

Giesen W45A Coffee Roaster

The Giesen W45A Coffee Roaster is the second largest machine in our collection, geared towards industrial roasting capacities.

The W45A was developed in 2011, to meet the demands of the market. It has a roasting capacity of W45A 180 kg/h. It is therefore well equipped for industrial purposes and roasting in large batches.

The roasting process itself can be monitored and programmed via the control tower system. This is the well known Roast Profile System, that Giesen Coffee Roasters works with for all the coffee roasters. This roaster operates completely automatically.

The Giesen W45A coffee roaster has a cast iron double walled drum with high performance bearings. The whole machine is equipped with low noise fans and all parts are easy to clean and maintain.

Specification

Capacity
22,5 kg - 45 kg

Exhaust
 $\varnothing 200 \text{ mm} + \varnothing 300 \text{ mm}$
