

# How To Create Smooth Stone In Minecraft

You can make smooth stone in Minecraft by smelting stone with any kind of fuel. - Smooth stone is among the most sought-after construction materials in the game. - You can also combine smooth stone with iron ingots and a Furnace to make a Blast Furnace.

If you're really desperate you can construct a home from any Minecraft item. Who among us hasn't stayed at most one night in a mud shelter?

But if you want a house that's not an eyesore, then you'll need to use some better blocks, for instance, smooth stone.

## How do you make smooth stones in Minecraft

Two things are required to make smooth stone: a furnace and stone.

You can create a Furnace by filling the edges of your Crafting Table with cobblestone. Furnace allows you to smelt objects using fuel, transforming them into new items.

Quick tip: A furnace requires fuel to melt. You can use coal, charcoal, a bucket of lava, or almost any other item made of wood.

The Furnace is also needed to obtain stone. Stone is a very common material in Minecraft , but you won't obtain any cobblestone when you mine it. You can use the cobblestone to melt it to create stone. For each piece of cobblestone that you melt you'll get one unit.

Once you have your furnace, stone, and all the tools needed to begin the process of making smooth stone.

Start the furnace and place one stone in the furnace. It will create an object made of smooth stone after a few minutes.

## What can you make use of smooth stone in Minecraft

Smooth stone is a beautiful basic block. It is not prone to explosions and has an even shape that makes it a great choice when building a home or fortress.

Smooth stone is an excellent option if you're seeking to upgrade your building from cobblestone or dirt. It'll look much more polished.

You can also combine your smooth stone with iron and a Furnace, to create a Blast Furnace. Blast Furnaces can be positioned within a village, transforming the Villager into an Armorer. They can smelt twice more quickly than regular Furnaces.

Finally, you can create six stone slabs that are smooth by placing the bottom three slots on the Crafting table with smooth stone. These are pieces made from smooth stone that is half the height of the standard.
