There are many reasons why we should own [silk duvet covers](#). Below is a list of 5 reasons.

## 1. Natural Product

Silk is much more breathable than synthetic fabrics, for silk is a natural product. Thus, you are able to maintain a regulated body temperature while sleeping. Silk is hypoallergenic. Thus, silk duvet cover is a great choice for allergy sufferers, for it is able to prevent dust mites and bacteria build up to promote a healthier sleep.

## 2. Warm Keeping

Placing silk fibers on top of each other until the desired weight is achieved forms an intricate design which regulates heat during the night. The silk grid allows for some heat to escape, but it still allows you to remain warm and comfortable throughout your sleep.

## 3. Temperature Regulator

Silk duvet cover, a natural fiber, does not conduct heat or static electricity. Silk duvet is able to moderate temperature based on your internal body, thus it is a good option for people who sleep alone or who sleep with a partner.

## 4. Comfort and Feel

Silk duvet cover will drape around your body without having the bulky or heavy feeling of down filled duvets. Sleeping with silk duvet cover, you will have a very comfortable feeling to it. You will have a great night sleep all year round if you sleep with silk duvet.

## 5. Easy Maintenance

It is easy to maintain silk duvet covers, for they are mildew and mold resistant. Less body oils and bacterial growth stay on your duvet for silk duvet cover cause you to sweat less. You are able to maintain the quality and durability for many more years than other types of duvets, for you don't need to clean them frequently.

Besides, it is easy to change your silk duvet cover.
