Zelda Adventure Mod for Minecraft is A Full Game

We've seen A Link to the Past recreated in Minecraft, but that's childish fun compared to what Minecraft forum user Gary520 has done. Zelda Adventure, his mod, promises over 10 hours playing time and a myriad of Zelda items to play with.

There are only five dungeons in the current version, but Gary520 is aiming for eight in the final version- the five currently available are based on the dungeons from Ocarina of Time and A Link to the Past. Server The mod is available for download from the source link below, but we recommend first watching the epic trailer.
