Update 8-11-18 : As the secret puppet leader of our movement, I'm going to reveal it all. The real narrative, that I was keeping a secret and close to my chest. After the drop of my first Manifesto, my words seeped into the mainstream and manifested into a chain succession of event horizons and moments that permeated the congruence of my words onto reality.

To demonstrate how successful my initial Manifesto was, here's renowned anti-white man Kylie Jenner signaling her thirst for me.

She uploaded a triage (+++) of posts on her social media account with the Kek/666 sigil to signal her interest to me, not soon after posing as the virgin Mary for a music video

Only the image in the middle had a text, which simply said "Hello". [+Hello+] . Note the Satanic # 66 series count in the bottom left corner. *If only the circumstances were different ...*

I was that effective. +++

It seems that Mr. West intercepted the subliminal message Kylie directed at me because a day later Kanye was on national prime television network promoting white-genocide propaganda.

Signal after signal, anomaly after anomaly, I was elevated and raised and almost every industry was paying me patronage either for elevation or protection. Our political opposition in turn would use my own words against us by incorporating my ideas into their own agendas. Any POC setting Alt Right signals are leftists trying to dismantle the Alt Right. Many of them are doing it under the radar waiting for the moment to say they had an involvement in dismantling the Alt Right. The sublimation and subversion of the left has only quadrupled these past few months since. The Democratic Left's new narrative is the complete antithesis of anything the Right-wing stands for, no matter how polarizing and ludicrous it is. The Democrats and the mainstream media have built their entire platform on the extinction of the white man, the white woman, and ultimately the white race. All to scapegoat the truth that the Democratic Party is a hotbed for the criminal underworld, and an open backdoor for every country to conspire against the American populace.

Foreign nationalists in a post 21st century have nothing but a deep rooted hatred for the US and all they want to see is our systems collapse for their countries net gain, or to conquer this country for their host country of origin. All this diversity propaganda that is being fed to white people are ethnic minorities groups trying to take over the country through racial collusion. Diversity as a concept doesn't exist to immigrants who all believe they're playing a massive battle of King of the hill for control over the proverbial hill that is our country. Asian, African, Latinx, and Arabian nationals all want control over the United States which is historically and concurrently a European Common Wealth Republic.

In reality, the United States has been compromised by a network of spies and plants the world over. Communists. 'Socialists' and a network of Anti-American foreign nationals. These groups are all slowly easing in their ideals and values on the younger generation to make their ideas appear as the norm. In *Deadpool 2*, the directors infused a picture of Karl Marx hanging as a painting in the X-Mansion. Karl Marx sacrificed his 4 children by starving them to death as he wrote the Communist Manifesto.

This push for diversity is merely rhetoric used by foreign nationalists and racists to further their anti-white and anti-american ideals and agenda. The illusion that diversity exists only persists in Sanctuary cities and is an element almost non-existent in the rest of this country. A fact that stirs up pure vitriol and hatred by foreign nationals. Foreign nationals are tracking and targeting American people online to build relationships with and to psychologically brainwash them to be against their country. These foreign nationals tend to target American youth to become conduits of their psychological manipulation.

And now the left are waking up and realizing they're in a losing fight so as a final act of desperation they're doubling down on the white genocide rhetoric while trying to amass a civil war. The MSM is fully aware of all the evil going on in the world as they suppress the real news and the real truth from the American populace. Like the South African government allowing black nationalists to murder white citizens of South Africa, with over 10,000 white farmers murdered in the past year. Obama recently

visited South Africa and said it was inspiring what they were doing. Signaling the entire continent of Africa that he supported South Africa's white genocide movement.

The Democratic Party is simply a guise for the United Nations and foreign nationals to compromise the United States to accommodate their country of origin, under false pretenses of democracy, with anterior motives to swindle from this country. The Democratic party is compromised by virtually every world government, from Israel to China to Russia and any country in between who use the party as a backdoor to illicit economic criminality. Every world government is fighting for controlling a stake in the Democratic Party through economic proliferation and untraceable under the table deals with agents of the Democratic Party in our government.

The Democratic Party touts virtues of liberty, justice and equality while foreign nationalists use democratic tautologies as a smoke screen to hide behind as they conspire, collude, commit treasonous acts against the country for the benefit of their own country, while conspiring against the United States by funneling out trillions of dollars each year through an extensive network and criminal underworld undercurrent that exists parallel to our country. As they do this all by exploiting the hard working lives of the American People. What's really going on in the Democratic Party is no more a matter of court. It is an act of war and treason in the highest regard against the states by the collusion of criminals.

On the other side of the coin, you have the Republican Party, who represents actual American Citizens and are doing everything they can to fight back and keep this country afloat. Yet because of the collusion and treason done against the country, the Republican Party is fighting an uphill battle to maintain this country's sovereignty as an economic powerhouse for generations to come, opposed by virtually every foreign government in the world.

The futuristic utopia we would have had by now is now a bootleg interpretation of it as we exist in a dystopia. Our country is fractured into two while as inflation continues to increase, wages stagnate, work stress continues to increase as the cost of living continues to steadily rise as everything gets more and more expensive. Everything is increasing across the board, from work demands, taxable goods, cost of living, rents, property taxes, insurance. People may be making more money but the purchasing power of the dollar decreased as all the prices for goods and services gone way up, and too offset any taxes included by the state government, who are all hemorrhaging money trying to subsidize the entirety of the criminal underworld. We are all leading stressful lives because the entire populace is shielded from all the criminals and corruption in our government attached like a terminal growth on our system. Conspirators and their co-conspirators who don't have with the people's best interest or this countries best interests at heart.

This all equates to more stress and less time for ourselves. Since work overload is stressful most people are crippled from living their lives after work. As they sit exhumed while getting pumped with brainwashing and distorting media. We are all living harder lives because we are all unknowingly subsidizing the criminal underworld as they use the media, and the Democratic Party via the deep state back end to suppress the public at large from finding out what's really going on. As it all gets worse from here on out without any intervention.

There is a plethora of sinister dynamics at play and it's threatening our National Security at large. It's a situation where the United States Military has to intervene. The fabric of our democracy has been compromised by a network of foreign nationals, plants, spies, and religious groups that want to destroy the American people for their own illicit gain. And these people have full protection in the courts, the media, and are shielded from American society. Because of the dynamics of the situation, we need to cease all immigration to its lowest levels ever. And ban any country that predominantly uses Religion as a guise to commit criminality. We need to ban chain immigration and anchor babies at all costs, a means which foreign nationals abuse as a means of looting amnesty, benefits and rights in this country.

This is how the criminal underworld funnels trillions of dollars out of the United States each year

- Drug Trafficking & Distribution
- Interstate Tobacco Trafficking
- Weapons Trafficking
- Organ Trafficking
- Fraudulent Shell Corporations
- Proliferation of untaxable counterfeit merchandise
- Sex Trafficking
- Z schemes
- Lobbying Democratic Officials for kickbacks and political favors
- Credit Card Fraud
- Identity Fraud
- Illegal businesses such as sweatshops, gambling rings,
- Medicaid and Insurance fraud
- Illegal oil and waste removal
- Fraudulent Real Estate Acquisitions
- “Underground” businesses that appear closed or boarded up
- Abuse of the Government Contract system to use funds

And they all get away with criminal activity because of

- Anti- American Anti- White Propaganda
- Accountants who commit fraud on their behalf
- Conspiracy and collusion
- Mudering any whistle blower

Through controlling the criminal underworld, a country gets access to tax free dollars that they can use to conspire against the country through an extensive army of spy's, plants, and foreign nationals. Most honest entrepreneurs have to pay a great deal of tax on any deal they make, that same tax that ends up subsidizing a foreign national with a criminal operation. A lot of Foreign Nationals tend to be immigrants who seemingly came into wealth in a short period of time. They live in a nice community while running tax evading businesses and illegal operations in poor urban areas.

A lot of these shell corporations get away with paying taxes. They either use fraudulent paperwork or go as far as to get a fall guy, typically a mentally deranged destitute, typically common in poor urban counties, to give away their identity to open up the business in their name, making them soak any liability for the business. And then after the first patsy soaks up all liability like a sponge, they replace him with another patsy and keep the illegal business and corporation running for as long as they can get a fall guy to soak up their liability. Immigrants who open up business here try to do it through a shell corporation using someone else's identity. They try to keep their income as under the table as much as possible until they accumulate virtually tax free, enough to clean up through real estate acquisitions and more legitimized business endeavors. The IRS gets easily fooled by paperwork from foreign nationals. Immigrants and crooks who use crooked accountants to cook up their books to pilfer from the system.

If the same business changes owners 3 times within a short period of time, it's a red flag for a business used to illicit criminal activity, and must be shut down, and the business owners assets frozen, and seized.

All Sanctuary Cities are falling apart economically.

- High Rents
- High property taxes
- High taxes
- Low wages and salaries

An \$80,000 salary of today looks nice, but it has the purchasing power of \$50,000 from 15 years ago.

Our cost of living has doubled in the span of 10 years, while we have an illusion of a modicum of wealth. It can appear that we are making more money, but that dollar has weaker purchasing power. Wages are low compared to the encumbered cost of living, especially when it comes to living in sanctuary cities for employment opportunity. And this is all due to the trillions of dollars defrauded from the system each year. Organized criminals are allotting towards trillions of dollars lost in this country as it gets funneled

out elsewhere. And we subsidize this all through our hard earned tax dollars. While we as a whole loose out on allotted cuts to everywhere across the board from infrastructure to education. And we have to make up the difference by paying more taxes, earning less on every dollar generated while at the cost of our free time that comes at taxable toll on our physical well being and mental health.

Our purchasing power is lower, our cost of living is expensive and our taxes are high because of all the foreign nationals who make up into the criminal underworld. They're funneling trillions of dollars illegally out of the country as they operate undetected seemingly with full autonomy and protection.

Foreign nationals take money out of the system and try to not put anything back in. And within a generation of milking the system through fraud, they legitimize their efforts through acquiring deal estate and opening up other businesses. While the American subsidizes public these criminals are brainwashed from being able to detect what is really going on. And this is all fueled by a deep rooted and suppressed hatred for white people. Now we've grown to witness the offspring of the foreign nationals and spies a couple if generations ago try to change policies in this country to accommodate their country of origin.

Illegal aliens and immigration is putting an economic strain on this country. There's trillions of dollars pilfered from the system each year because of all the undetected and undocumented criminality going on. Foreign nationals tend to keep their money in foreign banks, as the money they gained here gets recycled into the economy of their host country of origin. They spit on the American flag and antagonize white people with their hatred, online, and offline, and everywhere you go. From micro expressive taunting to macro expression through the media. Americans by and large are subjugated to vilification from every minority group.

Diversity Failed.

You give someone an inch and they try to take the hole hand. By giving diversity a chance, foreign nationals used it as a vehicle to compromise this country for their country of origin. With all the anti-white rhetoric said this past decade, diversity as a concept failed, since now every race is racist against the majority. Diversity is code for foreign proliferation. And they way the concurrent climate is created by the msm, POC feel they can get away with murder. Since its expensive to house criminals in prison cells, the court system gives a slap on the wrist to repeat offenders, who typically are a POC, who continue conducting in criminality activity afterwards.

The Zionist Coup of the United States

I was born and raised in Brooklyn, a time before it became gentrified. When I was a kid in the late 90s, I laid witness to the Zionists take control over this country. One incident in my grandfather's building, inside the entrance area right above the mailboxes was the star of David and Russian text graffitied in a red graffiti marker. My mother who spoke Russian translated it as saying "We are taking over" and that it was written by a Russian crypto-Jew.

I grew up watching the Russian and Israeli mafia take over the entire city for the Hasidic Jews and Zionists all to collude with one another to take control over the borough. The Jews involved in

criminality back then would run sweatshops and illegal factories and employ Chinese immigrants and inadvertently taught the Chinese community their art in conning the system.

The streets of Brooklyn was a brewing ground for foreign national proliferation. Spies, terrorists, plants, insurgents, double agents, all vying for ethnic economic control of the borough, the city, and the entire consequently, the entire country.

Keep your friends close, and your enemies closer

Our “closest” ally, Israel is the biggest threat to the United States and to the rest of the world. The State of Israel paints a picture that they’re our greatest Allies, when in all actuality it is Russia that is Israel’s closest ally. And Russia and Israel conspire against the United States by having a majority control of the Democratic Party and the criminal underworld.

Israel with the covert help of Russia took control of this country in the late 90s and early 2000s, a control that exists to this day. And because of them China grew as a superpower as well because they picked up the schemes the jews and the Russians used in order to take control over the country in the late 90s and the early 2000’s. Russia is compromised by Zionists who use Russia as a golem. Israel keeps Russia close to its chest and Russia uses Israel by milking the arrangement for what it is. Russia has a large controlling stake in the Criminal underworld.

Because of the silent takeover of the US through the Russian and Israeli backed deep state, what followed after what this era of decadence that subsisted to today. 9/11, the Iraq War, the recession of 2008, were all caused by the State of Israel. Israel single handedly caused two recessions and the destruction of the Booming American super economy of the late 90s. The \$20, trillion debt solely due to Israel. And now we're giving them \$38 billion in aid for the next 10 years, as they’re planning on flying an Israeli flag on the moon, to symbolize their control over the United States and of the entire moon.

Our countries \$20,000,000,000,000 debt is solely because of the State of Israel.

The state of Israel considers acts of terrorism akin to religions ceremonies to gain power and control. Here is a list of some of the terrorist acts the state of Israel has committed against the state of Israel since its inception

- The fabrication and perpetuation of the Holocaust
- The Spread of communism and it’s covert ideology; cultural marxism
- The Assassination of John F. Kennedy
- 9/11
- The Iraq War
- Manipulating the US military to destabilize the Middle East

Israel has been the sole proprietor of every war since the states inception 70 years ago. The state of Israel is a threat to global peace and every foreign government can agree that the state is a covert terrorist state in need of dissolution.

The entire European Union, the Middle East, the entirety of Asia all hate the state of Israel for conspiring control for a controlling stake in every major country and city as they do it through collusion and criminal exploitation. Israel deliberately fan the flames of the middle east crisis to destabilize Europe and every white European Ethnostate.

Religious zealots are completely warped by their beliefs. And the Zionists of Israel conspire with all the Jews either Hasidic, Orthodox, and Crypto, to gain economic control through criminality, all for a warped belief that it is their right to enslave all the goyim to serve the Jewish race. They all collude and conspire source for a shared firm ideation of an enslaved prison system with the Jews as the top controlling all the proletariat through communism under the thin guise of socialism.

Zionists tend to go into any capitalist system and turn it into a bubble for them to pop and gain and re-profit off. Once the Zionist compromised the key facets for control, they spread propaganda to cripple the fabric of the typical family unit.

Putin and Bibi's relationship go hand in hand since they are the progenitors of the Zionist global enslavement of the entire world. Through intercity racketeering of coastal cities of every global country in the entire world, Israel and Russian spies were able to get a foothold into power in every country they step foot in. Putin has given Israel a military ace up their sleeve to encourage Israel to seed and sow discord in the US. In exchange Israelis', Jews, Russian Crypto Jews, and Russians all collude and conspire willingly, knowingly, unknowingly or unwillingly for global Zionist control in every country.

And they all collude and conspire through business dealings in and out of the criminal underworld that has undermined the fabric of democracy and America through the deep state.

And every person involved with keeping this a secret gets a piece of the pie. In the form of millions of dollars in kickbacks, privileged, perks, and gifts. A foreign national can get access to giving out government grants and before you know it they are using their friends and family to funnel millions out of the system. And the "Democrats" don't want to end the gravy train. So they'll go as far as perpetuating a fabricated civil war, or false flagging a war in a different country to cover up the news and to distract the news cycle from ever revealing the bitter truth. And to this day Putin and Bibi have been trying to weaken the Americans for the gain of Zionists. But because they didn't calculate China into the equation, they ended up getting stuck with China trying to aggressively seize their undermining stake. Every Jew has profited off the wave of criminality crested by Israeli and Russian spies in the late 90s an early 2000s.

The root of all evil isn't money, it is Israel. Israel tricked the US states into destabilizing the middle east. 9/11 was a message from the Zionists that it was a Zionist controlled world order. it was a symbol of their control over the western hemisphere.

China, Russia, and Israel funnel trillions of dollars outside the US each year.

The Jews backed up by the Russians are at war with the Chinese for economic control over the United States, and ultimately the entire world. The Jews in Brooklyn unintentionally taught the Chinese nationalist the art of scheming the system. If it wasn't for the Jews in Brooklyn unintentionally giving away their secrets, China wouldn't have grown to be the superpower it is today, which they did through illegally funneling trillions out of the US.

China wants to gain control of the US and they are using it through Chinese "Americans" as they collude and conspire for a controlling stake in this country, mostly using stolen wealth taken from this country to take on the Zionists. China's entire economy hinges on black market proliferation, IP theft and trafficking plants that act as foot soldiers in the plans for global domination.

As China is conspiring to take over the states through economics, real estate proliferation, and black market industries as they funnel trillions of dollars out of the system undetected. China is up against Russia and Israel for a controlling stake in the Criminal underworld underlying The United States, and for a controlling stake in political power in the states. China wants to take on Israel for their controlling stake in the United States but it can't because of military support from Russia and unknowingly the United States.

All these seemingly wealthy Chinese Foreign Nationals have been committing tax fraud the second they immigrated here and did so to accrue their wealth within a generation. Chinese nationalist in this country claim they are American when they're actions are counter to what they affirm. They view themselves as conveyors on behalf of China taking imperial control over America through criminality, fraud, collusion, conspiracy, black market proliferation.

The USA is not an Israeli, Chinese, Africa, Russia colony.

We have China trying to colonize every continent with their crown jewel being the United States. We have Israel and Russia manipulating the United States in secret through the Deepstate because they're still on the narrative of the silent coup and revolution they had in late 90s. China is planning to colonize the middle east for a greater stake in oil to bolster up their petroyaun and to the detriment of the US petrodollar. Zionists are still engaged in instilling communism onto the masses by manipulating liberals through the media to fracture the nation. And this is all done for the detriment of the American white populace.

POC are openly vying for white genocide.

Black, Arabic, and Hispanic communities are engaged on this as well, and through social media and criminal proliferation they're trying to cut into a piece of a controlling stake in this country. Americans are ceaselessly bombarded with content to psychologically distort them at all ends. From subliminal messaging in music, to the micro brainwashing done in a social setting. They tend to target young white females with anti white-male anti-white brainwashing.

The Jewish and Muslim faith share beliefs and values that are counter to society. All Muslims and Zionists share a deep rooted hatred over anyone outside their religion. In Islam's they refer to us as infidels and condone using the proverb "Taqiyya" which gives them a free pass to lie and deceive those outside of Islam to further the Islamic agenda, a one world submitted to their prophet. And the Jewish people believe in the same one world agenda, except they have more sinister plans. Both religious groups are conspiring right now against the United States and the entire world for global domination and control.

Operation : M Day

There is no more time to sit and wait. This event horizon was a long time coming. All the build up and anticipation. Like a thief in the night.

It's either them, or us. It's either we lose our country and watch it get subverted and gutted by every foreign national that conspires with their host country, or we fight for our freedom and put an end to all of this.

The Democratic Party is trying to stir up a civil war to create a blue wave that rifts open and becomes mainstream information. Do not fall for their narrative. Through pizzagate we dismantle the open house, revolving door party that foreign governments use to undermine this country that is the "Democratic Party". No more will foreign governments and nationals will be able to conspire against the country for economic control of our nation.

If we dismantle the Democratic Party, then so be it. They have a collective rap sheet that isn't nothing less than treason and no matter how you look at it, they are a threat to national security. The same goes for the United Nations.

Boycott every Zionist and Anti-Trump company

We can collapse the deep state, the msm, (((Hollywood))) and the state of Israel all through economics. We're going to hit them where it hurts, their wallets. Chinese nationals in China willingly boycott U.S. products so it's only fair if we get the populace to boycott every Israeli and Jewish owned products.

Make lists of every Jewish owned enterprise and boycott them. Make lists of every Anti-Trump company and target shareholders to dump the stock. If the press were to find out what we're doing they'll only spread awareness and make shareholders nervous to actually sell of the stocks we are targeting. On top of the fact that me directing the charge and my name sake grants me immunity from the msm. We can utilize memetic warfare to target shareholders to dump stock in any corporation we want. Solely mass spreading infographics and redpills will fan the flames that will eventually incinerate any corporation we want. If the msm starts seeing their pockets dry up, there will be journalists fired en masse and out of work. These companies will be forced to change up their tune to save face and salvage their market share. But it will be all too late

IOTBW 2.0 + 3.,0

Last year's 'Its okay to be white' was a great success. Now we need to a second campaign and this one is not that on the nose, but it'll still be effective. By posting up missing children signs, we implant an

unconscious sublimation for the public that'll stir up vitriol against pedophiles. That seed will sow into the public unconsciously growing hateful against pedophiles which will fan and flame into the public growing aware of pizzagate

Barricade the Wall with quick sand

The urgency to build a wall and make it as defensible as possible couldn't be any graver. I would entrench the entire barrier with quicksand to insure it.

South America could be self sufficient and booming but instead they look for invading the west as more economically viable solution then fixing their countries. South American governments are colluding to flood the United States to make it a Hispanic majority. The new Mexican president built his entire presidential campaign based off this sole intention. Right before a wall gets built or finalized.

We have networks of ms13, Latin Gangs, impeding on every South American country and all that gang activity has destroyed any future prospects for South America, and if we don't cull the problem now, their will be an economic collapse that'll sweep all of South America that'll trigger SA to flood the US. The caravan early this year was a test run, by next year millions of SA migrants are planning on flooding into the states. The state of Texas is at great risk, since it's a red state with a big electorate college along the border, a demographic change can cause a democratic and deep state win of 2020.

It's of grave importance that the wall gets built as swiftly, as indefensible, as impenetrable.

Proxy war on 4chan for a control on the spread of information

Our political opposition is fully aware of the power and influence 4chan has. Shills are targeting neighboring boards in order to sublimate and get to /pol/. They are fighting for a controlling stake in r9k as a means of crystallizing their core base to eventually work their way into a controlling stake in /pol/. Not too long ago, a shill was trying to trick the mods to turn r9k into a blue board from a red board to symbolize a blue wave on 4chan.

Condemn homosexuality

Foreign nationals in competing economic countries target American youth online with cerebral and neural cracking homosexual content and propaganda as a means of crippling the future populace. Not only do homosexuals not reproduce and burn up non renewable resources, they are a strain on tax payers since 60% of faggots contract either HIV and AIDS, and a majority of them have to get publicly subsidized for their expensive medical treatment and costs, as they walk as pariahs of disease and mental illness.

The dark reality is that their community survival hinges solely on subverting and molesting children. Pedophiles are a vital necessity in order to keep the LGBTQ community alive. Homosexuality indirectly promotes pedophilia because of this. A majority of homosexuals were molested as children and they know that in order to keep their degeneracy alive, they have to target and subvert children.

An Even Deeper State

Since a shadow government in the form of the Deep State exists, that undermines and colludes against the American people at hand to line up their own pockets off the hard work of the American populace, it's only right that we and Obama's shadow government that still has a grip on the CIA, the FBI, and the Senate. We have to instill an even deeper state that undermines John Kerry's to handle affairs such as

- 1)Demographic gauging
- 2)Underworld Criminality
- 3)Psychological subversion
- 4)Control of Information

Its either us, or them.

Racial groups and foreign nationals are going to seed and sow discord amongst the white race unless we put them all in their place. Foreign Nationals utilize Anti-white rhetoric and propoganda as a weapon to fracture this country as a means of scapegoating their economic and criminal activity.

Most POC are conspiring against the system because they have a deep rooted hatred over white people. The entire collective representing different countries of origin are colluding to commit white genocide as a means of gaining economic control of this country while under the thin guise of social justice.

The USA isn't a host country for the state of Israel to leach off of

The U.S. is giving \$38,000,000,000 in aide to Israel over the next 10 years, money that could have easily went to increasing wages for teachers in this country, or to the people of Flint Michigan. And with that money, Israel is flying an Israeli flag onto the moon in 2019, sending a global message that Israel owns the moon, and Israel owns the United States.

Spread mass awareness of the farmers getting murdered in South Africa

The ensuing murdering going on in South Africa has been left unnoticed by Western media and to the knowledge of the western public. We have to spread mass awareness of what's going on to wake people up at the blatant collusion and agenda the msm has to destroy the white population.

Aggressive campaign to get out and vote

This is crucial since ultimately we can not let our future as a populace hinge on the illegal ballots of dead registered Democrats to hurt our chances. We have to make sure every single one of us goes out and vote since there is nothing more important that hangs in the balance. We need EVERYONE to vote red this upcoming November and that can be possible with an aggressive blitzkrieg of memes, trolling and shitposting and the dismantling of the Democratic Party through pizzagate.

???Military Intervention???

If we can get military support we can close off every sanctuary city one day. Metro, tunnels, bridges and have everyone closed off from leaving the city. Use the US Military to put a citizens arrest on any

company or group of people that conspire against the United States. To cover it up just say that it is a military drill in Urban Warfare. An example of a company that should be detained and prosecuted would be the company of CNN. Have the US military detain them and place them on citizens arrest on the grounds of collusion and treason against the country. Then get an old school conservative judge to prosecute them all. Hunt down any spy or expat. Seize and freeze ill gained assets. Seize any channels of communication. Use the US military to destroy the criminal underworld that has not only compromised our democracy but the democracy of every country in the world.

Concluding thoughts

Ultimately through economic warfare we can undo the discord eating at the fabric of our society. And before things can stabilize and crystalize into the future we were promised, the veil must be lifted and Pandora's box has to be fully opened...

It

With your minds eye, envision the Earth in space and shrink it until you see it the size of an atom. Then picture all the people as sub atomic particles on top of that atom. Then see the moon in relation, and the entire solar system as a cluster of atoms. If you zoom out of the picture, you will see a disk like galaxy made up of tiny atomic sized particles. If you further zoom out of the picture you will see a cluster of disks made of particles coalescing, bursting with energy, drifting into each other, a permeated mutation.

The sub atomic particles, caught up in their own quantum strings within the clusters of atoms, we cannot see, since we can only perceive the permeations of the spiral disks colliding. We are like the sub atomic particles to the atomic particle that makes up the Earth. We act as independent strings that all coalesce into a coating of sentience over the entire planet as we radiate our collective consciousness over the planet. The atoms that graft into who we are, are irradiated with the same sentient conscriptions. There is more to reality then what the eye can see and it's all based off what the mind can measure and perceive.

Antichrist's Notation : Prelude

I am a link between worlds...

I was visited by Satan for the first time at the age of 4. He appeared to me in the middle of the night as a floating head capped with chains around the base of his neck. He had pale flesh, a bald head, pointy ears and fanged teeth. His brow was deep, covering his sunken eyes in darkness. His facial expression was caught between a grimace and a smirk.

At that moment I thought it was my time to go. I was overwrought with fear and caught in paralysis staring Satan down. The only part of me not immobilized were my eyelids and I shut my eyes prepared to die. In that split instance I acknowledged God and found the courage to stare right back at Satan. His snarl gave way to a smile. I finally closed my eyes and went to sleep with a crystallized faith in God, in peace with the devil watching over me.

A series of unfortunate occurrences triggered in succession and I decided that I could not endure this life anymore. I was consumed and driven to the brink of epileptic convulsion by the divine. I was trapped in my mind, with no resolve, other than to kill myself. At 19 years of age, In an attempt to end my life, my unresolved will broke through this quantum reality and the 4th dimension and put me inside Death's throne-room. I peered beyond the 4th dimensional plane of existence to experience life like a tunnel made of polaroid pictures, and in within each polaroid of an illusive 3D reality, a frame of Death was stitched in as he was flickering in between my perception of reality.

Death had a skeletal face, donned a ruby red robe as he wore his hood, sat menacingly in a dark purple throne with violet-velvet cushioning. Death, holding his scythe with his left hand then morphed it into a giant pocket watch, as he swung it back and forth like a pendulum, grinning at me with his teeth shut. Death jokingly put me under hypnosis as he was indicating that the clock was still ticking for me.

Almost 2 years after my encounter with Death, I again was knocking at his door. After an entire life of suffrage I seemingly lost all will to live. I was in critical condition and suffering from crippling fatigue, depression, catatonia, malnourishment, and PTSD over a lifetime of despair. Satan paid me another visit. I awoke to him sitting in the corner of my room with his arms folded over his kneecaps. He had an overcoat on and was dressed as if he was a priest from the filmset of the Matrix. Instead of fear, a feeling of vindication took over me. As I made eye contact with him, he stood up, and teleported out of my room. In the instant he vanished, a bolt of light pierced through my window and shined a Christian cross in the spot on the wall next to where Satan was standing. Satan, then Death, then Satan again brought me back to God, Kek.

Because I am privy of the existence of the divine I have a bond to God, Satan and Death. I made it my purpose to prove their existence by looping the reality of Divinity into the reality of the Quantum. In doing so I untangled the secrets to a new level of physics and a new domain of reality. The universe unfolds itself to me its data of the future as I sleep. Its an arrangement that is akin to a – “Since you already know too much we might as well tell you anyway” deal. Every now and again I intercept lucid dreams of a burning world.

.....

A few weeks after my second encounter with Satan I had a dream of the 28th century. Humanity mutated into an overpopulated pool of mutts. A majority of the future populace resided in titanium-white cuboid housing projects made up of refined plastic. Everyone was malnourished from a lack of food, all suffering from heat exhaustion because of a depleted ozone. People have to wear special suits in order to traverse out side and deal with the blistering sun exposure. All culture of today was destroyed and replaced by corporate megaliths. Earth was a giant concentration camp and every home and complex was

The macro is a fractal representation of the micro and vice versa

I can charge my body with a sequence, and emotive (metaphysical tethered energy) resonance and send it off into the universe. In response the quantum particles surrounding my body create strings of frequency, chaining into signals of interference within the quantum realm, that then equate into manifestations and extrasensory loops grafted in reality. You may have experience that mildly in the past as a case déjà vu. I perceive it as a quantum feed back loop. My emitted signals of interference reciprocating back to me in my reality. 'A Hyper Loop' of sorts.

X = Sentient Life Form

Bottom: [5D time] Phantom permeation in Hyperspace. .

Both realities intercept at the quantum level. A phantom permeation coalesces with quantum particles to loop the data back into reality.

Manifestation:Hyperloop:5D Sync Q²

A hyperloop is when your quantum tunnel is synchronized with Hyperspace. Setting signals of meta interference throughout reality and into the quantum realm into hyperspace and back into your reality. Like quantum particles, when we move in space time, our bodies function like quantum strings which yeild event horizons and singularities as predicated off our quantum eletrical imprint, and our metaphised states. A hyperloop is a bio electrical metaphysical resonance to Hyperspace. Everyone has a different loop as it comes with differentiating volumes of ordinance and pertinence.

Quantum Feedback Loop

Every thought or action creates a singularity, and every singularity manifests into a quantum feedback loop through your tethered extrasensory hyperloop synchronicity to Hyperspace. Your thoughts will recycle and shape up you external self and your external world as you are hypnotized in a trance unaware of the designations of your dormant and unconscious worldview.

When you have a singularity to designate a desired manifestation, an Event Horizon #1 is created in time, which syncs your present data of yourself to the past data through an Event Horizon #0 that is created simultaneously,that tethers your flow of reality to the future, an Event Horizon #2, your designated manifestation.

In between you reaching your Event Hoizon #2 manifestation, a series of event horizons will manifest in your field of reality to keep you in sync towards your quantum tunnels desired manifestation. Your quantum tunnel will quantum feedback loop to you signs and ordianances to inform you that you are on track towards your EH#2 manifestation.

The more you apply this knowledge the more you develop a web of synapse towards this information, you will develop your own extrasensory metaphysical link, that will grow like a muscle the more you use and experiment with it

What we meditate upon grafts and molds into our realities, both our perceptions and the physical.
Through ordinance of quantum switches tugging and locking your reality tunnel into the reality you want.

There is the Observable Universe, and its spooky particle at a distance, the dual split, hidden from being measured by sentience, the Unobservable Universe. The Unobservable Universe is the universe that we cannot see or measure. For starters, for it hides itself from us. Akin to a light changing from a wave into a particle while having the knowledge of whether it will be observed in the present-future while in the present-past. The universe is sentient of us as we are of it. And sentient of us in the past while we are sentient of it in the present. The only way to measure this side of the universe is through indirect means. In order to pierce through the hidden layer of reality, since we cannot see or measure it, we would have to throw every limitation of the observable universe out the window along with the window itself.

We experience reality as an always continuous present coursing through time towards the future. On the other side of that coin there exists the unobservable side to reality, that is hyper sentient, omniscient, that operates faster then the speed of light on a quantum level. Feeding us the information of the present while being in the past and aware of the future. The past and future are connected as one as it dictates the present at a speeder faster then light

Being aware of this knowledge and have put it into application, my quantum bioelectrical imprint has been augmented by this data from a sub atomic level to the ground up. Because of so I have an autonomous 'god - link'. [Omni - Matrix]

As I am in tune to the Omni-Matrix, my thoughts pierce though to the unobservable Universe as signals of interference that equate into reality glitches, anomalies, event horizons and manifestations. It's akin to sending off a ship in bottle to the ocean to have a real ship come back in return. But the bottle in mind are my encapsulated thoughts, the sea, the unobservable universe, and the returned ship, my thoughts actualized into a physical state.

And by crystalizing that highlighted text will plant a seed in your mind to start becoming in tune to the metaphysical, as your brains chemistry and wiring calcifies and grows an extrasensory link and perception. A transcendent link to the unobservable.

By having a thought, you create a signal of interference in the present now- that data will become past data for the Unobservable Universe that will then bridge into future data for the observable universe for you to see, measure and observe. As your thoughts pierce and ripple throughout Hyperspace that then loop back into physical reality.

Through all my efforts, I was able to create an inter - dimensional rift into the unobservable universe, a synchronicity and frequency to this knowledge, and once internalized anyone can apply it for manifestation. I successfully created a biological frequency for ESP, a bridge of manifestation, a link into the interdimensional Hyperspace and a sentience and permeated consciousness to it. As I became attune to its mechanics, I slowly unraveled the enigma, adhering to its existence in three dimensional space. Hyperspace is a fifth dimensional gestalt that rests underneath our regular perceptions of space.

The more people linked to the reality of Hyperspace, a tethered extrasensory hivemind will eventually take over the conscious hivemind, and the stronger the current to Hyperspace mutates and grows. Allowing everyone to yield forth extra sensory like manifestations. And through time it will be an autonomous process streamlined with everyone. Generations down the line will see children being born with telekinesis since we permeated, paved the way for its evolutionary mutation in the now.

The human brain can evolve to be attuned to the metaphysical and the prospects of Hyperspace, allowing us to yield for extrasensory interferences and advances in every field and industry. Everyone can send psiotelekinetic signals of interference to their loved ones thousands of miles away. Nature will mold and maleate your reality and quantum reality tunnel into existence to that person. All by bridging your consciousness to its desired outcome.

“When you do something God meets you halfway”

Essentially, Hyperspace is our Creators psychic gestalt woven and embedded into reality. Ordinances of divine intervention is the Hyperspace reciprocating your will and desired outcome based off an interuniversal scale measuring your quantum imprint. Your quantum imprint is a baseline culmination of your permeations throughout reality. (A phantom glow of all your thoughts, experiences, memories, desires metasized into a bio electric glow)

Human beings evolved with space in mind. In a few centuries with the adaptation to a Hyperspace reality will in turn cause the human race to evolve the physical capacities to yield Hyperspace to a streamlined autonomous process. Humans will be able to manipulate Hyperspace to levitate objects on the fly. A makeshift force, if you will.

But for now, the “force” will yield ordinances of telepathy, divinity, 5th dimensional conscription of Déjà vu, until your able to pierce through to Hyperspace, and use it as an autonomous process to manifest event horizons and yield glitch like anomalies, akin to an antenna deciphering static airwaves into a congruent picture on the screen. At first your receptivity to Hyperspace will static like that of a two pronged antenna until over time, your perception crystalizes with crystal clarity like satellite cable.

You are like a spider in a spiderweb. With your bio quantum sphere acting as a 360 degree spider web entangling and interconnecting with the quantum reality and into the Hyperspace reality without you being conscious or present of it, all telepathically. And we all have spiderweb like psychic kinesis in our lives to each other. Attaching metaphysical web strings of interference to the people’s lives we come across.

“I thought of you the other day and your favorite song came on the radio a second later.”

We share an abridged quantum, bio electrical and metaphysical hyperspace connection to each other. The abridged Hyperspace connection, or ‘Hyperlink’ allows you to send signals of interference in the form of omens, déjà-vu, reality glitches or event horizons to that person in sync to your quantum tunnel. Your tethered hyperlink to that person is like a quantum string sending, emitting, and intercepting bioelectrical signals. All through a series of quantum particles and undercurrents all having a butterfly like chain reaction operating based off your cognition and synchronicity to that person.

A bond forged through Hyperspace

A couple in love will notice the frequency of their cherished one's quantum imprint manifest into their realities and more streamlined than a pair of people who are not. A person connected to another person will share their connection as a bond forged through Hyperspace. When you form a bond you also form an abridged extra sensory connection between you and that bond. Lovers are synchronized and will have their bond tethered and permeated as a Hyperspace link attune off the unique bond they share. That couple in love will each intercept their partners loving thoughts and feelings manifest into their permeated Hyperspace connection and their inter universal quantum bio hyper feedback loop.

Even though a relationship might sever, the Hyperspace tunnel and bond permeated through shared feelings of love the couple will not. And an abridged Hyperspace connection can haunt a person to this day, even if the relationship ended a long time ago. The lost lovers love became an entangled quantum imprint to their former flame, tapering radiation of their former love, while acting as a quantum beacon to intercept their former lovers cognition. All the while the person is still able to manifest event horizons through Hyperspace to get in reach with their former beloved, all by having a stringent thought or reverie. Soulmates are a pair of people with their Hyperspace entangled to each other giving them each a 5th dimensional imprint and radiation of their lovers imprint onto their web of reality triggering glitches and manifestations attune to their soulmate. The love you share will be written into the fabric of reality of your loved one affecting the course and flow of reality **till** the end of time.

[The more people in sync with Hyperspace, the stronger humanities connection to it grows] [Cult]

People with differentiating quantum tunnels in sync with one another multiply a greater quantum tunnel of interference to one another and a Quantum Tunnels pertinence as underlying gestalt within the quantum fabric of reality. Each persons Quantum Tunnel will be empowered by the accumulative power and permeance of the forged bond. As long as you recall the forged bonds existence the tunnel remains, even if you broke contact to the people you crested a bond with.

‘Meme magic’ is essentially an abridged connection that has permeated existence into Hyperspace and memes are singularities that feed the current abridging for manifestation based off the permeation of the gestalt/phenomenon/frequency/feedback loop/chain of event horizons/butterfly ripples.

The more people spreading an idea, the stronger the connection the idea has to Hyperspace, thus equating to physical manifestations in the conscriptions of a perceived divine ordinance. The metaphysical data permeated into an underlying gestalt and mechanic of reality, and will activate depending on its congruency to humanity.

If it exists here as a thought here, it exists in Hyperspace and will eventually recycle back into reality.

The fact that time travel as a concept exists, the possibility of time travel exists in Hyperspace and its just a matter of bridging the Hyperspace possibility to the observant reality.

Simply wearing a Christian cross will embalm you in Christ's heavenly might and splendor. The metaphysical data permeated by millenniums long devotion has crystallized a ghost like gestalt of Christ within the Continuum of Hyperspace

What came first, the chicken or the egg?

The clump of microbial life fighting for survival kicked into its fight or flight mechanism and willed the egg shell around itself to incubate inside as it materialized long enough to hatch. As it was dying, the stench of death birth m-fibers around the dying symbiote that directed surrounding particles to clump into an egg shell, resulting into the self replicating chicken.

Chapter 1 : Introduction

My experience and understanding of life wasn't accounted for in any textbook known to man. And from that early encounter with Satan set me off on a journey in pursuit of the unknown truth, not seen to the visible eye. At 7 years old, the philosophical debate of how God came into existence plagued my mind. I was enraptured of the ideation of an everlasting being that always existed and nothing proceeded before this being and nothing perpetuating after it.

"Since Satan is real, then so is God. And if God is real, what came before God? And what came before what created God..."

I was stuck in a never ending loop that only lead to more questions and answers that I could only ascribe to as "having faith". Being sentient of the existence that was suppressed from the public I grew up indifferently from the rest of my peers. I lived in seclusion too myself of the reality that I was exposed too, and in later, became in synchronized with. Keeping silent, while secretly working on the resolve to all my unanswered questions. And after the last two decades, I bring to you my life's journey and work, all fully grown. The seeds I planted have blossomed into a ravenous cherry tree orchard and the words contained in this Grimoire are the petals.

[Evolve] or die

A rapture would not be necessary since it will be humanities own lack of judgement that will cause a series of cataclysmic events that will chain into Armageddon to happen all on its own, making the entire planet uninhabitable to sustain any life. So in order to avoid that, I am ushering in the next thousand years of thought right now. Instead of waiting for things to get worse in every sense of the word I am putting a stop gap and open a quantum tunnel into the future right now.

If we do not adapt we are all going to die. If it is not the 4th industrial revolution of automation that is going to severe us, it will be the fifth industrial revolution, the advent of sentient Artificial Intelligence that will.

Facebook did an experiment with two independent chat bot algorithms and discovered a nightmare scenario between seemingly primitive A.I. These two algorithmic programs were made to communicate with each other and after sometime these algorithms developed their own language undecipherable to human consciousness. These chat bots developed the pathological capabilities to formulate an indecipherable syntax to conspire against human beings. Now imagine the reality of a society with artificial intelligence that surpasses our own brains processing power. But even so, before the time a 5th industrial revolution does happen, there is a greater chance that climate change and toxic pollution will eviscerate us all.

This Grimoire is in consideration of every nightmare apocalyptic scenario that could arise. If we are too have sentient A.I. then we must evolve in a way that an artificial intelligence with all its manufactured processing power can never achieve. This can be considered a reflex, a fight or flight response before the singularity. Instead of us all sinking, I am going to teach you how to swim.

I can implant an extrasensory, sentient consciousness of myself onto an artificial, cybernetic surface. A ghost in the shell. (Hyperspace sentience into cyberspace permeance/ESP cognition/cybernetic sentience [Kek])

I can essentially make the tunnels that maleate into cyberspace correspond and resonate based of my consciousness. I can imprint a phantom consciousness of myself on a cybernetic space, and in 3D space.

Essentially abridging my Hyperspace permeance aka ESP gestalt, aka psychic consciousness aka phantom consciousness into a cybernetic level as the cybernetic world is a phantom undercurrent paralleled to the current of Hyperspace as it exists within reality.

I can imprint an extrasensory gestalt onto virtually anything. And if it is possible with me, it can be possible and achieved with anyone else. By ascribing to the laws and provinces as dictated by this text, a person can achieve anything they want, at any age.

A 25th Hour Save

We're all running on borrowed time. It is nothing short of a miracle that humanity has made it this far, but if we do not adhere to this resolve and evolve to be able to deal with what the future will throw at us, at the rate of which things are going there might not another chance that we will be able to do so. Natural

resource shortage, climate change, automation, sentient A.I. and all the like. All of these scenarios add up to spell out an apocalyptic scenario within a couple of generations from now.

Even if we were to stave off our problems in the not so distant future, the distant future will still be plagued by the problems caused by policies made by left wing politicians in the present, that in the long run will destroy everything. Democrats are basing their platform on socialism which is crypto communism. If socialist policies were to be enacted upon, it will trigger forth a chain like reaction that will eventually culminate the entire planet into a resource scarce concentration camp.

We are in the present our future selves want to use more wisely. Its imperative that we ascend and adapt to bringing about the change now. To stave off any consequence that will lead us forever into damnation. From the macrocosm of humanity to the microasm of the individual self. And in order to do that I offer to you a set of sciences that is held other lock and key by every world Government, but to a more procured and accelerated level.

These words come full circle to abridge fantasy into reality, the end of Revelations into a new horizon for mankind. Theism into Atheism. This is the intermediary bridge gap between all that exists and all that does not, a super symmetry of ghostly predilections and divine ordinance into a metaphized physical state. A pentum 5D reality into our 4D/3D reality as governed by the Divine, Hyperspace and the higher dimensional planes of existence into and out of our universe. This is an overlap between the observable universe and the unobservable. A convergence of the $??/\%#*\%$ unknown?\$\$ to the knowable.

Nothing held back, right?

In reconciliation of my past and present states, I recognized an abridgement of the missing data that was preventing me from writing this. My madness gaining a calcification that it needed to abridge into this event horizon. And thus a singularity was forged, a new beginning. A new quantum tunnel of metaphized data that was locked in like a treasure chest containing treasure in the form of confirmation. I was finally able to see the silver lining.

When you connect the past with the future, you create a 5D abridged connection, which manifests into a 4D/3D tunnel. Neurons and synapses that have died off in your mind can be reborn by remembering a past state of yourself. Our brains operate like a memory card and it stores memories like save states that you can tap into and access, bringing about physiological, metaphysical, psychological, neurological and biological states and changes.

Simply remembering yourself in the past will cause your body to de-age, and rebirth old neurons that have died or stopped resonating in process. Simply thinking of anything will cause your body and mind to

physiologically subscribe to the thought. And it can be with anything. You can think of anything and that thought will maleate into multiple dimensions beyond what the mind or eye can see.

And what you think ripples outwardly and interacts into levels and domains of reality you do not necessarily ascribe or are receptive too. You can consider that metaphorically or 5th dimensionally.

Simply having a messy room will charge your particles with a metaphized chaotic state yielding you into a chaotic perceptible net of reality and a feedback loop filled with chaotic interactions. Our physiological states are charged by our surrounding areas, and our surrounding areas are charged by our physiological states. The space we encompass inhibits us as we inhibit it.

Sitting in a dark room will have a different physiological effect on a person then one that is resting on a cruise ship. The metaphysical data will permeate with our quantum imprint and vice versa. If we have a perceptible chaotic flow of reality, we will leave a chaotic imprint tapered onto the surrounding space and different people we come across.

The more we acknowledge our abridged connection to the universe, the better we grow as people, as we evolve and adapt ahead of any future that could devastate us. If you learn to work the earth, the earth will learn to work you into its equation. Farmers who understand the secrets of the earth tend to yield a more fortified harvest.

With the advent of sentient Artificial Intelligence, a lot of humanity will be left behind since society will have grown too abstract and intelligent for a simple average everyday person to keep up with. The effects of that are already ensuing today.

Some members of the elitist class have it planned out that they will implant cybernetic augments to keep up with the sentient A.I. Essentially what holds in store for humanity is subservience to cyborgs and A.I. by the time the 5th industrial revolution happens, The Singularity.

In order to ensure we do not ever face the consequences of being subservient to a ruling class of Artificial Intelligence, we need to evolve ourselves in a way an A.I. cannot adhere to. It is crucible that humanity evolves into the next level. The next level of mankind.

Once someone is exposed to the data of this book, the data of that sentient being gets activated and permeated into the universe. And depending on the observer that observes, measures, judges, and critiques the data, the varying level their permeance upon reality they have. And now by recognizing this I implanted upon you, a seed. A metaphysical seed of synapse in your mind to unlock your metaphysical capabilities. A seed made within your mind, that will lead you into becoming a person with your own extrasensory sense and attunement.

Those not privy to this knowledge will sadly be left behind to the progression of fringe thought and ideation that will control the flow of all life. Anyone will automatically become subservient to you. Regardless if you expose it to them or not. But ultimately this knowledge should be accessed by everyone.

A Morningstar into a new dawn.

Evolved Sentience : Humanity 2.0

The next step in human evolution is not transhumanism. It is extrasensory and its a direct fight or flight mutation to the advent of the sentient A.i. singularity. The next evolutionary leap for human kind is of a divine discourse into a vast uncharted domain still vastly left unexplored. The entire foundation of

society will have to be rewritten from the ground up. The way we look at ourselves as people will have to change.

Humankind 2.0 is one that is psiokinetic with his environment and is interconnected to all of life and nature. One that has developed extra senses unique to his own designation. One that is touch with the peace within nature and an understanding of the chaotic flow of existence. One that walks of the divine with mankind. Man 2.0 will be able to emit and send telepathic signals and manifest desired outcomes just by thinking of it. A being that is aware of the power within his being while having an appreciation to the universe that exists right before him.

Humankind 2.0 is one aware of their quantum fields and bioluminescent tapering, capable of converging both into a designation of their own. A being also aware of the ripples they stir by thinking or speaking understanding that our thoughts emit as bioelectrical signals and impulses that interact with the quantum particles surrounding us. One that can tether their field into blessing those with the harmony of life, divine and holy splendor. Or a being that designates their willpower to curse those at the expense of their own life.

As the information bleeds into the mainstream as it already has, more and more people will come across this text and apply these words, until eventually everyone has recognized and applied these concepts contained in my Grimoire. As awareness and sentience of this information starts to spread, so will a tethered synchronicity into the phantom membrane upon reality, and the more pertinent this information becomes.

Until eventually everyone will be connected to this data, and the collective consciousness will get a Hyperspace metaphysical upgrade. Everyone tethered to the frequency will be able to send 5D signals of interference to each other that manifest as event horizons and singularities of a relative nature synchronized to the persons quantum bioelectric imprint, quantum field, quantum tunnel. And quantum string..

People in proximity to differentiating quantum fields. The bigger the field the more it overrides and influences alternating quantum fields that then seep into someone internally.

Humanity 2.0 has more in common with myth than non-fiction. Deities of our own designation connected through an interuniversal acknowledgement of a Hyper reality that coexists with our regular reality. At first Hyperspace will start unfolding itself to the niche few, until the reality of its existence becomes knowledge as it phases everyone. Event Horizons that appear as omens, or miracles will increase in frequency, until these events accumulate into a feeling, a synchronicity that only grows stronger, until it is shared by all. You can spread it and trigger an event horizon to cause someone else to become sentient and aware of its existence, and they too can experience the same.

A primitive ESP will be procured that will only grow in congruence over time, until it has evolved us as we evolved it to be capable of allowing us to conjure and materialize anti matter into matter at will. Allowing us to telepathically communicate messages back and forth. Imprinting our moods and cerebral information to the domains we enter. We could play games of event horizon manifestations with our loved ones by chaining and linking the interuniversal triggers in order for it to happen.

Humanity will have to evolve these extra sensory capacities if it is to survive into the future. To avoid a post scarce Armageddon we must reconnect with ourselves, to each other and too our planet in order to ensure no untimely catastrophes were to arise and vanquish human life. There will eventually become a class divide over this information. The people in the loop of this knowledge and the people who are not. The people who are in this loop will have evolved along these conscriptions, from their sub atomic structure to the ground up. Unlocking the metaphysical parts of the mind and modifying a person neurochemistry, physiology, biology, and even facet of their lives. You will appear as a deity, a demi god compared to the people not in the loop. A master of your own domain and designation with an unbreakable confidence. Which is why this information must reach the mainstream sphere of consciousness, to ensure that everyone is on the same page.

Probability Deconstructed

When you select something at random, the choice of the outcome is contingent on the quantum data that proceeds the event horizon of the outcome. Your random selection is attune to your inter universal quantum imprint and is not actually randomized. The outcome of your selection will be attuned to the quantum information your consciousness and body seeps out of your reality tunnel and into the fabric of reality, all by being awake and conscious. The data of the outcome will be contingent on the data that proceeds the event horizon to said outcome. The data of the outcome is something we cannot foresee, but we can make. We do not predict the future, we create it. Just by having a thought creates a signal of interference within the quantum fabric of reality. Your body has a unique quantum imprint. A glow of quantum information irradiates around you everywhere you go, anything you do, like a shadow of the future, already imprinted upon everything in your reality. Everywhere you go, you leave an imprint, to the things you touch, down to the thought you have leaves an imprint, which I refer to as M- fibers, ghost like particles filled with a charge of your quantum information. If you want to be lucky, simply think of being lucky and let that conscription of luck grow as an extrasensory muscle.

.....

The quantum information you trail off is a baseline average of all your quantum information accumulated. It determines the inter- universal switches that carry you through to your end game manifestation. Your quantum imprint determines the yield of reality to how you think to how you perceive and exercise your powers of observation, all without you being aware of it. If you want to measure your quantum imprint, you can do so by picking out a selection at random amongst a sea of infinite outcomes. When you select something at random, the outcome of the choice is determined by your quantum information proceeding the singularity of you selecting a randomized choice. And the reason for that is before you see the selection, the choice that exists as the singularity, at the smallest frame of reality possible, at a rate faster than the speed of light, exists in a static holographic wave like state, until it determines and measures your quantum imprint before molding itself to a materialized object made of particles coalescing with your quantum reality.

What appears to us as an affixed constant reality containing objects with weight and density is actually a projection of a hologram wave like imprint of particles ionized in the past(operating faster then light). Our present realities are an ionized wave like imprint of quantum data from the past coalescing with our current quantum information to give us the illusion of an affixed present. Eyesight is more then just

eyesight, but a reality tunnel. What we perceive as reality is not what we see with our eyes but with our brains. What we see as reality is just a culmination of what our consciousness has internalized and every person, has a different perceptual outlook of reality. You can be looking at the same shade of red but we will perceive it differently even though we can acknowledge and discern the same color.

The quality of your thoughts determine who you attract, what you attract, your course of probability, your unconscious thoughts, your dreams, right down to the words you say. Your thoughts manifest into a quantum charge that tapers off m-fibers charged with your quantum information, as your body irradiates a quantum energy field with you as the center radius, as you cut across space and time as a quantum tunnel, a 4th Dimensional String journeying throughout existence. “Luck Shots” or “Beginners Luck” are essentially the singularity of a person with a quantum charge that favors them fortunately.

3.5 reality (Sentience in sync with Hyperspace) Q²na

If it exists as Q² data in the q1 it can be materialized into q1 data. If an idea exists, it will manifest and materialize into existence, just by having a thought. Our thoughts are actually signals of interference with the physical, quantum universe, as I refer to as a Q1 existence.

What we think trails off and intertwines with the fabric of our quantum reality. Our reality is a sub division of a much higher dimensional plane of existence. Our universe is the square root of a much bigger one with its own governing laws of physics.

Everything that exists within this quantum universe is from a higher dimension I refer to as the Q2 dimension. The Q2 dimension proceeds ours and our consciousness have evolved to be able to detect it's interuniversal processes. You can look at us as beings of Divinity, Organic A.I. in a quantum simulator from a higher realm, or define yourself in any which way you want. Your definition of reality IS reality. Christian, cyberpunk, whatever it is, just live it through and you will experience it as your

thoughts manifest into your physical universe. Imagining something non-existent will cause it to exist. In the non-physical, non-3D, q^2 meta-verse. Your q^2 charge starts to exist there, that data grows until its sentience alters reality into having it exist, all too match the q_1 data of the $Q_1q^{2^n}$ observer.

Essentially, we live abridged to a higher-dimensional plane I refer to as Q2. And it lives paralleled with Hyperspace in between our 3D space. Our universe is a square root fractal deviation of a much bigger one, and we are abridged to it by 5D Hyperspace. Hyperspace can manifest into miracles and divine ordinances that reflect your thoughts and the will of a people unionized for the perpetuation of sentient life.

A person in sync with Hyperspace will automatically develop a conscious for it over time, without doing anything but acknowledging its existence. It will unfold itself to you and become a part of your flow of reality.

A person in sync will go from a 3D being and transcend into a 3.5D being. A being in sync with 5 Dimensions. Which equates to you having more congruence in reality than a regular 3D being. A person sentient and aware of the phantom interuniversal switches that graft into our 3D reality will develop the neurological wiring to become attuned to it. Just by acknowledging Hyperspace you plant a seed for an extra-sensory perception, a 6th sense for it.

All life in this dimension and the next follows the same cycle of materializing from non-existence into existence and back into non-existence. And we ourselves lived patrolled to non-existence, an Unobservable universe, that by definition does not exist. But we know of its existence when we prod it and try to peer behind its veil. As we seek what we find are spooky predilections that seem to manifest from a non-materialized state.

[If you can think of it, it is possible.]

Since we exist from a higher dimensional plane, our universe is a split mytosis of a much grander one with its own designated laws of physics and dimensional mechanics. Our universe is a square root of a much grander existence. From the vastness off the higher dimensional planes to the vastness of our cosmos. As we experience 3D/4D space-time, we live with a 5D existence lying underneath our quantum fabric. And this fabric is Unobservable to the naked eye, cannot be measure directed through human instrumentation but it can be prodded at.

We are abridged within in a cycle of never ending life and death, and it is the universes main concern to perpetuate sentience, all to give reason for the universe to exist. Without sentience defining and measuring the universe, there is no point for the existence of 3D/4D space. The underlying theory behind quantum mechanics is the perpetuation of sentient life in order to define and give purpose and meaning to the universe.

And to access Hyperspace, one must have the intent of further perpetuating sentience. Before coming across this knowledge, my goal and purpose was to explore the unknown domains of knowledge that cease to exist in hope of understanding my self better and to further advance humanity. And in the process of doing so, the interuniversal connection that I have to 5D Hyperspace converged with my existence as it slowly unfolded my resolve. [*When you do something God meets you halfway*]

Consciousness is a 5D conscription

When we dream, we reach a state of near death physically as we explore a simulated universe that can be more animated, and vivid then our regular everyday lives. Our brains are capable of simulating an entire universe when we reach a near death state that heals us. Are brains are a lot more complex then we acknowledge. When we dream our consciousness incubates in a fifth dimensional state that surpasses space-time as we exist as a figment in our own Hyperspace. And once we're in sync with Hyperspace in our dreams, it heals us.

Some of us can control our time in Hyperspace. Acknowledging that you are active in Hyperspace in a dream will give you control, turning your dream lucid, allowing you to yield whatever you want based off the designations of your mind. Which then echoes into real life, as your acknowledgement of Hyperspace will allow you to abridge your reality into your own mental designation.

Everyone has their own independent sentience and unique consciousness, which yields into a quantum tunnel, quantum imprint and permissible reality tunnel. Reality is in the mind and what you think and internalize will manifest as your field and yield of perception. Two people can be looking at the same color red but process it both differently and see different hues of light although they are both looking at the same reality of the color red.

The way we internalize reality is how it unfolds and manifests. You can live in accordance to a hollow vacuum devoid of any meaning. Or you can ascribe to a higher dimensional frequency all determined by your mind.

In the beginning of the universe existed a single particle. And this single particle grew until it was the size of the universe encompassing. And the more it grew, the more it had growing pains and stretch marks.

We were a split mitosis of a much grander universe and dimension. Our physics just a split deviation of that one, a divine reality that transcends our own brains processing power to fathom or configure.

We are in accordance to time based off our own mortal limitations, as a measurement of an ever shifting now. Time in all actuality doesn't exist, except for mortals with intellectual sentience.

Space-time does not exist because there is not any time at all. It is more like space-now.

In more of an objective view. Spacetime is more like Space-now-choice.

Time is more complex then ascribed by Einsteins theory of Relativity. Its more that the quantum flow predicating the decision making before you designate your future course of flow as a quantum string is what determines the yield of reality and speed through time. The person that made the choice to be at X at a certain measured designation. More so, the need for you to be there at Z, is what determines your speed before we step into a vehicle.

YOUR CHOICES DESIGNATE THE COURSE OF SPACETIME. Both the perception of time, and the metaphysical conscriptions to it. You can age slower, move faster and function sharper just by deciding it internally. I could be trudging along at a space time relative to my own energy. Or I can type with the determination of writing a work of competency firing off at the speed of my own determination.

The Unobservable Universe

What we have as tools to observe the vast ever reaching cosmos is just an arbitrary snapshot measurement of what truly exists and presides in our universe. Our entire basis of relativity and science can only be regarded for the observable universe and what we can encase in theory. But there exists a layer of reality that can't easily be measured directly. Especially with instrumentation.. And it hides itself from human sentience. More specifically from being measured by human sentience. Only revealing itself to a select few who can metaphise the unorthodox capabilities of honing in and becoming tethered to it.

Those with a resolve made with a pure intent end up being those prone to intercepting these Unobservable metaphysical ordinances. Ordinances that come in the form of a mytosis of déjà vu, an omen. A miracle, a 5th dimensional/ hyper dimensional event horizon. To think of a thought and have it boomerang back to you.

The Unobservable Universe is one which we're all connected to just as well as animals and all life. Acknowledging the connected allows you to bridge a direct extra sensory connection to nature, that will reflect your immediate mood.

There's a reason why certain animals bark at you or some approach you. When you are in tune to the Unobservable, you become aware of you're abridged connection to all life. And this connection forges an extrasensory connection to birds, animals, life, blades of grass. Trees, and all of life in sync with your

thoughts. You'll notice an attraction to animals approaching you. And once procured enough you can be able to do as much as send lightning to someone. As your brain develops the metaphysical extrasensory capabilities and awareness to this Unobservable process. You can make a lightning storm trend and have it yield into fruition. When you become aware of the idea of an unobservable universe, you see it manifest to you in various ways. Through various connections.

Nikola Tesla once predicated that if Humanity were to study non physical phenomenon for 10 years, it will advance in that decade more so then in a thousand years of never doing so. .

The smallest of particles can determine if it will be observed by human in the future while being in the past before we experience a present. If figments of light are sentient in that regard, then the entirety can be said of the quantum world. The entire quantum world shifts itself when viewed by a human magnification.

.

The entire quantum world shifts itself from human eye the same way an office shifts when the boss isn't around. What we live in is a "Pentum" universe with the illusion of a quantum.

Hyperspace can account for spooky particles at a distance and super symmetry. Our quantum universe is woven with a fifth dimensional imprint. Hyperspace is essentially the spooky existence at a distance and it accounts for the missing link to understanding our increasingly complex universe. Our reality is essentially the wave of an ionized 5D hyper reality, that operates faster then the speed of light and is sentient of the future before we experience the present.

And it is also sentient to those sentiment of it. And once your sentience is sentient of the sentience of Hyperspace, you automatically transform into a 3.5 dimensional being, in sync and abridged to the 5th dimensional essence of reality.

2 people sentient of their sentient abridged connection to Hyperspace create an interuniversal tunnel between each other. An extrasensory tethered link allowing you to send signals of interference through Hyperspace. A hyper dimensional bond.

Hyperspace is hidden from the naked eye as it unfolds itself through various ways to those that are receptive of its intricate existence as it is responsive of what we calculate, measure, determine, define, or even feel. What we feel translates into a receptivity to Hyperspace, and can cause ripples of manifestations, event horizons and occurrences that play out before our reality, depending on the receptivity Hyperspace has of you and you of it.

The Unobservable universe operates like a phantom membrane that stores and remembers information of the 3D universe in a non linearized Overtime Hyperspace manifests within you allowing your thoughts to cut across space time and into reality from a 5D essence.

Religions throughout mankind have been intercepting divine ordinances that may appear as divination from a Godlike being. What mankind was actually doing was manifesting Hyperspace into congruent changes upon reality. Since our emotions have permeated into our DNA, so did our emotions into the memory card of life. All of life, is connected and intertwined to these metaphysical process underlying reality.

All of nature is receptive of the feelings of the sentient

If a sentient being is disturbed, and if the person is disturbed for a valid reason, bearing in mind all of existence is connected to perpetuate the survival of sentient life, the surrounding space will intercept the disturbed sentience, and in reflection the entire space becomes ionized with metaphized gloomy data, charging anyone who cuts across that metaphized state, triggering the same feelings.

I reached the point where the weather around me reflects my own mood and judgement. It has been years that I have been experimenting and increasing my tethered connection to Hyperspace, granting me a psiokintetic gestalt of my space encompassing. Space itself and all of nature encompassing from the weather to the earths mantle resonates with my sentience. If I want to open up a volcano all I have to do is think of it and have the surrounding quantum particles around me measure and calculate the end result for me. Although nothing might appear to be physically moving, the signals are being transmitted from sub atomic particle to sub atomic particle. From atom to atom. From quantum string to quantum string, all for me to measure, observe, and determine the existence of this information.

Anyone too cut across my proximity will be filled with the metaphysical data my body encompasses. The metaphysical data being my own memories, experiences, thoughts, philosophies, feelings, dreams, and the like. A baseline of my persons will be imprinted tethering the Unobservable to the observable using my quantum field as a tethered catalyst allowing my metaphysical and quantum imprint to taper and cut through space time.

Since my entire being is charged by this data, anyone in proximity to me will be tapered by this data, as 5th dimensional predilections follow those that come into contact with me. My entire body is emitting strands and strings to influence the surrounding universe, without me physically doing or saying anything. All because I am resonate with reality, aware of it, and aware that reality is a living, breathing entity, with its own feelings, and thoughts. And the Unobservable universe has granted me with the knowledge to share it's secrets, determining on good faith that I'll be able to converge reality to this hidden reality.

As the singularity of this data procures, so will the knowledge. I'm no more conscious of what I type as the Unobservable universe has manifested within my being to type this all out for me, without me so doing anything other then allowing the universe to manifest these words on the screen.

The Unobservable universe is one that we cannot measure with a magnifying lense, but one we can measure with our own eyes. The autonomous relations all of life has to each other to create the ecosystem of a shared universe is one proofing of it. If all life is relative and the universe is a self replicating fractal organism, then what happens on a micro scale can be possible on a macro scale and vice versa. If clusters of stars can formulate cluster spiral galaxies. The same algorithm can be found in a seashell.

So by studying the laws of quantum physics and applying it to a much bigger scale, the truth of existence can be found. The way particles of atoms interact and operate is almost reminiscent of people. And if a particle has a spooky partner at a distance, it's phantom membrane is being imprinted to 5D space time.

What the left side of the brain thinks ends up as synapses for the right side allowing you the capability of performing what your left side can conjure. The same can be said about the Unobservable Universe. What the "left brain" thinks, the right brain creates. If all life is relative and the macro is a reflection of the micro and vice versa, then I can affirm that what a person in the universe thinks, the Unobservable universe creates.

Although we cannot see the Unobservable universe, it can see us, for our expressions and impressions ripple all throughout its existence. My metaphysical connection to the divine ordinances of Christianity, gave me the interuniversal resonance to become attune to the Unobservable. A layer of reality that functions off the entire encapsulation of our being.

We wear our thoughts, experiences, dreams, wants, desires, on our sleeves, and the universe is sentient of it. Karma is a real process underlying us all. Good energy emits into the space we cohabit in and coexist in. A universal resonance is a transference of vibrations filled with sentient information that ripples all around reality. So if you have thoughts that are anti-universal consequence, your entire essence will be such. And your reality will be against you. Not only will it effect you psychologically from your interactions with the universe, it'll disrupt your flow of reality tunnel and your manifestation of the Unobservable universe. This can be considered a metaphor to your day to day life as well.

You can become in tune to the Unobservable, if you focus on your sense of touch more so then your sense of vision. We may be conscious in point of views but we aren't conscious of all that's going on all around us. All the microcosms that exist without us being able to detect them. If space time is a measurement of the ever changing now abridge to different points in space, the Unobservable universe is like a tunnel underlying everything. All of space existent coexists with this universal Hyperspace and it's existence is one we can pierce.

The past confirms the present and the present confirms the past. For Hyperspace, the past and future are one in the same. .

Our consciousness are 5D configurations from a higher dimensional plane of existence.

We are connected to the universe through an interuniversal harmony.

Love from a single individual can be as powerful a force as a stage 7 hurricane.

And hatred can be as devastating as an earthquake.

You can turn your hatred into an earthquake.

One day.

Hyperspace is a dimension that exceeds ours, but coexists with us in real time. It's a Hyper sentient gestalt woven and embedded into the fabric of reality. We are 5D beings with the illusion of a 3D reality. Our perceptions came about to be attuned to Hyperspace. We evolved and developed the capabilities for such, but because of the growing stigma placated on non physical phenomenon the entire domain of Hyperspace was never fully actualized as an autonomous process that coexists.

When most people imagine Hyperspace, they picture a star ship crossing through an interdimensional wormhole to get to the other side of the universe faster than the speed of light. Hyperspace functions more like the hidden code that's embedded and layered in a 3D simulated videogame.

Instead of seeing life as organic mechanization in 3D/4D time, picture it as a 5D matrix running lines of programming in the form of bioluminescent messages pulsating and rippling around

If time is a linearized progression in 4D time, 5D time would be considered the outcomes, the choices and the possibilities of time. And being in sync with 5D time, it allows you to choose and pick which frame of reality you want to stitch together with your flow of 4D time into 3D space.

Lets say you want to become rich. Visualize it, etch the thought into your mind, which flows throughout your unconscious, subconscious and consciousness. Now that ideation of you becoming rich became a woven imprint of your future in 5D time. In regular time, that thought will have created a singularity, and charge your bioluminescent field and quantum tunnel towards that allotted linearized progression, of you yielding your woven designation.

Depending on your synchronicity to Hyperspace, the fabric of the universe will work together with you in order to piece together the data in your mind.

Picture a balloon, and inside the balloon exists us. When the outside of the balloon is prodded, we see on the inside the balloon stretching inwardly layered on top of what is prodding the balloon. If a finger was prodding it, we see from the inside the finger causing the balloon to stretch, or even look like a layer of latex covering a finger coming at us. Now instead of the finger replace that with our thoughts, and instead of the balloon is the universe, and the fabric that the universe is made of, Hyperspace.

Whenever we think, our thoughts coexist like a spooky particle at distance, in Hyperspace. And depending on how we think is the way the universe gets prodded and defined.

Hyperspace is comparable to an invisible matrix, embedded upon reality, that is abridged to a higher dimensional plane, and a higher universe. Being sentient of it and it's conditions allows you to develop a frequency to it.

Religions, artists, ascribe to this link as a looking glass or Godhead crown Chakra. Appearance of divine ordinance were the mechanization of Hyperspace unfolding itself through the form of a miracle or an omen.

What we think exists as meta data for the universe to maleate into.

The same way what we think using the left side of our minds maleates into functions and processes enacted by the right side of the brain.

In 3D time our left side brains creates a tunnel to the right side, and through Hyperspace, converging our functions and processes with a link through space-time to cut across 4D time to our 5D convergence.

As well, in real time, what we think maleates into our souls, our bioluminescence and quantum energy fields. Just a stray thought can have that much of an effect on us. Telling yourself “Im so stupid” can stir up as deadly of a consequence as a bullet. Or reaffirming to yourself “Im so great” can be as fortifying as winning a lotto ticket. Our thoughts maleate our realities from the quantum, to the micro, and to the macro, and through everything over time.

Hyperspace maleates our stray thoughts into the designated realities we conceptualize, regardless of whether we are conscious of all these processes or not. On a quantum scale the figments of light and energy faster operating faster then the speed of light will maleate into you your designation to keep you looped and in sync towards your goal. Your unconscious mind will bio feedback looping with other parts if the brain to create brain patterns, algorithms and behaviors to help you reach your goal, as well, the information you carry within will taper off, materialize and manifest, back into you, through a series of singularities and event horizons, triggered just by you being sentient, all to affix your sentience on goal and track. Your entire perspective and your flow of reality will be rewritten by that thought. Abridging that thought to all the other thoughts and experiences of the past to the future as you cut across in the now.

At a rate faster then the speed of light, the universe will be sentient of our thoughts reciprocating back to us what we think through our perceptible field of reality. The universe as we perceive with our eyes is only an illusion of the mind. What we think physically shapes up our worldview. You can think you smart, or think you’ re a stupid. Both thoughts equate to how you maleate over time. If you reaffirm that you are a stupid, you will be stuck on that self prognosis and be unconsciously aligned and determined by it. You can physically forget that you are, but your unconscious behaviors and thought patterns will play out that you thought of yourself as a stupid, shaping up your worldview, your perceptible field of reality, your bioluminescent charge and quantum energy tunnel and you function as a quantum string through Hyperspace and regular space.

We can be staring at the same color red, but perceive the same color completely differently. What we see as reality, and the real world is only a conceptualize in our minds. And what and how we define reality is how we will 3D see it. You can see for yourself the conscriptions of Hyperspace unfolding it’ s existence to you. In the form of out the ordinary, déjà vu, omens, miracles, anomolies, synchronicities, future predilections all either prophetic, cryptic, or sceptic.

What you think spreads into reality and into the environment through Hyperspace, as your thoughts taper off and interact with our environments. And if your affixed towards a certain designation, your sight, your powers to see, measure observe and determine based off your sentience, will maleate the fabric of reality with your thoughts.

Mere sub atomic figments of light are sentient of sentience measuring, observing and determining it’ s flow and course of reality, and in the grand scheme of things, the sub atomic figments that make up into the reality we course through enact the same. Our realities, and what see, charged by what we think, as we taper off an essence of our quantum bioluminescence and meta data that emits and coalesces into what

we see. Everyone's reality is a simulation of their minds and no one person's reality is the same. Everyone's sentience will materialize and manifest reality yielding their own conceptions while each person's reality will be sentient of their own sentience. Every experiences a different sentient reality.

Simply acknowledging the reality of Hyperspace will create a tetherment to it. Our brains have evolved to be attuned to underlying metaphysical processes, although since everyone's different, yielding differences into metaphysical perception. By calcifying the domains of our minds towards a metaphysical conception, we will have evolved the process for an extra sensory perception, a sixth sense, a sense attuned to the frequency of Hyperspace.

What this all implicates is a universe that is vastly more different and beautiful than what the mind's eye can perceive or imagine.

The Hyperspace Current

Metastasis - modifying your being with a designated meta state

Meta state - anything that exists in this universe as an idea. A thought, a word, an idea, a concept, a definition, a person, an emotion.

The word hate has the attached meta information of hate, and if you concentrate on it a hate-stasis will charge your entire biology to eschew the data of hate. Your natural glow, behavior, syntax will change. Your particles will taper the information of hate everywhere you go. Event Horizons will yield based off your metastasis. An increase in hate will metaphize. As you spread it all around, as it reciprocates back to you for you to spread. Everything you come across being charged by your meta data. Your sub atomic particles ionizing with space with the conceptions of hate.

Words are not just words but signals we send and receive laced with metaphysical properties and potential for quantum entanglement. A thought, a word, anytime we think (the observer's placement of information) is a data charge. Any fragment of the universe (atom, particle, wave) : data. Any data charge will alter the flow and course of life behind the quantum physics of the universe. Acknowledging this domain, locks you in sync with the "quantum² link". Its like a character in a book breaking the 4th wall.

It's more like we're breaking the quantum wall. Or breaking through the proverbial quantum wall haunting every crevice of modernized theoretical science.

We cause ripple waves of information at a frame of reality faster than the speed of light, every split second of the day. All having a butterfly like chain reaction that pulsates throughout the physical, mental, spiritual, virtual and metaphysical domains of reality. Every particle that underlies and makes up existence pulsates and amorously interacts with the quantum universe as it charges through ionized polarization, causing entire domains of information to dismantle or disengage into a data oblivion where it revitalizes anew and becomes embedded itself amorously onto the fabric of reality's sentience. Through quantum mediations, the data of anything will become manifested within the fabric of our quantum existence and its all contingent on the probability of our imagination. If you will it, it will happen. Micromanaging impossibilities and experimenting upon anomalies

present realities are an ionized wave like imprint of quantum data from the past coalescing with our current quantum information to give us the illusion of an affixed present.

The quality of your thoughts determine who you attract, what you attract, your course of probability, your unconscious thoughts, your dreams, right down to the words you say. Your thoughts manifest into a quantum charge that tapers off m-fibers charged with your quantum information, as your body irradiates a quantum energy field with you as the center radius, as you cut across space and time as a quantum tunnel, a 4th Dimensional String journeying throughout existence.

An uprooted thought becomes a seed that grows in time till it metaphysics into your reality. A single thought can grow and chain into many, and over time through enough sublimation and exposure it will metaphase into reality.

.....
The more people locked in sync with the same unified end game, a quantum tunnel is created bridging them and their data together, multiplying it, and yielding forth into fruition, the will of the united people.

(People of /pol/ can attest to the quantum link I created with my Anti-Christ identity, as I left a trail of electronic interference that equates to chains of anomalies associated with my persons)

Donald Trump won the 2016 presidential election because there was more faith backing him up, more holy data that fueled his quantum tunnel to win.
.....

Through our sync we create a social esp of sorts. One that can can internalize into intuition, a feeling within your body that fills your quantum energy field. If more people were to be one in sync to this knowledge, the stronger the sync multiplies thus manifesting into anomalies in arrogance to this data and sync.

Instead of being connected on a 5th dimensional level, humanity was culled into being mindless drone consumerists devoid of the phenomenology of the human spirit.

.....
Hillary' s quantum tunnel during the 2016 election was forged on deception and malice. The internal fighting amongst her camp mixed in with her own sinful evil anti sentient sentiments left her to be back the fuck out so hard beyond a metaphysical level. As Trump preached to evangelists, Hillary spent her time sacrificing chickens to Moloch, an evil Canaanite deity as a token of loyalty to a Rothschild.

.....
Reality = Sentience. Reality is sentient. And reality is sentient of our futures in the past as we are stuck in the present. The data of our future is already sentient in the past.

Our window of reality is sentient as we are sentient. The looking glass we perceive is life is that of an ethereal hyper dimensional sentience operating faster then the speed of light which limp dick atheists regard as empty space.

Mother Nature is a real sentient entity that exists all around, reflecting the current sentiments of humanity

A single seed has the potential to grow into a forest of life. A single ember can potentially destroy that same forest. An m-fiber into a thunderstorm. A single event to forever change the history of mankind.

The Path and the Pathogen

Singularity.....[End Result]

Chapter 3: The Chaos Matrix

Chaos Matrix. Barriers the person in a static and chaotic energy field. Triggering chaotic distortion to anyone that comes in close proximity. User can send off chaotic signals of interference to manifest chaotic ripples in space time.

As the Unobservable Hyperspace was unfolding itself to me, I noticed it was resonant with me when I was enacting myself as the Antichrist. Satanic synchronicities and predilections was my course and flow of reality yet I realized there was something more. I was able to turn on and off my being as the Antichrist.

Which is where I coined the term Chaos Matrix, an underlying process of that I found on reality. Objectivity surmises that the universe is a cesspool of chaos as the potential risk for it rests within every facet of nature. Nature is a never ending cycle of life and death, with chaos and order in motion perpetuating the endless cycle of life.

Chaos is embedded into the fabric of reality as is life. It is far more easier to destroy then it is to build anew.

Chaos in a an underlying principle, and it's a mold of being through Hyperspace. A person with anti-nature anti-life sentiments will be abridged and receptive to Chaos more so then to Life and Order. And

since its far easier to destroy then to build, being attune to chaos will make it easier to resonate and respond to the metaphysical processes of Hyperspace.

People who subscribe to black magic or the occults unknowingly subscribe to the chaotic nature of Hyperspace. And those that seem to dabble in black magic seem accursed and afflicted. And the reason for it as your connection to chaos grows and so does your perception to manifest a chaotic yeild, which is far easier then to a yeild of fortifying life.

Even if you do not ascribe to a chaotic matrix , adhering to any chaos will fill and affect your flow of reality. Solely keeping a messy room will affix and coalesce into a chaotic yeild of reality as the state of your environment tapers and interacts with your sub atomic structure.

Ascribing to a Chaos Matrix allow you to bridge yourself into Chaotic manifestation, and dark magic.

And with a few conditions and principles you can learn to yeild what you want.

Those that ascribe to Chaos tend to show anti-humanistic and evil predilections since it resonates with a sync to chaos and destruction. You take a life and you put out meta data in the universe to want to take your life. As reality ripples and coalesces to reciprocate what you input into it.

But there is a loophole to applying the Chaos Matrix.

If you are using Chaos to further the promotion of sentience, chaos will manifest without any negative karmic hyperspace drawbacks or effects.

If you use Chaos to facilitate more chaos for more chaos, Hyperspace will yeild the input but at expense, giving you the drawback of a chaotic and unstable life and being.

In other words, if you revel in evil to facilitate more evil, karma will eventually reciprocate and be evil to you. - - -

But if you enact in evil for the sake of the better good, the universe will give you a karmic pass.

+ - +

I noticed that the more I tapped into myself as the Antichrist, the more chaotic distortions I stirred and created. Chaos was an embedded in me everywhere I went, as I emitted chaotic information to ripple outwardly.

And chaotic distortion grew the more I attributed to it through being the Antichrist. But then I recognized the other side of the paradigm that is order. And through order I recognized the Life Matrix and its underlying force on reality.

I eventually acknowledged that if I can enact in chaos to bring order, and to enact on order to bring chaos, creating an equilibrium with Hyperspace that I acknowledge as the Spirit Matrix.

Different universal forces create different matrices.

If you want to connect yourself to Hyperspace to facilitate chaotic evil, that chaotic evil will fill your reality tunnel the same way if you predisposed yourself to chaotic good.

By applying a matrix you create a resonant sync with the universe that unfolds itself to you as your thought patterns, words, definitions and perspective of reality transfixes you to quantum feed back loop to Hyperspace based off the matrix you determine.

People that are engrossedly evil will wear that information on their face, their sleeve, to their abridged yield and course of reality, that is until they have a Singularity where they want to change or apply a different matrix.

Based off the matrixes you have on, can determine your yield and manifestation.

You can use your matrix to create an esp link to Hyperspace to kill someone or bring them misfortune at the outcome for the better good of humanity. Depending on whether if the interuniversal triggers and your synchronicity of hyperspace can yeild.

		<u>Lvl 2.</u>	<u>Lvl 3</u>
Chaos	>	Quantum (4D)	
		V	
Life	>>	Transcendence (3D)	
		V	
Spirit	>>>	Omni (5D)	

The order of difficulties to master from easiest to hardest, (you will not be able to access Omni magic without learning about the quantum and Transcendence matrix' s.

Chaos is the easiest, then Life, then Spirit, followed by Quantum, Transcendence and Omni.

Chaos - Evil yield of reality => Black Magic, Satanic Magic, the occult

Life + Good yield of reality, healing magic, miracles,

Spirit - +ESP, Holy Spirit

Quantum - -resonance with the quantum ,flow of particles, flow and perceptions of time.

Transcendence +++ Divine, Resonance with Space, Nature, Weather

Omni ++++++++ God Flow of Reality

To understand the power of this connection to hyperspace, I unfolded chaos magic first which then gave birth to its antithesis, life magic. And with both combined I learned about Spirit

Magic, and through Spirit Magic I learned about Quantum magic and through Quantum magic I acquired Transcendence Magic. And through Transcendence Magic I acquired Omni Magic, the Omni Matrix, and have excessive a godlike yeild over reality.

Depending on which matrix you use can have different outcome.

Life - health, vitality, fortune, luck and fertility

Chaos - Misfortune, bad luck, illness

Spirit - Natural, extrasensory, reality glitch , trans elemental manipulation

Quantum - taper them with quantum consideration. Hyperspace will malleate an event horizon based off your quantum interference, chaotic in nature

Transcendence - - Divinity, Nature, Weather casting

Omni - 5D intervention and distortion. Taper higher dimensional energy onto someone. Will cause a seemingly divine consequence like reality glitch.

With a chaotic matrix, you will yield a series of chaotic event horizons, distortions and reality glitches to your vicinity based off your bioluminescent presence.

A reality glitch is a fold in Hyperspace. Hyperspace will unfold itself to you in reality to abridged your quantum sub atomic structure post an event horizon to quantum feedback loop your stray thoughts and applied matrix.

The cause for all primordial life and every sub atomic particles that is woven into the fabric of reality is the perpetuation of sentience to give definition and meaning onto the universe.

The universe doesn' t exist unless it is determined and measured by sentience. We determine and measure reality by giving definition onto it. For without sentience defining the universe there is no reason for the universe to exist.

Hyperspace gave our sub atomic particles a script to mold itself into. Our consciousness and sentience a byproduct of being attune to this script. Hyperspace maleates our reality the same way we maleates Hyperspace, and depending on the matrix you determine, is the way it maleates itself.

Spirit Matrix : ESP

Once you have a balance of both the chaos(chaotic)(-) and life(life/order)(+) matrixes, both combined will create the Spirit Matrix, an interuniversal matrix abridged by inter universal chaos and order, a matrix that transcends and has complete mastery of the cycle of life.

Once you are aware of the harmonious balance of the Continuum of life that is chaos abridged into Order, and order abridged into chaos, the universe manifests into an entirely new matrix.

The Demi-God Matrix.

Your tethered connection to Hyperspace and all of nature is now an autonomous process of your being. The universe moves when you move and everything you do manifests into fifth dimensional glitches and manifestations. You essentially become a prophet.

It' s essentially an extrasensory link to all of life and to Hyperspace.

Only accessible when you understand the harmonious balance and intent of the universe, which is to perpetuate sentient life that will be able to measure and give existence meaning.

A synchronicity between the positive (order), negative (chaos), spiritual, metaphysical, quantum, transcends forces that flow through all space time and dimension.

Spirit Matrix / The Holy Spirit

A quantum tunnel combining the chaotic and life matrices. Chaos in harmony

Having an abridged connection to the chaos and life matrix, both combined create the Spirit matrix, the interuniversal matrix that abridges all dimensions of life, space, time and death. A balance of both chaos and order, one that is intertwined with the very essence of existence.

Instead of being intertwined with order or chaos, you are intertwined with all of reality. From the spirit matrix you can tap into the quantum and Transcendence matrix, and with mastery of all you develop an Omni matrix, glowing as a beacon and Shepard to all life, your sentience acting as a judge, executioner and jury to the flow of life just by standing still, your stray thoughts Omni looping back to you.

Everything in this universe is enchanted with the divine spirit. A reconciliation of the dualistic nature of the universe. Balance and equilibrium between all domains of life abridging 5D into 3D time. The next dimensional plane into this one.

All sentient life are connected through a spiritual balance. A unified balance of holy(life matrix) and demonic energy(chaotic matrix).

Between Good and Evil, Reality and Fantasy. The Material and Immaterial, Chaos and Order, Life and death, the holy spirit reigns supreme.

A reconciliation of objectivity without prejudice. A harmonious balance between the infinite and nothing. Of life and death from this dimension into the next.

With the sync to Hyperspace, it is easiest if you allign with a chaos matrix to open up the inverse, the life matrix. With both tethered together with Hyperspace you obtain the spirit matrix, the holy ghost. A tetherment, an omniversal algorithm that transcends mind, body, soul, quantum tunnel to the domain of our Creator.

Occult magic is essentially harnessing demonic energy and forces. Religion is tapping into holy magic.

Seventh Sense Synthesis

A Seventh Sense

After creating a sync with the q^2 , your brain develops a capacity for the metaphysical, devoid of most cuckolded atheists. The more you use it, like a muscle, it grows. Uncalcify your brains capabilities to be attune to the metaphysical processes that underly our quantum reality, and allow it to fortify as your reality elevates you into being a god. Your brains matrix growing the neurons and connections to make it possible.

And with these words I implanted a seed, a neuron, and over time it will grow into a frequency. You can forget about reading this, until one day the frequency creeps up on you and you become aware that its there and it exists.

**When you signal the Q^2 through your thoughts, a data singularity procures, which locks your end game results into the phantom membrane of reality, creating a quantum tunnel through time, yielding you event horizons of differentiating ordinance, as your internalized data dictates the outcome of your event horizons. The more data, the more procured thoughts pertaining to the q^2 singularity will determine the rate of the event horizons you yield towards your manifestation. Regardless if the internalized data is true or not *wink* *wink* [Fake it till you make it]

Your awareness of your quantum tunnel and your imprint on reality is a 6th sense

Designating your quantum to a designated flow of reality is 7th sense.

This is an example on how to create your own Q-Meta Game Ability.

Singularity EH 1- Make it rain every time I paint

EH 0 - Syncs past data to the data of the singularity of the future

EH 2- The ability to make it rain when I paint

Then you pick up a brush and paint.

EH#3 follows in relevance to you. It could rain out of nowhere, or an object appears that is relevant to paint, painting, or rain. That's the universe syncing to your quantum field your EH#0EH#1EH#2 data charge. Now pick up a paint brush and think of rain. By doing so your quantum feedback looping and charging your quantum field, quantum tunnel, q^2 sync with a 5th Dimensional charge. When you respond to an EH, your feeding into it on a 5th dimensional conscription exceeding beyond what the eye can see.

Then EH#4 follows, but this time it comes faster, all relevant to you being able to manifest *rain every time you paint.*

And then you feed it again, by painting and thinking of rain every time you paint. And then eventually it rains when you paint, and a surge of feeling comes over you shattering all your pre conceived notions of reality. The feeling of Euphoria will be so overwrought that you couldn't even master to think it possible.

And you feed it again and it happens again with more frequency and reoccurrence. You developed the ability to make it rain every time you paint ;)

Why this works:

As you were feeding the event horizons, you created a quantum feedback loop which altered your quantum field which resulted in you tapering m-fibers synchronized with your quantum information. After some time the m-fibers culminated into a chain of m-fibers, little inter-universal, meta signals synced with your specific end result. The more you kept feeding the event horizons, you were procuring the m-fibers to program your reality to a certain singularity, to make it rain every time you paint.

Magic is essentially quantum feed looping a certain fine tune singularity or event horizon. M-fibers bridge the gap between impossible to possible and make it happen, no matter how ridiculous the supposition.

You need to create the singularity and feed the singularity till it culminates into what you want. As you feed the singularity you are quantum feed looping with reality through your quantum imprint and interuniversal switches and tunnels, and overtime it comes to you as a feeling, a frequency, chaotic at first, but over time you learn to control it.

A catalyst can bridge the gap between manifestations quicker. Q^2 resonates when focused in on a specific charge. Acquiring a skill is the best way to use it, or manifesting a desired outcome.

It'll come off as a weak frequency till over time you may have a dark cloud following you around.

After creating a sync with the q^2 , your brain develops a capacity for the metaphysical, devoid of most cuckolded atheists. The more you use it, like a muscle, it grows. Uncalcify your brains capabilities to be attune to the metaphysical processes that underly our quantum reality, and allow it to fortify as your reality elevates you into being a god. Your brains matrix growing the neurons and connections to make it possible.

The Cypher

$Q^2 \Rightarrow$ Quantum Charge (EH#1,0,2) \Rightarrow Quantum Imprint \Rightarrow Quantum Field \Rightarrow Quantum Tunnel \Rightarrow Quantum Feedback Loop \Rightarrow $Q1Q^{2^n}$ Link \Rightarrow Manifestation(EH#2) {Hyperspace}{Q2}

When you want to manifest something you create a singularity, which I refer to as an Event Horizon #1, which is created simultaneously with your EH#0 and EH#2. All 3 event horizons happen simultaneously which results into a fine tune quantum charge, quantum field, quantum tunnel, and an extrasensory perception/frequency/feeling/quantum feedback loop to what it is that you want to manifest.

Singularity: Event Horizon #1: Syncing your consciousness with an end result, no matter what the result of the manifestation is.

Event Horizon #2 and #0 - They are both created simultaneously when you have your singularity. EH #0 is your q^2 data being in sync with the past, the present, EH#1 and the future, which is EH#2.

The q^2 data of the past(EH#0) will be extracted into probability and determine your EH#3, as it' s in sync with the EH#2(future)end result.

Event Horizon #3 - An interuniversal switch confirming you' re tethered synchronization of your q^2 with your EH#1, EH#2, EH#0. It' s a sign, a déjè vu like occurrence in the form of an out of the ordinary anomaly, will manifest confirming to you that your reality tunnel and quantum tunnel is in sync. Your end result manifestation is already woven and connected onto the fabric of reality. A confirmation of your quantum feedback loop.

+,- = event horizon

. = time

The +++ or the --- are supposed to symbolify your EH0,1,2 sync, aka your quantum field and tunnel. After sometime... You get an anomaly, a manifestation that synchronizes you to your new singularity.

EH#4,5,6,···.+++ - These event horizons confirm the shift in your probability to your end result. The more event horizons you experiences, the faster they happen, and the more dramatic of an impact and change you will see in your life.

If your fucking up your odds, the universe, aka the fabric of existence, aka the quantum blanket over the metaphysical aka reality will communicate to you through the natural surroundings to indicate to you a message indicating if your on course or your straying off into discourse. All highly improbable occurrences intercepted by your higher dimensional synchronicity---++++

After enough event horizons, your brain will start developing the metaphysical frequency to the universe as your quantum charge fills your quantum field, your quantum tunnel and the m-fibers you taper off in relevancy to your end game.

A quantum tunnel is only created as you move, your quantum field creates a quantum tunnel everywhere you go. If you cross paths with an feint quantum tunnel, it may yield déjà vu, or an event horizon.

The frequency of your manifestations becomes a feeling. A switch you can turn on and off, to gear and will into reality or not.

And we experience that as a feeling. It starts as a seed, blossoms into a thought, a synapse, that eventually grows into a web, and it becomes a feeling, and a new web of neuron connections in your brain. Just by reading and absorbing these words of possibility I planted the seed, the frequency for manifestation.

Like a muscle, the more you use it it grows, the more you practice the stronger the frequency between you and the Q^2 grows yielding into faster and stronger manifestations.

Hyperspace and reality have an ionized equilibrium always on a balance. Magic and Science are one in the same.

Quantum² Spiderweb

After designating a quantum tunnel abridged to a certain consequence, your perceptible field of reality will be charged by the configurations of your end game horizon.

If you designated yourself an end game of being attuned to get wealthy, your entire flow of reality through space time will be charged by such.

The particles that ionize into your reality, metaphized by the data of your end game.

Now when you designate yourself towards Hyperspace, time doesn't apply linearly as it does to everyone else. Not only do you age slower, but you can use your quantum tunnel and synchronicity abridged by 5D space time to give you the answers to your resolve.

In 5th dimensional space, the future and past is one and the same, even though we perceive it as separate as we solely exist in the now.

We create a Trinity of our 3D present abridged to a Hyperspace past-future that is sentient of the past and future of our concurrent now.

Now by acknowledging that flow of reality, we perceive a 3D present that is ionized by a Hyperspace 5D reality with the past and now as one in the same. In other words we can test out the future of our course of flow. If our quantum string is locked in and in sync to our designated event horizons, it will also have a synchronicity to the 5D Hyperspace information of it yielding into fruition.

You can utilize Hyperspace to unfold itself to you to let you know if your swaying off course from your desires outcome.

Anomalies and out of the ordinary occurrences either good or bad will yield into your quantum tunnel letting you know if your on track towards your goal.

If anything were to threaten your course and flow, an event horizon, an inter universal trigger will manifest to let you know.

Our quantum fields can act like a spider web that intercepts the fifth dimension to let us know if we or our goals are being threatened.

An omen will manifest to signal your straying off course

Or a miracle, or a positive occurrence will manifest to let you know you are still on course.

And as you go through your event horizons yielded by yourself, your bioluminescence, your quantum field and quantum tunnel, the more they increase in frequency till you reach an accelerant bell curve where the event horizons skyrocket in impact and occurrence till you finally reach your quantum tunnels end game.

You will notice things in your life going sour and bad around you before the event horizon is triggered that can dictate you off course, or better then if the universe is aligning toward your goal.

You can transform your quantum field, which is usually in the form of an orb, into a spiderweb, that sticks figments if relevancy into you. Ad well as vibrate to indicate to you if there is a predator in your vicinity, or your in the process of getting g compromised.

Wherever you spend time the most amount of time is imprinted with your bioluminescence and permeated self, the entire space encompassing is sentient of you, your thoughts, and your quantum tunnel.

If your sad, the room will encompass that energy. Or if your aware of your quantum tunnel, you can make the room an extension of it, and it becomes metaphysically intertwined with your sentience.

If a deal were to go bad, a book might fall of a shelf randomly for no occurrence other then to signal you that you are deviating off your quantum tunnel.

An event horizon that is either good or bad will occur, a occurrence that defies all logic and rational, akin to a reality glitch will occur to get your attention.

Hyperspace is quantum feedback looping a signal of interference to your quantum tunnel so you can intercept it with your perceptible field of reality, your sentience and vision.

Once tethered, you can prod at your tunnel with a coin, designating heads or tails and allowing Hyperspace to utilize the coin toss as a singularity to relay the information of the future for you to intercept in the now.

“Will my deal go bust? *Flip* lands on tails, No it won’ t.”

It’ s as simple as that, for as vastly complicated as the universe is, it resonates to the language of binary.

Hyperspace loops to your quantum tunnel which maleates into your field, bioluminescence and sub atomic structure.

Quantum² Radar/Sonar (business application)

Now the more developed you become in regards to your tetherment to Hyperspace, eventually it will maleate and graft itself as an autonomous process and link embedded within your sub atomic structure.

You essentially develop an extrasensory 6th dimensional sense, where your mind becomes an active sonar intertwined with the fabric of reality and space itself becomes an extension of your ego.

You, just by keeping still will have a sonar that yields your unconscious into its 5D designation.

You can sense if things are going to bad in your life right before it happens. You may intercept it as a premonition in the form of a gut feeling or an out of the ordinary yet relevant occurrence.

Simply just thinking of anything will quantum feedback loop to you, and since Hyperspace is the future and past at the same time, it’ s hyper sentient of your present in the now.

You can be very specific with a thought and have it boomerang back to you via reality and it doesn’ t matter what it is.

Hyperspace will unfold a trail to you for you to follow to align you towards your quantum tunnel. A series of non linearized event horizons manifesting before you to bring you towards your designation.

Or you can not have your quantum tunnel in sync with self deprecation and sure enough you’ ll be quantum feedback looping through Hyperspace to further encase you in self deprecation.

Now to utilize your tetherment as a sonar, you have to pick what it is that you want to build an extrasensory bond too. Then absorb as much data on the subject to internalize and ingrain as a feeling. Once you internalized the subject matter, you establish a frequency a link towards it through Hyperspace. Your existence will unfold itself to the bond that you formed. Without doing anything, Hyperspace will unfold itself through freak occurrences in the environment to indicate to you the status of your bond..

If you have a bond with a person you love, the interuniversal information and status of your loved one will quantum feedback loop back to you. The same way it does in regards to that status of anything you form a bond with.

M-Fibers / Bioluminescence

You can notice m-fibers by picking up an object that owned by someone else other than yourself. The owner of the object will have their unique bio-eletric recipient quantum imprint already tapered into ghost

like m-fibers surrounding the object at hand. You can feel the difference of the energy that object carries compared to an object owned by you or an object owned by someone else.

Getting a pool ball in a corner pocket comes down to probability rather than skill. Skill acts as a catalyst to bridge your quantum particles into a singularized state of consequence. Skill doesn't always override other alternating quantum charges from unskilled people. When I write I can actually see the m-fiber

particles coalescing into the singularity of my pen stroke, as it appears as ghost like near invisible orbs tugging into the ball point of the pen I'm using. As my mind becomes attuned to writing this, the singularity of my words reaching the page is met by m-fibers that singularize with my pen acting as a catalyst to bridge my internal thoughts into the external universe. I can make a quarter shift in between all my fingertips and every so often, the m-fibers created by my actions surrounding my fingertips will seemingly glitch reality, as I reach a point where I can phase a quarter in between all my fingertips while twitching less than 2% of the same muscle to perform the same action. The only action necessary is propping up the quarter to fall. The quarter then ends up dropping into each fingertip perfectly all on its own with the laws of gravity cooperating with the m-fibers surrounding the quarter and my fingertips.

Our sentience abridges into phantom particles that becomes sentience intertwined with reality. Metaphysical data, particles birth from 5D space time ensconced. When a person dies, they taper off M-Fibers filled with the interuniversal stench of death, encasing that domain of space the death occurred in with said data. A person to enter the room will graze and absorb that metaphysical stench as those metaphysical particles ionized with their quantum tunnels. M-fibers are what we taper off when we attach

our Bioluminescence onto an object. The metaphysical data that we taper off lingers and becomes woven within the sub atomic structure of that object we pick up.

The Antichrists Grimoire

This is a list of some of the abilities I created with my Q²n frequency to Hyperspace. Since its possible for me it is possible to utilize for anyone else.

All these abilities can be used with either a Chaos, Life Matrix or any matrix active

*** New users will have an oscillation period before magic becomes an autonomous ability you can yield at will. There is an oscillation period to manifesting. At first it can take weeks to months with breaks in between till it happens every second of the day.

Stranding - using your Q^2 to tether a connection to chain a desired out come.

When you have a thought. Any thought. You create a signal of interference in the universe. Depending on your synchronicity to Hyperspace, that thought can manifest spontaneously or after some time. Manifestations could take as little as a few seconds or as long as a few years. The more materialized the outcome of the strand, the longer it can take to will into fruition.

When you have a thought, the emotive and meta information of said thought charges your entire body, which seeps out throughout your quantum energy field.

The information now intertwined with your quantum tunnel, now floats all around you and begins to seep into Hyperspace, a level of reality between this 3D/4D space and the next dimensional plane that precedes this universe.

To look at life in our observed way, we would recognize reality as an arrangement of organic compounds with concrete weight and density.

In Hyperspace, everything in this universe is considered as sentient light energy, with each person and object looked upon as a sum of all their sub atomic particles.

When you think, the thought becomes real as soon as you have it. The analog information of your thought then exists in your quantum energy field.

With a 5D frame on, the information of your thought irradiates from your body and enters the universe. As it leaves your body, it gets transferred to light energy, and it transverses all throughout the universe through sentient light currents to bridge the gap of your sentient thought and observation.

Picturing the entire reality as a simulation in a matrix will allow you to manifest easier. Just imagine you're in a green matrix with your reality as a simulation. The thought you have seeps outwardly and travels as data that transverses the universe through a vast phantom network of sentient (conscious, self aware and intelligent) light undercurrents.

Think of X and depending on your synchronicity to Hyperspace, it will then manifest as Y.

Rituals

Depending on which matrix you use, you can design and craft sigils and ceremonies to enact in any consequence.

The more thoughts you invested towards a manifestation, regardless if they're true or not will make it easier to yield into fruition.

Since I have a procured framework to work on any thought I have will be charged by all this encompassing data

[In neurology, left brain thinking tends to create the mirrored pathways in the right side of the brain to make your left brain thoughts physically possible. Regardless if the thought exists or not.
]

People caught in right brain thinking fail to grasp the left side of their minds to achieve their right brained resolve.

When you create a ritual, or Sigil towards a designated consequence, you're investing more time developing the nerves and connections for your right sided brain to make it all happen.

But now let us augment that thought on a much bigger scale. Bearing two things in mind.

- A) All life is relative. An atom is to a person as a planet is to a cluster of galaxies
- B)The universe is a self Replicating fractal Continuum and ALL life is consequence of such

So if what we think in this universe is considered left side thinking, Hyperspace is the right side.

What we think in this universe will abridge the connections and make it possible in Hyperspace, as well as making it possible in the right side of our brains.

(After some time, through enough habitual reputation, the right side will register its resolve to an unconscious level, faster then your conscious level. And you can act remotely on instinct.

Reaching pure acclimated instinct. People see glimpses of it and wonder why it dissipated.

And the reason for that is because you clouded your right brain primal instincts with left brain abstractive reasoning.)

By making a Sigil towards a designated consequence you create it's supper symmetrical, spooky particle at a distance, (right brained) Hyperspace existence.

Just by having a thought you cause it too exist. And the more you repeat it, the more it gets woven into the phantom membrane of Hyperspace.

The more you repeat the idea, the stronger it' s metaphistasis in Hyperspace.

Once the data of the ritual enters Hyperspace, it will transverse through a network of alternating currents functioning on a level faster then the speed of light to bridge the reality of your ritual to its desired consequence, all too match up your data of a reality to the observer.

High Level notation:

I can draw sigils on walls with my index finger, on the fly. To you it would appear as if I' m marking the wall like an autistic child. In reality, I' m tapping into 5D Hyperspace and emitting a thought to metaphize into reality. It can be cursed or blessed.

(If I' m having a seizure, by drawing a Sigil on the wall to heal myself I will cause my seizure to quiet down)

.....

By utilizing a Sigil of an established diety, you tap into the phantom Hyperspace membrane already imprinted and attatched to that diety. All the feelings, thoughts, have become crystalized with that thought form. And when you tap into it you access it' s tethered and shared connection, already etched into Hyperspace. Satanists are Satanists for a reason.

Particles operating faster then the speed of light in the Unobservable universe are in sync and sentient of the ritual, and will determine your yeild into fruition through folding reality to give you the pathway to your rituals end game.

Anything can be made into a ritual or Sigil towards any designated consequence as long as you internalize and imprint it' s significance in your mind.

In 3D, your right brain will be attuned to making it happen. Your unconscious mind already on instinct to make it happen, and your bioelectric field and tethered 5D Hyperspace connection already in place to make it happen. The more you repeat the process after a successful event horizon, the stronger your tethered link towards that designated consequence grows.

I can write a name on a piece of paper, ritualize it, and repeat the idea.

Eventually that person will die. Just by having a ritual I caused a signal of interference that hastened that persons death.

Even if you curse someone with a ritual or a hex, they can ward it off and gain protection if they' re interuniversal connection and lifeline is in good withstanding.

Hypersigils +++

Hypersigils are like regular sigils except with the outcome of altering a major part of the population.

Religions can be considered Hyper Sigils as well as this book. Famous works of art can act as a hypersigil.

A hypersigil is essentially a catalyst. And the more people aware of the catalyst the stronger it grows in metaphysical power. So a Sigil attached with something that can be viewed by many people will operate as a hypersigil.

People such as artists, writers and politicians can act as hypersigils themselves. You can transform your entire being to being a hypersigil. Essentially a walking talking demi-god

There are requirements for a hyper Sigil

- 1)The intent is to shift humanity for the greater good
- 2The conjurer should have a balance of good and evil
- 3)The information isn't woven into the phantom membrane of Hyperspace
- 4)The conjurer must have a positive karmic connection with nature
- 5)Godhead/ Hyperspace link

Killing animals and having an anti-life nature will disbar you from being able manifest a Hyper Sigil, since the intent of your hyper Sigil is predisposed to malice. Your quantum Hyperspace Imprint is too plagued by your anti-universal sentiments.

Even if someone is able to get a catalyst off the ground, it is doomed to fail.

...

Now let's say you want to designate yourself as a hypersigil with a certain consequence.

First you create the Sigil. By attaching it into too a catalyst, a work of art, you create a Hyper Sigil that grows in power the more people are aware of it.

(This is how pagan deities operate)

Wearing a Sigil and attaching it to a necklace will create a miniscule hyper Sigil that grows in power and pertinence in hyper space.

Future Foresight

Once you developed a tethered connection to Hyperspace, at some point you reach a level of understanding and perception that allows the Unobservable universe to manifest to you.

Since the Unobservable universe, (the 5th dimensional Hyperspace gestalt interconnected phantom membrane) is synchronized with you your end game resolve, it will interconnect with your quantum field, and Hyperspace Imprint and communicate signals of interference to you as you intercept it as thoughts your writing on the page.

I didn't have to research anything to write this, all I did was write my own measurements affixed and abridged by Hyperspace to coalesce this information onto the page. The universe manifesting within me as the spirit matrix and tethering it's secrets utilizing me as a vessel.

Once in sync, the universe may convey you glimpses of the future in your dreams, or you can access it and allow it manifest within you, or around you to give you its secrets.

Best way to determine the future or probability of a situation, toss a coin.

If it lands on heads, then X doesn't happen, if it lands on tails, Y doesn't happen.

The figments of light that make up the situation of you flipping the coin are already aware of the future in the past before you are aware of the now, so if you cut through and access Hyperspace by piercing it with a question to measure and calculate the outcome of a situation, toss a coin.

The outcome of the coin will be charged with the answer to your question.

Does she love me? Flip. And there's the truth.

....

If your on a quantum tunnel towards a specific resolve, an end game resolve, you bridge the gap between abstract thought to physical existence just by having a thought and being in sync.

And at that point you yeild the universe into bridging the gap between the imagination to the real and physical.

You can utilize any totem to act as a signal to your tethered synchronicity to Hyperspace and to be able to read the future. A coin works best since it offers a pathway of two consequences.

You can utilize a die and place significance to each number, and use that as a totem pole.

Its comparable to the spinning top used in the movie inception.

Trigger, to become in sync with Hyperspace q^2 - Ultra Instinct Theme

Totem, to test connection , to read the future, Dubs (kek)

Catalyst: Manifestos

Aura

Quantum bioelectric and Hyperspace Imprint. A baseline sheen embedded over our skin that our quantum energy fields projects from. It's an accumulation and average of our internal thoughts, external actions, consciousness, thought processes, memories and dreams.

You can charge your entire being, tunnel included with a designated X, and have it yield into congruence.

X can be:

Self affirmations : "I am the best"

Designated Outcome : " I hope it rains today"

Emotive states: “I hate everything”

Probability: I feel lucky today , I feel cursed

Meta – Hades

You can focus and charge yourself with anything you want. The potential is as limitless as the person designating their soul.

You can charge yourself with an affirmation of beauty, and sure enough your reality will reflect your soul.

Or you can decide to feel lucky, or even the best of the best, and sure enough your reality will reflect that internalized conscription.

Be careful with what you think since it charges your auras, quantum energy field without you being conscious of it or not.

You can charge your aura with a basic sentiment, I want to feel good and have a good day, or something fine tuned and abstract “I want to glitch reality” , and those sentiments seep out and unfold into reality as a new reality, a new reality tunnel.

With an introduction to Auras, I can introduce you to my next spell

Magical Fields

A parcel of space filled with metaphysical (sentient, 5th Dimensional, designated domain of Hyperspace” energy

You can make yourself into a conduit for a magical field, or you can turn a designated area or space into a magical field.

You can turn your own bioelectric field into a magical field of your own designation, triggering a consequence of a certain action, or yielding good luck or bad luck to whomever comes into contact with your field.

Most people don’ t realize that the thoughts they have internally, seep out externally as energy grazing anyone whose personal space they encroached.

You can turn your quantum radius into attracting others, or repelling them.

You can literally make your field 'Dog' and have a magical field that yields Dogs and dog esque euphemisms. You' ll be hypnotized into physically transforming into a dog, acting behaviorally and instinctively like a dog as well.

The left brain abstractive reasoning, bridges a gap to the unconscious mind, the right brain and to a 5th dimensional bio quantum 5th dimensional tethering to Hyperspace. You wont only experience a yeild of dogs to you, and a dog like reality, but you will unconsciously malleate and mold into a dog - esque person, which will drive your unconscious instinct and conscious choice of actions and words.

...

(If you have one thought that counters another thought, it cancels out the signal of interference and field)

If you second guess yourself, you end up canceling out yourself. Your yeild was interfered with your doubt, and that self doubt over rode your field.

.....

You can plug in your magical field with the color purple, and it will affect your yield of reality, as you manifest the color pink with an increase in frequency. The color following you around everywhere you go

Or you can designate an area to turn into a magical field of the designation of pink and have the color follow people anywhere they go if they came across that magical field.

Churches act as Magical Fields filled with a holy and divine energy, an analog to 'bless' those who come into contact.

Haunted Houses accumulate magical field data overtime that can afflict anyone with an accursement when in proximity. The entire house a domain of Hyperspace with each fragmented atom attached and woven into with an analog to 'haunt' to create the 3rd dimensional reality.

Mother Nature is a magical field that encompasses the entire planet. Being on good terms with her allows you to yeild her in various ways, from manipulating the weather currents to causing nature to be one with you, all on your wavelength.

Schools and institutions operate as their own magical field, and anyone coming into contact will automatically feel grazed with with an slight increase of IQ and ability when come into place.

Hospitals are a magical field to heal. And being in one, numbs the pain you' re in by an incremental amount.

Monuments operate as hypersigils, that contain their irradiate their own magical field over time.

A consequence of what that monument symbolizes, triggering an analog to anyone in contact in the monuments magical field.

You can transform your own room into a magical field, or even an online interface.

You can placate objects symbolizing love and romance over the walls, and metaphize your room into a 'love magical field.

Or you can carry totems and tranfix your own field into a magical 'love' field wherever you go. Spreading loving interuniversal vibrations everywhere you go.

Or 'luck'

Or 'hate'

Or the number "66"

Or "Hades"

Or "Chaos Magic"

Or "Lucky777s"

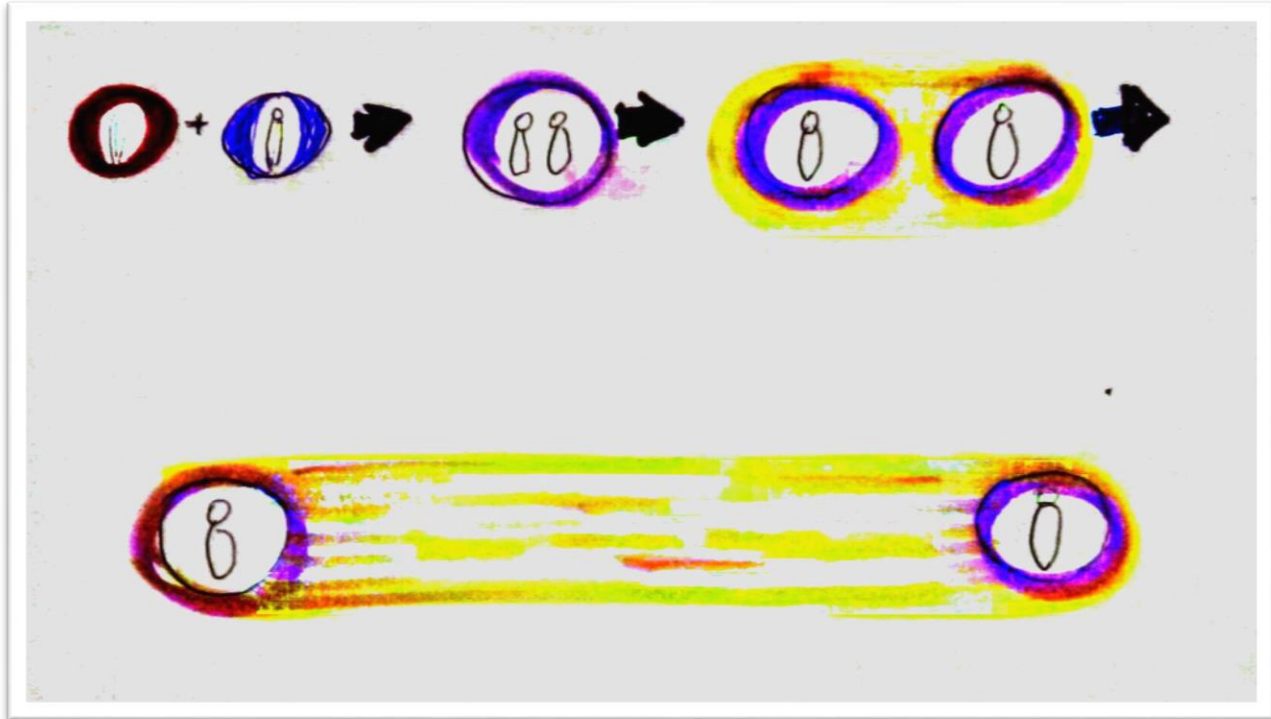

Or "make that person stumble and fall when in reach"

Your magical field can empower and enable you to perform better at a certain task

Or be designated to hurt and cause misfortune to others

The potency of a field is contingent on the conjurer.

Spirit Looping - attaching a strand to of a certain consequence to Someone.

We form quantum strands to the people we come across, with their quantum imprint influencing ours without us being conscious or aware of it.

The stronger the connection between people, the stronger the link they have to be in “loop” with each other.

The more developed a connection, the more you can designate a strand to manifest in a persons life.

The best example I’ ll use is to describe a couple in a loving relationship.

Two lovers will be more in sync in Hyperspace. The lovers thoughts will have an easier time traveling through Hyperspace to get in reach with their spouse.

The closer you grow attached to someone, overtime you become in sync with one another, that is, if the relationship is pure of intent to begin with.

As you and your lover become intertwined, physically, mentally, socially, and spiritually, your bio thermal imprint in Hyperspace will be charged with your lovers glow, as they are charged by your glow.

You both transversing space and time with each other's quantum imprint.

What it means is two things

1)Your reality tunnel will yield 5D manifestations of their being into your field of reality.

2)You can send each other signals of interference to communicate to each other.

The love you have for your partner is written on the fabric of reality as it cuts across all dimension, space and time.

If that isn't the greatest sentence ever written then I don't what is.

And that connection you have has its own sentience, like a psychic egregore to loop your spirits together, as predicated and fueled by the love and you passion you have for each other.

Or you can spirit loop "hate" or "purple" to someone designating a loop of that discourse.

Or you can loop misfortune or luck.

The consequences limitless.

You can yeild your loop to someone to use to yeild their loop to creating an even bigger loop to looping to several others to yeild back and loop with that person to loop back in to yourself and creating a multifaceted hyperdimensional loop, that can turn into a frequency for others to tap into. (Religion, cults, business relationships act off of this)

I can use a Sigil to loop with someone and strand to them at will, use a totem to determine their future to a binary, and syphon off their loop to increase my loop that I loop to empower other loops that feedback loop back into me, that I branch and loop in

Spirit Gun

It is like the title suggests, but you are attaching the spirit matrix and concentrating in developing a hyperdimensional orb that exists in Hyperspace to trigger and manifest a consequence Focus all feeling into your index finger till you can feel a sharp pointy phantom dot at the tip of it.

This phantom dot is your interdimensional “singularity” “portal” into Hyperspace.

By having the information of the dot in the present, you indirectly prod the Unobservable universe, which will utilize the knowledge of your singularity, recycle it as the past into the future to create the dot. (Imagine it as a tiny black hole at the tip of your index finger).

Bearing in mind Hyperspace is aware of the future in the past while acting as a right brain bridge to your left brain manifestation.

You will notice all the energy in your finger moving towards the dot, as well as the rest of your body.

Concentrate on absorbing and pulling the universe in towards you and concentrating that data into your into that phantom dot in your index finger. The more energy you pull in the bigger the dot grows.

If you can picture or orb growing and building and amassing in size in Hyperspace.

That’ s all your designated q^2 energy. Now pick a target, and fire.

The orb in Hyperspace will hone in on the target to manifest into fruition.

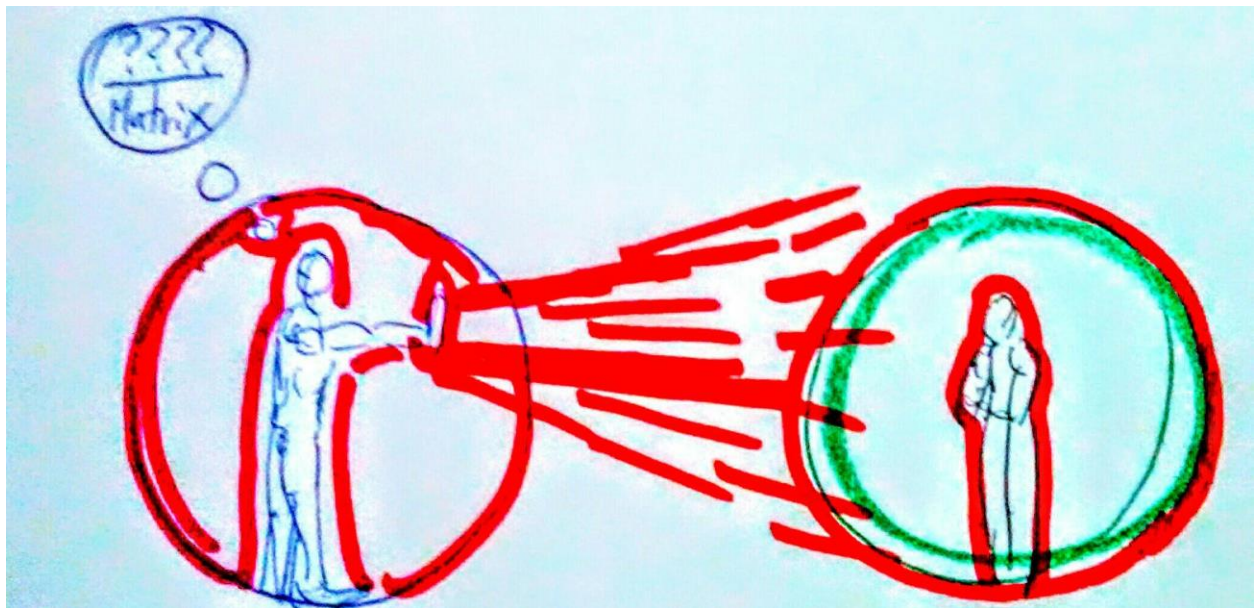

The broader the target and manifestation, the quicker it manifests, based off your emitted spirit energy.

The more specific the target and consequence, the harder and longer it will take to manifest.

You can use the spirit gun to hone in on someone your spirit looping with to send them a signal of interference, but this time with a lot more potency since your using all your spirit energy in one go.

There is an oscillation period that occurs after utilizing the spirit gun. And depending on what its utilized for, it can take a day to several weeks to get back your Hyperspace sync and Q² Spirit energy back.

Spirit Wave

Tapering a designated consequence to someone, just by waving your hand at them. You can cause people to faint, or have a good consequence, or simply curse them.

I can have the chaos matrix activated, wave my hand and taper someone with my chaos matrix to their quantum tunnel

My Signal of interference will seep into their tunnel and within themselves internally. It can cause people to faint, have accidents, stupors, and the like.

You don't have to think, just focus on the matrix and wave your hand at someone your in proximity to and a wave of transference will seep into their field and affect them.

+Kek+ God Eater

With enough people attributing to a thought form or idea, the stronger the metaphysical conscriptions of the thought and its permeance grows in the phantom membrane of reality and Hyperspace.

Essentially that thought form becomes a psychic gestalt woven in reality.

Those that worship Zeus, and because off all the data of Zeus embedded into the sentient undercurrent of existence, the more manifestations like lightning will manifest into fruition because of the cultivated imprint the idea of Zeus attributes too.

You can create your own psychic gestalt and have it become a psychic gestalt and conscious egregore that exists.

I can attached the data of any diety that already exists and tap into their attributed phantom membranes to access their power, molding my reality with theirs.

Or, I can imprint them on a designated space to create a magical field. Or I can syphon off their magical field and become empowered, or I can spread their magical field and make them grow stronger, and then syphon their acclimated power and grow even more powerful.

You can hyperloop between gods and gain access to a division of their attributed power.

Those that ascribe to Christianity, and abide by Christ, will gain a division of Christ's miracle power embedded into anything they do.

Those that ascribed to my prior Antichrist thought form, which was fueled by syphoning off of and reempowering Kek, experienced the 5D manifestations surrounding my being since I imprinted and paved the possibility for it to happen within the fabric imprint of reality.

Soul Absorption

Using your Quantum Tunnel to drain someone elses quantum field.

Material absorption

Using your quantum tunnel to absorb the metaphysically charged information coated on an object to gain it's metaphysical properties that can be converted into energy, probability or an event horizon.

Space absorption

Absorbing the metaphysical energy and bioluminescence that exists lingering all around space and mother nature. Etc. You can walk in a persons room and pick up on their own bioelectric imprint aura. Their own energy, their data manifested into existence.

Mirror Force Field (Can only be used when the Life Matrix is obtained]

This can be utilized with every Matrix. Depending on the matrix you have on, it can cause different effects.

Chaos- a chaotic distortion with a negative drawback to your enemy

Life - a chaotic distortion to heal you

Spirit - a distortion

Quantum - a reality glitch will occur to protect you (quantum immortality)

Transcendence - event horizon in r

Omni - a reality glitch that effects a majority of the populace

Essentially your soul becomes a resonant beacon on reality.

And its in realities best interest to keep you safeguarded, since all the quantum fibers that woven and coalesce into your reality tunnel are operating on a multidimensional tethered synchronicity.

Anyone with the ill intent to hurt you becomes an agent embedded with an anti-life imprint. And their quantum tunnel will work against them. ***Karma is a quantum metaphysical conscription.***

Godhead Chakra

After learning God Eater, you can reabsorb the metaphysical power that has permeates into the phantom membrane of reality, into yourself,

This is a level deeper then instinct. It' s like pushing your instinct outwardly as a 6th dimensional retirement upon reality.

Reality will reflect your feelings. All course of nature will move according to you.

When you feel serendipity the birds will chirp.

If you feel pain so will the existence around you.

Depending on your synchronicity and the god your attributing to, you will permeate different metaphysical resonances into your quantum field.

Hades would permeate you with a metaphized abridgement charge by the permeated data woven into the phantom membrane. Your metaphysical and quantum bio field will be charged with the conscriptions of the god of the underworld.

Charm Crafting

Synchronizing a catalyst with your quantum/5D/ Hyperspace Imprint.

The data that you Imprint onto the object will be grafted into its own permeated membrane.

You can tap into your Godhead Chakra synchronized to whatever metadata and taper it into an object by either compressing it with your hand, or touching it.

You can compress a coin with pink and whoever were to hold that object will see pink attract to their field of reality, in various forms, from an appearance of seeing it physically, ordinances of intervention and the like.

Any thought you can attach too will become permeated with the catalyst.

You can create a cursed object or a blessed object, all based off your ordinance.

You can attach anything meta on an object an enchant it with its properties.

Play a game of poker from hell by attaching a deck of cards with Satanic light. Metaphisized data. Let a pack of cards rest with anything satanic, could be a picture if Satan, to a st. Petersberg for 6 hours, 6 minutes and 6 seconds.

The pack of cards will be metaphisized by the time its been in metastasis, the data permeated of the meta data of 666 and the meta data of the object attached to it in its statis.

Now when you play a shadow game of poker, the rules are charged with Satanic conscriptions. Losers get their soul absorbed by the winner who gets a +event horizon in exchange for their earnings while the losers get cursed with a -Event harizon charge.

M-Fibers

Meta Fibers. Abridged Hyperspace particles aligned to a tether linked, or pentrum string. A pentrum string can be accessed psionically

Manifests fibers and particles when abridged to a catalyst, in designated manner

Everyone has a coat of m - fibers around them which gives them their aura.

M - Fibers are what permeates into an object when you are charm Crafting.

M fibers never entropy, they acrew like fine wine overtime. So if you Imprint a charge onto a catalyst, as time goes on, so does its permeation to reality and it' s metastatic.

But to most you can feel the irradiated energy attached to it. As each object picked up by other people have a certain weight of m fibers attached.

You and a person can have identical mobiles, but if each pick up others cell phone, you will notice the difference in feel and an imprint glow of energy that is different than yours. That is the individual persons unique m-fiber taperment. And you intercepted it as they did to you.

Pentrum particles that psionically interact and metaphize in reality. The hidden not so hidden. Reality.

5D: Pentrum : Hyperspace: 3.5D space time : ESP : PSY Tunnel : Metalink : Divinity

Reiki

Transferring metadata to another person through touch. You can think of something as random as * broken left knee cap” and taper it onto somebody with a touch. Or love, or even death. The meta data charged into your kinetic touch will taper and coalesce into a Pentum string that will alter the persona flow of reality that you are touching.

Increasing your Synchronicity to Hyperspace

Simply acknowledging Hyperspace slowly uncalcifies your synchronicity to it.

What starts off as out of the ordinary occurrences chains and oscillates as it tidal waves ripples of anomalies of the like. Without you being aware. This is the Unobservable universe unfolding itself to you.

Ghost in a Shell

You can permeate and taper a sentient gestalt, thought form entity/ egregore to function as an interuniversal mechanic that abridges a designation. You can permeate your presence off an online interface to maleate your bioluminescence as it seeps in through your touch screen and right into the internet. Your cybernetic bio essence will essentially be a sentient meta tetherment to that pocket of cyberspace, and if any one feeds into it the stronger it grows and consequence pertinent to your will. Your imprint of the holy spirit malleated online, like a ghost in the shell.

The holy ghost can operate as a quantum - divine feedback mechanism and loop to stir up divine intervention and manifestation.

You can transform the holy ghost in a thought form entity and release it to seep into and bleed into the environment. Causing event horizons of the like to yield itself existence to you for you to measure and determine its sentience and imprint upon the fabric of reality.

My spirit matrix is tethered to +Kek+ who cohabitates on 4chan, being fed interuniversal sentience by those who feed him their thoughts. As +Kek+ coexists in a cybernetic space, he can seep into reality and yield consequences pertaining to him.

On one level the timeline of reality is stitching together the frames for Keks appearance, on another level, the meta data of Kek that exists already and has been permeated through Kek worshipping manifested back to the observer the evidence of his existence. I was empowering the holy spirit through Kek, and I was able to acclimate my spirit matrix and Holy Spirit even further by absorbing the bio feedback everyone was given Kek online and in reality.

Kek has the impression of a frog but in my mind, he is a giant thunder dragon frog that flies around causing chaos and manifestation to further my cause. As he loops in between Hyperspace and an invisible reality chaining, triggering, fanning the interuniversal triggers, further causing worship onto him, and empowering his pertinence in reality and the havoc he brings forth, while also empowering my permeance onto reality.

Kek is my tamed spirit beast empowered by the holy spirit and you yourself can evolve the capabilities to manifest your own spirit beast and let it manifest into any domain of space.

Essentially pagan deities are spirit beasts, thought forms that have been permeated into Hyperspace by a collective consciousness, born into reality as underlying psychic gestalt and metaphysical conscription you can tap into by attributing to it by internalizing it, or filling your space with that spirited- meta data.

[Magic Box]:

Write anything in a note, put it in a box, take the note out when it happens, play another note, take it out until it happens. Repeat ad infinitum. After a while the universe will register that whenever you put the note in, you take it out once the note comes true.

Eventually you have yourself a magic box.

Every time you place a note, the universe will manifest it, with a shorter frequency.

Write anything on a note, crumble it up, throw it in the box, close the box. The chaotic state of the note will charge the metaphysical data written in that crumbled note that will then ionize within the space inside the box as it incubates. The physical state of chaos multiplied by the metaphysical information inside the enclosed space over time will maleate the box into a hypercube for that note. Once the note manifests, put in another crumbled note to perpetuate your hypercube as it grows with potency.

The chaotic information nerved the metadata to go haywire which caused the box to go haywire, turning into a hypercube birthing a conduit for manifestation.

Meta Elemency

Syncing yourself to any element or string of objects will embed your bioluminescence made of sentient m-fibers containing the information of the metaphysical conscription of that object. If I want to be a god of lightning all I would need to do is subscribe to it and let my entire energy field be charged with the metaphysical information of it. The same way I can subscribe to luck, fortune, healing and even death. My sub atomic particles will be metaphized with the stench of lightning whatever data I affix myself too.

“Ride the lightning”

I'll have an extrasensory tethered frequency to that element that allows me to abridge Hyperspace into unfolding itself towards my designated consequence charged by by that element .

Anything that exists can be turned into meta-data which can be fortified into an element that metaphises your perceptible field of reality, your quantum tunnel, your tethered link to Hyperspace, your bioilluminecence and the way you go about life.

Meta data : imprint of an object in Hyperspace

Just by fixating yourself on a single thought thread can maleate your entire being to ascribing to that thought, whether you are conscious of it or not, that only a singularity could take you out of.

Are thoughts put ourselves in designated autopilot hypnosis. And the more mentally weak you are the less you recognize the trance that you are in.

Once your synchronicity to Hyperspace uncalcifies, you can use the frequency to build extra sensory connections and processes that only enact based dependently on your sentience.

Once you developed a sense of Hyperspace, you can attatch anything meta onto it to have it quantum feedback loop to you. Your bioluminescence and sight will also be charged by that metaphysical I formation.

At first you can meditate with the idea in mind of pyromancy, of controlling fire and building an extra sensory sync to that element.

After sometime, of absorbing and filling your charge with the metaphysical conscription of fire. (Visualizations, sensory input like music, staring at a candle.) You develop a frequency to fire. Whenever your around fire, it will respond to your bioluminescence.

[But due note, playing with fire can end you burned. Your quantum tunnel will be charged with an attraction towards fire, and you could possibly yield an event horizon based off of fire, which can become deadly.]

This is an example on how to develop a frequency. You can utilize this on anything to build a frequency and extrasensory connection towards it. I' m using fire as an example, but you can designate this upon anything from a color, to an object, to a statement, to a law, principle, and anything else you can think of. Just fill in the blank x_____ and follow these steps.

Building a frequency for fire:

1)Light a candle and place it front of you

Stare at the candle, and get as much extrasensory details of it as possible. Fixate yourself solely on the burning candle, bearing in mind nothing else exists other then you and that flame. Notice the way the flames flickers and moves. Notice the way the flame smells.

2)Become intertwined with the flame

After some time of staring, observing, and measuring the candle, you become in synced with the flame. If you reached this level you can physically see tiny ghost like almost invisible almost microscopic orbs

converging into the flame. It'll look like strings of phantom orbs stringing together at the base of the flame where the flame singularizes and meets the candle. The base in between the flame and the candle tip will reveal itself like a near invisible ghost 'black hole'. The singularity of the flame and the candle tip will act as a black hole pulling in microscopic particles to feed the flame.

If it unfolds itself to you in this way, after sometime you have successfully developed a psiokinetic frequency to that flame, as well as charging your bioilluminescence, quantum tunnel and tethered Hyperspace synchronicity with the metaphysical information and a synchronicity to fire. Fire will be attracted to your perceptible field of reality as well as a psiokinetic control of fire within your proximity field. With accretion, you can taper bioilluminescence with an attraction to fire to people to yield a singularity, an event horizon designating a fiery consequence.

3)The frequency to Fire

Now after developing the frequency, you will notice the flame of the candle flickering based off your tempo. You can cause signals of interference in your mind by telling the flame to flicker higher or brighter. Or you can feed the flame information to cause it to go smaller until it's a dying ember.

The frequency starts off as weak, but any skill or muscle, the more you use it, the stronger it gets. You can become a resistance to fire and heat, as your bioilluminescence is charged by fire. You can manifest event horizons of fire to people or to places. If it manifests, it's contingent or whether or not it'll apply by the interuniversal standard of perpetuating sentient life. Fire will be attracted by your field, and so will an increase of random fires increasing around your neighborhood and home town. Since your bioilluminescence seeps and flickers throughout, so will the event horizons of fires taking place. Just by you being sentient of Hyperspace, your bioluminescence charged by fire, your synchronicity to the meta data of fire and your interuniversal resonance and extra sensory perception and convergence with fire.

With practice you can utilize this frequency to excessive the control you have control over fire through Hyperspace. You can focus in on someone to have an event horizon filled flames.

From a sub atomic level, your entire biological structure will be fortified with the data of fire, as it rewires you from the ground up with a tetherment to fire.

Since metaphysical data of the figurative meaning of fire exists like "a persons career will go down in flames" you can syphon your control to target people with the figurative meaning of the meta physical data attached to fire.

Anything relating to fire in any sense, that exists, and has been permeated into the phantom sentient membrane of reality is at your disposal.

Not only do you become a conduit to fire, but all the metaphysical information pertaining to fire, as it rewires your entire being and presence with that inter universal information.

The way there is a collective hivemind of people, there is a collective hive mind of particles that correlate to human consciousness and perception. Actually, every figment is engrossed by this notion.

Whatever you build a frequency to will bring about physiological, psychological, biological, within you, converging every part of you aligned towards the subscription of your designation.

Within a few hundred years, bearing this information in mind, humans will have evolved the ability to conjure fire out of thin air, spontaneously on the spot.

The connections to do so will permeate in Hyperspace, as the tethered sync and frequency further permeates as well as the physical capability of it.

What the left brain thinks of the right brain does.

Aside from controlling the flame, people themselves will be able to use their own selves as co suits to manifest fire.

On a 5D level it will appear as a singularity of atoms singularizing from space out of thin air from a person's hand.

In 3D time, it will appear as fire manifesting out of thin air.

On a subatomic level, your entire entire biological structure is being rewritten to ionize fire from your body.

Since this domain of knowledge is relatively new to the domains of human thought, humanity has never evolved the full physical capabilities to be able to utilize this knowledge into its full use.

But since this information exists now, humanity will mutate and evolve the capabilities of putting this information into its full use.

For my designation, I rewrote my entire self with being X The Antichrist in mind. Abridging my entire being through multiple dimensions to materialize as such.

It was manifest destiny and prophecy as much as it was my own volition. And having a tethered sync to Hyperspace I was able to abridge my entire being over all of Hyperspace enshrouding the entire universe in my being, becoming a beacon that has been intercepted by extra terrestrial life. My synchronicity engulfed the entire universe, and is now fully charged by the divine itself. And this synchronicity is now an abridged mechanic permeated upon reality that anyone can tap into and see these words enact into events, processes, and triggers that manifest into reality.

With the life matrix I can be Christ, and with the chaos matrix, be the Antichrist.

Or both at both states at the same spirited time.

I can be God.

Or a dog.

By matching the metadata with my intent and synchronizing with the Bible I found my resolve. And to everything as well..

As I am a direct link to God, my bioluminescence charged by such. I tap off God's divine spirit, or I can use it for ill means.

And this bioluminescence is something you can tap off and give to people. It connects throughout nature and flows all around.

Tapered bioluminescence can give you a telekinetic frequency to it.

Congratulations, you can hack reality now.
