

TO REMOVAL TO SAUERLACH

Dear customers, suppliers, friends, partners,

we are pleased to announce that we will move to our new and larger office in Sauerlach on October 29th 2020. Due to our continuous growth, our current premises could not keep up with our current pace.

In order to be prepared for the future and to enable further continuous growth, we had to look for new company headquarter this year and found them within the „Technopark Sauerlach“.

We are expanding our services with new technological possibilities, such as the storage of MSL classified components in drying cabinets according to JEDEC standards. We will also optimize your piece-precise requirements by shrink-wrapping components in ESD packaging with vacuum equipment. So you will continue to profit from our improved quality.

The unique concept of *Technopark Sauerlach* did not made the decision difficult for us. Particularly noteworthy is the social interaction at the location, which enables us to realize and live our visions of a community with new partners and an even better infrastructure (S3 and freeway A8). The flexible use of office and industrial space allows us to optimally reflect sustainable growth.

Professional component distribution in combination with ecological, sustainable thinking and acting is certainly unique in this industry! The evaluation and certification by the *ÖRS audit* should manifest this!

We are looking forward to all new challenges and can be reached from October 29th at our new address:

COMPONENTS AT SERVICE GMBH

Technopark Sauerlach
Robert-Bosch-Straße 14, 82054 Sauerlach
tel: +49 (0) 8104 448 182 4
fax: +49 (0) 8104 448 189 0
