Ripping presell pages
&
**Reading CB Stats**

With Ilya Gurman

What is Ripping?

- <u>Nice definition:</u> To do research on your competitors and marketplace to identify what types of marketing creatives are currently popular – and then making a copy for yourself.

- <u>Direct definition:</u> Stealing your competitor's stuff.

Site & Access for SAS customers

An email list is a list of emails that you are collecting, this is valuable because you have a direct (and **free**) communication channel to these people, that are proven to be interested and engaged with your niche/product.

Feel free to try out their other tools, but we are interested in that specific feature!

Settings

Rip Landing Page

Name : landing page name

Folder : Undefined

Url : landing page url

Rip it   Reset

Name: Choose a name for your new page.

Folder: Keep undefined.

Url: paste the url/link to the presell page you want to rip.

What then?

Then you may download the page, which will create a zip, and then you can just follow the manual method steps, with your new page.

● Note that you'd need to find the places where your hoplink should be on and attach it so **you'll get the commissions!**

● **You can click 'edit'** to see if this page supports editing in-site, so you can make changes and input your links **before** downloading.

CHANGE OF TOPIC! CB STATS

- **In this part of the webinar we will be reviewing a new campaign of mine and thinking together what can we understand according to the stats we got, and what can we improve.**
- **This is a practical part with no theory text on here :)**
