The Major International Conference

"Leading the Future 2018"

April 23-26.2018 | Tel Aviv, Israel

You are invited to take part in a founding event
The 1st International Conference of Medical Grade Cannabis

In recent years, there has been an increase in the use of medical cannabis in many countries in the world, while at the same time there has been significant progress throughout the world in scientific research in the field of cannabis, which has led to the clinical consolidation of the use of the cannabis plant as one that contains compounds that have beneficial medical effect for a variety of symptoms.

The State of Israel is one of the world's leading countries in the extent of use of medical grade cannabis and recently a regulation outline has formed for the field of medical grade cannabis: "Medicalization", which ensures access to and supply of cannabis of medical grade on the one hand and control of a medicinal product on the other.

Israel is the leading force in cannabis medicalization, and a pioneer in regulation and research of medical cannabis. The international conference, unique by its kind - organized by governmental authorities, agencies and offices, is expected, to attract hundreds of attendees, including scientist, researchers, regulators, medical personnel and medical doctors, farmers and policy shareholders, interested in this vibrating field of medical cannabis.

We look forward to you joining us in this thrilling event
The 1st International Conference of CANNAAN will be held in Tel Aviv, Israel, April 23-26, 2018.

The conference will be a 2-day forum, Welcome cocktail and Gala Dinner and a third day of professional tour. The conference will convey and share knowledge about legal and regulatory issues, scientific, medical, Clinical, economic and social related subjects of medical cannabis.

The following subjects will be included:

- Regulation and Medicalization in Israel and worldwide
- Hi-Tec agriculture
- Socio-demography aspects
- Scientific research on Endocannabinoids
- Scientific research on Phytocannabinoids
- Good Clinical Practices
- Clinical studies
- Development of medical-cannabis based treatments and medicine
- Economic issues related to Medical cannabis

We invite you to submit a 250-300 word abstracts for oral or poster presentations and proposals to lead a discussion panel. The deadline for abstract submission is December 16, 2017.

All submissions will undergo a peer-reviewed selection process.
