Auto-locking liquidity

2% of each transaction is locked to liquidity. This contributes to less volatility and a continuously increasing price floor.

Donations

1% of each transaction is distributed to a charity wallet . The destination of the charity funds can be voted every 7 days on the social medias

Auto-Redistribution

1% of each transaction is shared across all the holders. This encourages to hold more and thus, increasing the token value.

100% Safe

LP tokens were time-locked thereby locking initial liquidity away for a period of 2 months. Fair distribution without whales. Active and engaged team, ready to answer any questions.
