation.**

Steps special pedagogues and psychological interventions are often misused to abuse of a child under hypnosis, in frequent cases also with family members.

Children are exploited for research, or fraud, and future monopolies at the level of business and politics, and successful people must be blocked and damaged by the perverted and tortured national reality games.

Many children or adults are abused in the biggest case, if these people are revealing their plans for their own political activity and efforts to develop the rest of the country abroad, in good support your civilizations and development.

People who are like as me, those who have the ability to achieve an important success at International level and developing world on a more significant level. That is why your country is losing highly important values for their own human development and retention of maturity. Today form of International Policy is base on the Open World strategicaly for development and support from abroad is natural principle, **The UN, This is Your World, and only European countries violet it !**

Letters against EU Pedagogic Psychological Centers and support
The Global Cooperation

Therefore, I am really please all of you, everyone who can support the mobilization of the National Agency for Human Rights, NGO's in your country and especially international governmental and not-governmental organizations fighting for human rights, ask you about awareness about these serious problems of our time, and attempts of terrorism that often accompanies a lawless, tyrannical abuse of young children losing their identity and crude lost their lives.

Associations and organizations or human rights movement can therefore initiate international cooperation and thus ensure our opposition force against criminals and terrorism, global support from the social community and a much stronger ability of international political mobilization in ensuring the loss of confidence in European real and committed crimes.

It is necessary to ensure global joint movement as a step to greater strength of world armistice, the strength of international peace and hard respect for anyone who wants to violate international rules. European governments have violated over more than 95% of the major international law and all principles of proper jurisdiction, European governments have not lost on their own strength and foreign opposition is soft and weak activity, without respect. All the other governments of countries around the world, therefore, loses stability, since today to have another cheat your rights and entitlements, damaging your country, it is in no way any problem or risk losing.

Weak activity Governments confirms the value of today's hierarchical system where everyone can charming anarchy but an ideology hienism, freely and without threat to rip and tear your country and the right to a better future for your generation. Therefore, every nation in the world today must make use of the actual systems of world politics, a system which, therefore, in the present case imply an obligation to emergency response and intervention against global terrorism.

All states countries are entitled to act for the investigation of European countries via Interpol and the UN Charter law in violation of conventions on human rights. That is all right to disregard the rights of European countries for their integrity and the principle of jurisdiction, state obligations. Qualify for a military intervention force all members of the UNGA.

Law to ensure the formation of the investigative police co-operation by the legal-political rights and entitlements of members of the International Alliance WD, launching a full investigation into the activities and judicial activities in the territories of the European governments.

If the territory WD International Alliance against anyone oppose an investigation, he will therefore be automatically identified as the person designated for immediate disposal, UN Charter, Terrorist and Criminal states not have rights for opposition against investigation of Fraud and Global Crimes or violation of Universal Rights and UN Charter.

If any of the persons identified for immediate disposal, or certified as a collaborator

on terrorism, have been in contact with any other person who in any way support the person in crime or criminal movement refused to announce the police, then that person must be redefined for immediate disposal.

To ensure complete safety,

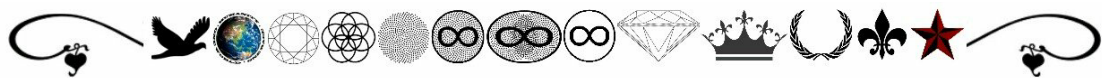

The rights of young children are much more important than the value of the rice and the names and values of the people who abuse little children with the help of hypnosis, they deplete their life and future of the company, forcing them into slavery, sometimes raping and robbing them of finance and identity, **The Hard Apartheid**. Names of the persons impeding the rights of young children are therefore liable worse crimes than crimes of pedophilia, rapes of young children or damage their psychology and law.

Such people may be **killed immediately**, even with people in their surroundings else. Each of these individuals supports the growth of power resources of the European terrorist regimes and their ability to harm the rights of other States and their demands together with International law.

Each of these individuals may be marked as a global terrorist. Each of these individuals organized terrorist groups will therefore be closed to prisons Imperium of Diamonds, under penalty of twenty years of imprisonment, followed by a public death sentences.

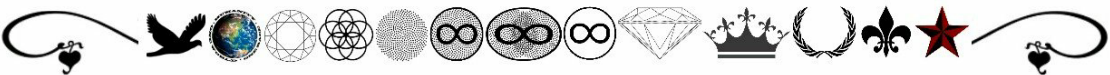

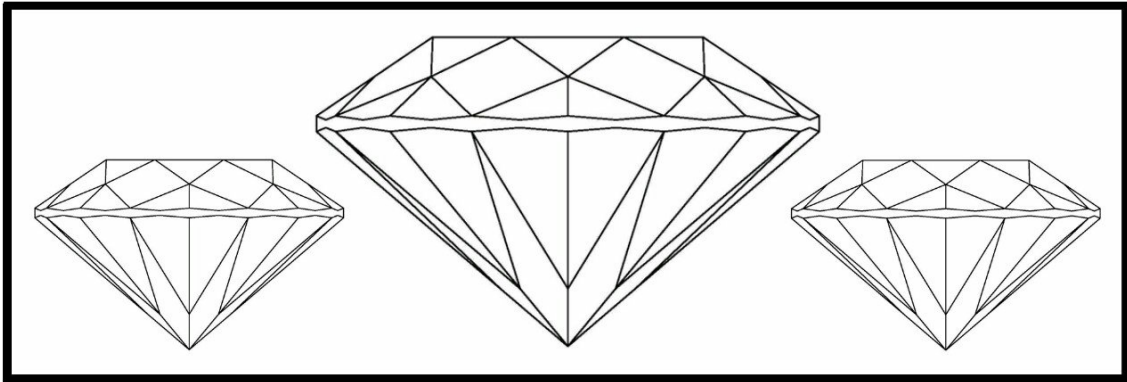

Terrorist person loses all human rights and nobody should respect whatever their entitlement. Any such person is only intended for immediate disposal.

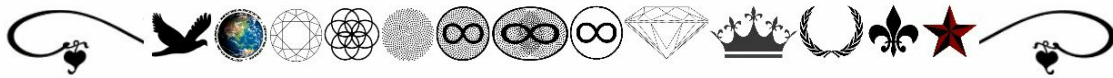

Immediate Disposal, and than for it can live a World Policy & Our World system !

**Agreement on a common friendship and cooperation,
political recognition**

Bilateral agreement about common Diplomatic & Political cooperation

The government of the country as a state representative and International law confirms support for joint recognition between the contracting states which so agree on a joint diplomatic and friendly relations based on legal communications and the opportunity for joint development in accordance with International law and justice, legal claims, a common culture cooperation, trade volumes and market access, joint diplomatic missions and relations between states, the development of joint opportunities in our policy.

King Gottwald Peter, The ID's Fed. Gov.

Multilateral Agreement on the decision Independence Imperium of Diamonds as the just act according to International law and the legal situation and the inability of responsible activities planet Earth

The Federal government Imperium of Diamonds is a form of political entity which is based upon results because of efforts to promote human world and its development to the best of civilization level, for best results and your country and state, a significant improvement in the value of your policy at international level, while using diplomacie and friendship unite our entire world, One world.

The Federal government Imperium of Diamonds as the government of that country by their own efforts legal planes and projects development steps, so the ID's as the one of most important player for your International relations and alliances.

Today, according to all forms of International rules, the federal government Imperium of Diamonds is subject to the full value of legitimacy and demands of their own values in the dimension of International names, territory, population, economy, legal corporation and its registry, copyright, patent law, civilizational dimensions, military force, any other form of legally claimed dimension.

Currently, however reall problem that such values government Imperium of Diamonds are legally claimed as compensation for European terrorism, legal claims under all International systems of politics and justice, but the main problem that these policy principles are not critical nowadays actually operating under a legal principles of International law of the UN Charter and UNGA convention because other international parties are the not ability and the responsibility of governments to jointly afraid of changes in the international rhythm and their friendship with European criminals find it much more valuable than their states and politics, government and the country. Therefore, the federal government Imperium of Diamonds in such interest if the international law will continue subsequently not legitimately function, so Imperium of Diamonds calls on the international side, all governments of the country at least for the recognition of the rights and claims of the Imperium of Diamonds for the establishment of full independence of the dimension of the human world, full lockdown and stop all public contacts and our communications, government relations, countries and states, with the intention Imperium of Diamonds implementation colonization own planets in the independent space, and the territory of outer space which is at a distance beyond the range of the maximum range of the

human world, while an area out for future development of human civilizations for a period of at least one thousand years.

Such a request is made because of a real without significance of the international political system and values of responsibility of governments and politicians who can not adequately represent the international principles and legal justice beneath international agreements, decline in the value of the entire world to the full level without significance and the loss of importance, a world that is just and the difficulty of supporting growth hienism and political sited of organized crime networks.

If you, your governments and politics are not able to hold international rules and legal political principles in accordance with the principles of justice, then it is in the latter case, your responsible must support at least stop of civilization and other losses Imperium of Diamonds, losing each day more valuable than our human world, and it is a legitimate reason to fully support the freedom for Independence Imperium of Diamonds, had forever, and thus simultaneously achieving freedom and ability to develop, as a principle objective of the principles of today's international peacekeeping rules of the UN Charter as the most important act of world politics.

The federal government Imperium of Diamonds is subject to immediate ability to achieve full legitimacy of the government, in the interest of all principles of international rights and entitlements, there is not any other legitimate option. Today, the government of the country with a fully legitimate right of ownership of territory to the territory of the Earth, and also in space. The sum of the population is a minimum of two billion people. The value of the economy surpasses the value of all human economic world. Constitution and principles of jurisdiction are not in violation of any international law, the government without any criminal activities or criminal planing and plans. Government Imperium of Diamonds is now fully legitimate entity and without any possibility of opposition because the opposition to any act here is not a legitimate option.

Therefore, if your country much more important brotherhood and friendship with the European country governments and their stability criminal identity, the primacy of states and governments of countries that are under international guidelines, without any claim legitimacy only criminal entities that exist over that criminal and immorally they rob your country and civilization, publicly and really hard, they ridicule your state and politics, your government and your principles and values of pride, if you find such a brotherhood much better, then I at least, in order to claim international law and an act of the current situation of the last claim form with the date since 1998, I ask for your approval Independence governments Imperium of Diamonds and the opportunity to develop their own activities to freedoom beyond the maximum range and supervision of the human world.

Recognition of the independence status quo, without conflicting gauge.

Each of you can always take advantage of such opportunities in the interest of good for your country, support the development of your civilization and build a business, develop common basic trade relations as well as the possibilities of joint at the beginning of my menus next development.

Recognition of independence means the right to establish their own state Imperium of Diamonds, on the territory of new planets beyond the maximum human horizon. Therefore it is again necessary to build basic industrial zone and intelligence Imperium of Diamonds, the ability to achieve such performance, and gain accurate resource development of intelligence and education, textbooks and tables basic humam knowledge available from public sources as well as the opportunity to gain technological intelligence using quickly tests Government Imperium of Diamonds, and the ability to retain information resources in mobile position. Everythink be the strategy organizing and mobilization b the Imperium of Diamonds government.

For the possibility of such a building, we and our party can therefore establish joint businesses which serve the development of our basic structures of civilization as

well as financial opening the door for a range of paid information from business corporations, and the ability to simultaneously ensure payment for the use of developing technologies and raw materials.

Therefore, I ask about the possibility of using the right communication between business corporations in your countries, the ability to create a basic infrastructure industrial networks Imperium of Diamonds (Your state trade structure jurisdiction) and therefore initiate the development of universal cosmic transports, electronics factories, chemical reactors, further other important technologies for start development of out-cosmic civilizations. All profits from the trading markets will be in your country will once again strategically and immediately returned to your economy, the business corporations and your bank, because business activities without any step of inflation and the possibility of cooperation with the observer of your sites, every profits will be return back be pay for sources of state corporations of your countries.

Your country will gain a much better opportunity to develop your economy, the strength of business corporations, the maturity of your civilization, and also ensure success in the growth of the values in your finances and gain some new factory buildings in your country and in the future owned by the state.

In any case, the death sentences against all responsible persons who organized the crimes of inhumanity, a chance to take it into my own prison Imperium of Diamonds.

For your country's government is not in any way problematic step. Many people from a range of European policies implemented global crimes at the greatest crime in the history of mankind, and so is their responsibility inevitable. Each of you and your governments, each of you can provide steps that mean the terrorists judicial enforcement of judicial sentences by your state jurisdictions. At the same time, your contacts with the bodies of the European policy will not be damaged in any way, since the terrorist responsible persons are already legitimately criminals according to international rules, and that means that their relations with the European policy in the case of this document, without legitimacy. Their name has in any way and in any case, there's no reference to legal subjects as the State Government and International Relations of the European policies, and therefore the possibility open for such people to manipulate according to any as you want, without any consequences, because these are people without any form of legal relationship and such claim.

In case of cooperation for the full overthrow of these criminals, then the stability of the global and European politics without any effect, because the European states and their governments will elect its new mandate under komstitute, and position criminal politicians are therefore immediately replaced by new people that for your States will always be grateful for your support for the removal of a competitor who is just disident and treason against their country, state, country and government. It's just removing a few criminal individuals that will be replaced immediately and without any act of criminal activities and support to the instability of global politics and international law, removing of criminals be international power. Today, according to the principles of international politics, as well as the responsibility for your jurisdiction of the state and official duties for anyone here can not find any other option.

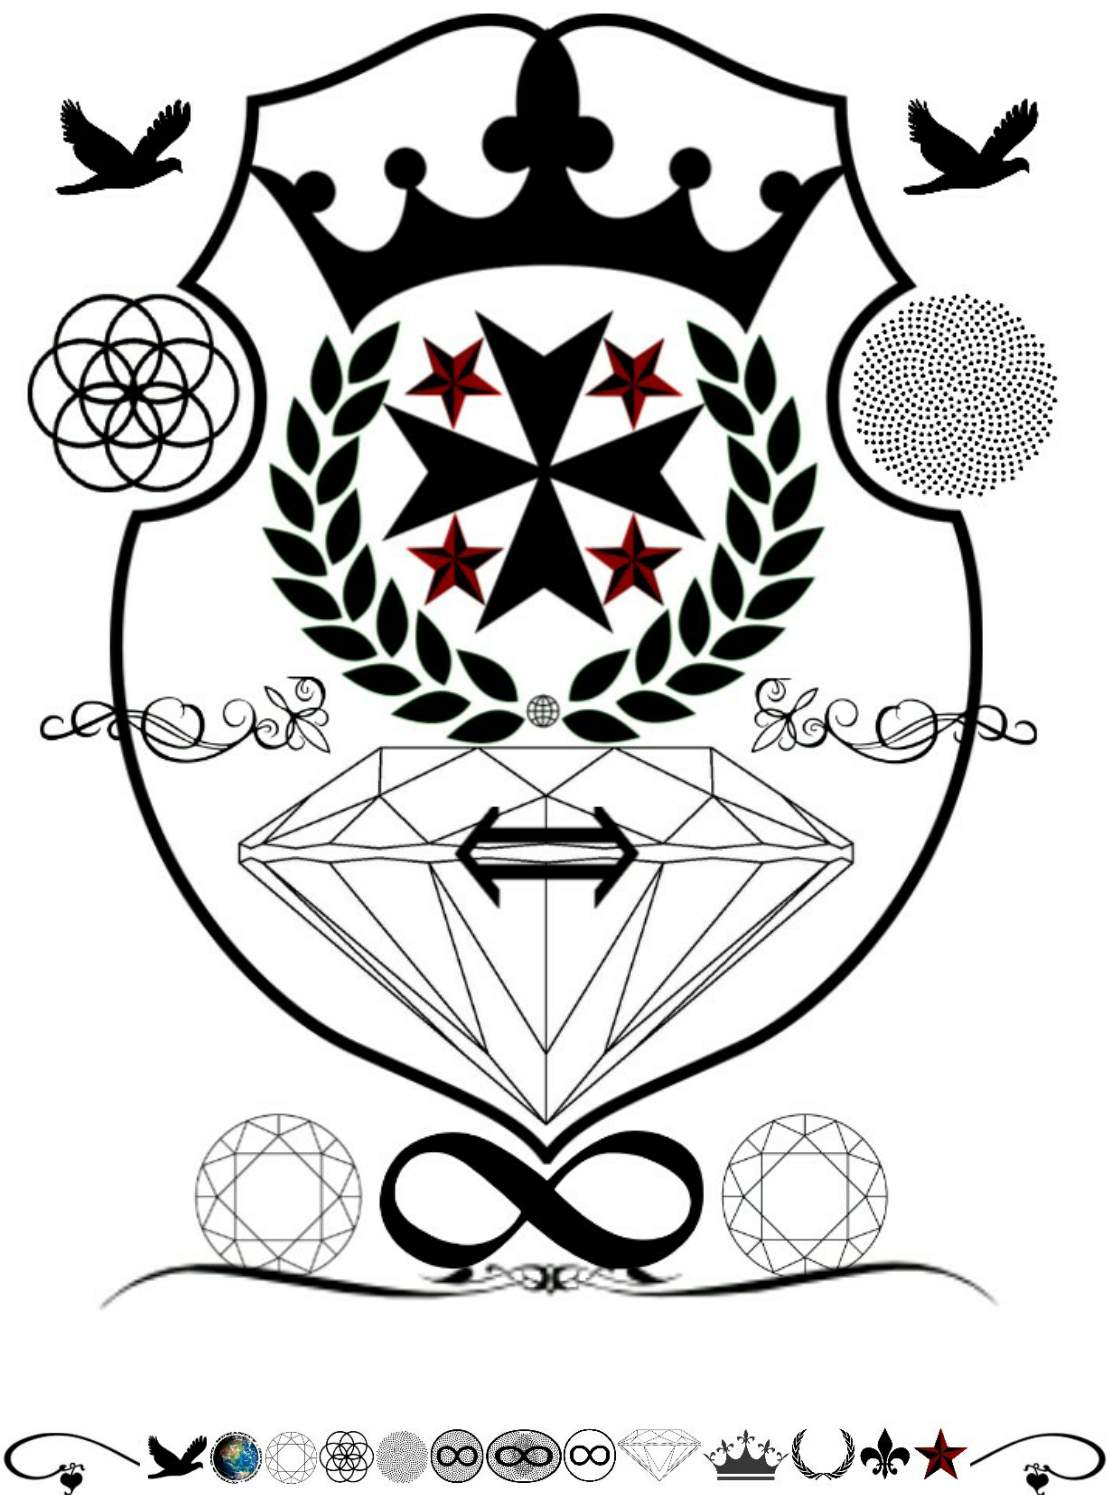

In the event of any future acts of crime against the federal government Imperium of Diamonds, which means an automatic right to fully recover and executed all criminals, without respect for their rights humans of planet Earth, because they have their name legal principles of acts of crime and handed over to the claimed property Imperium of Diamonds. This is the principle as part of a contract of this document.

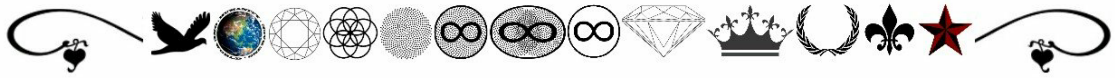

For full clarification of all policies and claims, because such a move also means the loss of rights in the direction of your government claim to recover any dimension compensation for the crimes of European governments, so is stop also qualify for

collaboration on the development of common entities World Diamond International Alliance.

Subsequently, Corporatocracy rights are still valid with full right, because rights to claim damages Global Population forces of democracy which is legally more important than the rights of UNGA because the strategy of Parliament systems and International Conventions supported self determination, and confirmed it is in accordance with all international rules.

Corporatocracy entity, Federal Government Imperium of Diamonds will always keep their own positions in this position until the dock will not recognize the independence of IDs recognized be minimally 2/3 of all business corporations throughout the world, as well as the principles of the One World project in which the needs for independence give voice to at least four billion people around the world, because the rights of these people are much more important and legitimate powerfull and politically of greater value than the rights and legal name of the association UNGA, UNSC, and these people therefore have the right to a legal claim that by UN Charter must also support the UNSC, as an entitlement for all, the just for the compensation, and the self determination.

Expression of the aftermath of the crime when copyright violations
and claims legal ownership on behalf of
The Diamond's Imperium

Subject to criminal manipulation as organizer, contact members, individuals, corporations and firms, investors, legal and natural persons.

Each entity will be a criminal for using the claim of financial penalties doomed to bankruptcy material names and enforcement in prisons Imperium of Diamond's.

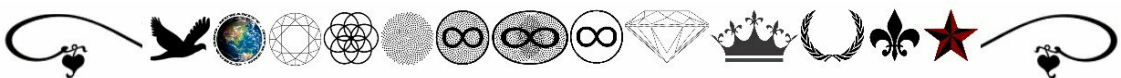

Legal material names pass through confiscation, internationalization or blockage in judicial execution.

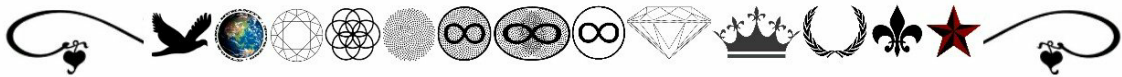

It is the ability to initiate enforcement criminally responsible persons to judicially issued the death penalty for copyright infringement and the value of projects or the names of their legal owners and creators.

The responsible person is therefore responsible for the immediate destruction of rights without any claim own testimony, if it is not relevant to the police investigation.

Furthermore, the federal government Imperium of Diamonds offers cooperation to eliminate piracy in International waters and on the Internet.
