## THE FIRST MEME COIN KILLER

XMAFIA is a PAYMENT token build in the XRPL.

Basically it was born as a payment token but it is also a meme coin killer. What does it mean? Most meme coins have trillion-dollar supplies that give the illusion of "wealth", allowing investors to own billions and billions of tokens for just a few bucks. XMAFIA has a fixed supply of only 200 million coins, with a deflationary burning system that will make it increasingly scarce and precious within the next 3 years.

**In 2025 the total supply will be around only 20 MM.**

**2% will be allocated for the FREE AD for the verified TL's.**

**4% will be reserved for the exchanges.**

**2% for the marketing and 2% in the treasury team wallet.**

# MISSION

Our mission is to build a strong ecosystem. We want XMAFIA be the leading cryptocurrency on this blockchain and bring the notoriety of the XRPL on a large scale.

We want that when people heard "XRPL" they don't think only to XRP but also to the success of XMAFIA.

And this is possible only with a strong commitment and a strong VALUED coin.

We will integrate NFT's and much more along with the development of the ecosystem and we reserve the right to modify this Lightpaper according to our progress.
