

GC 12 x40SAW

acid-washed granular activated carbon from coconut shell

GC 12 x 40SAW is a virgin activated carbon which is granular in form. Made from selected grades of coconut shell and then acid washed, it is ideal for many liquid phase applications including the removal of organics from water streams. Its superior level of hardness and low level of impurities make it cleaner than most other carbons and gives it longer life expectancy. Manufactured at an NSF/ANSI certified facility, it is suitable for drinking water and food grade applications.
