

# DPS Career Development

## Work-Based Learning

### Learning With Purpose

The DPS Career and College Success Career Development Team partners with businesses and higher education institutions to help students visualize what's possible, chart a plan for their futures, provide hands-on experience and expand their professional networks through work-based learning.

With the invaluable support of our partners, students gain a head start on their personalized career paths in Colorado's ten career clusters. There are many ways to collaborate – from sponsoring a live/virtual career exploration event, becoming a mentor, hosting an intern or apprentice, contributing with a monetary donation and more.

We will partner with organizations who share our commitment to equity and provide anti-racist environments where our students can thrive. We look forward to working with you!

#### Industries:

- Agriculture
- Business
- Creative
- Education
- Engineering
- Hospitality
- Medical
- Manufacturing
- Public Safety
- Technology

**HIGHER ODDS**  
of on-time graduation for BIPOC and low income students
