**NOTES:**

This is data collected from visting all trade terminals available. **Pricing has been left off because it is dynamic within the PU.** (S) is what cargo you can PURCHASE FROM the terminal, and (B) is the cargo that you can SELL TO the terminal. I have noticed an error when selling commodities to some mining outpost terminals as well, so plan your routes with caution when selling. **Items in orange** are highlighted because you can only buy them in a few locations, OR only one major location. **Items in green** can only be sold in one location. Please direct any issues to me via Discord.
