# Introduction

phase.

**DeFi has become an integral part of the cryptosystem where decentralization is, met at its peak. Users are gradually moving from CEX(Centralized Exchange) to DEX(Decentralize Exchange) where they find decentralization very convenient and transparent. People are happy with the non-censorship found in DeFi. The latest introduction of yield farming has added to the extensive growth of the DeFi ecosystem that not only aids users to earn from liquidity pool but also to acquire massive rewards for the addition of liquidity, crazy, isn't it?.**

**This has directed to DeFi being the trend of 2020. The rise of Blockchain & Cryptocurrencies has led to the exponential growth of decentralized economies. Blockchain opens up the possibility for users to build digital assets but also own and transfer them. A decentralized economy built on addictive features in yield farming opens up unlimited possibilities and incentive models for the users.**

# About Phase Dex

phase.

Phase dex is a two layer scaling solution built on Uniswap and further extendable to modify orders on other DeFi platforms like Mooniswap, Kyber, Balancer, Airswap, Bancor, etc. Phase dex solves the ongoing issues that have been deterring people from using DeFi protocols.

These issues include:

- High Transaction fees
- Inability to set buy/sell point
- Unavailability of leverage trading
- No privacy
- Slow transactions
- Poor user experience

# Features

Phase is built to support a plethora of features facilitated by the integration of blockchain-based decentralized economy integrated into Phase. Some of the features include:

- **Phase Dex**

Phase Dex offers a unique peer-to-peer, decentralized solution for trading with Automated Market Making (AMM) and two layer matching built to modify the existence of most decentralized trading platforms. It allows users to be in control of their assets and participate in the DeFi economy within the Phase ecosystem. With the order execution, you can buy and sell at the point you want. Phase Dex operates as a next layer solution on Uniswap and other DeFi platforms and modifies all the orders before sending them to the liquidity pools.

# Features

## Why Phase Dex?

Low Trading Fees

Buying and Selling Limit

Faster Transactions

Privacy Focused

Optimized for Mobile use

80% of Transaction Fees Awarded To Stakers

## • Phase Store

Phase Store allows buying and selling of goods and services from anywhere around the world. Open up your store and reach a massive audience. Our store allows an easy to use peer to peer trading mechanism with no middlemen.

# Features

phase.

## • Payments

Users will be able to pay anyone with Phase instantly using the integrated wallet within the phase app. The transactions will be instant, on-chain, and will provide flexibility for users to use the payment features seamlessly within the store.

## Phase transactions for services can be:

Hiring Community managers to manage a platform or event

Hiring a Scriptwriter or a Content creator

Hiring Marketers and Promoters

There are limitless possibilities of transactions with PHY. 80% of Transaction fees will be awarded to the stakers.

# Phase Architecture

phase.

- **Blockchain Layer**

This is the foundation of Phase and the ecosystem built on it.

**It consists of:**

Smart contracts

Phase Dex

Staking dApp

Phase Store dApp

- **Dex Application Layer**

Dex swap engine is censored-tested and has already gained popularity among users of the cryptosystem to be one of the best means of exchanging crypto assets. Phase Dex provides a stable means of exchange with lots of unique features.

# Phase Architecture

- **User Interface**

Decentralized Applications

Staking Integration

Marketplace Website

# Phase Token

One of the foundations of a functioning society is its currency. Phase Yield (PHY) is a currency that powers the Phase ecosystem. Holders can use PHY for all the transactions in the Phase ecosystem.

# Phase Architecture

phase.

## Why use Phase:

Decentralized Finance

Staking with huge expectancy

Global Trade and Commerce

Payments and Money

Fast and Secure

Loyalty rewards

Lower transaction costs

Easily usable and accessible

Two Layer order matching

Transaction fees goes back to the people

# Tokenomics

phase.

Total supply: **30,000 PHY**

Presale: **15,000 PHY (50%)** (Unsold will be burned)

Uniswap Liquidity: **5,100 PHY (17%)** (Depends on token sales)

Marketing & Partnerships: **3,000 PHY (10%)**

Team: **3,000 PHY (10%)** (Vesting)

Advisors: **900 PHY (3%)** (Vesting)

Presale token price: **0.05 ETH**

Listing token price: **0.1 ETH**

## Usage of Funds

Development: **50%**

Marketing: **30%**

Operations: **20%**

**phase.**

# Roadmap & Token Info

## Overview

Name- Phase Yield  
Symbol- PHY  
Decimal- 18  
Total Supply- 30,000

## Allocation

Presale- 15,000 PHY (50%)  
Uniswap pool- 5,100 PHY (17%)  
Marketing - 3,000 PHY (10%)  
Team funds- 3,000 PHY (10%)  
Reserve funds- 3,000 PHY (10%)  
Advisors- 0,900 PHY (3%)

## September

Creation of Phase  
Pre-sale  
Unsold Token Burned  
Team Token Locked

## October

Uniswap & CEX Listing  
CoinGecko & CoinMarketCap Listing  
Phase Dex Test Launch

## November

Phase Dex launch  
PHY Staking  
More Exchange Listing  
Phase Store Test Launch

## December
