There might be anyone unfamiliar with the benefits offered by Amazon Prime. If you are a new user and looking for ways to activate the subscription via [amazon.com/code](https://amazon.com/code), then you are at the right place.

Cash App is a user-friendly payment app that was formerly known as Square Cash. It is a peer-to-peer payment app that enables users to send and receive money to their friends and family. Apart from sending and receiving money, all the users can also use the optional linked debit card to purchase or withdraw cash from ATM. The best part about using Cash App is that the users are known on the network through their registered phone number or email address instead of an account number. Apart from this, it is free to receive, send and request money from Cash App, which means no amount is deducted when any transaction is made. In addition to this, users can operate it via the website, or the more convenient way to use Cash App is through Cash App mobile application. Moreover, we have given the required information you need to know about Cash App, including [Cash App login](#), how to send and receive Cash App.
