

Giesen W60A

Coffee Roaster

The Giesen W60A Coffee Roaster is the largest machine in our collection, geared towards industrial roasting capacities.

The W60A was developed in 2014, to meet the demands of the market. It has a high roasting capacity of 240 kg/h. Therefore, the W60A is well equipped for industrial purposes and roasting in large batches.

The roasting process itself can be monitored and programmed via the control tower system. This is the well known Roast Profile System, that Giesen Coffee Roasters works with for all coffee roasters. This roaster operates completely automatically.

The Giesen W60A coffee roaster has a cast iron double walled drum with high performance bearings. The whole machine is equipped with low noise fans and all parts are easy to clean and maintain.

Specification

**Capacity**

30 kg - 60 kg

**Exhaust**

Ø 200 mm + Ø 300 mm

**Power**

400 V - 50/60 Hz

**Weight**

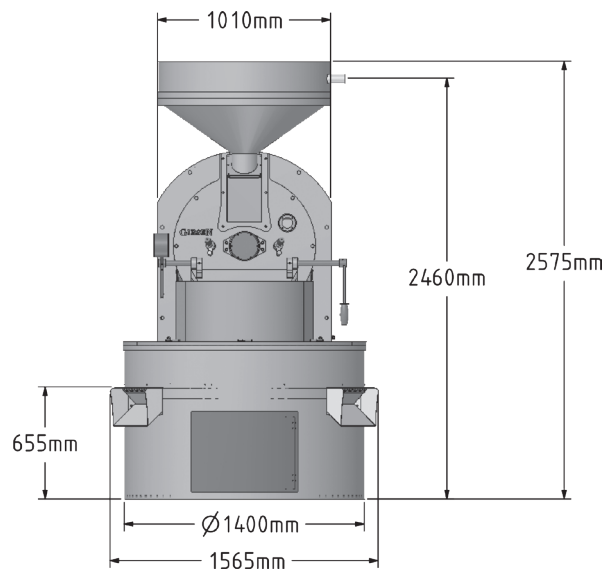

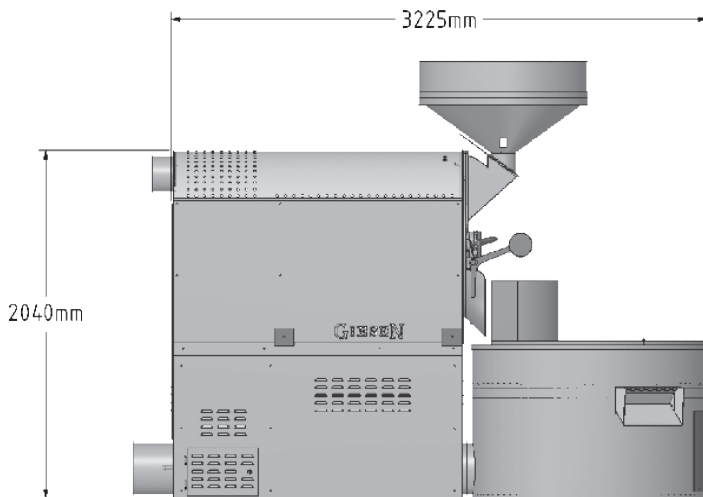

1900 kg

**Gas**

Natural and Propane

**Certificates**

CE
