FAQ

- What is ManaCube? - ManaCube is one of the leading Minecraft servers on Minecraft: Java Version. We've got had over 4,000,000 players login to our servers and take pleasure in the nice number of our options that may be found on no other server.

- Minecraft servers are worlds which you can play on with other players by way of multiplayer. They offer totally different experiences and video games.

- To join a Minecraft Server, open Minecraft then click on Multiplayer. To add a server, click on "Add Server" then type the server's IP within the Server Deal with field. If a server didn't specify a port to make use of, do not sort something into the Server Port subject. Soundz promising By default, the port is 25565.

- Minecraft Java Edition servers usually are not moderated by Microsoft and offer no parental controls unlike on Bedrock Version. At all times play on known and trusted Minecraft servers which have a algorithm to be sure that your experience is protected and clear from any obscenity or dangerous content.

- The most popular Minecraft Server gamemodes are Skyblock, Prison, Towny, SMP,

Factions, and Survival. ManaCube has all of these gamemodes and you'll join our servers to play with other gamers. We strive to be the most effective Minecraft server on the market.
