

WORLD ECONOMIC FORUM

Technology Pioneers 2022

The Technology Pioneers of 2022 bring together 100 early-to-growth-stage companies from around the world that are pioneering new technologies and innovations. These include healthy alternative sugars and plant proteins, the enhancement of virtual connections via tactile effects, satellite-based space weather intelligence systems and many more.

By joining this community, Technology Pioneers begin a two-year journey where they are part of the World Economic Forum's initiatives, activities and events, bringing their cutting-edge insight and fresh thinking to critical global discussions.

Technology Pioneers are an integral part of the Forum's [Global Innovators community](#), which is an invitation-only group of the world's most promising start-ups and scale-ups that are at the forefront of technological and business model innovation.
