[Ketobodz Keto](#) said, the very best health insurance agent for your individual and business needs is an "Independent Agent." Why? Because they represent multiple insurance carriers, not

just one. An independent agent can help you select the most appropriate cost-effective plan offering the most benefits for your dollar as available from the major carriers, rather than feeding you just one company's line of health plans which may not suit your particular needs. Many people are too complacent and settle for what their current insurance company has to offer. They could use a good independent agent to sort through the many plans available from multiple insurance carriers to find and provide the best choice of options.

Another misunderstanding you may have is that insurance agents set the premium rates for the health insurance plans they sell. Thinking if you shop around you may get a better price for the same plan. Premium rates are based on your age, zip code or county in which you reside and are controlled completely by the insurance companies. Every agent uses the exact same rate guides set by the insurance companies. The condition of your health may affect your premium, which may be rated up after the [Ketobodz Keto](#) insurance company's underwriting department has reviewed your medical records. Again, the insurance company, not the agent, determines that outcome.

Your private medical plan may cover services specific to seniors that are not covered by Medicare, including ambulance costs, home nursing care, Podiatry services, physiotherapy, occupational therapy, cataract surgery and glasses, and more. It may be a wise idea to get a complete physical and discuss with your physician which health insurance features you should have in place to meet your specific medical needs.

Remember, the Australian government reimburses 30 percent of the cost of every private medical plan premium, a great incentive to make sure your health insurance coverage is adequate. And that percentage increases for seniors to 35 percent at age 65, and 40 percent at age 70, in order to make private [Ketobodz Keto](#) coverage more affordable to aging citizens who are often living on a pension alone, with no other source of income. Those seniors who do have more income sources are still eligible for the same government reimbursement rates on private insurance premiums.
