

# Steps To Make Use Of The Outdated Launcher

There are sadly some bugs with the brand new launcher which prevent players from taking part in. Therefore minecraft creative servers needed to create this submit to offer steps to obtain and use the previous launcher. Nevertheless, you may report bugs concerning the old and new launcher on the bug tracker (if they don't seem to be already reported) to make sure the devs are aware of them.

The previous launcher could be downloaded on <https://minecraft.web/en-us/download/various>. If the outdated Minecraft.exe launcher shouldn't be working for you, you'll be able to obtain the "Linux / Different" variant. Utilizing this directly to launch the game will present a message that you need to replace the launcher. You'll be able to stop that by launching the launcher.jar file it downloads to the Minecraft information (%appdata%) folder once you first launch it instantly.

The new launcher should have created a file referred to as launcher\_profiles.json.backup in your Minecraft information (%appdata%) folder. Just rename it to launcher\_profiles.json and change the existing file. You may have to login afterwards when you begin the launcher.
