**Biography:** Established in 2000, San Francisco D.I.Y. foursome Dexter Danger are leading artists in the Bay Area underground punk rock scene crafting magnetic, energetic, rock-infused pop-punk. Known for their superhuman work ethic, the group developed a large and loyal fan base at home and across the U.S. while ultimately producing five official releases, embarking on several self-booked national tours, and regularly being invited to perform at punk festivals. At the end of 2006, Dexter Danger went on hiatus and primary songwriters Aymen and Miguel continued to write music and perform under the pseudonym Hey Sunshine between 2007 and 2010. In 2015, Dexter Danger announced their return after years of continued support and held their comeback show in San Francisco to the elation of long-time fans and new fans alike. That same year, the band was recognized by Itcher Magazine (UK) as one of the top five underrated pop punk bands from the United States. In 2016, Dexter Danger went back into the studio to record the "Lucky Strike/ Hey Sunshine" EP, the group's first musical release in over 11 years. In 2017, the band was recognized as the eighth most prolific Bay Area punk band by BayAreaPunk.com. [\[Read more\]](#)
