

# [Office.com/setup](https://www.office.com/setup) – Download Office Setup

# [office.com/setup](https://www.office.com/setup) - Microsoft Office Setup Download Procedure

- Go to '[www.office.com/setup](https://www.office.com/setup).'
- Go to 'Sign in' section, if you're not signed in.
- Enter the credentials of your Microsoft account and sign in.
- Click on 'Install Office' from the homepage of Microsoft Office.
- Now, click on 'Install/Install Office' of your version or package. [Office Setup](#) will start downloading in the 64-bit version.
- Note: If 32-bit version of Office is already installed on your phone and you want to change the downloading version then before start downloading, uninstall the older 32-bit version and before start downloading click on 'Other options.'

# Office.com/setup – Install Microsoft Office Setup

- Sign in with your Microsoft account, when asked.
- After that, click on 'Run/Setup/Save File' to begin installing.
- Click 'Yes' on the User Account Control prompted menu.
- Office is installing, wait to complete.
- Click on 'Close' when it completes.
- Now, launch an 'Office app.'
- When apps open, 'Accept' license agreement.
- That's it! You're all set Microsoft Office installed and activated on your PC.
