The King Gottwald Peter,
for protection the Right of People and His Humanitarian mission to the World.

Join The King !

Tuesday, October 31, 2017

Great Day and All Success,

my name is King Gottwald Peter, representative of the Imperium of Diamond's federal government, new government with the rights of territory of the North East Africa base ID's Diamond Oasis between the International Border of republic of Egypt and Sudan, today my right to claim right since 1998 and recognized by the principles of International law with the responsibility of such justice of International Law in its recognition of the Global Democracy of the governments of the countries and states, and on the same issue over the foundations of the national nature state's national political function in International relations and its own state existence and the primary principles of the establishment of the national legality in terms of the responsibility of International criminal law and political customs.

Today, my country's territories, under the UN Charter and the UNGA Declaration, fall under the sovereignty of my sovereignty as de jure, and my government's right to lead full administration of sovereignty over territory, to expand jurisdiction, to grant citizenship, to administer the strategy of civilization development, and development on the International political level.

The constitutional principles of the government and the purpose of the federal exercise are not in opposition to the Charter of the United Nations and the principles of International law and, above all, the government's purpose of government is to support the development of the whole world and the elimination of all the problems of today's peoples. On the part of the government of my country, development is guaranteed only by legal principles in line with the issues of peace, justice, security and the purpose of self-fulfillment to defend the goal of such a value for society and to defend the policy at an International level.

My goal is support development of every country in the whole world, open our diplomatic relations between states and organize common strategical development, when I invite for trades in the values of 1,000,000,000,000 € on bilateral size, meaning new resolution of global civilizational progress and expansion of the modernity and advance of human race.

Bud, in the First, My country's government aims to make use of its own territory for peaceful development and thus to provide support to all refugees around the world to deport any refugees held in one place in my country and thus to build unified colonies that will slow the growth of a new civilization with all civil rights, with all the social foundations and civilization needs of social society.

Since 1998, it has been a federal government plan to provide citizenship and ensure the development of a healthy and full-quality life for everyone who is threatened by his freedoms and justice, anyone who has to live in emigration and his people are displaced, people who are state-owned by a large group in overwhelming discrimination and state persecution by apartheid, as well as people and, above all, children who lose their lives due to lack of food and health care.

That is why a building proposal is created, registered as an economic product of the state recognized as the legal basis of my country's economy, and for the purpose of building a new civilization intended for the growth of education, health, labor market development, social quality, culture and sport, responsible lifestyles standards, enabling all refugees to return their rights to all life needs, health care and maintenance, top-level education of law and justice, family development, and the right to build their own life in a developing society.

My country is therefore open to all refugees, migrants and refugees from all over the world, anyone with refugee status, but also for children who are starving and their countries are not in the economic budget to provide their care.

My country is open for all refugees from all around the world, and my country is therefore strategy of the world response for life of refugees, and the law which defend their lives, and the law which defend rights for my country for development, the Law declared be the global majority of government, and Intelligence of world political operations must have the same responses.

Today there are over 3,000,000 people living in a refugee camp all over the world. Their development in life is weak and a loss for the future of their families, their societies, but also the future nations that accept their citizenship application, and that is why such a refugee camp is only a place for the strengthening of life in a country of growing racism and social disparity.

Every refugee have right for his freedom and self determination, and I give all rights for every refugee to stand and obtain citizenship of my country, escape from all refugee camps.

The first objective of refugee camps is to ensure the future freedom of the people living here, and I allow such offers to be fully International. Keeping refugees in camps is only the

development of a prison camp that robs innocent people about human rights. Concentration camp on principles of the Second World War or dictatorial fascist regimes.

Nowadays, the world's population of refugee camps is actually over 3,000,000 people, they are People in the number of a real nation, those who only lose their lives in captivity in a refugee center, but Each of them has been waiting for years if the foreign representatives of the country's government come to accept their citizenship so that they can start a quality life and support the growth of their membership in the new country of their home.

I am coming today and I am able to guarantee the development of my country, government, constitution, jurisdiction and civilization and society according to all the necessary goals of a responsible state administration policy and in accordance with International standards of rights and responsible principles of the natural duty of the norms of liberty and social and social developmental morals and health, as well as respecting and having no problem with International supervisors and with membership of International organizations in which my goals are to ensure their development on the other, and thus to support the growth of other Member States that maintain their positions at peace.

Some people in the captivity of the refugee camp have been waiting in vain for over ten years, and so their families and children are losing their future to the generations of mankind. You now have a chance to give these people a new hope for their lives because I am giving citizenship rights for everyone around the world and I am therefore willing to accept all the refugees in your countries to ensure that You completely stop Your duty to manage the camps and the need to maintain states Your countries for the purpose of managing the life and population of other states.

If You allow this step, this will bring about a significant development of human rights and freedoms, human dignity and respect for the right of the freedom of nations, and a responsible demonstration of your dignity in the United Nations Organization's rights representing freedom of the nations and their claims for free life and good development.

So, above the foundations of the UN Charter, establishing the rights of the freedom of nations, as the responsible purpose of this organization after the end of World War II, and the abolition of practices of slave possession of innocent people in concentration camps, today such laws are declared by all governments of countries around the world. the duty of the primary strategy of the implementation of world politics, I therefore ask You for your support and the goal of opening the rights of nations and achieving joint execution through the procedure of International law responsibility giving states security for a just and safe step for their nations.

UNGA Declaration on Political and Civil Rights determining the right to self-determination of its own legal status, which also means the right of each member of refugee camps for his decision to accept the citizenship of the ID's government, and therefore every member of the refugee camp always has full rights for his independent decision on his status of citizenship and accept the Imperium of Diamond's citizenship offers.

My country government offers for every foreign country government all rights to use ID's Diamond Oasis land for the purpose of building a refugee camp in line with the new economic strategy and will immediately build camps designed for the reception of all refugees from around the world and allow their immediate security screening, ensuring their urgent treatment and detoxication at the risk of illness, ensuring their vaccination, short-term observation in the isolated company of the operating camp for the restoration of the practice of social practices and morals, and then full release into the public society of the civilization of my country ID's Diamond Oasis, textiles, medicines, education and life needs for each individual, the freedom and right to build own civilizational home.

In the camps of your country, people have to waste their time in constant isolation. In the camps of my country, people immediately live in a civilized space, free and capable of full life development. People do not have to live in a refugee camp, people immediately live in a civilized place that becomes their own home civilization with all the life needs and freedoms.

Your country government has the right to decide, to declare a convention on co-operation with the International crisis of refugees and refugee camps, to work on a decision-making strategy with other states representing refugee camps, as multilateral declarations for the land use of my country for the purpose of global centralization of all refugees, and using the offerings from my party's governments as a government that defines the strategies of civilization development as a center of multiculturalism, with strategies of social unity, always aiming at the basics of their own political visions of the One World diplomatic projects, therefore promoting

the acceptance of every person without distinction of their race, religion, political ideology, social differences, property and society, education, and social advancement, and therefore the government's goal is to ensure the social centralization of the common recognition of the unity of the state and the nation and therefore the holding of a state-owned society in common and without conflicting threats of difference.

If your government supports the deportation of all refugees, my government is always open to accepting all the refugees and ensuring a full-quality life for them.

Intelligence of industry, agriculture and social budgets, according to the systems of function and normalization of the civilization function strategy at the level of the operationally active form of the first phase of standard civilization, will always ensure the ability to use its own flexible resources of resources for dozens of people, up to hundreds of millions of people. Only 14 days in case of necessity of building up resources, and only three days in the case of the full function of the Government Office and the stability of diplomacy at the International level.

Your support for a good and quality refugee life in the country also means a great deal of support for my country's government, so I must admit that my government and state will therefore always appreciate your support for willingness to cooperate for the purpose of helping and stabilizing the government the state of the state, the capacity to develop civilization, and also the retention of governmental power over its own resources and the demands of its own developmental activities.

The government of my country is legal according to all International political priorities, the principles of its own independent territories of 2,062 square kilometers as terra nullius until 1998 when the federal government's claim was guaranteed, since 1998 the validity of the copyright of the economy and finances reaching the values of the developed world and the founding economy, as well as on responsible civilization development plans, together with the development of responsible logistics of jurisdiction allowing citizens to human rights, freedoms and dignity, demands of democracy and self-determination, decisions on state development strategy, ensuring and functioning of society as well as commercial and property ownership of individuals; legal societies according to the peace and respect of good practices and principles and so today with the International recognition of the countries and governments of the countries as an act of recognition for the regular interaction of public communication and sharing of public social networking contributions, meaning the lands of the governments of countries and International organizations under the auspices of the federal government, and ensuring government stabilization in the process of progress and strategy.

I am willing to take steps in peace, in cooperation with the International community, and also with responsibility for developing strategies to enable peace and progress among other countries abroad.

If the Imperium of Diamond's federal government stabilizes, the Federal Government, the Imperium of Diamonds, can use its own humanitarian plans to support and develop cooperation with other governments of countries and states and organizations to stop poverty globally, halt famine, stopping the risks of lack of civilization resources, suppressing illiteracy and mobilizing the development of education, ensuring the development of healthcare throughout the world, and developing all world civilizations to the level of today's most developed countries.

Your help for refugees in your countries is therefore also helping my country's peace-based government, but also the step of giving you support and support for the lives of all children starving with starvation and illnesses without drugs.

Today I, as the Head of State representing the country and the government, provide security for the adoption of all children at risk of famine and I always provide them with the skills for their development and growth in civilization that will provide them with health care, education, but also social foundations and responsible moral and civilization education, and in the same way I want to support the development of Third World countries to ensure their own geography stability to maintain the budget of all living resources and qualities to the needs of all people in the population. I will support agriculture, industry, pharmacy and hospital growth, education, urbanization and the economy.

In accordance with the principles of International law of the United Nations, as well as the purpose of establishing this organization and the natural morality and responsibility of the policies of all governments, the objective is to promote the peaceful development of all founding states and nations, security.

That is why this objective is determined as the main priority of the International Policy Strategy according to the objectives established by International law, the real purpose of cooperation to stabilize the federal government and civilization.

The federal government has its own economic resources that make it possible to gain its own development resources and hence also all the capabilities of organized growth, so it is only necessary to establish an agreement on the transfer of funds between our banks, thus allowing for the growth of common trade between our countries.

The objectives of the civilization development of ID's Diamond Oasis are extensive, with the ability to minimize the annual economic out turn of 300,000,000,000,000 euros value mainly in construction, industry and business services, as well as development in the financial sector industry and fundamentally on the development of new technologies and civilization trends and the much more advanced level of civilization dynamics ahead of today's modernity of the standard of civilization format of other states.

The economy of the direct budget of legal offers of business positions, representing the determining power of GDP, is sufficiently responsible for determining the budget of finance for every citizen of civilization and thus enabling them to attain the ability of their stable life.

Our Bank offices can jointly establish business co-operation and agreements for financial transactions between our states. That is why our cooperation can immediately ensure the full development of essential living resources for more than ten million people within one year of slow growth, and so even in the beginning of a postal country without sufficient water resources and living standards.

Civilization development resources and the goals of developing modern intelligence technologies already guarantee full security for all the resources of more than ten million people, and therefore I am willing to accept all members of the refugee camps in your countries and with children who die of hunger in the first year.

Sufficient capacities are available from water resources plans, food production, health and education development, residential centers and public spaces, as well as markets and development capacities.

Total civilization development over a one-year period will ensure stable capacities for the population Ten million people, skyscraper cities, their own advanced urban infrastructure, commercial enterprises with more than 25,000,000 business-active entities, raw material resources from their own lab production and international mining co-operation, function.

Therefore, I really praise You for Your support and the purpose of cooperation for the promotion of the interests of the world's democracy, recognizing the rights and principles of International rights that determine the political strategies and humanity of the public society.

I ask You for really minimal needs, a few simple steps for the purpose of mutual logistical communication between our authorities and allowing joint administration of the deportation act and the development of a new refugee center in the territory of my government.

First, I ask You to secure the financial transactions between our banks and my willingness to provide You with all the guarantees of the value of the currency and the strength of my country's coin and with the introduction of long-term financial stability regulation plans under the administration of the central bank of the federation and the government of my country.

Stable Bank Transactions with Checks and Telex will be used primarily to stabilize government offices and to provide logistics administration to state and major state institutions. Therefore, it is in my interest in your countries to buy the basic needs of the office, but also to ensure the ability to pay employees to the offices, a currency that is applicable Internationally, and that is why my coins in public society are free of discrimination and public contempt.

Telecommunications, data connections, archive and notariate functions, law enforcement agencies, budgets of practical forms, and central planning management for administration & development.

Likewise, it is in my interests to ask for the right to bankruptcy between the members of the refugee camps of your country, for the purpose of election among the candidates, for the job offers of an official function in my country's government, for the representation of politics, provisional diplomacy and ministries.

This will create our cooperation full of logistic communication at the legal level, and our ability to develop together at the level of active performance will be in our interests as well.

A budget will be created for those interested in federal government citizenship or the budget of all deportees from refugee camps and in the interest of their profession, education, or

interest in education; this will modify the civilization development plan of my country, in the interest of pace, budget of building materials and the scope of International business cooperation and the centralization of performance and use of own resources.

Within a few weeks, a base camp will be built in the form of a civilized refugee camp with all the resources needed for life. Here, at this stage, people gain freedom, and the purpose of their community budget and shared democracy, which cultures, traditions and principles of national society will be created.

People get a free life right now, and everyone has all the rights to their life growth.

Your country governments have the right to win the Nobel Peace Prize, and International Recognition, Pride and Honor in the International Society. Your country is therefore the cornerstone of the history of my country and always has all the respect of my nation.

Our cooperation will therefore always be friendly and always establishing common support for the success and development of our civilizations.

The federal government of Imperium of Diamond's is in the first place to invest over € 1,000,000,000,000 in the IDMD currency into a base for the emergence of a common market between our governments and states, to finance the development of your country and thus to buy productive raw materials at this value of 1,000,000,000,000 € in IDMD signifying the establishment of the common market level of this system of common commercial cooperation in the interest of the rhythm of the strategy of the development of our markets and trade.

Your country still has sufficient capabilities and significant opportunities for its development, your country gains significant positions and new possibilities for your own future, your country is proud to support the freedom of nations and the active validity of international peace law together with steps for the future of human generations and states.

Your country is the model of the responsible state with the right to recognition of pride, as well as enrichment for the responsible exercise of enabling peaceful stabilization of the state and support for foreign countries.

I Thank You, for Your Honorable Government, for Your support in this interest, Thank You for Your diplomatic protection and assistance in organizing matters, and mainly in the interests of supporting the stabilization of my office and the functionality and performance of logistics, and also Thank You for Your willingness to stand in today's world and publicly demonstrate Your purpose and interest in helping humanity, and the peaceful development of relations between nations and the people.

5. Protection of civilized development & Central policy

Autonomous operating system of Source of Live

Marketing Center of social services and raw materials, food and drugstore chain for the consumption of high-density population.

Also, I'm looking forward to my markets will operate and trade chains can economically supply the full dimension of my population using possibilities of the modern system of common business contracts and prosperous cooperation for our party.

It is easy, in the interest of civilization beginning, even with favorable bilateral and multilateral agreements beneficial to both the business side. Support for the establishment of basic business corporations abroad, anywhere in the world, the goal of the corporation is the processing of raw materials for the production of basic social and marketing products, the Corporation for trade with biscuits Corporation for the fruit and vegetable shops for toilet needs, trades on basic consumer products. Possibility to use the system also for the expansion of the pharmaceutical industry in your country through agreements between traders on sharing the market between corporations in your country, and a new corporate ID's.

The new ID's corporation can be based on an investment basis of society, and with business activities in your country and in your jurisdiction, offshore enterprise system. Therefore, financial profit corporations will be used for payment of the founding of financial costs, while at work and administrative operation of the business, paying taxes, and operational needs, paying for a manager who cares about the function and management of company manager called to the employment office to exercise functions of political or business contracts.

The subsequent balance of the profits of the enterprise will be made market in which the government Imperium of Diamond's as the owner of companies abroad, will be from these own businesses in buying up raw materials from their profit and carry them into the country Imperium of Diamond's, along with the strategy of payment for customs services and bulk import .

Some funds may be used for promotion and investment in local development activities of civilization in which business corporations have their own seat and therefore while there is support strategies for the development of your country, or the ability to use the fund for the development of our bilateral and multilateral projects is a special form of division.

Consumer Raw, thinks bars, drinks, fruits, hygienic products, textiles, and other consumer products without long-term durability and therefore as values without sustained investment value products that are at redemption for corporate money because state-owned Imperium of Diamond's and imported for sale in their own state trading centers and compatible trade Market for public social Diamond Oasis.

A formal agreement to promote investment value of business corporations and businesses in your countries, and trade which again promotes the growth of the value of these enterprises in the ratio of consumer population statistics Imperium of Diamond's Diamond Oasis with a plan for 10 million consumers, it means an increase in GDP of your country's strong financial growth and making the basic unit of civilization market, which will be used for future development of your country in case of natural growth of your population and consumption, stronger consumer economy in your country and thus strengthen the investment value of such forms of business corporations which automatically increases a whopping GDP and economy of your country , strengthening growth in strength of your currency.

At the same time, Diamond Oasis could such a deal be used for gain basic raw materials for the survival of civilization and population health, the establishment of basic infrastructure Market and shopping malls for public social company, thereby ensuring a stable pace for the possibility of adopting a new population from abroad, people who migrate, refugees, refugees, children are dying of hunger and people who for reasons of civilization deficiencies must suffer in society as people without gain for the state, people in the form of mere consumption of social financial benefits from the authorities, or those that can only beg on the streets of small finance and coins and therefore they only damaging to look at the quality of your civilization, people who only because of their civil registry causes need your bank to print higher number of coins which therefore cause a weakening of your financial currency and reduced production and profits from

international markets, it is weaker profit for your business corporations and their development, strongly statistically slower development of your civilizations.

Joint agreement is based on a common profit, stable retail chain advantageous for each side and at the same time with the ability to succeed at the level of humanitarian missions and the application of modern principles of the policy of peaceful principles after World War II, and also in accordance with the UN Charter, to promote peaceful development nations.

It's beautiful to live in a world that is stable and prosperous, every one of you own the right to promote the development of such contracts as contract activity political form, or business form, and therefore each one of you and supports the ideology of modern peace and humanitarian resources with global application, is an important gain for you and for your country.

Deport is also permissible. According to international principles and in many cases the jurisdiction of the States, vagrant and homeless people have no right to use public streets for their private life without social principles, and at the same time safeguarding international law that each person's own obligation rights to health and quality of life. Development plan civilization Diamond Oasis is the first year designed for 10 million people.

Today, throughout the world, for reasons of economic differential civilizations die more than 15 million children, more than 500 million people have to live on the street without any financial income persons without any civilizing exercise and social contact, many of these people are just a little children without social life and education, children who must live as a raw material for commercial sex and rape, or slavery without financial disbursements. The federal government Imperium of Diamond's is the entity that owns the legal value of government and state, but because of European terrorist blocking, without an opportunity to steadily develop the principles and standard principles of today's world of peace policies and rules.

Each of you who will support the joint development opportunities, each of you and supports better values around the world, politics, states and public companies.

It's an important step for the whole world.

As one of the basic steps of the investment opportunity is your cooperation and present the proposal before the committee Nobel Peace Prize. The most important humanitarian challenges of today's world and society.
