Deca durabolin improves protein synthesis and enhances nitrogen retention. This helps your muscles grow in size and strength. Beginner weekly dosage is 250-500mg while for more advance steroid users is 600mg. But this is the limit as anything more than that can harm you. Deca-Durabolin is part of the Anabolic Steroids class and treats Anemia, Osteoporosis, and Breast Cancer. Anabolic steroids are used to stimulate appetite and aid in weight gain. They work by promoting the growth of muscle and bone mass. Deca-Durabolin is available in both brand and generic forms. Prescription Settings.
