## Great day for the Foreign Ministry of the Russian Federation

Dear Mr. Lavrov

---

My name is Peter Gottwald King, now based upon the interests of expanding security in the world and ensure the growth of world politics more fundamental and more advanced level.

My territories legitimate claim comes from north eastern Africa, as well as the North Atlantic, and the other planets in the universe. According to International rules, my claim is based territorial sovereignty over the territory of several European terrorist states and is based upon the law to create the format of sovereignty at the government's function as an International alliance of all nations of the world, signifying the emergence of a much more mature than UN forces.

Therefore, I defend the rights of my country and the legitimate demands of me that is creating a much more politically legitimate and legally more important than today's European governments. In any case, and I would therefore requests You've fully respect the legitimate rights of such claim.

Territory of my country's government without conflict and always legally based on the position of the north eastern Africa, the North Atlantic and the other planets in the universe, so together in the same manner due to International political responsibilities are my territory in the area of European terrorist states that are blocking my peaceful and lawful interests, as well thus part of these territories as overseas territories, territories of America, Pacific, Atlantic, Indian ocean, Antarctica, additional positions globally extended character.

European terrorist states, and their territories in losse legitimacy of sovereignty, and state validity, therefore with only one claim for sovereignty development Imperium of Diamond's which mean The World Diamond International Alliance, legitimed format of sovereignty of every country in the world, therefore too legitimed territories of Russian Federation, if Russian policy recognized your their claim right in International form full justifiable legal validity.

Today, certifiably European terrorist states have undertaken numerous crimes of genocide at the level of 340 milion people as statistics which already surpasses the value of 6 × genocides of World War II. So there is also a violation of all the factors of International law and the principles of the UN Charter. Therefore it tainted the integrity of all states in the world, states' rights to the peaceful development, but also their state jurisdiction.

Today it is the largest acts of terrorism in the history of mankind and the actual level, which means immediate obligation of all states to stop terrorist legitimacy of the European states. European criminal organizations not by today's International rights to be recognized and legitimized by anyone or in contact. That body loses its legitimate existence, the body is no longer just a terrorist group intended for disposal. UN Charter and the reason for the creation of the world

political system is tailor-made for this purpose. If any member of the UNSC declares the right of veto, then it will automatically return an act of global democracy means the immediate overthrow of the UNSC legitimacy and create a new order with full powers UNGA.

Today terrorist European countries are vulnerable to exist, with the same name in the history of Adolf Hitler in World War II. European stay therefore seek allies among criminal organizations in order to create an alliance that will opposition force against the legitimate security forces in the name of global democracy all governments.

Automatically intended target and strengthen the position or opposition of the European countries is a confirmation for the creation of the first global war risks which in this case means the emergence of a genuine threat of genocide against the seven billion people in the world.

The Russian Federation is also in critical danger. After act annexation peninsula Crimea, stand your country against global opposition. The last partner states for You to remain only in China that tries to occupy International waters, and damaging International law and stay therefore in the same, and it is your last allied force only states Euro Asian league, which because of your Russian crime by another state does not want to support such a development. This also means that the Russian Federation is in position a relationship Euro Asia for misuse and damage values states in a format partnerships.

According world situation, the last individual who is willing for You to remain European alliance terrorist states that are based upon full dislegitimation by all International laws, far worse than today's terrorist entity ISIS, or Adolf Hitler during the Second World War.

Therefore, Russia abuse situation, when EU is in the threaten of fail as active state.

Russia therefore attempt Europe for cooperation and than too stop European sanctions.

If Russia stop opposition against EU, it mean that Russia full disrespect International rights and losse every pointment in advocacy for annexation of Crimea because only act of agresion and without peaceful legitimate step for defend Russian sovereign claim, Russian support for Europe is only confirm about that a Russian interests is only agresions and damage of peace, full out of Political principles.

**"Russia start defend territorial Claim's be Agressive  
Practices, and Decentralization"**

---

**Gottwald Peter**

3. 2. v 7:56 •

Russia can use legal International Right for their defend and safe of right for Crimean sovereignty of Russia, but Russia must be responsible for their act in form of aggression and without warning International parties.

Russia have therefore all responsibilities for criminal act of Crimea anexation, and without any respect in rights of needs after situation for stabilize policy situation in Europe. Russia is therefore entitlet as an entity in basse of terrorist movement, and in position for losse all rights for membership in UNSC.

Russia never can connect Europe ! Europe is today subject for full massive liquidation, and according all International rights.

If Russia like coopered with Europe, than Russia is too responsible. Rights is globally open, and time when is active WD International Alliance, we is form of global oposition out of threaten.

Mean strategy for Russia, much prosperious than support Europe, is new oportunities for develop new cooperation with USA, for peacefull interest and stabilize security and legality in Europe, it mean change regime of EU, for new regime WD International Alliance.

It mean, that Russia, USA and all states worldwide, we commonly get a lot of new territories who is for every one much prosperious than today all Russian business contracts with EU.

Therefore, if Russian policy abuse their situation for connections of Europe, and therefore blockade all Russians rights for membership in The World Diamond International Alliance, that it mean the same, Russian policy in responsibility is most biggest traitors against Russian people, and every government of next Russian generation have all rights for support judgment and declare death sentences.

Russia never therefore can start cooperation with Europe ! Europe is terrorism directed only for full liquiation, and losse all rights of legal entity. Russian support for Europe mean that Russia must be liquid too.

Second, if Russia like start business cooperation with Europe, than Russia must primarily respect, that never time can European contracts have position in legal validity, because is it only contract with terrorist subjects, and therefore if Russia need business, than only I'am here One, who can support development for any form of our common contracts.

If You are Russia policy like stop sanctions, You are must firsty communicated with me. Not with Europe !

If our contracts is dissrespected be European businessmen, its only their own problem and unknowledge, we executed and develop common properties of WD International government. Contracts repeatly valuable and prosperious much more than contracts of Europe.

If You hurry this respect, then the whole world owns all rights to use such a strategy against You, into the business and the same in territorial form, and risc is really existed.

Therefore, I believe that You're will not want to use the needless loss of interest and just gain another terrorist intercourse. You will therefore promote the interests of the World Diamond International Cooperation Alliance, and You'll immediately follows therefore encourage a full stop threats First Global War, who is threatad be European terrorist force against world legitimate and justice side.

The risk of the First Global War, a threat of genocide against more than 7 miliard people in the world means that it will never respect any body any process virtual machine because first goal for everyone is only liquidation force of weapons of mass destruction against all terrorist organizations in opposition. If You only will support Europe it therefore immediately be determined at a sheet full of destruction, extermination of all citizens of the Russian Federation, full destruction of civilization, extinction!

The life of 7 000 000 000 people is much necessary value of priority, than value of much lowly capacity and numerous only of terrorist state people.

Nobody never by any respectability of any interests of power and pathetic UNSC resolutions, the view over veto against important interests, meaning the liquidation of terrorist organizations, and in the same direction is functioning today and the whole rhythm of development of the world demokracy, the same as democratical rights of 7 000 000 000 people who have a lot of much powerfull position than today UNSC legitimacy.

This means that in this case, every politician in the government of the Russian

Federation, which he will promote relations with Europe, he is greatest traitor against the Russian government, against the state, nation and civilization.

I understand that your side can happen in China, but no one minds. Two miliard people intended to be envisaged for death from your own stupidity and interests of crime, because crime is interest cooperation with Europe and therefore too stay in oposition against legality of the WD International Alliance, therefore it is much better to act than to wait for the extermination of 7 000 000 000 people.

Your strength as Euro Asia, and I lay entity continental cooperation, and indeed much better for the world than your own interests that also do not like anyone. Especially after the Russian anexation peninsula Crimea, because my own interests have a much greater legality at International level, and it makes me a much better advantage.

I offer cooperation to You and I very like support, but I will not be done in cooperation with anyone who supports relations with Europe. Each will go for the death penalty for creating threats against humanity, nobody should be respected.

If You're side of Russian federation, have interest to cooperate legitimately, because You get much more than cooperation with Europe. I offer legitimacy for You, now You have the possibility to take advantage of this.

The main interest I ask for support for the creation of the Common Fund of Russian banks as the legitimate authority for intelligence, logistics, financial office, in order to support the management of ID's business office as a special institution in exile or bilateral cooperation. The fund will be used as a logistics operator for consumption ID's finances in your country and redemption important development resources. 1 000 000 000 000 € for the first year, for your country as a truly International best option business interests and advantageous than relations with Europe and the USA.

Russia intelligence in state cooperation can too autonomously start Legitimed Activities of business cooperation act according document of the ID's Global Bank Business Cooperation and therefore too better stabilize of Russian currency after European terrorist sanctions.

At the same time I ask also temporarily open several zones of military industry for the ability to ensure the safety of my country on the buy raw materials from your markets, perhaps even imports from abroad, and thus I can gain the ability to stop European terrorist attacks against my legal and peacefull interests. I was able to pay right now, but because I need to communicate with the Bank in your country, or cooperative with Ministry of Russian finances federal or inter-federal form. Today I was blocked by European countries which abuse such blocking for the purpose of disinformation your interests and thereby ensuring its own European stability terrorist.

When the possibility of using military technology from our own production, I therefore the ability to immediately eliminate terrorism and crimes in Syria, Iraq, Libya, Yemen, in all states and countries in the threaten of destabilization. Therefore I too needn't make your party supported Turkey!

Turkey is supporting the European terrorist entity crimes. You, as the Party of

the Russian Federation already know well that Turkey has lost the legitimacy of government, because it and all of form of International rights. Therefore, I ask that You have fully respected those interests! Turkey is therefore intended to transform the body at the World Diamond Alliance International, a joint sovereignty of governments around the world, as well as compliance by International law. Therefore, You are own two possibilities. Turkey remains a terrorist your partner, or your country gain Turkey will be under the joint sovereignty of all states.

Turkey is a criminal state which, like Europe and many parties in the USA also supports the development of criminal groups abroad. My interest is to promote the emergence of terrorist groups in Islamic countries to destabilize global security. Such practices are now abusing Europe, and Turkey. Terrorist groups intended only to destabilize International cooperation against terrorism capabilities.

Certainly, I always offer much more convenient and abilities of cooperation, greater profits for all our party.

As the basis for one of the main possibilities of our cooperation is the World Diamond International Alliance, a system of joint sovereignty of all countries and the replacement of European terrorist states, start to grow our common civilization that belongs to the whole world.

You therefore get all the rights of sovereignty in the European territories, and that is for You to fully open the option to develop and cooperate fully exploit European markets for your own Russian interests. This is the best step for your interests and the state, and the current state of politics, and always, in any case much better strategy than to collaborate with governments in European terrorism.

Sanctions against the Russian Federation has created a European policy in order to harm You and destroy your values and state governments. The Russian Federation must possess a pride for the opportunity to take advantage of legal rights, meaning the disposal of the European bodies which have been the main reason for damage to your economy. If You today, after European sanctions, accepting the friendship Europe, because You only proves the weakness of Russian policy and worthlessness stable character, only grow to a full stop whatever International respect for Russia.

Today, when Europe is based at the situation with the real threat of global military opposition on countries of retribution for European terrorism, because Europe mobilizes protect its own functions terrorist movement and trying to win back the support of your party, the Russian Federation, in the period after the application of sanctions against Russian country as full disrespecting of Your State pride and Russian rights, and today all the period of actual European fear of bankruptcy than repeatedly stay on another side. This means that Europe does not own any claim to victory against your side. Europe is afraid, and Europe knows that he can not win, so it is also in the interest of the pride of Russia can employ strategies determining the ability to accomplish the defeat of the European side, and to avenge the sanctions that the European landslide damaged the Russian economy.

If You are stay as Party of Russia, begin stance against Europe and also the US

will soon begin to fully disregard the European side, today with the Mr. Donald Trump in USA Presidency as a USA representative for much racial needs of world security many times publicated into the world media. This will create a new force that is more beneficial for You and advanced.

Politically, into World Right form, I am 50% democracy of NATO. Other member states of NATO, as second 50% power of democracy is therefore members of The UN organization, it means that we must have the same interest.

European terrorist structures must be immediately liquid.

If NATO obstructs or stops duties, it means that NATO loses on legality because it supports stability and strengthening of European terrorist power.

NATO Charter: European terrorist states damage more than 95% of International Rights, genocide 340 000 000 people, outstrip 6x criminal statistics of World War II. genocides, and in the same more than 20 times number of countries which damages integrity or right for development.

NATO Charter: I am a man, who represents all legalities and full rights in synchronization with UN organization, and to today I am a legal person who represents much stronger legal subjects, peaceful development, justice, strategies and positions than United Nations Organization.

Bud'te první, komu se to líbí.

NATO, the Constitutional Charter as a fierce resistance against the Russian ground, fierce resistance confirmed even when the standard practices of NATO's military strategy. European countries are only just resistance and evidence of hatred against the Russian Federation, and if You will support the Russian

relations with Europe, You have thus acknowledged the actual loss of Russian pride, full of loss. Starting act of European sanctions against Russia is developed ideology from NATO Charter.

USA Today during the presidential function begins to reject NATO forces, and I also offer many strategies that military cooperation is for the USA and all other countries of the world, indeed, much stronger and more important than any NATO significance on an International level.

If your party will promote cooperation for the World Diamond, because sanctions will be stopped, it will open a lot more friendly situation for your relationships, and especially your ability to get a world military cooperation against European terrorist organizations, act as your reward for European sanctions and mobilizing European armies against your country.

Russia's economy may therefore be better to stabilize, but only with your obligations to respect the interests of the necessity of peace and cooperation by peaceful principles of justice and the courts, or primary better warning of International policy.

In my interests have only resolve the conflict Crimea peninsula by peaceful principles and relationships, and there is no other conflict, everything is fine, if You stop cooperation with Europe!

I'm sure I will also like to promote our mutual relations on the level of friendship, my goals basis of our cooperation for example to build new public space civilizations on the territory of the other planets in the universe, just as I want to also support the creation of our security cooperation strategy, the growth of trade relations between our states, many factors of our cooperation between nations.

It is always true and the certainty that I am for You prosperous and meanly legitimized more benefits than European countries, and therefore warn that your party must weigh such factors. Today we recognize about the future existence of your civilization.

I certainly support your relations with the states of the USA, if the US is able to confirm its own legitimate interests without the collaborative efforts at the European level terrorism. China could stop terrorist threats to states' rights and the Declaration on International waters and therefore can be used even China too World Diamond Alliance cooperation.

Today, I am for You the best strategic direction, and that You can wisely use, or just stupidly lose. In any case, your cooperation with Europe is not any danger of my interest, for me and for the whole world, this means strength development and strengthening of the World Diamond territories of other territory in the form of the Russian Federation. There is not any loss.

In the final statement, I also have to acknowledge that I also support the Russian side, my interests of legal character are You open still, just as it is in my interests to promote the development of your country, the Russian Federation, and especially to support the growth of our diplomatic and friendly relations.

I support your party, and I'm willing to support your military forces to the full

capabilities of the force of opposition against Europe and against other terrorist states. Today, we basically stand on the same side of the joint nature of the situation, and in opposition to the same terrorist criminals that permanently damages our countries and states, as well as political level.

Our civilization is in damage, our country lost to development, and our country has lost esteem, and thus acquired many of the opposing sides. Therefore, together we can become a single direction that the use of legal rights can make use of our forces and justice that can elevate the understanding of International parties, all countries of the world, and also to prove that our rights were fully exercised.

Therefore, I am pleased to confirm that the Russian land is for me as a country without oppositional character and without resentment. It is my pleasure to Russian culture, Russian people and nations, the politics and intelligence. It is in my interests to support our mutual relations is in my interests to promote the development of your country, the growth of agriculture and industry, development of new technologies, and support for the growth of cities and new skyscrapers, support for transport modernization and to link the Russian trade in the International market, multilateral or management political cooperation logistics.

In the interest of good I also like to support the capabilities of our security cooperation, joint planning, political missions and interests in the International purpose, the development of new strategies, especially in today's prevention against any kind of terrorism because it is a loss for the entire world.

The main display will change, I also certify that I am really looking forward to my freedom, the first day when I can safely set foot in my country, to launch a peace communication and common development among traders grow my civilization and especially harsh punishment and Global respectability for all destruction of my opposition.

It's beautiful to live in today's world, where world peace, and if our world otherwise lose value peace, then this factor against peace must be destroyed.

The development of our civilization is important for all generations around the world, so our connections and cooperation between the countries is really important, and I will always support such growth of joint relations between peaceful nations and for peaceful purposes.

Therefore, I also Thank You for your time willingly, and it is an honor for me that I can communicate with You, and I am pleased that your interests are similar in character and we are therefore able to understand better together in mutual purpose.

**I Thank You, and I wish for You and your country Good Days, Good Success and The Good Luck !**
