

DropsyncDropbox is astounding as a result of desktop software program that accompanies it - devoid of that automatic and seamless sync, Dropbox would just be One more storage locker.nine

So, It truly is astonishing that its Android consumer doesn't have an computerized sync selection. Plainly, persons want 1, as there are actually innumerable Dropbox sync applications available available in the market. I reviewed a single these back again in June 2011: Titanium Media Sync. Effectively, moments - and my demands - have changed, and i have found a much better app.

Dropsync differs from Titanium Media Sync, in that it provides correct two-way sync to Dropbox. The most obvious gain here is that you could now update a synced file on your PC (e.g. edit a photo), and possess it show up back again on your handset. My favourite usage nonetheless, is a chance to maintain a folder, say, my digital camera folder, in-sync between my several Android units.
