Dear Marin Electricity Customer,

Cities and Towns in Marin have joined together to provide a better electricity service option for Marin ratepayers with the specific goal of increasing renewable power content.

The Marin Energy Authority, a not-for-profit public agency, provides this renewable energy alternative through the **MARIN CLEAN ENERGY (MCE)** program with **nearly twice the renewable energy content that you currently receive – at the same rates you currently pay.**

Under State law, residents and businesses in the service area will become Marin Clean Energy customers. On your meter reading date during May or June, MCE will begin serving you **Marin Light Green** power, which will include 25% certified renewable energy. The electric rates charged for Marin Light Green will be the **same as what you currently pay to PG&E.**

Residents and businesses will not notice any change in their day-to-day electric service. There will be no

disruption of service. Your electric utility bills will still be sent by PG&E, which will continue to transmit your power through its electricity infrastructure and charge for its distribution and transmission services.

This is the first of 4 notices that you will receive. Ratepayers can “opt out” of MCE’s reliable, renewable, and affordable energy portfolio and may continue to receive electricity from PG&E’s portfolio without penalty. To opt out, you may phone (866) 743-0335 or visit www.pge.com/cca. You may opt out at any time. However, if you choose to opt out later than sixty days following commencement of service from MCE, additional fees, terms and conditions may apply.

MCE also offers a voluntary **100% renewable energy service option, Marin Deep Green.** For more information or to sign up for Marin Deep Green, please visit www.marincleanenergy.info/deepgreen.cfm or phone **(415) 473-6624.**
