

# MINECRAFT PREMIUM ACCOUNT GENERATOR

This is the latest version of the Minecraft Premium Account Generator. This update we fixed some bugs that were found in the previous version. Additionally, the generator is now working four times faster. With the help of our Minecraft premium account generator, you'll be able to transform free Minecraft accounts into premium, and so you can play on premium servers. Since a lot of players are abusing this method, we put a limit on the premium generation. You can create a maximum of 3 accounts per day using the premium account generator in Minecraft.
