AUSTRIA

Mannlicher M1886

Blade: Squared fuller, edge facing downwards.
Hilt/Grips: Wooden grips, 2 rivets.
Scabbard: Painted/blued metal with U-shaped frog stud.

Length:373mm
Blade length:245mm
Blade width:26,8mm
Blade thickness: ..5,9mm
Muzzle ring:17,7mm
Weight:370g

State: Austria Hungary
Weapon:Mannlicher M1886
Rarity:.....R4

Mannlicher M1888

Blade: Squared fuller, edge facing downwards.
Hilt/Grips: Wooden grips, 2 rivets.
Scabbard: Painted/blued metal with U-shaped frog stud.

Length:376mm
Blade length:249mm
Blade width:26,7mm
Blade thickness:6mm
Muzzle ring:16,3mm
Weight:365g

State: Austria Hungary
Weapon:Mannlicher M1888
Rarity:.....R3

Mannlicher M1888 (NCO)

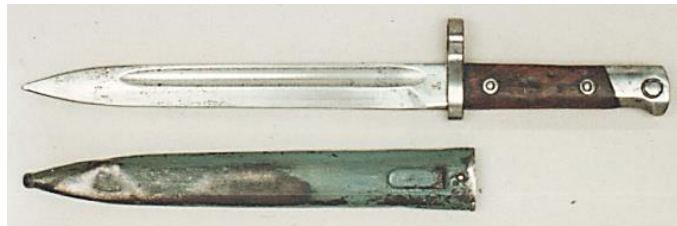

Blade: Squared fuller, edge facing downwards.
Hilt/Grips: Wooden grips, 2 rivets.
Scabbard: Painted/blued metal with U-shaped frog stud.

Length:376mm
Blade length:249mm
Blade width:27mm
Blade thickness:6mm
Muzzle ring:16,3mm
Weight:390g

State: Austria Hungary
Weapon:Mannlicher M1888
Rarity:.....R3

Mannlicher M1890 (M1886/90)

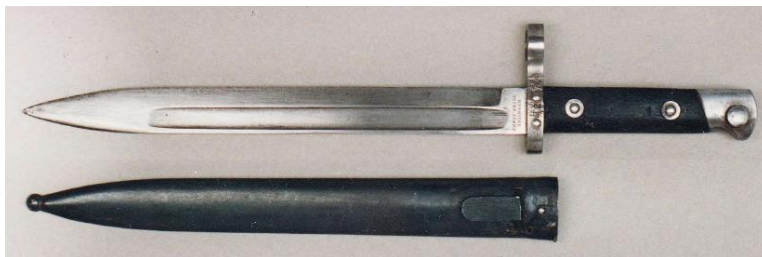

Similar to the 1888, but with a 15mm muzzle ring. Serial no. on the crossguard / regimental markings on the pommel.
Blade: Fullered, edge facing downwards.
Hilt/Grips: Wooden grips, 2 rivets.
Scabbard: Painted/blued metal with U-shaped frog stud.

Length:373mm
Blade length:247mm
Blade width:27mm
Blade thickness:6mm
Muzzle ring:15mm
Weight:370-380g

State: Austria Hungary
Weapon:M1886/90
Rarity:.....R3-4

Mannlicher M1895

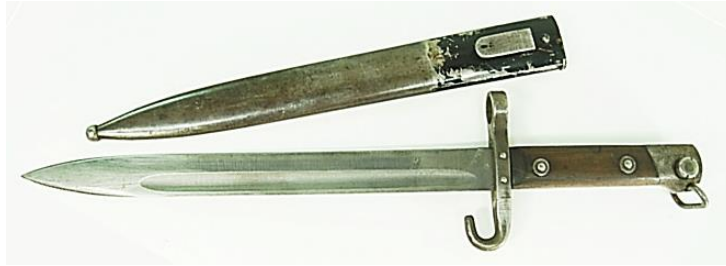

Blade: Fullered, edge facing upwards. Some have serial no. STAMPED on the crossguard.
Hilt/Grips: Wooden grips, 2 rivets. Some have regimental markings on the pommel.
Scabbard: Painted/blued metal with U-shaped frog stud.

Length:359mm
Blade length:248mm
Blade width:22,9mm
Blade thickness:5,3mm
Muzzle ring:15mm
Weight:285-300g

State: Austria Hungary
Weapon:Mannlicher M1895
Rarity:.....R1

Mannlicher M1895 (NCO)

Decorated grips

Standard M95 converted to NCO (Quillion added)

Quillion and a hole and a pommel ring, these made be found with the quillion removed/added, some are nickeled/chromed.

Blade: Fullered, edge facing upwards.

Hilt/Grips: Wooden grips, 2 rivets. Some have regimental markings on the pommel. Quillion and loop to hold portepee. Some with decorated grips.

Scabbard: Painted/blued metal with U-shaped frog stud.

Length:362mm

Blade length:250mm

Blade width:23mm

Blade thickness:5,2mm

Muzzle ring:15mm

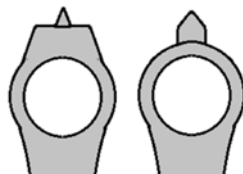

Weight:320g

State: Austria Hungary

Weapon:Mannlicher M1895

Rarity:.....R2

Mannlicher M1895 (Cavalry/Carbine)

BLADE SHAPE PIN SHAPE

Adjustable sights added to the muzzle ring. Some are standard M95 with fixed sight. Variations: Standard carbine/cavalry, NCO carbine cavalry.

Blade: Fullered, edge facing upwards.

Hilt/Grips: Wooden grips, 2 rivets.

Scabbard: Painted/blued metal with U-shaped frog stud.

Length:357mm

Blade length:246mm

Blade width:22,7mm

Blade thickness:5,5mm

Muzzle ring:15mm

Weight:300g

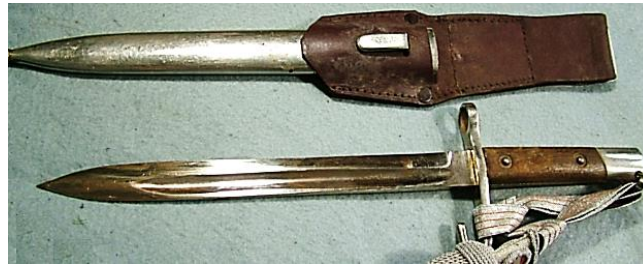

State: Austria Hungary

Weapon:Mannlicher M1895

Rarity:.....R2

Mannlicher M1895 (Dress)

No pommel slot or Vestigial only. **Variations:** Standard, NCO. Often chrome/nickel plated.
Blade: Fullered, edge facing downwards.
Hilt/Grips: Wooden grips, 2 rivets. Some with decorated grips.
Scabbard: Painted/blued metal with U-shaped frog stud.

Length:360mm
Blade length:249mm
Blade width:22,9mm
Blade thickness:5,1mm
Muzzle ring:15mm

State: Austria Hungary
Weapon:Mannlicher M1895
Rarity:.....R3-4

Mannlicher M1888/16 (M1890/95)

Constructed using modified M1895 components that were already being produced. The blade and tang are standard M1895 type. The crossguard is also from a blank M1895 crossguard but with a larger muzzle ring inside diameter and mounted lower on the blade to fit 1888 rifle.

Length:371mm
Blade length:247mm
Blade width:22,7mm
Blade thickness:5,2mm
Weight:315g

State: Austria Hungary
Weapon:Mannlicher M1890
Rarity:.....R5

Mannlicher M1888/16 (Converted for M95M)

Yugoslavian conversion of a leftover M1888/16 bayonet to fit on the Yugoslav M95M rifle. (More on page 200).

Mannlicher M1895 (Foreign manufactured/converted)

Bulgaria

'Klementinets' ceremonial bayonet

Bulgarian markings, electropen serial numbers

Some have replaced wooden grips, some are converted from NCO

Czechoslovakia

Czechoslovakian markings on bayonet and scabbard, electropen serial number.

Some have replaced wooden grips, some are converted from NCO

Germany

German manufacturer / German WaA proof stamp / German rework (muzzle ring removed)

Greece

Greek stamped on the pommel and ricasso

Hungary

Hungarian made and issued with bone grips, Hungarian markings

Italy

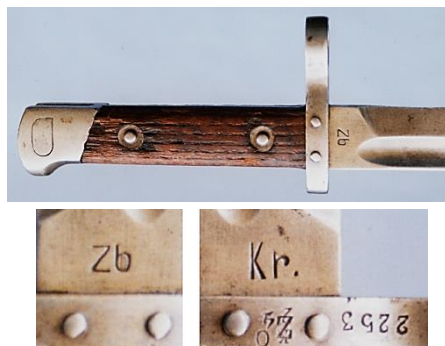

Hilt has VE (Vittorio Emanuel III) and Italian crown

Nickeled/chromed bayonet and scabbard.

Poland

Grips from rough wood, markings on crossguard and ricasso.

Romania

Romanian scabbard and ricasso markings.

Werndl 1867 (Unshortened)

Most were shortened, very rare to find one unaltered.

Variations: Standard and NCO (with pommel ring).

Blade: Yatagan, rounded fuller

Hilt/Grips: Leather grips, 4 rivets.

Scabbard: Blued metal with U-shaped frog stud.

Length:711mm

Blade length:580mm

Blade width:32mm

Blade thickness:8,5mm

Muzzle ring:18,5mm

Weight:755g

State: Austria Hungary

Weapon:Werndl 1867 hunting rifle

Rarity:R5

Werndl 1867 (Shortened)

Variations: Standard and NCO (with pommel ring).

Blade: Yatagan, rounded fuller

Hilt/Grips: Leather grips, 4 rivets.

Scabbard: Blued metal with U-shaped frog stud.

Length:606mm

Blade length:475mm

Blade thickness:8,5mm

Blade width:30,6mm

Muzzle ring:18,5mm

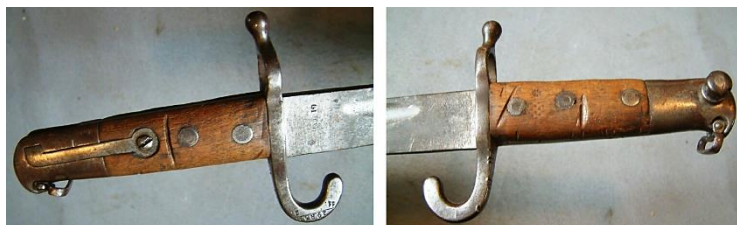

Weight:640g

State: Austria Hungary

Weapon:Werndl 1867 hunting rifle

Rarity:R2-3

Werndl 1867 (NCO, wooden grips)

<p>NCO version with the pommel ring. This example has been re gripped 1867 short, fitted with w 3 rivet wooden grip, there are 2 and 4 rivet versions as well. Blade: Yatagan, rounded fuller Hilt/Grips: Leather/wooden grips, 2/3/4 rivets. Scabbard: Blued metal with U-shaped frog stud.</p>	<p>Blade width:30,4mm Muzzle ring:18,5mm</p>	<p>State: Austria Hungary Weapon:Werndl 1867 hunting rifle Rarity:R3/R4</p>
--	---	--

Werndl 1870 (Shortened)

<p>This example was officially shortened in 1877. Unshortened examples exist, but are very rare. Blade: Yatagan, squared fuller. Hilt/Grips: Leather grips, 3 rivets, 1 screw. Scabbard: Blued metal with U-shaped frog stud.</p>	<p>Length:605mm Blade length:475mm Blade thickness:8,6mm Blade width:28mm Muzzle ring:18,2mm Weight:620g</p>	<p>State: Austria Hungary Weapon:Werndl 1867/77 Rarity:R2</p>
---	--	--

Werndl 1873

<p>Uses a coil spring rather than the earlier external spring. <u>Variations:</u> Standard, NCO with the pommel ring and three rivet wooden griped variations Blade: Yatagan, squared fuller. Hilt/Grips: Leather grips, 3 rivets. Scabbard: Blued metal with U-shaped frog stud.</p>	<p>Length:604mm Blade length:474mm Blade thickness:8mm Blade width:28mm Muzzle ring:18,6mm Weight:550g</p>	<p>State: Austria Hungary Weapon:Werndl 1873 Rarity:R2</p>
--	---	---

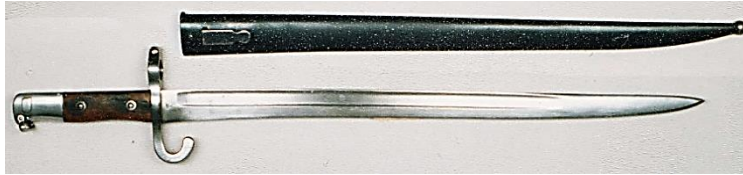

Mannlicher 1885 (Trial bayonet)

<p>Trial bayonet for the 1886 Mannlicher rifle with wood rather than the earlier leather style grips. only 5000 were made for trials purposes. Blade: Yatagan, squared fuller. Hilt/Grips: Wooden grips, 2 rivets. Scabbard: Blued metal with U-shaped frog stud.</p>	<p>Muzzle ring: 17,5mm</p>	<p>State: Austria Hungary Weapon:.....Mannlicher 1886 Rarity:R5</p>
---	---	--

Werndl 1873/81

<p>Uses a coil spring rather than the earlier external spring. Variations: Standard, NCO with the pommel ring. Blade: Yatagan, squared fuller. Hilt/Grips: Wooden grips, 2 rivets. Scabbard: Blued metal with U-shaped frog stud.</p>	<p>Length:601mm Blade length:471mm Blade thickness:7,8mm Blade width:29,3mm Muzzle ring:18,6mm Weight:565g</p>	<p>State: Austria Hungary Weapon:Werndl 1873 Rarity:R3</p>
---	--	---

M1886 (Steyr 1886)

<p>Carried by the Austrian army during WW1 as a side arm. Blade: Yatagan, squared fuller. Hilt/Grips: Wooden grips, 2 rivets. Scabbard: Blued metal with U-shaped frog stud.</p>	<p>Blade length:470mm</p>	<p>State: Austria Hungary Weapon: ? Rarity:R3</p>

AUSTRIAN ERSATZ

Mannlicher M1895 (Ersatz)

Muzzle ring:15,3mm

State: Austria Hungary

Weapon:Mannlicher M1895

TWIST BLADE (Total length: 387mm, Blade length: 265mm, Blade width: 24mm)

Different variations, length varies.

Rivet type and position varies

Both the flat stave and twist blade ersatz bayonets occasionally appear with a series of "chevron" markings which appear on the side of the corner of the elbow of the piece which forms the muzzle ring/ letter H on the hilt (these marks remain unknown.)

TWIST HANDLE (Total length: 387mm, Blade length: 265mm, Blade width: 24mm)

Crossguard similar to the 1895 bayonet but much cruder but using the same twin rivet fixing method.

TWIST HANDLE (Rare type)

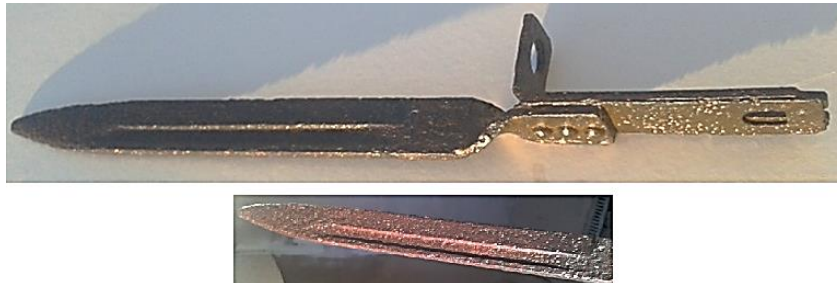

Robust, more angular crossguard. Handle twisted upwards compared to the regular twist handle

M1917

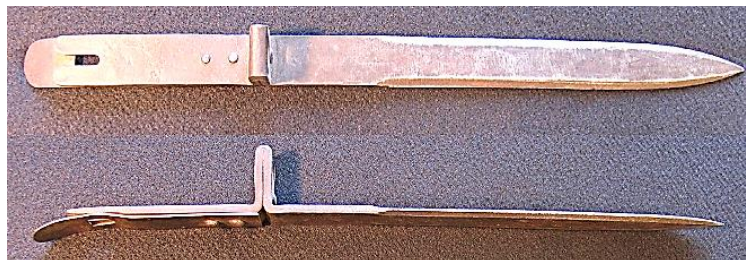

Rare. German style metal gripped knife-style ersatz bayonet.

TWIST BLADE (with fuller)

Rare variety of M95 twist blade. Represents only about 0.3% of all Austrian ersatz bayonets. It has different grip stave design and fullered blade. The blade is longer, 260mm wide and about 6-7mm thick. This example is in relic condition and is missing a blade tip.

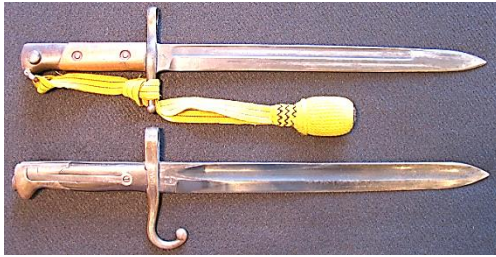

FLAT STAVE

Rare flat stave M95 ersatz

CAPTURED AND CONVERTED

Top bayonet is a M 1891 Italian Mannlicher-Carcano bayonet that has been altered for issue to an Austro-Hungarian NCO who was issued a captured Italian rifle (Pommel ring was added) The bayonet on the bottom is a captured M 1870 Vetterli bayonet which has been converted to fit the M 1895 Mannlicher..

Werndl (Ersatz)

Muzzle ring:cca. 19mm

State: Austria Hungary

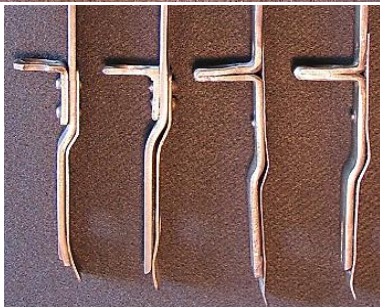

Weapon:Werndl 1867/70/73

TWIST BLADE (NCO) (Total lenght: 387mm, Blade lenght: 265mm, Blade width: 24mm)

With a quillion, Muzzle ring is 19mm for the Werndl rifle.

FLAT STAVE (Total lenght: 402mm, Blade lenght: 251mm, Blade width: 25mm MRD: 18,9)

Different variations. Size, rivets position and size, muzzle ring shape varies. Variations stamped with star / letter K

These were produced by dozens, perhaps hundreds of shops.

CORKSCREW TYPE

This style bayonet was also produced to fit captured Russian M1891 Three-Line rifles and M1870 Berdan II rifles.

1886/90, 1888, 1888/90, 1890 (Ersatz)

Muzzle ring:16,3mm

State:Austria Hungary

Weapon:Mannlicher M1888

FLAT STAVE

Rare flat stave ersatz for M1888.

TWIST BLADE

Different variations. Size, rivets position and size, muzzle ring shape varies.

M1890 CARBINE

Produced for issue with the entire series of Model 1890 Mannlicher carbines

BELGIUM

M 1848

Blade: Long fuller.

Hilt/Grips: Solid brass, 15 circumferential grooves, 1 rivet.

Scabbard: Leather with brass throat.

Length:736mm

Blade length:616mm

Blade width:27,2mm

SAFN 49

Made for use by Belgium and for export. All metal except the blade is painted black.
Blade: Double edged, spike shaped, dark blued finish.
Hilt/Grips: Wooden grips, 2 screws.
Scabbard: Painted/blued metal, long frog stud.

Length:363mm
Blade length:232mm
Blade width:24,3mm
Blade thickness: ...5,4mm
Weight:350g

State: Belgium
Weapon:.....SAFN M1949
Rarity:.....R1-2

SAFN 49 (short)

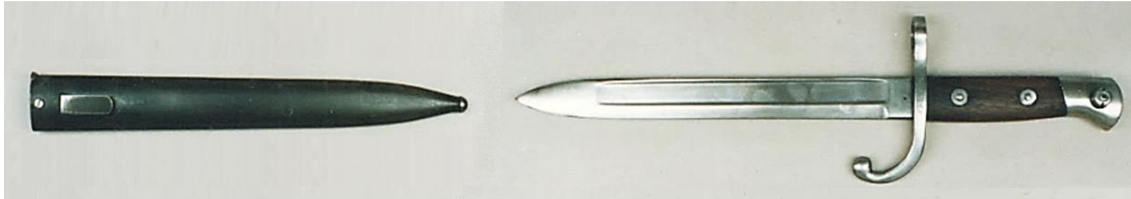

Made for use by Belgium and for export. All metal except the blade is painted black.
Blade: Double edged, spike shaped, dark phosphate finish.
Hilt/Grips: Wooden grips, 2 screws.
Scabbard: Painted metal, long frog stud.

Length:361mm
Blade length:230mm
Blade width:24,3mm
Blade thickness: ...5,7mm
Weight:330g

State: Belgium
Weapon:.....SAFN M1949
Rarity:.....R1-2

M1889 (short)

Serial no. on the crossguard, markings on the ricasso.
Blade: Squared fuller.
Hilt/Grips: Wooden grips, 2 screws.
Scabbard: Parkerised metal, long frog stud.

Length:366/373mm
Blade length:241/248mm
Blade width:26mm
Blade thickness:6mm
Weight:410/425g

State: Belgium
Weapon:.....M1889
Rarity:.....R3

FN FAL Type A

Serial no. on the crossguard, markings on the ricasso.
Blade: No fuller, double edged, parkerised ricasso.
Hilt/Grips: Wooden grips, 2 screws, parkerised metal.
Scabbard: Parkerised metal, long frog stud.

Length:315mm
Blade length:202mm
Blade width:21mm
Blade thickness:4,3mm

Weight:220g

State: Belgium
Weapon:.....FN FAL
Rarity:.....R1

BRITAIN

Brunswick Pat. 1848

Blade: Both sided edge, narrow and short fuller.
Hilt/Grips: Solid brass, symetric oval hilt.
Scabbard: ?

Length:678mm
Blade length:562mm
Blade width:36,3mm
Blade thickness:7,2mm
Weight:910g

State: England
Weapon:.....Brunswick rifle, P 1848.
Rarity:.....R4-5

1853

Type1: The brass handled artillery variation, this is very similar to the French 1842 with a swept back finial. Less than 10,000 were made in the 2 years of production. Steel scabbard.

Type 2: Has the leather grips used on the infantry model, but retains the steel scabbard.

1855 Carbine

Used by sappers and miners. Variations: Long, shortened, Volunteer (steel crossguard and pommel)

Blade: Quillback blade.

Hilt/Grips: Brass hilt and crossguard, leather grips with 4 rivets.

Scabbard: Leather with brass mounts. Oval frog stud.

Length:735mm
Blade length:608mm
Blade width:30mm
Blade thickness:7,9mm
Weight:725g

State: England
Weapon:.....Lancaster 1855 Carbine
Rarity:.....R4

1859 Naval Cutlass

Unfullered cutlass shaped blade with a basket hilt. The 1st type had grooved wooden grips. The 2nd pattern having knurled leather grips. Large numbers of fakes of this blade can be found. Example on the top is with quillion removed.

Jacobs sword

The longest of all the UK produced bayonets at 900mm overall length. Handguard, leather grips, markings on the pommel.

Pattern 1856/58 (Shortened)

Blade: Shortened yatagan blade, rounded fuller.
Hilt/Grips: Leather grips with 3 rivets and 1 screw.
Scabbard: Leather with metal mounts. Round frog stud.
 (Shortened P 1856 scabbard)

Length:466mm
Blade length:331mm
Blade width:32,2mm
Blade thickness:10,7mm
Weight:610g

State: England
Weapon:.....Martini
 Henry P1856, P 1858.
Rarity:.....R3

Pattern 1856/58

Some volunteer issues have brass hilt and crossguard.
Blade: Yatagan blade, rounded fuller.
Hilt/Grips: Leather grips with 3 rivets and 1 screw.
Scabbard: Leather with metal mounts. Round frog stud.

Length:713mm
Blade length:580mm
Blade width:32,4mm
Blade thickness:10,7mm
Weight:775g

State: England
Weapon:.....Martini
 Henry P1856, P 1858.
Rarity:.....R3

1863 Whitworth

Virtually identical to the 1856 Infantry sword bayonet, the only differences are a smaller muzzle ring and a circular hole below the mortise groove, this blade was made especially for the Whitworth rifle and only about 8000 were made.

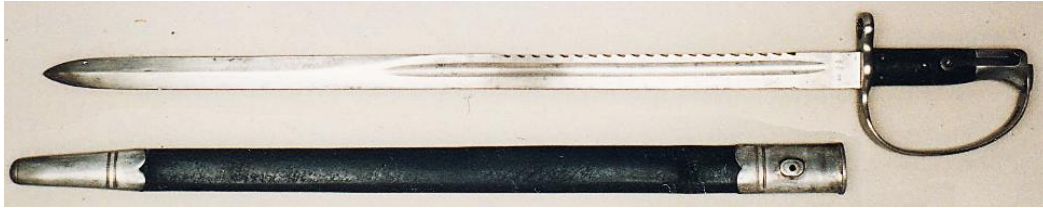

Pattern 1875

It is a straight bladed sawbacked weapon with either an 45,7cm blade (Type 1) or 51,5cm blade (Type 2).

Pattern 1879 Artillery

Blade: Short fuller, sawback, 30cm false edge.
Hilt/Grips: Leather grips with fishscale pattern, 4 rivets. Crossguard continues and forms a handguard.
Scabbard: Leather with metal mounts. Round frog stud.

Length:793mm
Blade length:653mm
Blade width:30mm
Blade thickness:7mm
Weight:815g

State: England
Weapon:.....Martini Henry Carbine Mk I.
Rarity:.....R4

Pattern 1887 Mk. I

Blade: Short fuller, 23cm false edge.
Hilt/Grips: Leather grips with fishscale pattern, 4 rivets.
Scabbard: Leather with brass mounts. Oval pointed frog stud.

Length:598mm
Blade length:463mm
Blade width:28,8mm
Blade thickness:7,3mm
Weight:670g

State: England
Weapon:.....Martini Henry 1887.
Rarity:.....R4

Pattern 1887 Mk. II

Similar to the Mk. I. MkII were new production bayonets with a coil spring in the pommel instead of the external leaf spring

Pattern 1887 Mk. III

Blade: Without fuller, 22cm false edge.
Hilt/Grips: Leather grips with fishscale pattern, 2 rivets.
Scabbard: Leather with metal mounts. Oval pointed frog stud.

Length:603mm
Blade length:467mm
Blade width:29mm
Blade thickness:7,4mm
Weight:745g

State: England
Weapon:.....Martini Henry 1887.
Rarity:.....R4

Pattern 1887 Mk. IV

1887 MkIV made by converting one of the few 1886 pattern blades made.

Pattern 1888 Mk. I Type I

Similar to the Mk. II, but with 3 brass rivets

Pattern 1888 Mk. I Type II

Blade: Without fuller, double edge.
Hilt/Grips: Wooden grips, 2 brass rivets. Cleaning hole on the grips.
Scabbard: Leather with metal mounts. Oval pointed frog stud.

Length:424mm
Blade length:305mm
Blade width:27,4mm
Blade thickness:6,3mm
Weight:435g

State: England
Weapon:...Lee Metford Mk.I, Mk.II, Lee Enfield Mk.I
Rarity:.....R3

Pattern 1888 Mk. II

Blade: Without fuller, double edge.
Hilt/Grips: Wooden grips, 2 brass rivets.
Scabbard: Leather with metal mounts. Oval pointed frog stud.

Length:424mm
Blade length:303mm
Blade width:27mm
Blade thickness:6,1mm
Weight:430g

State: England
Weapon:..... Lee Enfield Mk.I
Rarity:.....R3

Pattern 1888 Mk. III

Similar to the Mk. II, but with a different pommel variation.

Pattern 1888 trial bayonet

Muzzle ring: 18mm. Without quillion, with black leather/plastic grips and a larger cleaning hole.

Webley Mk. VI Revolver (Pritchard bayonet)

(Bottom photo is a reproduction)

Blade: T-shaped blade (from Gras 1874 bayonet)

Hilt/Grips: Solid brass

Scabbard: Blued metal (shortened Gras 1874 scabbard).

Length:321mm

Blade length:211mm

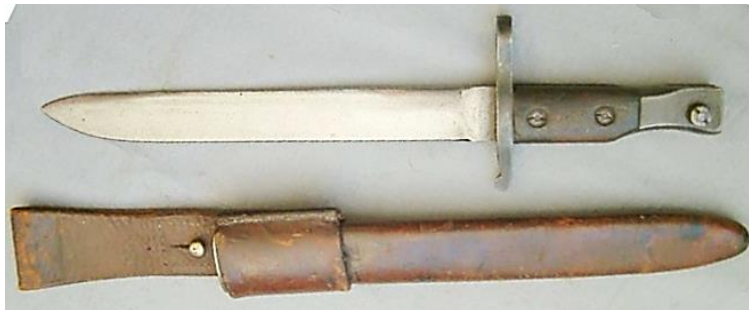

Weight:410g

State: England

Weapon:..Revolver Webley Mk. VI

Rarity:.....R5

Ross rifle bayonet

Over 100,000 of the Ross rifles and bayonets were purchased from the Canadians. These are clearly marked with UK WD marks to distinguish them from the Canadian models

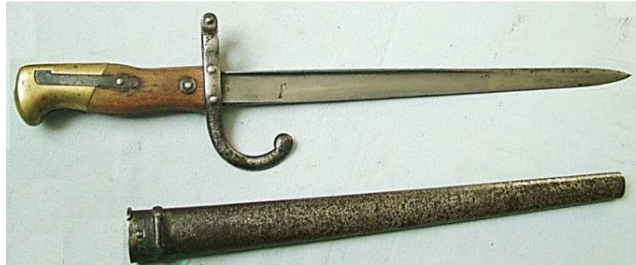

VTC

Has a 1888 style pommel and a 1907 style blade. There are several variations to the scabbard pattern.

Converted Gras 1874 (Home guard)

Converted French Gras for use by the Home Guard. Bushed muzzle ring to 15mm and modified frog stud on shortened scabbard. Some with "Made in England" stamp on the slot. Some have machined groove into the muzzle ring to allow the sights to be used.

Pattern 1903

Early ones used actual 1888 blades which are dated pre 1903, later versions have post 1903 dated new made blades.

Blade: Without fuller, double edge.

Hilt/Grips: Wooden grips, 2 screws. blued hilt and crossguard.

Scabbard: Leather with metal mounts. Oval pointed frog stud. There are even more scabbard variations authorised for this model, and the earlier 1888 scabbards will fit as well. (Some have leather covered wood scabbards, with copper washed locket with only single rivet.

Length:424mm

Blade length: ...302mm

Blade width:27mm

Blade thickness: 6,2mm

Weight:445g

State: England

Weapon:... SMLE 303

Rarity:.....R3

Pattern 1907 Mk. I (With quillion)

Most had quillion removed. Unaltered examples are rare.

Blade:Fullered

Hilt/Grips: Wooden grips, 2 screws. quillion intact.

Scabbard: Leather with metal mounts. Oval frog stud, 3 rivets on the throat.

Length:556mm

Blade length:434mm

Blade width:24mm

Blade thickness:7mm

Weight:495g

State: England

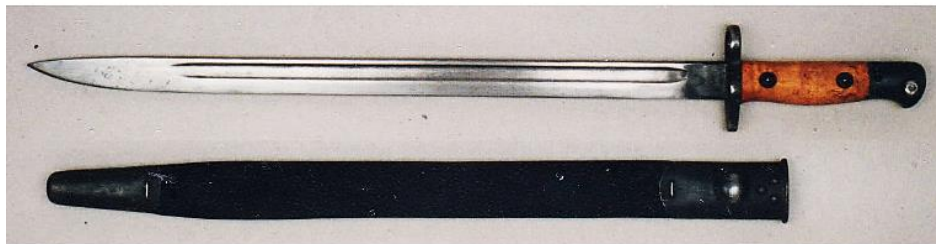

Weapon:..... SMLE Mk.

III, SMG Lanchester Mk. I

Rarity:.....R4

Pattern 1907

In 1913 it was decided to remove the hooked quillion from production blades, without changing the designation. As blades went through repairs or re-furbishment they had the quillions removed (early made versions can be found with the quillion ground off.).

Blade: Fullered. Some arsenal reworked examples have phosphated / parkerised / sandblasted / blued blade finish.

Hilt/Grips: Wooden grips, 2 screws. (some with removed quillion). Blued hilt, crossguard and ricasso.

Scabbard: Leather with blued metal mounts. Oval (old pattern) / round (new pattern) frog stud, 3 rivets on the throat.

Length:555mm

Blade length:434mm

Blade width:24mm

Blade thickness:6,8mm

Weight:475g

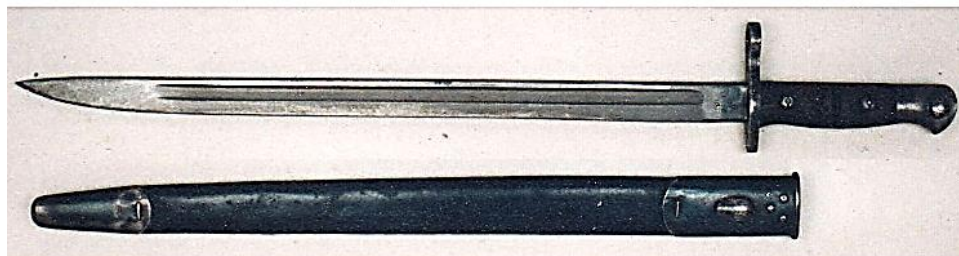

State: England

Weapon:..... SMLE Mk. III, SMG Lanchester Mk. I

Rarity:.....R1/R1-2/R2/R2-3

MAKER	PRODUCTION SERIES
WILKINSON (Most common)	2.360.000
SANDERSON (Common)	1.600.000
ENFIELD	500.000
CHAPMAN	300.000
REMINGTON (Uncommon)	100.000
MOLE (Scarce)	60.000
VICKERS (Rare) (Cleaning hole appears larger)	10.000

Pattern 1913

Made to mount on US produced 1914 pattern rifles. Having a higher muzzle ring than P1907. Makers: Remington (common) and Winchester (less common).

Blade: Fullered, phosphate finish.

Hilt/Grips: Wooden grips, 2 parallel grooves, 2 screws. blued hilt, crossguard and ricasso.

Scabbard: Leather with blued metal mounts. Oval frog stud, 3 rivets on the throat.

Length:553mm

Blade length:431mm

Blade width:23,4mm

Blade thickness:7mm

Weight:515g

State: England

Weapon:..... P 1913, P1914

Rarity:.....R2

US M1917

During WWII numbers of US 1917 rifles and bayonets were supplied under lend lease for Home guard issue, these all have the US 1917 pattern mark.

Blade: Fullered, phosphate/white finish.

Hilt/Grips: Wooden grips, 2 screws, 2 parallel grooves. Blued hilt, crossguard and ricasso.

Scabbard: Either US scabbards modified by the addition of a leather frog for attachment to UK webbing, or fitted with the 1907 pattern scabbard (known as the No1).

Length:556mm

Blade length:434mm

Blade width:24mm

Blade thickness:7mm

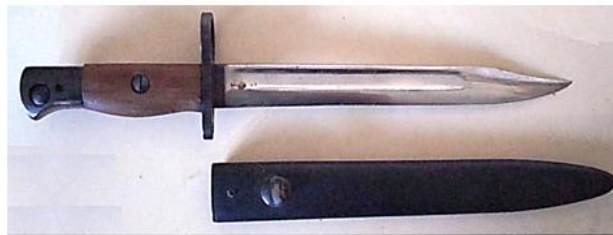

Weight:535g

State:USA/Britain

No.5 Mk I

No. 5 MkI with the single grip screw.

No.5 Mk II

Blade: Squared fuller, bowie shaped blade.

Hilt/Grips: Wooden grips, 2 screws. Hilt, crossguard and ricasso are blued.

Scabbard: Painted/blued metal, round frog stud.

Length:303mm

Blade length:202mm

Blade width:24,3mm

Blade thickness:6,7mm

Weight:280g

State: England

Weapon:..... L2A3 MP, No.5 jungle Carbine

Rarity:.....R2-3

No.5 (Short fuller)

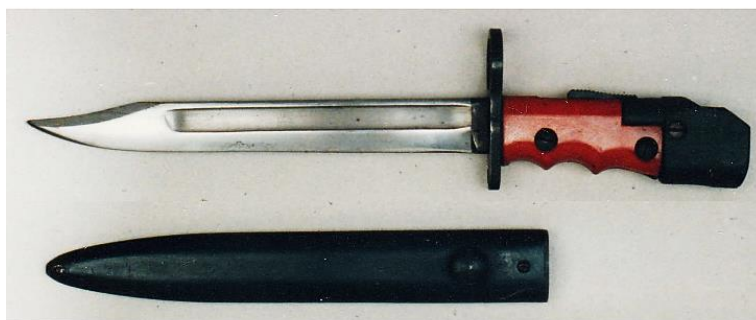

Very short fullered No5.

No.6

Using the blade of the No5 with a but with a hilt more like the 1907 (No1) bayonet. Few were made, however there appears to have been an order by Israel for the blade and a few of these turn up occasionally. Care must be made with these blades as fake is easily mistakenly identified.

No.7

Blade:Squared fuller, bowie shaped blade.

Hilt/Grips: Red/black plastic grips, 2 screws. Hilt and crossguard are blued/painted black. Novel swivelling pommel design was made to allow the blade to be attached to the machine gun and still used as a conventional bayonet.

Scabbard: Painted/blued metal, round frog stud.

Length:312mm

Blade length:199mm

Blade width:24mm

Blade thickness:7mm

Weight:365g

State: England

Weapon:.....SMLE No.4,
Sten-MP Mk.5.

Rarity:.....R3

No.8

Basically the No 5 with a small muzzle ring to fit the No4 rifle. Only 2400 trials blades made. Markings on the pommel, scabbard has brass throat.

FN FAL L1A1

After a series of trials the bayonet adopted for the SLR was the L1A1, this used the No5 blade and scabbard on a new sheet metal hilt. Has squared fuller. Protruding press stud. Used by Britain and has identifying markings on the ricasso and grip.

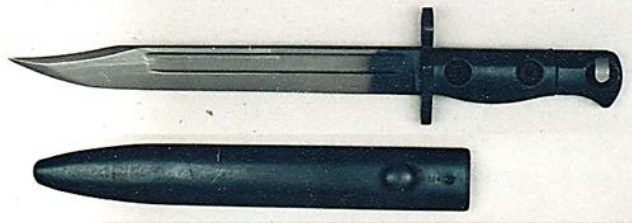

FN FAL L1A2

Riveted crossguard rather than the brazed of the L1A1. Not generally manufactured in the UK but was used by Australia and Canada. The Australian bayonet is devoid of markings. Protruding press stud. Can have squared or rounded fuller.

FN FAL L1A3

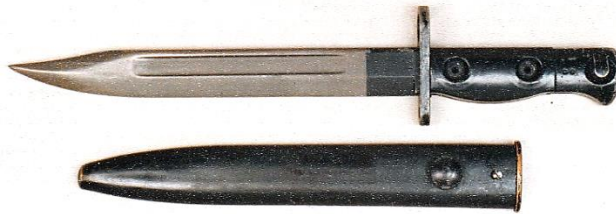

Sunked press stud, parkerised/painted metal.
Blade:Squared fuller, bowie shaped blade, phosphatised.
Hilt/Grips Metal grips, 2 rivets.
Scabbard: Parkerised/painted metal, round frog stud.

Length:305mm
Blade length:205mm
Blade width:24mm
Blade thickness:6,5mm
Weight:270g

State: England
Weapon:.....FN FAL
Rarity:.....R1

FN FAL L1A3 (Short fuller)

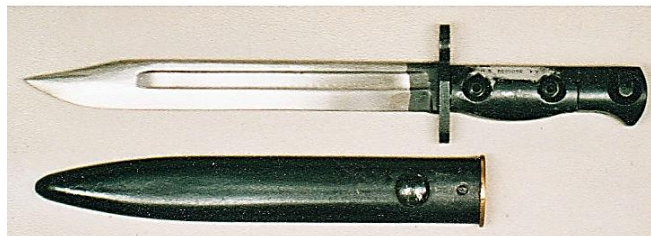

After mid 60's. Sunked press stud, parkerised/painted metal.
Blade:Squared fuller, bowie shaped blade, phosphatised.
Hilt/Grips Metal grips, 2 rivets.
Scabbard: Parkerised/painted metal, round frog stud.

Length:303mm
Blade length:203mm
Blade width:24,2mm
Blade thickness:6,7mm
Weight:330g

State: England
Weapon:.....FN FAL
Rarity:.....R1

FN FAL L1A4

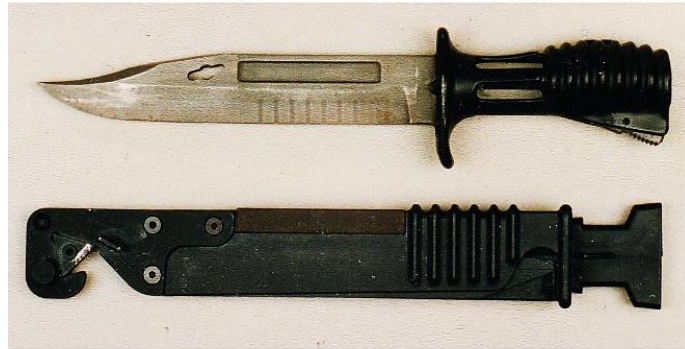

Similar to the L1A3, the only difference is the pommel is attached to the tang by rivets and not by brazing.
 Parkerised / painted metal.
Blade: Squared fuller, bowie shaped blade.
Hilt/Grips Metal grips, 2 rivets.
Scabbard: Parkerised/painted metal, round frog stud.

Length:303mm
Blade length:202mm
Blade width:25mm
Blade thickness:6,2mm
Weight:300g

State: England
Weapon:.....FN FAL
Rarity:.....R1

L3A1

Blade: Bowie shaped, short squared fuller, hole for cutting wire.
Hilt/Grips: Hollow socket, metal
Scabbard: Plastic.

Length:280mm
Blade length:177mm
Blade width:30,7mm
Blade thickness:6,6mm
Weight:420g

State: England
Weapon:.....L85A1
Rarity:.....R2-3

BULGARIA

Mannlicher M1888

Stamped with Bulgarian markings (Lion before serial no., V&N, Lion on the ricasso)

Blade: Squared fuller, edge facing downwards.

Hilt/Grips: Wooden grips, 2 rivets.

Scabbard: Painted/blued metal with U-shaped frog stud.

Length:376mm

Blade length:249mm

Blade width:26,7mm

Blade thickness:6mm

Muzzle ring:16,3mm

Weight:365g

State:Austria Hungary, Bulgaria

Weapon:Mannlicher M1888

Rarity:.....R2-3

Mannlicher M1895

Stamped with Bulgarian markings. Electropen serial numbers. Some are converted from NCO. Some had replaced wooden grips.

Blade: Squared/rounded fuller, edge facing upwards.

Hilt/Grips: Wooden grips, 2 rivets.

Scabbard: Blued metal with U-shaped frog stud.

Length:359mm

Blade length:248mm

Blade width:22,9mm

Blade thickness:5,3mm

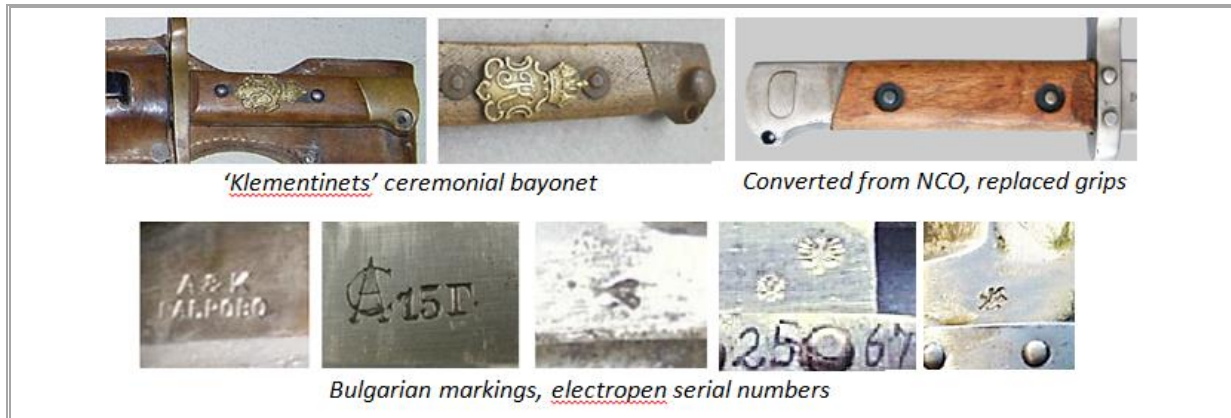

Muzzle ring:15mm

Weight:285-300g

State:..... Austria Hungary, Bulgaria

Weapon:Mannlicher M1895

Rarity:.....R1

'Klementinets' ceremonial bayonet

Converted from NCO, replaced grips

Bulgarian markings, electropen serial numbers

AK-47

Blade: Blunt, facing upwards, fuller in the center.
Hilt/Grips: Black/brown plastic grips, 2 screws. Serial number on the pommel.
Scabbard: Blued steel. Vinyl belt hanger with leather strap.

Length:311mm
Blade length:200mm
Blade width:22mm
Blade thickness:5mm
Weight:280g

State:Bulgaria
Weapon: AK-47

AKM Type II

<p>Some orange bayonets and scabbards have been painted with a gloss black/camo paint. Blade: Bowie knife shaped, sawback, no fuller, hole for cutting wire, Hilt/Grips: Orange plastic grips, 1 plastic rivet, grip: electro engraved serial. Scabbard: Orange plastic (some are painted), leather frog, leather wrist strap.</p>	<p>Length:267/270mm Blade length:146mm Blade width:30mm Blade thickness: ..3,5mm Weight:300g</p>	<p>State:Bulgaria Weapon: AKM</p>

CZECHOSLOVAKIA

Mannlicher M1895

Stamped with Czech markings. Electropen serial numbers. Some are converted from NCO. Some had replaced wooden grips.
Blade: Squared/rounded fuller, edge facing upwards.
Hilt/Grips: Wooden grips, 2 rivets.
Scabbard: Blued metal with U-shaped frog stud.

Length:359mm
Blade length:248mm
Blade width:22,9mm
Blade thickness:5,3mm
Muzzle ring:15mm
Weight:285-300g

State:..... Austria Hungary, CSZ
Weapon:Mannlicher M1895
Rarity:.....R1

Czechoslovakian markings on bayonet and scabbard, electropen serial number.

Some have replaced wooden grips, some are converted from NCO

VZ-24

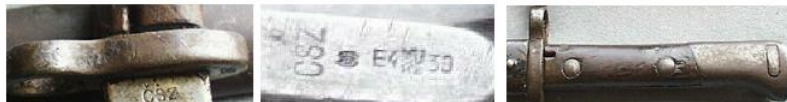

Some have serial number on the side of the pommel, some wave regimental markings on the pommel.
Blade: Rounded fuller, edge facing upwards.
Hilt/Grips: Wooden grips, 2 screws.
Scabbard: Blued metal with U-shaped frog stud.

Length:433mm
Blade length:298mm
Blade width:23mm
Blade thickness:5mm
Muzzle ring:15,5mm
Weight:405g

State:.....CSZ
Weapon:VZ-24
Rarity:.....R1

EXPORT

Export scabbard markings. Has slightly different pommel and muzzle ring shapes, no rivets in the crossguard.

GERMAN OCCUPATION

Modified during German occupation (muzzle "ears", screw in the scabbard)

S-24(t): Made during German occupation. Made with/without muzzle ring/stamped serial on the ricasso and scabbard/WaA stamped.

RUSSIAN CONTROL

Manufacture by BRNO (tgf) under Russian control (crossed swords) in 1950.

DRESS

Without pommel rifle mounts, FS marked / painted scabbard.

EDGE DOWN

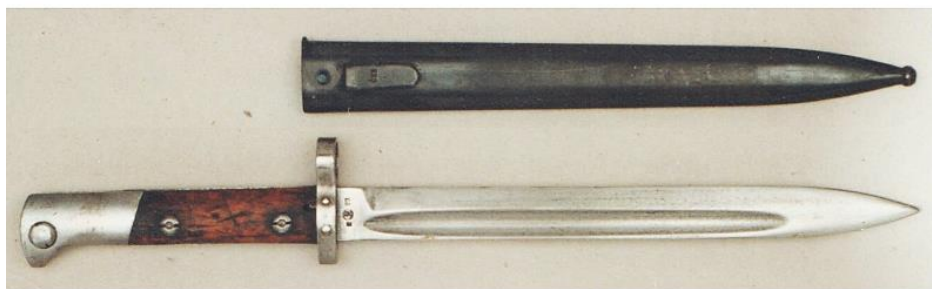

VZ24 type blade with edge down and not edge up as normal.

POST WAR

Heavily blued post war manufactured marked E3 46. Marking on tang and not ricasso as pre war models.

VZ-23 (Short)

<p>Blade: Rounded fuller, edge facing upwards. Hilt/Grips: Wooden grips, 2 screws. Scabbard: Blued metal with U-shaped frog stud.</p>	<p>Length:379mm Blade length:246mm Blade width:23mm Blade thickness:5,2mm Muzzle ring:15,5mm Weight:335g</p>	<p>State:.....CSZ Weapon:VZ-24 Rarity:.....R2</p>

M 1898 nA mS

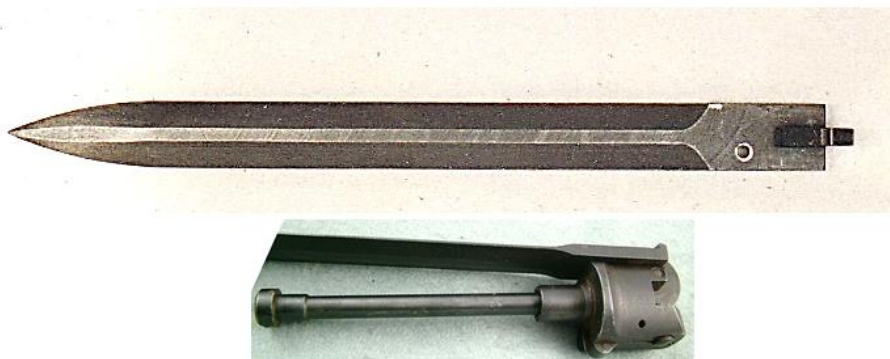

German S98 nA mS used by Czech forces after WWI. It has got a Czech arsenal mark and a Czech serial on the pommel. Very rare.

98/05 (Reworked)

Refurbished German 98/05 used by initial units on formation of Czechoslovakia in 1918. E Lion 23 markings on the ricasso.

VZ-52

Folding blade. Blade folds sideways onto rifle.

Length:290mm
Blade length:240mm
Blade width:23mm
Blade thickness:5mm
Weight:175g

State:.....Export
Weapon.....VZ-52, 52/57
Rarity:.....R2

VZ-58

Blade: Rounded fuller, integral with the crossguard.
Hilt/Grips: Wooden/bakelite-wood composit grips, invisible/metal rivets.
Scabbard: Leather with ink stamp.

Length:290mm
Blade length:173mm
Blade width:20mm
Blade thickness:5mm
Weight:230g

State:.....CSZ
Weapon:.....VZ-58
Rarity:.....R1/R2

WOODEN GRIPS

Earliest, rarest type, with wooden grips, short tang, and no lower crosspiece extension.

SHORT TANG, 2 RIVETS

Bakelite-wood composit grips, short tang and without the lower crossguard extension found on later examples. The grip scales are secured by two rivets.

SHORT TANG, 3 RIVETS

An unusual, rare example of the early, short-tang/no lower crosspiece type, with scales secured by three rivets. Three-rivet examples may be the result of repairs.

SHORT TANG, INVISIBLE RIVETS, CROSSGUARD EXTENSION

Mid-production example, still has the short tang, but incorporates the lower crossguard extension. Unusual variant with no visible rivets .

SHORT TANG, CROSSGUARD EXTENSION

Mid-production example, still has the short tang, but incorporates the lower crossguard extension. This variant has a single visible rivet securing the grip scales.

LONG TANG

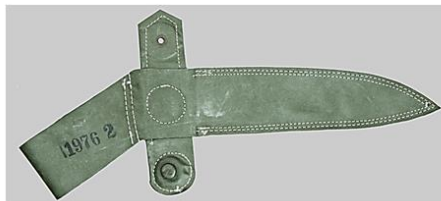

Late-production, most common variant with the full-length tang that protrudes beyond the grip scales. The grip scales are secured by two rivets.

PRESENTATION

Presentation VZ58 with complete lack of fixings to mount on rifle. Wooded grips are special to this piece as the long tang and pointed crossguard indicate a late model bayonet was used as a basis for this piece. There are no markings on the bayonet at all, metal is chrome/nickel plated.

GREEN VINYL SCABBARD

Green vinyl scabbard for use with the VZ-58 bayonet in nuclear, biological, and chemical (NBC) warfare environments. This scabbard is part of the soldier's chemical warfare kit.

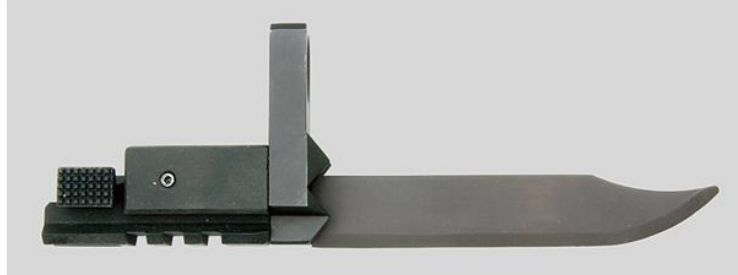

BON SA-58

An updated VZ58 with altered blade profile and soft polymer grips. Designed for a rifle that was not put into production, blade is sold as a knife but is reputedly used by some units. The scabbard is available in the camouflage, plain green and black.

CZ-75

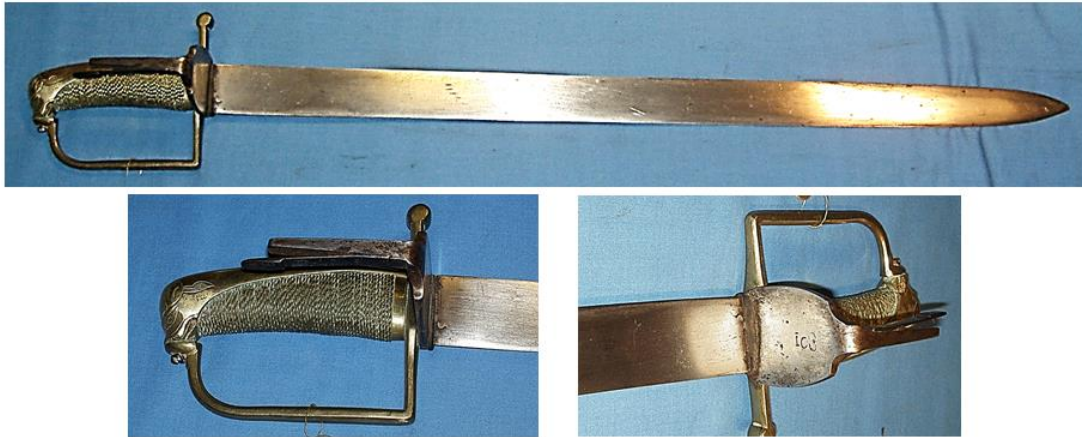

Accessory block with bayonet for the tactical variants of the 9 mm CZ-75 pistol. The tactical block serves to protect the muzzle and slide, enabling the user to break glass or other light materials while keeping the pistol pointed in the direction of a potential adversary. The block also prevents muzzle contact from moving the slide out of battery, which would prevent the pistol from firing. A steel bayonet blade may be attached, if desired. The tactical block is very well made. The hilt is of aluminum alloy. The crosspiece and blade are steel.

DENMARK

M 1801

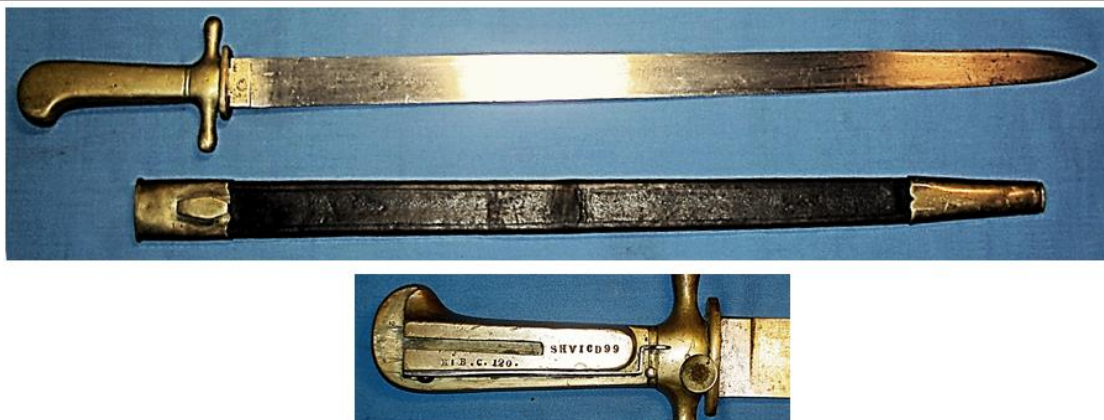

Variations: Long, shortened. Internal spring, external spring.
Blade: No fuller, double sided edge.
Hilt/Grips: Brass with hand guard. grips of twinned brass threads.
Scabbard: Leather with brass mounts.

Length:.....760mm
Blade length:620mm

State:.....Denmark
Weapon.....M1801, M1803, M1807 hunting rifle
No. made:10400

M 1848 Hirschfänger

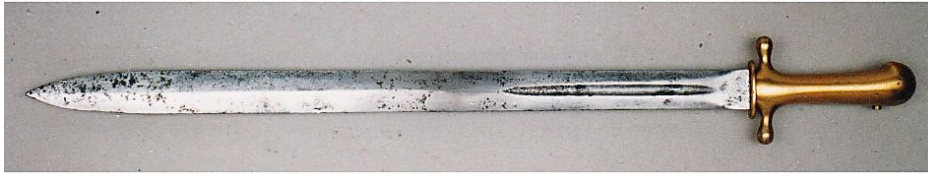

This bayonet was never used in Denmark, but in 1869 it was modified to craftsmen sable 'hantverkarsabel' M/1869 by removing locking device.
Blade: Double edged, no fuller.
Hilt/Grips: Brass hilt,
Scabbard: Leather with brass mounts, angular frog stud.

Length:705mm
Blade length:570mm

State:.....Denmark
Weapon.....M1807 modified hunting rifle
Rarity:.....R4-5

M 1853/66 Hirschfänger

Issued to Danish navy.

Blade: Double edged, short narrow fuller.

Hilt/Grips: Brass hilt,

Scabbard: Leather with brass mounts, round frog stud.

Length:680mm

Blade length:552mm

Blade width:31-33mm

Blade thickness:7mm

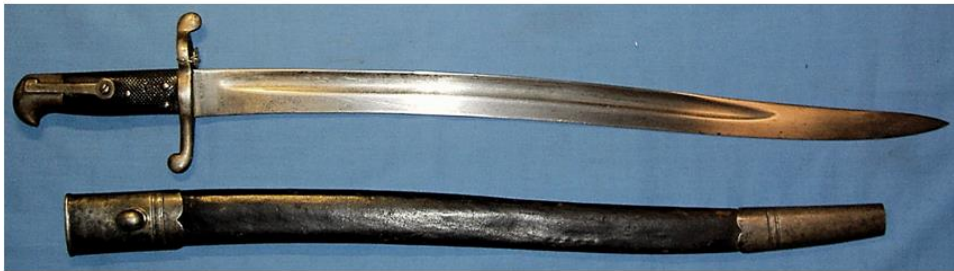

Weight:855g

State:.....Denmark

Weapon.....Dornbüchse
M 1848, M1853-66

Rarity:.....R4-5

M 1861 (Rifle association rifle)

Blade: Yatagan, rounded fuller.

Hilt/Grips: Leather, 4 rivets.

Scabbard: Leather with metal mounts, rounded frog stud.

Length:650mm

Blade length:530mm

Muzzle ring:19mm

State:.....Denmark

Weapon.....M1861
Rifle association rifle.

Rarity:.....R4

Remington 1867

Variations: Long, shortened. Internal spring, external spring.
Blade: Yatagan, rounded fuller.
Hilt/Grips: Leather, 4 rivets.
Scabbard: Leather with metal mounts.

Blade length:554mm
Blade width:29,6mm
Blade thickness:9,2mm
Weight:685g

State:.....Denmark
Weapon:.....Remington M1867
Rarity:.....R3

Remington 1867 (Dress)

1867 with muzzle ring and all mounting attachments in pommel filled in, chromed with horn grips.

M 1867/93

Normally stamped with crown over 95 or 96 (manufactured in 1895 or 1896).
Blade: Fullered.
Hilt/Grips: Wooden grip (checked), 2 screws, one on one side of the hilt, locking mechanism on the other side.
Scabbard: Leather scabbard with plated chape and mouthpiece. If the scabbard was replaced, a shortened M1882 scabbard was used. It has brass chape and mouthpiece.

Length:690mm
Blade length:556mm
Muzzle ring:18,2mm

State:.....Denmark
Weapon:.....M1867/93 Navy rifle
No. made:1700

Krag-Jorgensen 1889

Early leather grips variation produced until cca. 1893 in Germany by Weyersberg Kirschbaum & Co, Solingen and Axel Coppel, Solingen.
Blade: Narrow squared fuller, blade and hilt are one piece.
Hilt/Grips: Leather, 2 rivets.
Scabbard: Leather with metal mounts.

Lenght:340mm
Blade length: ...ca. 220mm
Blade width:24mm
Blade thickness:4,2mm
Weight:245g

State:.....Denmark
Weapon.....Krag-Jorgensen M1889
Rarity:.....R3

Krag-Jorgensen 1889 (Wooden grips)

Later wooden grips variation produced since cca. 1893 in Denmark. Manufactured by Hærens Tøjhus, Hærens Rustkammer, HVV and RKV.

Krag-Jorgensen 1915

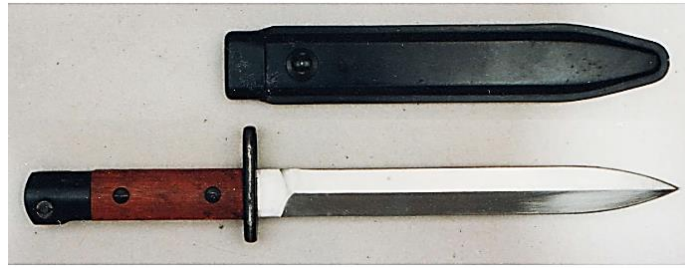

Found in blued with brown scabbard and polished with black scabbard.
Blade: T-shaped.
Hilt/Grips: Wood, 2 brass rivets..
Scabbard: Leather with metal mounts.

Lenght:555mm
Blade width:20mm
Blade thickness: ...10,5mm
Weight:365-380g

State:.....Denmark
Weapon.....Krag-Jorgensen M1889
Rarity:.....R3-4

Madsen 1947/53

M1947 bolt action rifle: The distance from muzzle ring to the grip is circa 2 mm. 6500 serial numbered examples exported to Colombia, unnumbered are also found.

M1953 MP: The distance from muzzle ring to the grip is circa 4 mm.

Blade: Double edged,

Hilt/Grips: Wood, 2 rivets/screws, hilt and crossguard painted black.

Scabbard: Stamped sheet metal, painted black, internal spring, small round frog stud.

Length:323mm

Blade length:208mm

Blade width:24mm

Blade thickness:5mm

Weight:310g

State:.....Denmark

Weapon.....Madsen 1947, 1947/53

Rarity:.....R3

Madsen 1953

Unknown blade for Madsen MP M/53 Mk II.

Length:219mm

Blade length:129mm

State:.....Denmark

Weapon.....Madsen 1947, 1947/53

M 1953 (1917)

Modified English M 1913 or US M 1917 with Danish web frog. The bayonets delivered were a mixture of P1913 and M1917. They can be found with stamps from England, USA, Canada and Denmark (P1913) or USA, Canada and Denmark (M1917).

Length:555mm

Blade length: ...443mm

Muzzle ring:15,5mm

State:...US, UK, Denmark

Weapon.....Remington M1917

No. bought:50.000

M 1955 (1950)

M1 Garand Danish manufactured (local designation M1955), wood grained scabbard. Danish made bayonets (FKF) and scabbards. Some bayonets were made in the US, but the scabbards are made in Denmark

M 1962

Blade: No fuller, blued.

Hilt/Grips: Plastic, 2 screws. Hilt and crossguard blued.

Scabbard: Wood grained, integral belt strap.

Length:290mm

Blade length:170mm

Blade width:22mm

Blade thickness:5mm

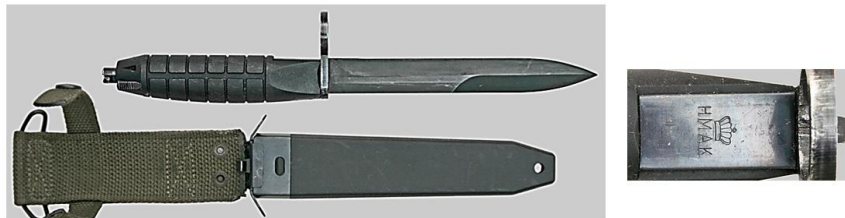

Weight:300g

State:.....Denmark

Weapon:.....Garand GM 50

Rarity:.....R1-2

M/75

Knife bayonet for use on the 7.62 mm. NATO caliber AG3 assault rifle. The AG3 is a variant of the German G3. Three m/75 variations exist:

- The earliest examples had a black 6-groove grip; broad notched crosspiece; and steel pommel.
- A second variant had a 7-groove grip, half-notched crosspiece; and plastic pommel.
- This example is of the third variant, which is identical to the second, except for the narrow plain crosspiece.

Earlier scabbards had the British-style belt fastener, like the m/62 bayonet scabbard above. Later scabbards had the U.S. M1910-style wire belt hanger. All Danish m/75 bayonets were made in Germany. Another variation is M75 with double-edged blade and overall length of 370mm.

Trial/Experimental

Bayonets, that were produced in limited numbers for trial purposes. Generally these bayonets are very rare.

M 1842

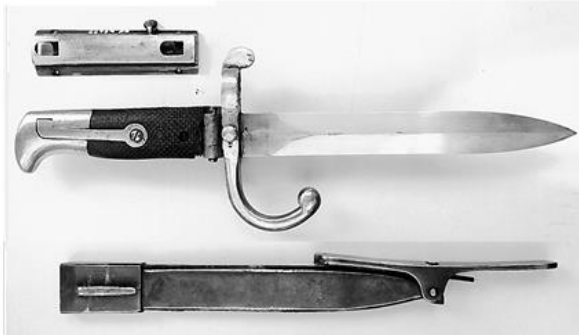

Sword bayonet with brass hilt and leather scabbard. Designed by Løbnitz. The blade is the same as for jagerhirschfanger M1801. Bayonet made at Fredriksverk (usually marked crowned 'F').

Length:765mm
Blade length: ...635mm
Muzzle ring:23,5mm

State:.....Denmark
Weapon.....M1842
 NCO rifle
No. made:cca. 33

M 1867 (Folding bayonet)

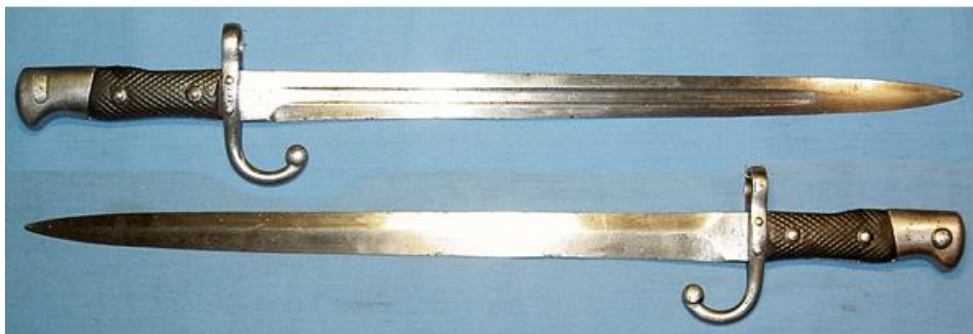

Foldable behind the crossguard. The scabbard has a base plate and can be used as monopod in folded position. There are at least two versions: -Leather grips and an oval base plate. -Wooden grips and a round base plate.

Length:320mm
Blade length: ...190mm
Muzzle ring:19mm

State:.....Denmark
Weapon.....M1867
 rifle

M 1883

Hilt similar to the French M1874. Blade is double edged, and has a fuller on one side. The grips are made from pressed leather. Lockin stud with internal coil. Steel scabbard. The trials ended in 1885 because a new rifle model was planned.

Length:520mm
Blade length: ...400mm
Muzzle ring:18mm

State:.....Denmark
Weapon.....M1867
No. made:220

M 1886 (Long)

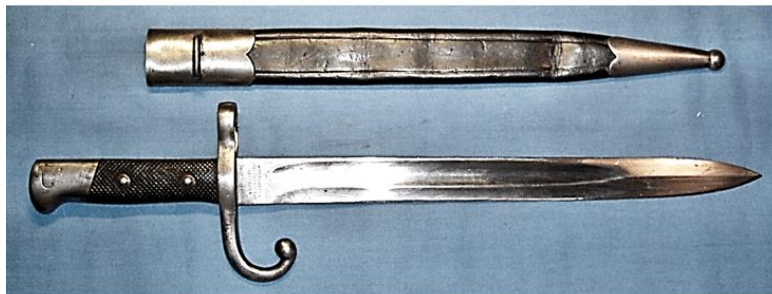

Cruciform blade. Made by Weyersberg, Kirschbaum & Co, Solingen.

Length:548mm
Blade length: ...431mm
Muzzle ring:15mm

State:.....Denmark
Weapon:.....Remington-Lee .315 cal.
No. made:160

M 1886 (Short)

Fullered blade. Made by Weyersberg, Kirschbaum & Co, Solingen.

Length:418mm
Blade length: ...301mm
Muzzle ring:15mm

State:.....Denmark
Weapon:.....Remington-Lee .315 cal.
No. made:320

M 1888

Fullered blade, wooden grips with 2 rivets, quillion on the pommel. The bayonet exists in two models, one with the edge upwards and one with the edge downwards. Other variations are: 1888 without quillion and 1888 with folding blade.

Length:303mm
Blade length: ...185mm

State:.....Denmark
Weapon:.....M1888
No. made:Just a few

M 1915 a

Similar to the 1915, but the upper tang is thinner (just a few mm thick). The muzzle ring is aligned with the guard and the blade.

Muzzle ring:16mm

State:.....Denmark
Weapon:..... Krag Jørgensen M1889

M 1915 b

Similar to the 1915, but the upper tang is thinner (just a few mm thick). Compared 1915 b (left) and regular 1915 (right) in the photo.

Muzzle ring:16mm

State:.....Denmark
Weapon..... Krag Jørgensen M1889

M 1917 Bang

Like M 1915, but without muzzle ring. Steel scabbard with bayonet stud. The scabbard is attached to the rifle, and the bayonet is mounted on the scabbard. Design by Sören Hansen Bang.

Lenght:545mm
Blade lenght: ...415mm

State:.....Denmark
Weapon.....Madsen M1917, Bang rifle.
No. made:just a few

FINLAND

M 1793

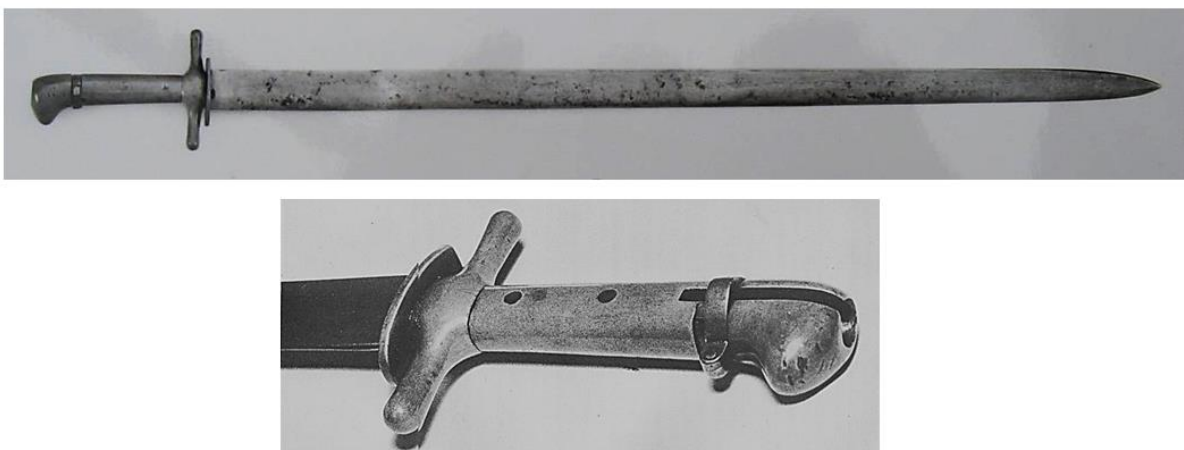

Blade: Narrow fuller near the spine of the blade.
Hilt/Grips: Brass hilt, metal handguard, octagonal muzzle ring with locking bolt.
Scabbard: Leather with brass mounts, elongated frog stud.

Lenght:780mm
Blade lenght:660mm

State:.....Finland, Sweden
Weapon:.....M1793
 Flintlock.
Rarity:.....R4-5

M 1827 (Finnish Guard Sharpshooter battalion)

As the bayonet was extremely long and attachment weak the bayonets were soon replaced by shorter ones.
Blade: Long, single edged blade without fullers.
Hilt/Grips: Brass hilt.

Lenght:832mm
Blade lenght:699mm

State:.....Finland
Rarity:.....R4-5

M 1827/29 (Finnish Guard Sharpshooter battalion)

2 variations of blade length have been found.
Blade: Broad double edged blade.
Hilt/Grips: Brass hilt.

Length:550/460mm
Blade length: ...410/325mm

State:.....Finland
Rarity:.....R4-5

M 1927/28/29

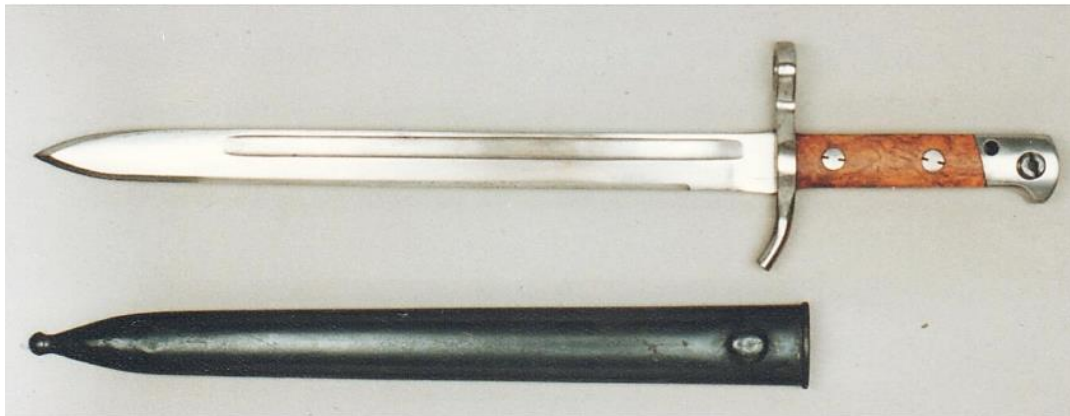

M1927: Hilt, loose crossguard and interchangeable blade sitting in a dove tail in hilt. Kept together with 2 rivets penetrating grip plates. Rivet heads were domed to allow their easy removal for blade change.
M1929: Hilt is blued and blade bright. Welding the crossguard to hilt by two weld spots behind crossguard, the dovetail design was also modified and one internal rivet was added. More or less all bayonets existing today are 1929.
M1928: Hilt is blued and blade bright. Metal parts are permanently attached together. Blade is welded to hilt in middle of tang. Crossguard is attached with a pins behind crossguard, inside grip plates. Pommel has no oil hole but at later overhaul it was drilled in some cases. Grip plates are attached by flat ground rivets as there was no possibility to replace the blade. In some late production models grip plates are attached by screws as well. Tubular overhaul rivets exist occasionally.
Blade: Fullered, convex sharpened.
Scabbard: Blued steel, 2 longitudinal grooves. Teardrop shaped frog stud.

Length:412mm
Blade length:300mm
Blade width:22,3mm
Blade thickness:5mm
Weight:370g

State:.....Finland
Weapon:.....Car.
 M91, M27, M28
Rarity:.....R2-3/R4

M 1928/30/35

M1928/30: All white finish. There is oil hole on pommel, however some early models do not have oil hole. Crossguard is attached with 2 visible pins.

M1935: Similar to M/28-30 but it is blued overall and does not have Sk-markings. There are 2 different blade tip sharpening patterns depending on maker.

Blade: Fullered, sharper edges.

Hilt/Grips: Wood, 2 screws, cleaning hole in the pommel.

Scabbard: Blued steel, oval frog stud.

Length:415mm
Blade length:300mm
Blade width:24mm
Blade thickness:5mm
Weight:390g

State:.....Finland
Weapon:.....Car.
 M91, M27, M28, M28 Sk.
Rarity:.....R2-3

M 1939

A few prototypes with slightly different handle and pommel exist.

Blade: Narrow fuller, bowie shaped.

Hilt/Grips: Wood, 2 screws.

Scabbard: Green leather with metal rivets. Some early scabbard were brown.

Length:292mm
Blade length:178mm
Blade width:25mm
Blade thickness: ...5,3mm
Weight:325g

State:.....Finland
Weapon:.....Mosin
 M1939
Rarity:.....R3-4

M 1942

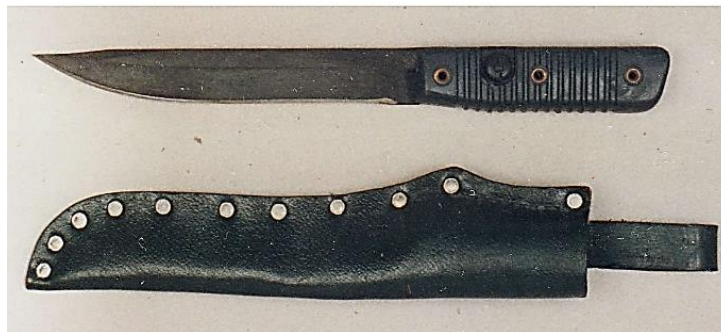

Due to delivery problems at M39 bayonet maker, some 150 bayonets were shortened and sent to units for field tests. Made from M28/30 bayonets with scabbards, and a small number of M28 and M29.

Length:295mm
Blade length:180mm
Muzzle ring:16,5mm

State:.....Finland
Weapon: Mosin M1939
No. made:cca. 150

M 1960/62

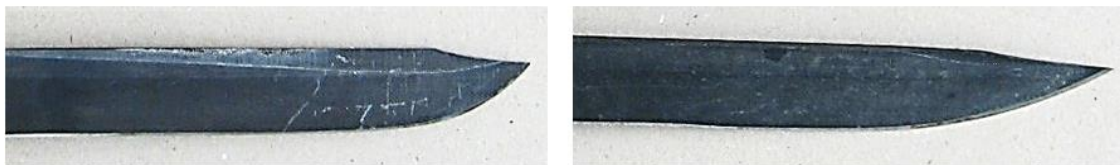

Blade: Knife blade, no fuller, blued.
Hilt/Grips: Plastic, 3 rivets.
Scabbard: All leather with metal rivets.

Length:266mm
Blade length:153mm
Blade width:24mm
Blade thickness:4,5mm
Weight:185g

State:.....Finland
Weapon:.....RK62
Rarity:.....R2-3

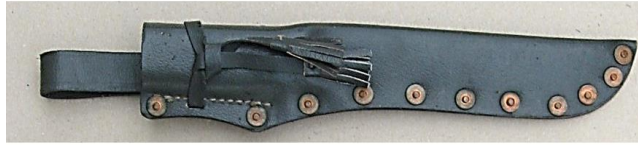

Blade variations

Early blade tip pattern (left), later blade tip pattern (right)

Scabbard variations

Decorative for knives.

White for parade use.

Late pattern with 3 rivets.

11 large rivets with unit marking (souvenir).

Early pattern with 11 smaller rivets.

AK-47 (M 1954)

Reworked AK bayonet, has arrow mark of iveshk arsenal. The lack of scabbard drain is typical of Finnish reworks.

Training bayonet C 1966

Made of rubber.

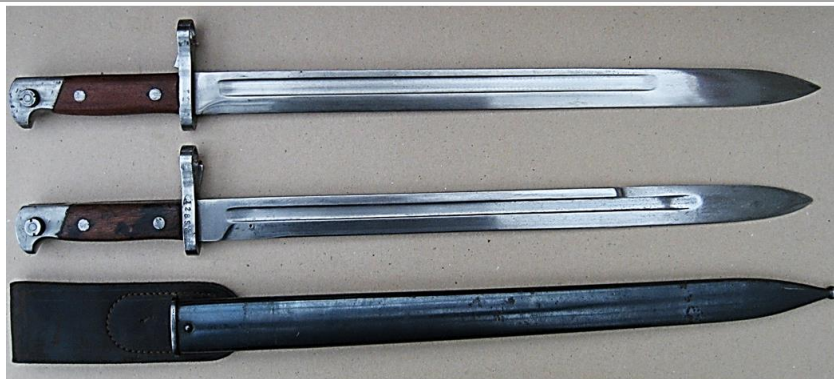

Length:290mm
Muzzle ring:20mm
Weight:350g

State:.....Finland
Weapon:.....M1960, M1962

Foreign

Bayonets, that weren't produced in Finland / for foreign rifles.

Winchester M 1895

Sword bayonet for Russian Winchester M95 rifle, that were left behind after 1917 war. 2 variations of this bayonet exist in Finland: -A normal version (top). -Scarce blade version where the manufacturer possibly has used an US m/1905 blade (less than 1/20 M95 bayonets have this blade) (bottom).

SG 1898 (German with Finnish markings)

In 1919 Finland purchased a big quantity of WW1 surplus weapons from France. Also German 98a carbines with various types of bayonets, as there was lack of short rifles cavalry and artillery used until mid 1920's. The weapons often had unit markings but bayonets rarely. In the picture is an example on a long SG98 bayonet unit marking. K.T.R.1. N.10 (for Finnish field artillery regiment 1 weapon No. 10).

Japanese Arisaka

Japanese Arisaka bayonets. Some were shortened, as this was not official there were no instructions and near each shortened bayonet is different. Length varies from 300 to 345mm and scabbards and frogs have also been modified.

Trial/Experimental

Bayonets, that were produced in limited numbers for trial/prototype purposes. Generally these bayonets are very rare.

M 1960 - Folding (prototype)

Metal parts are lacquered green. Scabbard is hand made of brown leather.

Length:307mm
Blade length: ...195mm
Muzzle ring:16mm

State:.....Finland
Weapon.....RK60

M 1960 - Folding

Folding bayonet of series production. Metal parts lacquered green. Brown leather scabbard.

Length:304mm
Blade length: ...192mm
Muzzle ring:18mm

State:.....Finland
Weapon.....RK60

M 1960 - Fixed (prototype)

Fixed prototype with locking latch in different place than in series production. Rubber grip is hand made and attached with tubular rivets. Scabbard is hand made of brown leather.

Lenght:275mm
Blade lenght: ...167mm

State:.....Finland
Weapon.....RK60

M 1960 - Fixed

Fixed bayonet of series production. Molded black rubber grip attached with pin rivets. Metal parts lacquered green. Brown leather scabbard.

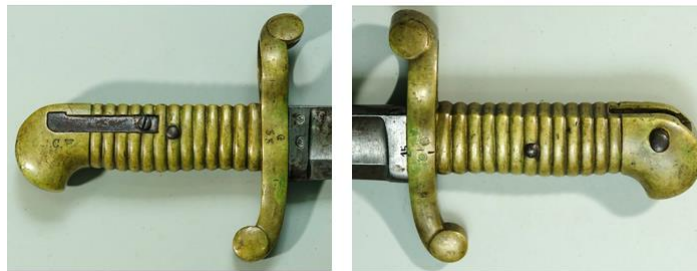

Lenght:277mm
Blade lenght: ...170mm

State:.....Finland
Weapon.....RK60

FRANCE

M 1840

French M1849 for the Rampart gun. The later M1942 is similar, but with steel crossguard. Very rare.

M 1842

Blade: Yatagan, fullered.

Hilt/Grips: Solid brass, 15 circumferential grooves, 2 rivets (1 for spring), leaf spring, steel crossguard.

Scabbard: Blued steel.

Length:697mm

Blade length:574mm

Blade width:31mm

Blade thickness:11mm

Weight:790g

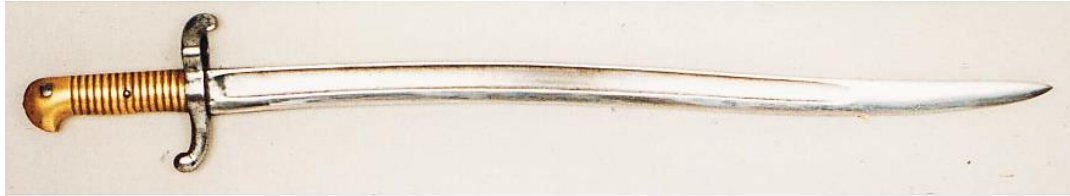

State: France

Weapon:.....Carb. 42, 46, 56, Mosqueton 1829.

Rarity:.....R3

M 1842/59

Similar to the 1842, but with an internal coil spring.
Blade: Yatagan, fullered.
Hilt/Grips: Solid brass, 15 circumferential grooves, 1 rivet, internal coil spring, steel crossguard.
Scabbard: Blued steel.

Length:697mm
Blade length:574mm
Blade width:32mm
Blade thickness:10,5mm
Weight:790g

State: France
Weapon:.....Carb. 42, Mosqueton 1829/41/46.
Rarity:.....R3

M 1861 (Marine)

Blade: Yatagan, fullered.
Hilt/Grips: Brass, 16 circumferential grooves, brass crossguard.
Scabbard: Blued steel.

Length:698mm
Blade length:576mm
Blade width:29,5mm
Blade thickness:8,6mm
Weight:695g

State: France
Weapon:.....Marine Mle. 1861.
Rarity:.....R4

M 1866 Chassepot

Blade: Yatagan, fullered.
Hilt/Grips: Brass, 16 circumferential grooves, steel crossguard.
Scabbard: Blued steel, side lip. German reissued have elongated frog stud and are painted black.

Length:700mm
Blade length:577mm
Blade width:30mm
Blade thickness:8,7mm
Weight:655g

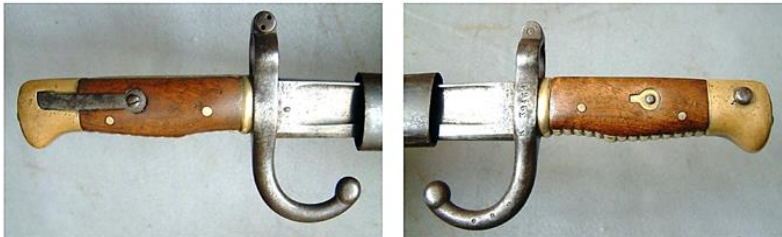

State: France
Weapon:.....Mle. 1866 Chassepot
Rarity:.....R2-3/R4

1866 Cadet

Lenght: 568mm, blade length: 468mm, blade width: 28mm, blade thickness: 8,6mm, weight: 530g.

1866 - Converted

Conversion of 1866 with wooden inserts into modified grips, held by brass rivets.

1866 - 3 Fullers

Defense Nationale bayonet made using a modified side arm sword blade. This one has a distinctive 3 fuller blade.

1866 - Double edge

Defense Nationale bayonet using an 1866 style hilt and a re-used double edged sword blade. Chassepot style muzzle ring with cut out, and Remington style un chamfered slot. Bottom rivet is missing and shows only a dimple where the hole would be drilled

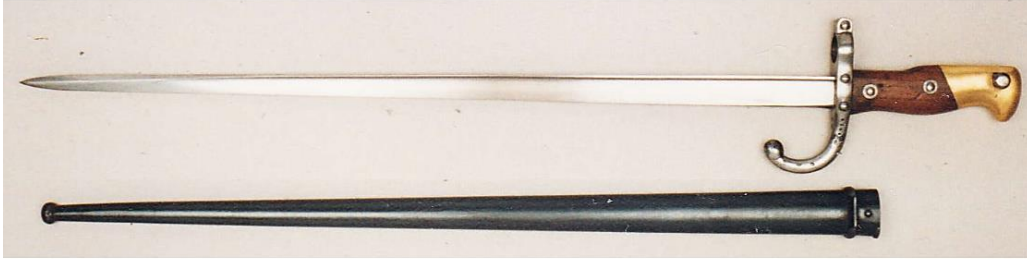

1866 - Double barrel

Doubled barrel muzzle ring, probably a hunting blade or a Franco Prussian war period model. Slot is the un-chamfered Remington style

M 1874 Gras

Makers: Most common: St. Etienne. Common: Chatellerault, Tulle, Ursine de Steyr. Less common: Waffenfabrik Steyr (Greece), Paris Oudry, L. Deny Paris. Uncommon: Alex Coppel. Rarest: Commercial St. Etienne (without date on the spine), commercial Chatellerault- Henry Entrepreneur (without date on the spine), OE WG marked (on the spine).
Blade: T-shaped.
Hilt/Grips: Brass pommel, wooden grips, 2 rivets, steel crossguard.
Scabbard: Blued steel (Tulle made are found painted black).

Length:645mm
Blade length:523mm
Blade width:21mm
Blade thickness:12mm
Weight:595g

State: France
Weapon:.....1874
 Gras, 1866/74 Chassepot
Rarity:.....R1-2

1874 - Commercial

Scarce commercial example of the M1874 Gras bayonet. Very little is known about the maker of this commercial bayonet. "S . L" was Sutterlin & Lippmann's commercial trademark and is found on the revolvers they produced at St. Etienne. The placement, between the crosspiece pins is unusual.

1874 - Telegraphers

1874 Gras with muzzle ring filled with brass threaded plug. Stud is permanently fixed as adjustment screw on top of muzzle ring has been riveted. This conversion is to allow the bayonet to be used as an earth for telegraphers.

1874 - Kropatschek

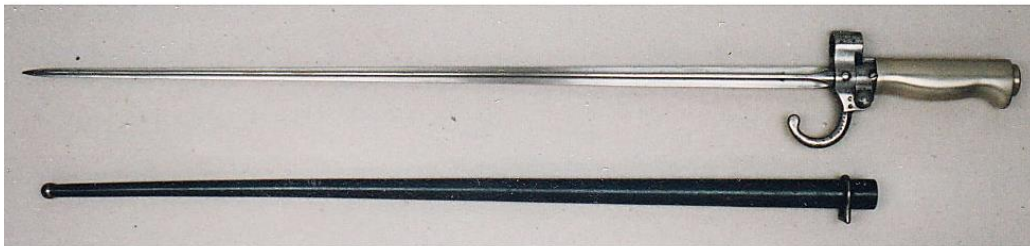

Kropatschek bayonet made for France by Steyr in Austria. Similar to the 1874 Gras the back of the handle is straight and not humped, muzzle ring and cross guard are different. It is also similar to the Romanian Peabody, but the hilt is shorter.

BAYONET MANUFACTURERS (Engraved on the spine of the blade)	
State Arsenals	Private Makers and Subcontractors
Manufacture Imperiale de Chatellerault	Alexander Coppel & Cie., Solingen
Manufacture Imperiale de Mutzig	Cahen & Lyon, Paris
Manufacture Imperiale de Saint Etienne	Charles Reeves & Co., Birmingham
Manufacture Imperiale de Tulle	Christofle, Paris
Manufacture Nationale de Chatellerault	Felix Escoffier, St. Etienne
Manufacture Nationale de St. Etienne	Francois Louis Henry, Chatellerault
Manufacture Nationale de Tulle	L. Deny, Paris
Manufacture d'Armes de Chatellerault	Oesterreichische Waffenfabrik- Gesellschaft, Steyr
Manufacture d'Armes de Saint Etienne	Oudry, Paris
Manufacture d'Armes de Tulle	S.L. (Sutterlin Lippman & Cie.), St. Etienne
	Stehelin & Cie., Bitschwiller, Thunn
	Y. Funcke & Cie., Herdecke

M 1886 Lebel

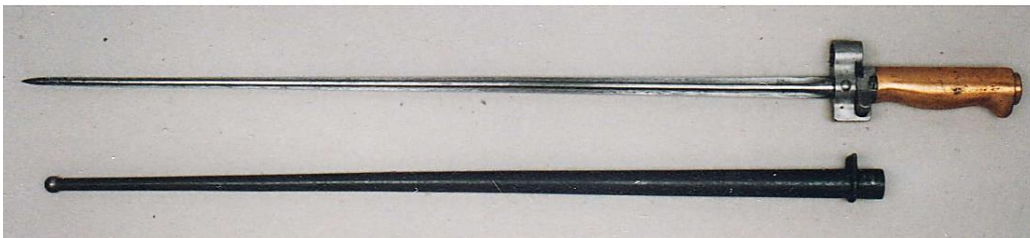

Blade: Cruciform blade
Hilt/Grips: Nickel silver, riveted hilt.
Scabbard: Blued steel.

Length:640mm
Blade length:521mm
Blade thickness:13,8mm
Weight:415g

State: France
Weapon:.....Mle.
 1886 Lebel
Rarity:.....R2

M 1886/93/16 Lebel

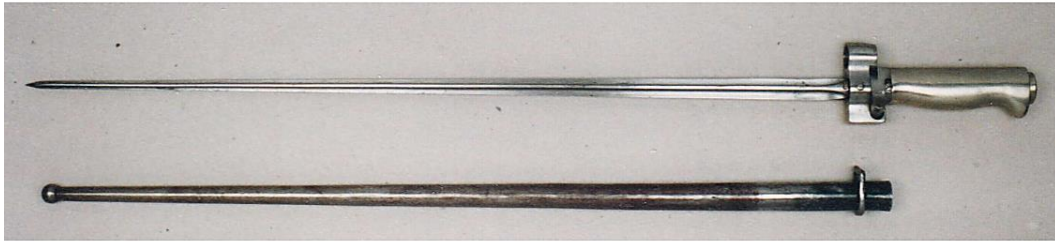

Blade: Cruciform blade
Hilt/Grips: Brass, screwed hilt.
Scabbard: Blued steel.

Length:637mm
Blade length:518mm
Blade thickness:14,2mm
Weight:490g

State: France
Weapon:.....Mle.
 1886 Lebel
Rarity:.....R1

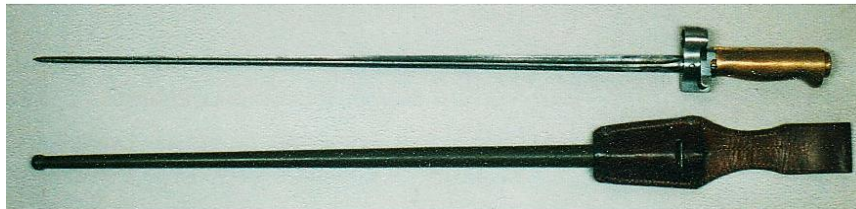

M 1886/16 Lebel

Blade: Cruciform blade	Length:641mm	State: France
Hilt/Grips: Aluminium bronze, screwed hilt.	Blade length:521mm	Weapon:Mle.
Scabbard: Blued steel.	Blade thickness:13,5mm	1886 Lebel
	Weight:430g	Rarity:R1-2

M 1886 Lebel (Export / Captured)

Many of the other countries during the WW1 or after, such as Belgium, Bulgaria, Finland, Greece, Italy, Serbia, Russia who had been sold or used various French rifles also used these bayonets. After WWI ended the newly created nation of Poland was sold, by the French, many of both type of these bayonets which were used during the Polish-Soviet War (1919-1921) and later during the Polish Invasion of 1939. These bayonets were called Bagnetowy Wzor 1886/93 and were usually marked at the back of the pommel with following markings: Wz86/91 or Wz86/93. Germany also used many of these from captured stocks or from enemy prisoners of war during both World Wars, these bayonets are usually marked with the regimental unit which used them on the side or inside the top groove of the grip, scabbard tip is riveted.

M 1886/16/35

In 1915 blades were shortened to a blade length of **400mm**, all white metal parts blued, the scabbard was shortened to fit the new length of the blade and the rounded tip at the end of the scabbard was increased to 12.7mm instead of the original 11mm diameter.

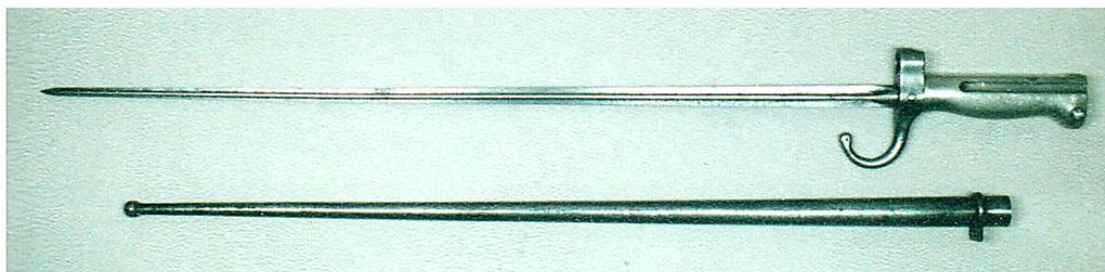

Later, the ministerial decree from 1930 ordered the shortening of the 1886 blades, but was cancelled in 1933. Shortened anywhere from **265mm up to 400mm**. Some have blades and crossguards blued, some have additional numbers stamped on the hilt, crossguard and scabbard.

Cyclist bayonet: Some 1886 were shortened to a blade length of 340mm prior to the WW1 for Troupes Cyclistes (Bicycle Troops). Its hard, almost impossible to distinguish a pre war "cyclist" blades from after war shortened ones.

Blade: Shortened cruciform blade.	Blade length:265-400mm	State: France
Hilt/Grips: Nickel silver/aluminium bronze/brass hilt. With/without quillion.		Weapon:Mle.
Scabbard: Blued steel, shortened, with ball tip.		1886, 1935
		Rarity:R1-2

M 1890 (Gendarmerie)

Blade: Cruciform blade

Hilt/Grips: White metal/brass, pressing stud with inner coil spring on the pommel.

Scabbard: Blued steel.

Length:632mm

Blade length:517mm

Blade thickness:13,8mm

Muzzle ring:13mm

Weight:470g

State: France

Weapon:.....Mle. 1890.

Rarity:.....R4-5

1902

Export for Indochina. The main difference between the 1890 and 1902 models was that the 1890 version had a 520mm long cruciform blade and the 1902 bayonet was shortened in 1912 from to 420mm to better accommodate Indochinese. Both of these had a 13mm diameter muzzle ring.

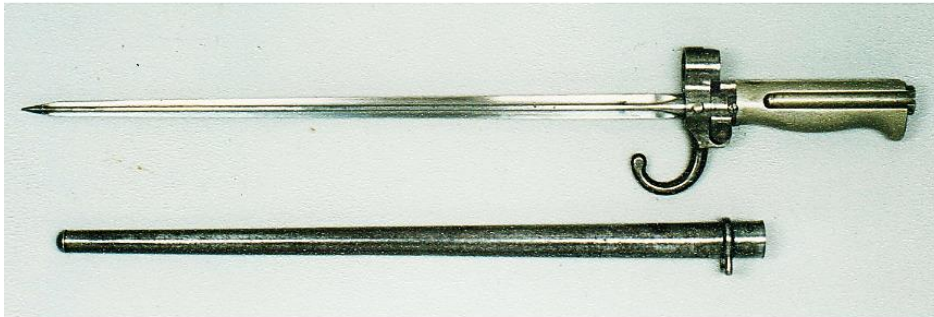

M 1907

These bayonets were used with the Fusil de Tirailleur Sénégalais Modèle 1907, it was then decided to widen the issuance of the weapon to other colonial troops, except those in Indochina. The bayonets blade were the same length as the Épée-Baïonnette Modèle 1890 (520mm) but the main difference was these did not have the groove that extends down the left side of the bayonet grip.

M 1895 Daudeteau

Similar to the 1886 Lebel with the addition of a groove down the side of the hilt to accept the cleaning rod. Fakes are common.
Blade: Cruciform blade, shortened (1895/35) or unshortened.
Hilt/Grips: Nickel silver hilt.
Scabbard: Blued steel.

Blade thickness:13mm

State: France
Weapon:.....1895 Daudeteau
Rarity:.....R3-4

M 1892 Berthier

Blade: Fuller extending to the tip.
Hilt/Grips: Wood/hard rubber with rivets. Long/short quillion.
Scabbard: Blued steel.

Length:512-515mm
Blade length:398-400mm
Blade width:23,2mm
Blade thickness:7,7mm
Weight:420-445g

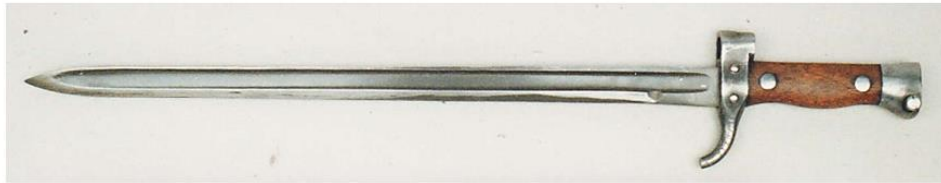

State: France
Weapon:.....Mousqueton 1892/17, 1892/27
Rarity:.....R2/R3

Rubber grips, long muzzle ring, short quillion.

Rubber grips, long muzzle ring, long quillion.

Wooden grips, long muzzle ring, short quillion.

Wooden grips, long muzzle ring, long quillion.

Rubber grips, short muzzle ring, long quillion.

Rubber grips, short muzzle ring, short quillion.

M 1914 Remington

Remington produced 100,000 rifles and bayonets for France in 1915–16, long-blade variant is most often associated with France.

Blade: Fullered, inscription engraved inside the fuller.

Hilt/Grips: Brass, 16 circumferential grooves, brass crossguard.

Scabbard: Blued steel, riveted leather frog.

Length:520mm

Blade length:405mm

Blade width:26,2mm

Blade thickness: ...6,1mm

Weight:530g

State: France

Weapon:.....Remington

M1914

Rarity:.....R3

Combat knife (Remington 1913)

Fighting knife made from cut down Remington 1913 bayonet. Used by French foreign legion.

MAS 1949/56

Blade: Double edged, blued.
Hilt/Grips: Plastic, 2 screws.
Scabbard: Blued steel, blade shaped, riveted leather frog.

Length:343mm
Blade length:218mm
Blade width:23mm
Blade thickness:4,4mm
Weight:315g

State: France
Weapon:.....MAS
 49/56
Rarity:.....R1-2

FAMAS

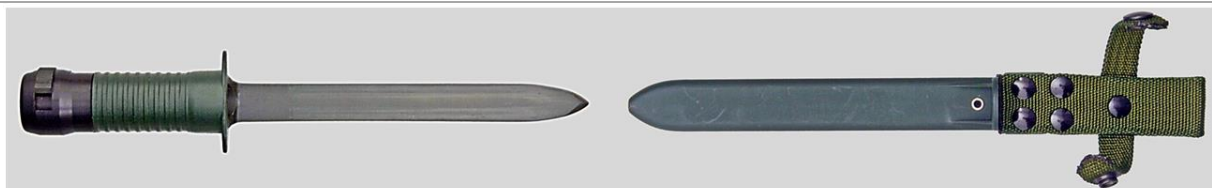

Blade: False edge, blued.
Hilt/Grips: Plastic, 2 screws.
Scabbard: Plastic, riveted frog.

Length:327mm
Blade length:204mm
Blade width:23mm
Blade thickness:4,6mm
Weight:310g

State: France
Weapon:.....FAMAS
Rarity:.....R1-2

SIG 540/42 (M 1982)

Blade: Half circle shaped.
Hilt/Grips: Hollow socket, lined with plastic.
Scabbard: Plastic with integrated frog.

Length:280mm
Blade length:178mm
Blade width:19mm
Blade thickness:4,5mm
Weight:200g

State: France
Weapon:.....SG
 540/42
Rarity:.....R2

GERMANY

Hirschfänger M 1810 (Neue Art)

Blade: Without fullers, no markings.

Hilt/Grips: One piece brass and oval brass shock plate, no markings.

Length:690mm

Blade length:557mm

Blade width:34mm

Blade thickness:10mm

Weight:1160g

State:Prussia

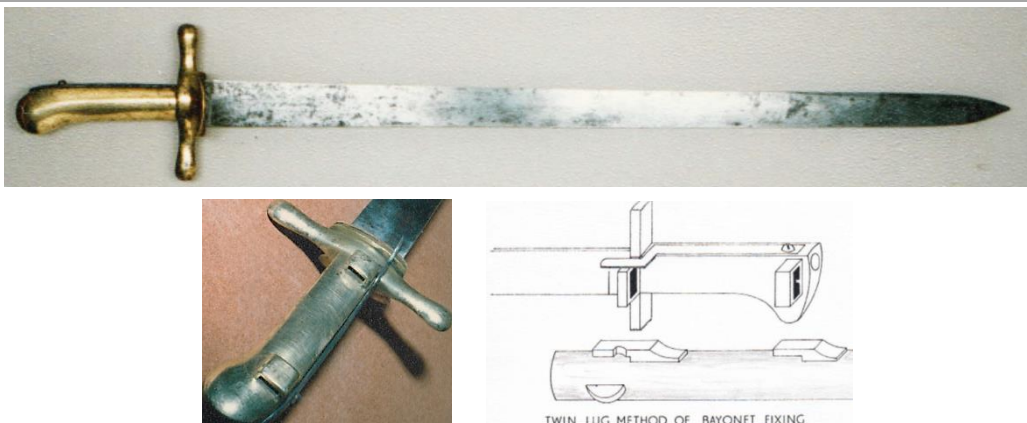

Weapon:New

Korpsbüchse 1910,

Jägerbüchse 1835

Rarity:.....R4-5

Hirschfänger ca. 1820/30

Blade: No fuller

Hilt/Grips: Solid brass, brass crossguard, smooth.

Length:736mm

Blade length:600mm

Blade width:34,5mm

Blade thickness:7mm

Weight:860g

State:Hassen-Kassel

Rarity:R4-5

Hirschfänger ca. 1838

Blade: Smooth edged blade, 127mm false edge.

Hilt/Grips: Solid brass, 25 circumferential grooves, retainer on the left side.

Scabbard: Leather with brass mounts, oval/rounded frog stud.

Length:709mm

Blade length:592mm

Blade width:33,5mm

Blade thickness:10mm

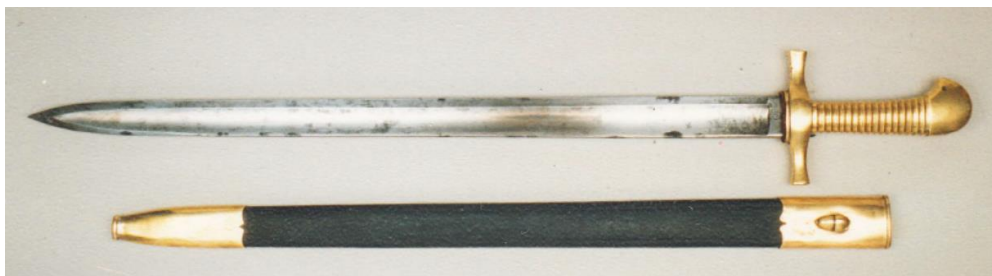

Weight:985 – 990g

State:Hannover

Weapon:Towerbuchse 1803, Pickelbuchse M1824

Rarity:R4

Hirschfänger M 1846

Blade: One-sided wide fuller extending to the tip..

Hilt/Grips: Solid brass, 17 circumferential grooves.

Scabbard: Leather with brass mounts, frog stud in acorn shape.

Length:716mm

Blade length:577mm

Blade width:32,3mm

Blade thickness: ..9,2mm

Weight:835 – 840g

State:Baden

Weapon: M1846 rifle

Rarity:R4

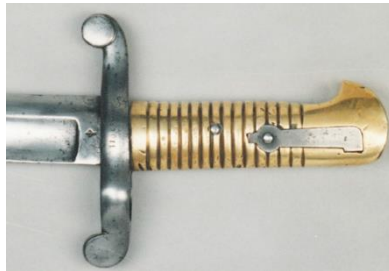

M 1855 (border guards)

Bavarian 1855 border guards bayonet. Fullered blade, leather grips with fish scale pattern, 2 rivets, 1 screw.

M 1854 Yatagan

Blade: Yatagan, Fullered.

Hilt/Grips: Brass, 15 circumferential grooves, grooves wider at the edges, grooves start 5mm from crossguard.

Length:694mm

Blade length:575mm

Blade width:30mm

Blade thickness:11mm

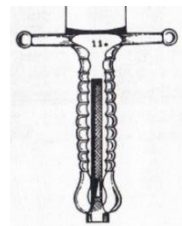

Weight:910g

State:Bayern

Weapon:Dornbüchse M1854

Rarity:R4

Braunschweigischer Hirschfänger

Blade: Yatagan, fullered.

Hilt/Grips: Solid brass, 10 circumferential grooves, flattened handle on one side.

Scabbard: Leather with brass mounts, oval/rounded frog stud.

Length:712mm

Blade length:587mm

Blade width:32,5mm

Blade thickness: ...10,6mm

State:Germany

Weapon: Gev. 98

Rarity:R2-3/R3/R3-4

SG 1884/98 alter Art

Blade: Squared fuller (Stamped Mehlich / Berlin)

Hilt/Grips: Wooden grips, 2 screws.

Scabbard: Blued steel, long teardrop shaped frog stud.

Length:380mm

Blade length:245mm

Blade width:26,3mm

Blade thickness:6,4mm

Weight: 390g

State:Germany

Weapon: Gev. 98, 98 carbine

Rarity:R4

Mannlicher M 1895 (Austria)

(Made by Ernst Busch Solingen)
Blade: Squared fuller, edge facing upwards.
Hilt/Grips: Wooden grips, 2 rivets.
Scabbard: Blued steel, long U- shaped frog stud.

Lenght:360mm
Blade length:249mm
Blade width:22,9mm
Blade thickness:5,1mm
Weight:280-285g

State:Austria, Germany
Weapon:Mannlicher M95
Rarity:R2

Mannlicher M 1888 (Austria)

(Made by Weyersberg Kirschbaum & Co. Solingen)
Blade: Squared fuller.
Hilt/Grips: Wooden grips, 2 rivets.
Scabbard: Blued steel, long U- shaped frog stud.

Lenght:373mm
Blade length:245mm
Blade width:27,2mm
Blade thickness:6mm
Weight:360-365g

State:Austria, Germany
Weapon:Mannlicher M 1888
Rarity:R3

1898 (Shortened)

Most 1898 that were shortened, were issued for imperial navy (Those have navy regimental markings). Some were also issued/shortened by ground troops (blade was fragile and often snapped). Most were shortened to 30cm. Many shortened 1898 are Turkish reworks (Shortening of blade and scabbard is done to much lower standard than on the German shortened blades and most were shortened to 25cm.) Scabbard can be shortened leather one with metal mounts, or full metal.

1898 a/A (alter Art)

Blade: Quillback.

Hilt/Grips: Wooden grips made of one piece, 2 screws, 9 diagonal grooves.

Scabbard: leather with iron mounts and elongated frog stud.

Length:652mm

Blade length:519mm

Blade width:20mm

Blade thickness:6,6mm

Weight:400g

State: Germany

Weapon:Gev. 98, Schusswaffen 98

M 1889 (Conversion)

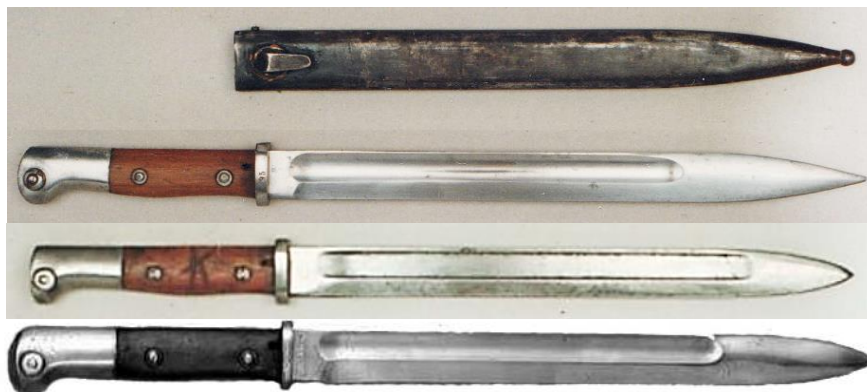

German conversion of a Belgian 1889 to fit M88 rifle.
Blade: Squared fuller.
Hilt/Grips: Wooden grips, 2 screws, muzzle ring removed (muzzle ears remaining).
Scabbard: Blued steel, U-shaped frog stud.

Length:378mm
Blade length:250mm
Blade width:26,2mm
Blade thickness:6mm
Weight:415g

State: Germany
Weapon:M1888
Rarity:R3-4

1898/14 (M 1914)

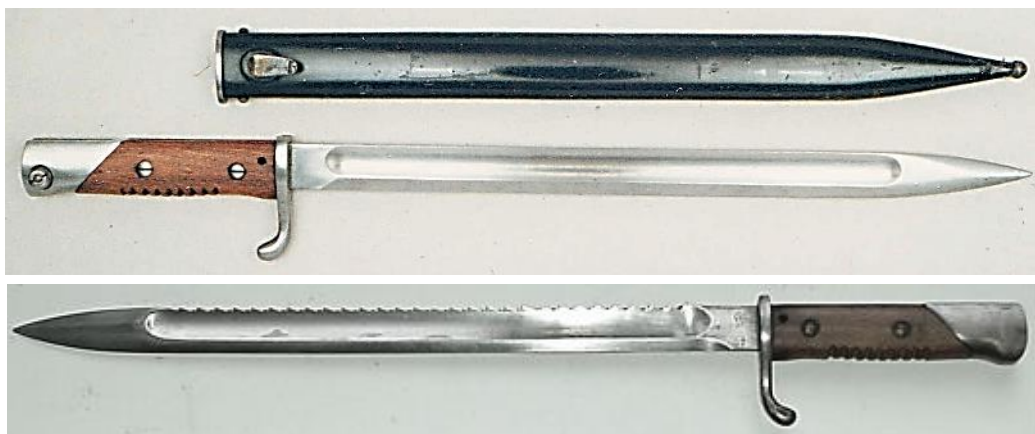

Several different variations, lengths, fuller designs, some are nickled.
Blade: Rounded /squared fuller. (Variations: Plain, sawback, sawback removed)
Hilt/Grips: Wooden grips, 2 screws/rivets.
Scabbard: Blued metal with tear shaped frog stud.

Length:417/438/446mm
Blade length: ..288/ 305/ 314mm
Blade width:25,9-26,2mm
Blade thickness:4,8-6mm
Weight:370-410g

State: Germany
Weapon:Gev. 98
Rarity:R3

1914 Gottscho (1914/II)

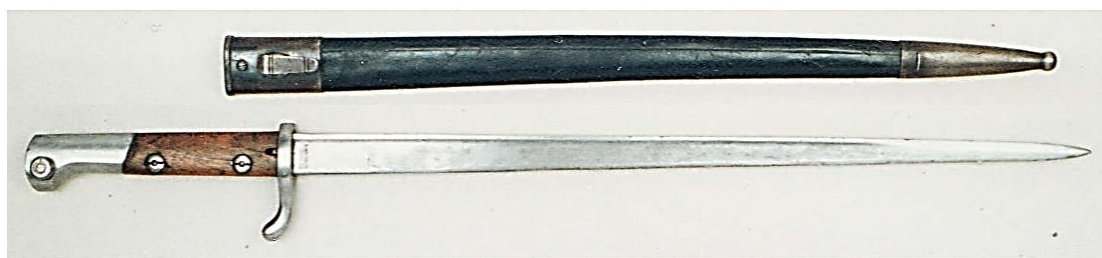

Blade: Rounded fuller (Variations: Plane, sawback)
Hilt/Grips: Wooden grips, 2 screws, 9 grooves on bottom side of the grips.
Scabbard: Blued metal with tear shaped frog stud.

Length:500mm
Blade length:368mm
Blade width:23,3mm
Blade thickness:6,3mm
Weight:470-490g

State: Germany
Weapon:Gev. 98
Rarity:R4

1898/03 (Conversion from Greek 1903/14)

German conversion of a Greek M1903/14.
Blade: T-shaped.
Hilt/Grips: Wooden grips, 2 screws.
Scabbard: Leather with metal mounts, teardrop shaped frog stud.

Length:530mm
Blade length:397mm
Blade width:21mm
Blade thickness:8,2mm
Weight:375g

State: Germany
Weapon:k98
Rarity:R4

M 1886 Lebel (Converted)

French 1886 Lebel shortened for use by the Germans with a period shortened scabbard having a domed end riveted into the base of the scabbard.

KS 98 (Dress bayonet)

Blade: Sawback, rounded fuller (some with the trench knife blade).

Hilt/Grips: Wooden/leather/horn grips, 2 screws/ 2 rivets / 3 rivets.

Scabbard: Blued metal with tear shaped frog stud.

Length:386mm

Blade length:253mm

Blade width:25mm

Blade thickness: ..6,3mm

Weight:380g

State: Germany

Weapon:Gev. 98, 98 carbine

Rarity:R2-3/R3

1884/98 III (Export)

With a full muzzle-ring, without flashguard for export customers. Typically unmarked, except for serial numbers added later by the purchasing government (rare examples have German proof stamps). Blued examples can be also found. Scabbard on this example is Spanish (Spain was an export customer).

VZ-24 (Modified)

The muzzle ring is ground away, leaving protruding muzzle ears or ground off completely
Blade: Edge facing upwards, serial number applied to the ricasso, blued metal.
Hilt/Grips: Wooden grips, Screw slots have been cut in the grip-securing nuts and in the nut securing the press-stud.
Scabbard: Blued steel, long U- shaped frog stud. The rivet securing the scabbard throat has been removed, the throat reversed and secured at the side by a screw.

Length:432mm
Blade length:298mm
Blade width:23,2mm
Blade thickness:5,3mm
Weight:390g

State:Third Reich
Weapon: k98
Rarity:R2

S-24(t)

<p>Made 1940–41 in German-occupied Czechoslovakia, made without a muzzle ring Blade: Edge facing upwards, serial number on the ricasso, all blued. Hilt/Grips: Wooden grips, Grip-securing nuts and the nut securing the press-stud are made with screwdriver slots. Scabbard: Blued steel, long U- shaped frog stud.</p>	<p>Lenght:432mm Blade length:298mm Blade width:23,2mm Blade thickness: ...5,3mm Weight:390g</p>	<p>State:Third Reich Weapon: k98 Rarity:R2-3</p>
---	--	---

Dress bayonet (Short)

<p>Not designed to be mounted on a weapon Blade: Narrow short fuller, nickled/chromed metal. Hilt/Grips: Deer horn/ plastic, 2 rivets. Scabbard: Blued/painted steel, long teardrop shaped frog stud.</p>	<p>Lenght:317-320mm Blade length:199-201mm Blade width:23,1mm Blade thickness:5mm Weight:270- 290g</p>	<p>State:Third Reich Rarity:R1-2</p>
---	--	---

Dress bayonet

<p>Not designet to be mounted on a weapon. Fire service dress bayonet (lower in the picture). Pioneer pattern (right picture). As dress bayonets they were issued with a portiepee. Some were etched by a private contractor, but most etched examples found on the market are after war fakes. Blade: Long fuller, nickled metal. Often etched (made by private contractor). Hilt/Grips: Plastic, 2 screws or 2 rivets (fire service). Scabbard: Blued/painted steel, long teardrop shaped frog stud.</p>	<p>Lenght:365mm Blade length:246mm Blade width:24mm Blade thickness:4,9mm Weight:305-310+ g</p>	<p>State:Third Reich Rarity:R1</p>

1884/98 III (DDR rework)

After war rework of the WW2 k98. Reblued, markings are less sharp, often barely visible. Bluing is shiny and dark, when original WW2 usually have more matt and greyish/brownish finish. Press stud often doesn't fit well.
Blade: Reblued, markings are often barely visible.
Hilt/Grips: Some have checkered flashguard.
Scabbard: Reblued, teardrop shaped frog stud. Numbers generally don't match with the numbers on the bayonet. Typical for DDR reworks is aluminium rivet on the side of the throat.

Length:384mm
Blade length: ...251mm
Blade width: ...25,5mm
Blade thickness: 5,7mm
Weight:430g

GERMAN ERSATZ

by the Anthony Carter ersatz bayonet book nomenclature

The only markings found on the bayonets are a small inspection stamp on the blade. Occasionally the bayonets can be found with unit markings on the crossguard. Any blades found with a serial number on the crossguard are Turkish issue.

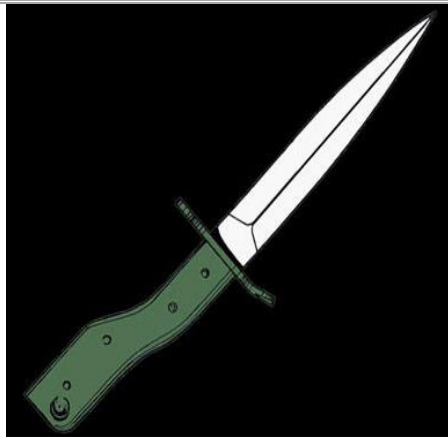

Huge numbers of the ersatz types were supplied to Turkey at the end of the war (page 192-193):

- a) Unmodified blades - with a serial number on the crossguard
- b) Shortened blades - the blade is shortened to 250mm with appropriate shortening of the scabbards and replacement of the frog stud by an oval stud one
- c) Modified crossguards - initially to fit the bayonets on the export pattern Mauser rifle, subsequently some were further modified to fit the US M1 Garand, these modifications can be quite extensive

Another category of ersatz bayonets is ERSOC (ES) bayonets, where blades from socket bayonets were used. These are rare, recently they have emerged on the market after many depots were discovered in Afghanistan, where they were held since the 1920's.

GREECE

Mannlicher M 1895

Greek markings on the pommel and ricasso.

Mannlicher M 1903

Blade: Double edge, no fuller.

Hilt/Grips: Similar to the M1895, wooden grips, 2 rivets.

Scabbard: Blued steel. U-shaped frog stud.

Length:360mm

Blade length:248mm

Blade width:22,4mm

Blade thickness:3,9mm

Weight:310g

State: Greece

Weapon:.....Mannlicher
-Schoenauer M1903

Rarity:.....R3

Mannlicher M 1903/14

Identical to the M1895, but with a smaller muzzle ring.

Blade: Fullered, edge facing upwards.

Hilt/Grips: Wooden grips, 2 rivets.

Scabbard: Blued steel. U-shaped frog stud.

Length:361mm

Blade length:250mm

Blade width:24mm

Blade thickness:5,2mm

Weight:295g

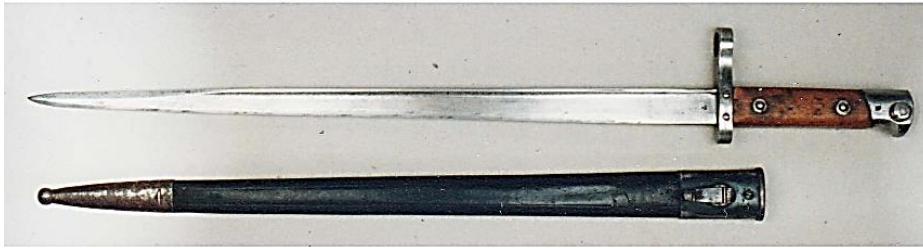

State: Greece

Weapon:.....Mannlicher
-Schoenauer M1903/14

Rarity:.....R3

Mannlicher M 1903/14 (Long)

Blade: T-shaped, blade from French 1874 Gras.

Hilt/Grips: Similar to the M1895, wooden grips, 2 rivets.

Scabbard: Leather with metal fittings/ blued steel. Teardrop shaped frog stud.

Length:507mm

Blade length:395mm

Blade width:21mm

Blade thickness:8mm

Weight:360g

State: Greece

Weapon:.....Mannlicher -Schoenauer M1903/14

Rarity:.....R3-4

Gras 1874 (+Converted for Mannlicher 1903)

M1874 Gras: Greek contract – engraved “Waffenfabrik Steyr” on the spine.

Greek 1874: Similar to the French but has a 2mm higher muzzle ring and the hilt is almost straight (brass pommel slightly below the wood grip level). All made by Steyr.

1874/03: Greek 1874's modified by changing the muzzle ring to one sitting higher, by letting in a new section of metal into the original crossguard (left picture).

1874/03 variation: Same as the above but with the quillion removed.

1903 variation: Shortened 1874 blade (shortened at the tang end), flatter hilt and replaced (more contoured, 2 piece) crossguard.

M1

Marked E-US/EN-US on the scabbard/ ricasso.

M4

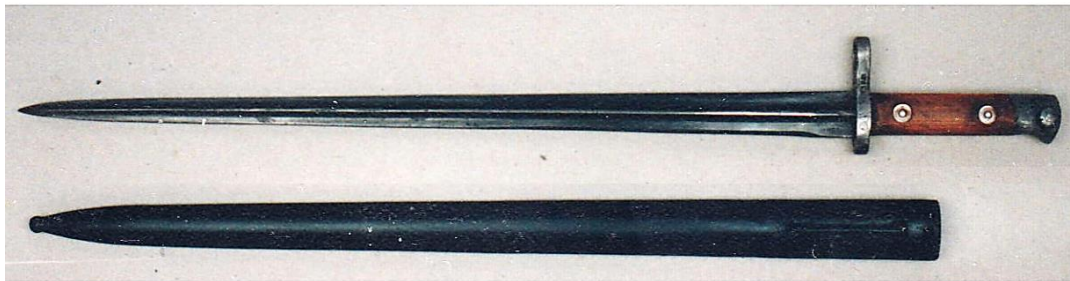

Marked EME on the ricasso. Greek copy of the wartimer U.S. M4 for the U.S. Carbine M1. Similar to the American M4 but there are distinct differences and the workmanship is crude. The blade is copper-plated, then finished in a black coating of some sort.

HUNGARY

(Austro-Hungarian bayonets on pages 2-15)

M 1895 Gendarmerie (1895/31)

Blade: Cruciform shape. Blued/white finish.

Hilt/Grips: Similar to the M1895, wooden grips, 2 rivets.

Scabbard: Blued/painted metal, 63mm long frog hook.

Length:563mm

Blade length:453mm

Blade width:25,4mm

Weight:430g

State: Hungary

Weapon:Mannlicher
M1895, M31.

Rarity:R3

M 1935

Blade: Semi-cruciform shape. White/blued (after 1942 production) finish.

Hilt/Grips: Single piece of wood, blued crossguard and pommel.

Scabbard: Olive green/black painted metal, U-shaped frog hook.

Length:478-480mm

Blade length:338-340mm

Blade width:25mm

Blade thickness:11,5-12mm

Weight:505-515g

State: Hungary

Weapon:M1935

Rarity:R2/R2-3/R3

M 1935 Infantry

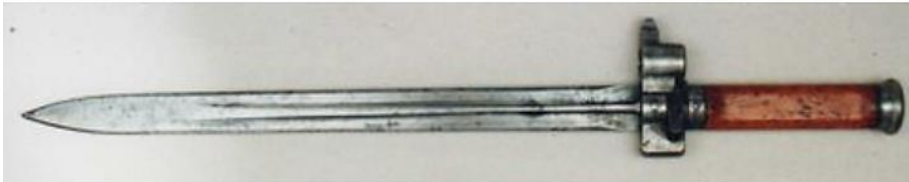

No sight on the muzzle ring, no quillion.

M 1935 Infantry NCO

No sight on the muzzle ring, quillion, pommel ring.

M 1935 Cavalry

Sight on the muzzle ring, no quillion.

M 1935 Cavalry NCO

Sight on the muzzle ring, quillion, pommel ring.

AKM Type I

Blade: Bowie knife shaped, sawback, no fuller, hole for cutting wire,
Hilt/Grips: Maroon plastic grips, 2 plastic rivets.
Scabbard: Blued steel, ocre rubber insulator, brown leather frog (separate hilt strap and belt loop), brown leather wrist strap.

Length:280mm
Blade length:149mm
Blade width:30mm
Blade thickness:3,5mm
Weight:265g

State: Hungary
Weapon:.....AKM
Rarity:.....R1

IRELAND

M 1874 Gras (Converted to fit Vetterli)

A French Gras modified to fit the Vertelli rifle. All metal is nickel/chromed. It is thought to be a honour guard bayonet.

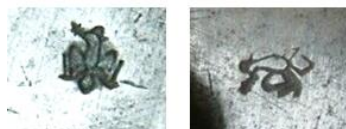

M 1874 Gras (Converted to fit Gew.88)

Gras modified for UVF (Ulster Volunteer Force) for GEW 88 during rebellion. Shaved hilt, lock stud extension to allow blade to lock on a Gew.88.

M 1893 Mannlicher

M1893 for Irish Mannlicher, 10.000 made for UVF in Romania. The 1893 has the Rumanian eagle on the pommel, the 1904 hasn't. This is the only variation between the two models. 3 digit serial on the crossguard is typical of those on the Irish UVF blades and is usually the only Irish marking.

M 1904 Mannlicher

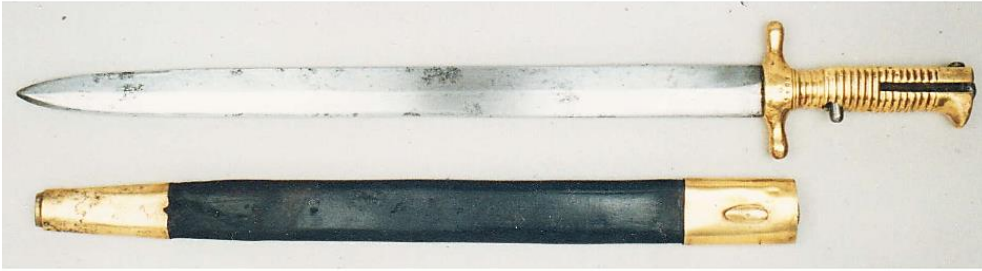

M1904 for Irish Mannlicher, 10.000 made for UVF. Austrian made but supplied through Romania. Lack of Romanian markings indicates that this is the 1904 not the 1893 which is otherwise identical. 3 digit serial typical of the Irish contract.

ITALY

Piemont M 1846 (1844)

Blade: Double sided edge, no fuller.

Hilt/Grips: Solid brass.

Scabbard: Leather with brass fittings. Long oval shaped frog stud.

Length:567mm

Blade length:451mm

Blade width:32mm

Blade thickness:6,4mm

Weight:780g

State:Italy

Weapon:.....M1844

Rarity:.....R4

Bersaglieri Volunteer

Bersaglieri volunteer unit bayonet, only 6000 of these blades were made. Similar to the French 1842 with Yataghan blade and steel crossguard. MS marked on the ricasso and a year on the other side.

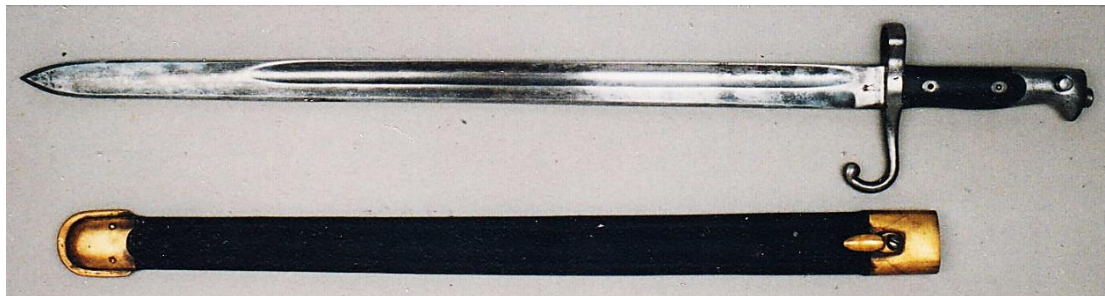

Vetterli M1870 (Early pattern)

Brass hilt with 15 circumferential grooves. Hooked crossguard, very uncommon pattern.

Vetterli M 1870

<p>Blade: Rounded fuller.</p> <p>Hilt/Grips: Horn grips, 2 screws. <u>Variations:</u> Long spring (more common) and short spring (uncommon).</p> <p>Scabbard: Leather with brass fittings. Teardrop shaped frog stud.</p>	<p>Lenght:640mm</p> <p>Blade lenght:519mm</p> <p>Blade width:27mm</p> <p>Blade thickness:7mm</p> <p>Weight:575g</p>	<p>State:Italy</p> <p>Weapon:.....Vetterli M1870, M70/87</p> <p>Rarity:.....R3-4</p>
--	--	---

Vetterli M 1870/87/15

<p>Shortened M1870, metal all blued.</p> <p>Blade: Rounded fuller extending to the tip of the blade.</p> <p>Hilt/Grips: Horn/wood grips, 2 screws. <u>Variations:</u> Long spring (more common) and short spring (uncommon).</p> <p>Scabbard: Leather with brass fittings. Teardrop/oval shaped frog stud (2 different throat variations).</p>	<p>Lenght:cca. 355mm</p> <p>Blade lenght:cca. 232mm</p> <p>Blade width:26mm</p> <p>Blade thickness:7mm</p> <p>Weight:cca. 415g</p>	<p>State:Italy</p> <p>Weapon:.....Vetterli M1870/87</p> <p>Rarity:.....R2</p>
---	---	--

Vetterli M 1870 (Dress)

M1870 shortened and with replaced grips (ivory, bone or a pale composite). The original spring has been removed.

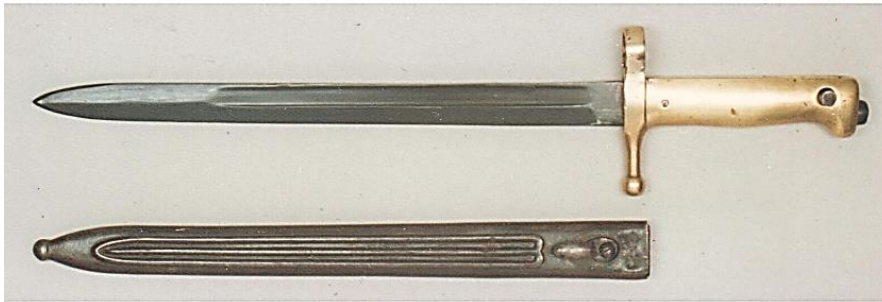

Vetterli M 1870 (Shortened and modified)

Vettereli shortened and bushed for an unknown rifle. Possibly for UK Home guard.

Vetterli M 1870/87/16 (Brass ersatz)

Blade: M91 blade, squared fuller, blued finish.

Hilt/Grips: Brass hilt and crossguard.

Scabbard: Leather with brass fittings/ blued metal with longitudinal grooves. Teardrop shaped frog stud.

Length:418mm

Blade length:300mm

Blade width:23mm

Blade thickness:.....5,5mm

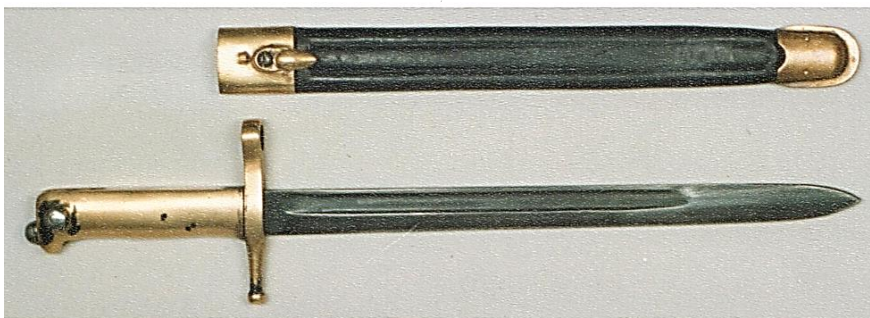

Weight:435g

State:Italy

Weapon:.....Vetterli M1870/87/16.

Rarity:.....R3

Carcano M 1891 (Brass ersatz)

Blade: Squared fuller, Blade in blued finish.

Hilt/Grips: Brass hilt and crossguard.

Scabbard: Leather with brass fittings/ blued metal with longitudinal grooves. Teardrop shaped frog stud.

Length:411mm

Blade length:297mm

Blade width:23mm

Blade thickness:.....4,7mm

Weight:410g

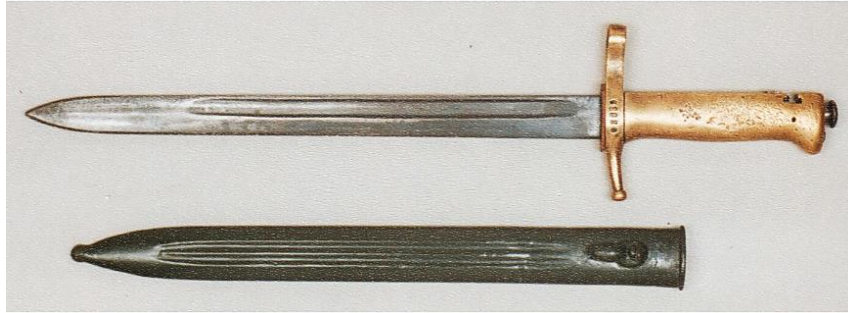

State:Italy

Weapon:.....Carcano M1891.

Rarity:.....R3

Carcano M 1891 TS (Brass ersatz)

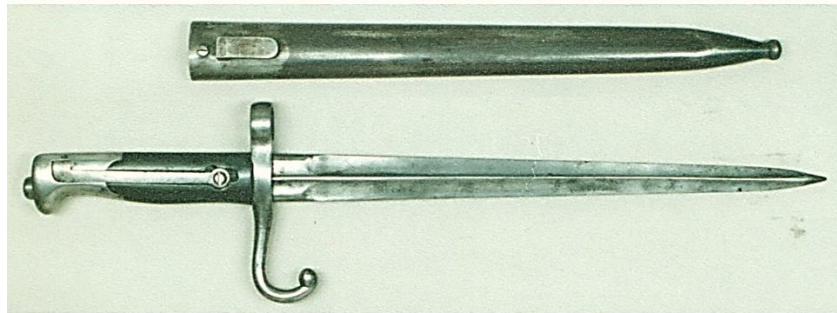

TS (Truppe speciali) version with transverse locking mechanism.
Blade: Squared fuller, Blade in blued finish.
Hilt/Grips: Brass hilt and crossguard. Transverse lock groove on pommel.
Scabbard: Leather with brass fittings/ blued metal with longitudinal grooves.. Teardrop shaped frog stud.

Length:415mm
Blade length:302mm
Blade width:22,3mm
Blade thickness:.....4,6mm
Weight:410g

State:Italy
Weapon:.....Carcano M1891 TS.
Rarity:.....R4-5

Vetterli M 1870 TA (Truppe Africana)

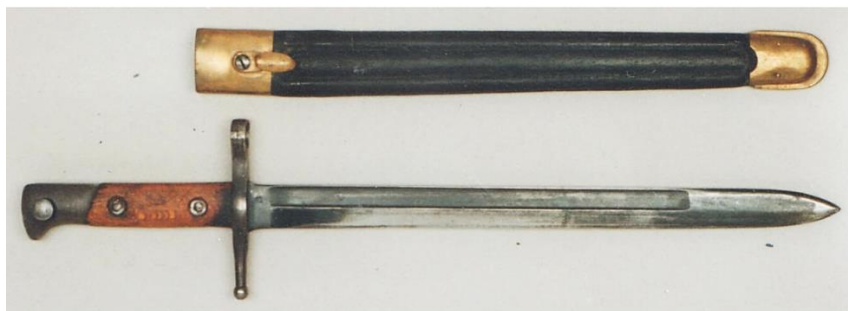

Issued to African troops.
Blade: Cruciform blade.
Hilt/Grips: Horn grips with 2 screws/brass hilt.
Scabbard: Leather with brass fittings/ blued metal. Triangular/ U-shaped frog stud.

Length:407mm
Blade length:280mm
Blade width:24,8mm
Blade thickness:.....13.mm
Weight:490g

State:Italy
Weapon:.....Vetterli M1870.
Rarity:.....R4

Carcano M 1891

Blade: Squared fuller, blued finish.
Hilt/Grips: Wooden grips, 2 rivets. Blued crossguard and pommel.
Scabbard: Leather with brass fittings (early, WW1) / blued metal with longitudinal grooves (late, WW2). Teardrop shaped frog stud.

Lenght:412mm
Blade length:300mm
Blade width:22mm
Blade thickness:.....4,8mm
Weight:335g

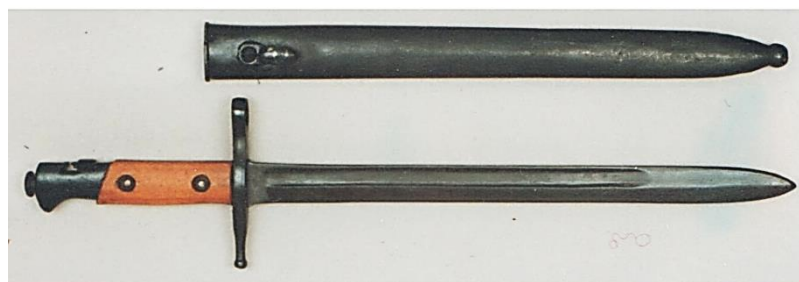

State:Italy
Weapon:.....Carcano M1891, 91/24.
Rarity:.....R2

San Marco Marine

San Marco Marine marked 1891. Only a very small number of troops were in this specialist unit so it is rare.

Carcano M 1891 TS (Truppe speciali)

TS (Truppe speciali) version with transverse locking mechanism.
Blade: Squared fuller, in blued finish.
Hilt/Grips: Wooden grips with 2 rivets. Blued pommel and crossguard. Transverse lock groove on the pommel.
Scabbard: Leather with brass fittings (sometimes painted black)/ blued metal with longitudinal grooves/ plain blued metal. Teardrop shaped frog stud.

Lenght:412mm
Blade length:298mm
Blade width:22mm
Blade thickness:.....5mm
Weight:340g

State:Italy
Weapon:.....Carcano M1891 TS.
Rarity:.....R4

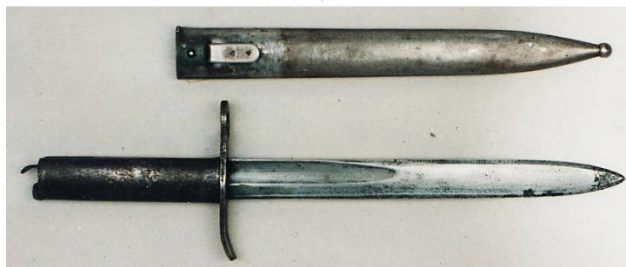

Mannlicher M 1895 (Dress)

Converted captured Austrian M95 bayonet. Nickered/chromed bayonet and scabbard. Hilt has VE (Vittorio Emanuel III) and Italian crown.

M 1917 Ersatz (Vetterli ersatz)

Ersatz bayonet for captured Austrian M95 rifles/ Carcano M91 rifles. Scabbard can be Austrian / shortened Vetterli / shortened Carcano... It is still disputed whether it was made by Italian troops for use on captured M95 rifles, or an Austrian troops from captured Vetterli bayonets.

For M95 (M95 blade)

Ersatz for Austrian M95 rifle with M95 bayonet blade. Protruding screw/rivet on the pommel.

Lenght:cca 364mm
Blade length:cca. 250mm
Blade width:22,9mm
Blade thickness:.....5,3mm
Muzzle ring:15mm

State:Italy
Weapon:..Mannlicher M1895.
Rarity:.....R4

For M95 (Vetterli blade)

Ersatz for Austrian M95 rifle with Vetterli 1870 blade. Protruding screw/rivet on the pommel. Example in the photo has an unusual straight quillion.

Lenght:cca 352mm
Blade length:cca. 238mm
Blade width:24,8mm
Blade thickness:.....4,5mm
Muzzle ring:15mm
Weight:cca. 310g

State:Italy
Weapon:..Mannlicher M1895.
Rarity:.....R4

For M91 (Vetterli blade)

Ersatz for Italian M91 rifle with Vetterli 1870 blade. Flat rivet on the pommel (pommel is rounded compared to the M95 variant).

Lenght:cca 352mm
Blade length:cca. 236mm
Blade width:24,8mm
Blade thickness:.....4,5mm
Muzzle ring:12,9mm

State:Italy
Weapon:.....Carcano M1891
Rarity:.....R4-5

Carcano M 1938

Blade: Fixed/folding, squared/rounded fuller. Black/red finish. Blade once fixed to the rifle could be folded under the rifle.

Hilt/Grips: Wooden grips, 2 screws/rivets. Crossguard and pommel with black finish.

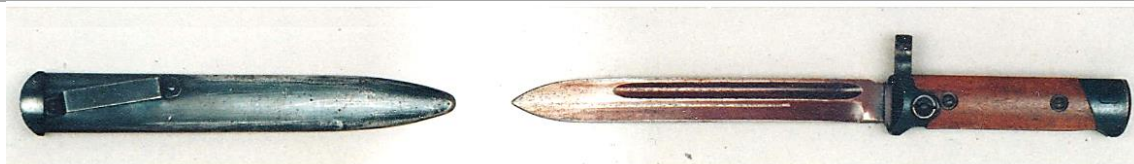

Scabbard: Blued metal with wide throat, belt loop/ teardrop shape frog stud.

State:Italy

Weapon:.....Carcano M1891/38, 1938.

Rarity:.....R2-3/R3-4

FOLDING BLADE

Early pattern with folding blade. After long use, the blade folding mechanism got damaged so they decided to fix the blade permanently (fixed folding blade variation). (Less common variation – cca. 28.000 made)

Length:290mm
Blade length:175mm
Blade width:20,5mm
Blade thickness:.....4,5mm
Weight:270g

FOLDING BLADE WITH LATCH LOCK

Early pattern with folding blade. Locking latch on the pommel. (cca. 349.000 made).

Length:289mm
Blade length:174mm
Blade width:21mm
Blade thickness:.....4,5mm
Weight:260g

FIXED FOLDING BLADE

After long use, the blade folding mechanism got damaged so they decided to fix the blade permanently. With short quillion. (cca. 57.000 made).

Length:292mm
Blade length:176mm
Blade width:21mm
Blade thickness:.....4,5mm
Weight:290g

FIXED BLADE

Later pattern. Fixed blade design. With short quillion. (Most common variation- cca. 331.000 made).

Length:288mm
Blade length:175mm
Blade width:21mm
Blade thickness:.....4,5mm
Weight:275g

Beretta M 38 (Folding Blade)

Folding bayonet for Beretta Model 38 submachine gun. It has a T-shaped attachment stud, compared to the Carcano M38 muzzle ring. Very rare bayonet.

Enfield SMLE (Carcano)

Bayonet made using Carcano blade hilted to suit the SMLE rifles supplied to Italy after WW2.

Blade: Carcano blade, blued.

Hilt/Grips: Wooden grips with 2 rivets. Blued pommel and crossguard.

Scabbard: Leather with brass/metal fittings (painted black). Teardrop shaped frog stud. UK scabbard makers marks that has been cut down and an Italian Carcano throat fitted.

Length:417mm

Blade length:296mm

Blade width:22,4mm

Blade thickness:.....4,7mm

Weight:350g

State:Italy

Weapon:.....Enfield SMLE Mk.3 Mk.I.

Rarity:.....R2

M1 Garand

Italian-made copy of the US M1 bayonet, used with M1 Garand rifles manufactured by Beretta in Italy. The scabbard is patterned on the U.S. M7 scabbard, but has a web belt hanger or scabbard for M1 or BM59 made from converted Carcano/Vetterli scabbard.

BM59 (AR-70)

Italian BM59, also used on the AR70, based on the US M4 but with plastic handle fixed with 2 screws.

BM59

Re-furbished M1 Garand bayonet to fit the Italian Beretta BM59 rifle. Fitted with a new crossguard with a larger muzzle ring (cca. 22mm) and a serial number stamped on the ricasso.

NETHERLANDS

M 1858 Navy

Blade: Yatagan, wide fuller.

Hilt/Grips: Brass hilt and crossguard, 14 circumferential grooves. Has a long mortise with a dovetail slot on the reverse side of the hilt and was fixed to the side of the barrel of the musket.

Scabbard: Leather with brass throat and brass ball tip. Small round frog stud.

Length:627mm

Blade length:508mm

Blade width:33,5mm

Blade thickness:...10,3mm

Weight:810g

State:Netherlands

Weapon:.....M1858 Marinebus Musket.

No. made:cca 2000

M 1873 Beaumont Navy (1st pattern)

Similar to the French M1866 Chassepot bayonet. The Dutch copied the very famous M1866 Chassepot bayonet to be mounted on the Beaumont Navy Rifle. The main difference between the first pattern and the second pattern is that the second pattern has a longer locking spring. Some Dutch M1873 "Navy" bayonets have a brass tag on the crossguard with a number on it.

Blade: Yatagan, fullered.

Hilt/Grips: Brass hilt, 15 circumferential grooves.

Scabbard: Blued metal with side lip.

Length:697mm

Blade length:574mm

Muzzle ring:17,5mm

State:Netherlands

Weapon:.....Beaumont Navy Rifle.

Rarity:R4-5

M 1873 Beaumont Navy (2nd pattern)

Similar to the French M1866 Chassepot bayonet. The Dutch copied the very famous M1866 Chassepot bayonet to be mounted on the Beaumont Navy Rifle. The main difference between the first pattern and the second pattern is that the second pattern has a longer locking spring. Some Dutch M1873 "Navy" bayonets have a brass tag on the crossguard with a number on it (some say it is a ship number).

Blade: Yatagan, fullered.

Hilt/Grips: Brass hilt, 15 circumferential grooves.

Scabbard: Blued metal with side lip.

Lenght:697mm

Blade lenght:574mm

Muzzle ring:17,5mm

State:Netherlands

Weapon:.....Beaumont Navy Rifle.

Rarity:R4-5

M 1891

Made by Weyerberg Kirschbaum & Cie, Solingen, Germany.

Blade: Double sided edge. The blunted tip of this bayonet is original...they were only to be sharpened during war-time.

Hilt/Grips: Wooden grips, 2 large rivets.

Scabbard: Made entirely of brown leather, reinforced with copper rivets, with an exposed brass ball finial (see M1895).

Lenght:376mm

Blade lenght:256mm

Muzzle ring:18,5mm

State:Netherlands

Weapon:.....Remington M1891 Carbine.

Rarity:R4-5

Mannlicher M 1895 Infantry

Since 1900 the hooked quillon disappeared. Serial number with serial letter on the crossguard. All metal blued.

Blade: Pointed, T-shaped.

Hilt/Grips: Wooden grips, 2 large rivets.

Scabbard: Brown leather, reinforced with copper rivets, with an exposed brass ball finial. In 1905 the leather scabbard got a brass ferrule and a securing leather strap.

Length:480mm

Blade length:360mm

Blade width:21mm

Blade thickness:.....8mm

Muzzle ring:14,5mm

State:Netherlands

Weapon:.....Mannlicher M1895

Rarity:R2-3/R4

Mannlicher M 1895 Navy (Early model)

Almost identical to the early M1895 Infantry bayonet, the only difference is their serial number. A Navy version only has a serial number and no serial-letter. All metal blued.

Blade: Pointed, T-shaped.

Hilt/Grips: Wooden grips, 2 large rivets.

Scabbard: Brown leather, early model "stitched" scabbard (no rivets).

Length:480mm

Blade length:357mm

Blade width:21mm

Blade thickness:.....8mm

Muzzle ring:14,5mm

Weight:380g

State:Netherlands

Weapon:.....Mannlicher M1895

Rarity:R4

Mannlicher M 1895 Navy (Later model)

Typical for navy bayonets is 4-digit serial number without serial letter, later model with oval plate on the grips. All metal blued.
Blade: Pointed, T-shaped.
Hilt/Grips: Wooden grips, oval plate with a screw.
Scabbard: Brown leather, reinforced with copper rivets, with an exposed brass ball finial.

Lenght:480mm
Blade lenght:357mm
Blade width:21mm
Blade thickness:.....8mm
Muzzle ring:14,5mm
Weight:380g

State:Netherlands
Weapon:.....Mannlicher M1895
Rarity:R4

Mannlicher M 1895 KNIL

Used by KNIL (Royal Netherlands East Indies Army). Variations: Cavalry Carbine KNIL (marked 'CAV'), Engineers Carbine KNIL (marked 'KAR').
Blade: Double edged.
Hilt/Grips: Wooden grips, 2 large rivets.
Scabbard: Brown leather, reinforced with copper rivets, with an exposed brass ball finial / steel scabbards with a wooden lining and a leather frog (very rare).

Lenght:372mm
Blade lenght:251mm
Muzzle ring:14,5mm

State:Netherlands
Weapon:.....Mannlicher M1895, KNIL Carbine.
No. Made: 36.000

Mannlicher M 1895 KNIL Carbine

<p>Has no grip. The pommel was to be inserted into the bayonet lug of the rifle and to be fixed with a coiled press stud (located on the carbine). <u>Variations</u>: KNIL carbine, KNIL Artillery carbine (muzzle ring that placed 3 mm lower). SG 101 (h), 102 (h), 103 (h), 104 (h)

During the occupation of the Netherlands, many M1895 were captured by the Germans. According to German documents they had to be shortened in order to be called "Seitengewehr".
Seitengewehr 101 (h) = M1895 "Infantry" bayonet (with hook)
Seitengewehr 102 (h) = M1895 "Infantry" bayonet (without hook)
Seitengewehr 103 (h) = M1895 "Carbine No.1 NM" bayonet.
Seitengewehr 104 (h) = M1895 "Carbine No.3 & No.4".
Blade: T-shaped, shortened.
Scabbard: Leather scabbard was shortened by removing a bit of the tip of the scabbard. the tip than was to be sewn closed after shortening it.

Lenght:402/420mm
Muzzle ring:14,5mm

State:Netherlands
Weapon:.....M1895, 1895 Carbine.
Rarity:R3-4

Klewang (Converted)

The Klewang is a very infamous Dutch sword (manchete). It was originally developed for use by KNIL anti-guerrilla units. This Klewang was converted into a bayonet by probably a local Indonesian blacksmith around 1946, for use in the struggle for decolonization against the KNIL. One of a kind example.

M 1941 Johnson

Scarce example, many fakes are on the market.
Blade: Flat triangular shape.
Hilt/Grips: Flat strip.
Scabbard: Brown leather, stitched.

Lenght:302mm
Blade length:204mm
Muzzle ring:14,5mm

State:Netherlands
Weapon:..... Johnson M1941
Rarity:R4

Papoea Korps

Used by Papoea Volunteers Korps (PVK) in former Dutch New Guinea. All blued metal.
Blade: No fuller, long false edge.
Hilt/Grips: Wooden grips with 2 screws.
Scabbard: US M8 type.

Lenght:315mm
Blade lenght:191mm
Muzzle ring:16mm

State: Dutch New Guinea
Weapon:..... FN-Mauser
Rarity:R4

Uzi Prototype

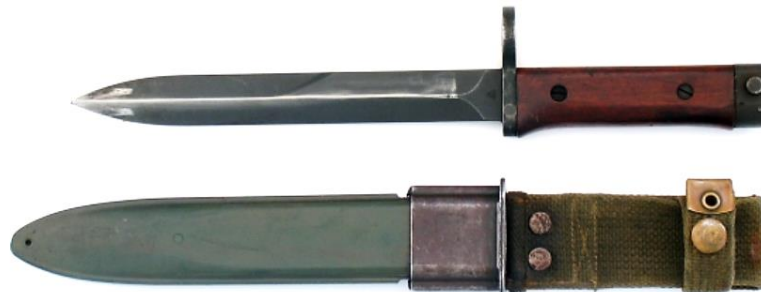

Prototype for the UZI sub machine gun that was issued in the Dutch Armed forces. All blued metal.
Blade: No fuller, long false edge.
Hilt/Grips: Wooden grips with 2 screws.
Scabbard: US M8 type.

Lenght:300mm
Blade lenght:191mm
Muzzle ring:16mm

State:Netherlands
Weapon:.....Uzi
Rarity:R5

AR-10

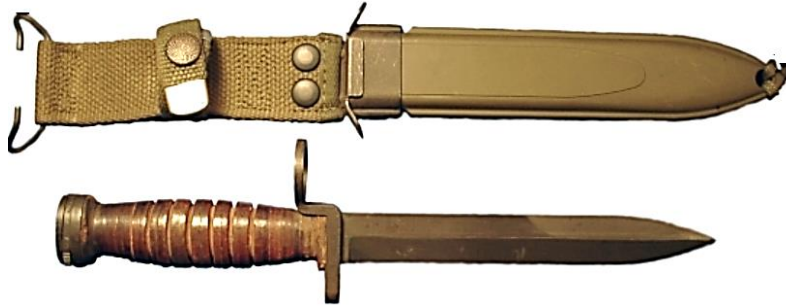

1600 were made, most of them were exported to Portugal. Very rare bayonet.
Blade: No fuller, long false edge.
Hilt/Grips: Wooden grips with 2 screws.
Scabbard: US M8 type.

Lenght:305mm
Blade lenght:190mm
Blade width:23,2mm
Blade thickness:.....5mm
Muzzle ring:21,5mm
Weight:270g

State:Netherlands, Portugal
Weapon:.....AR-10
No made:1600

AR-10 (Commercial)

Before the Dutch started to make their own AR-10 bayonet, the Kiffe company (NY, USA) made commercial bayonets for the Dutch AR-10. Basically a high quality copy of the US M4 bayonet. The only difference is the strange bend shape of the guard to the muzzle ring. The handle is made of compressed leather washers with six grooves

Length:290mm
Blade length:167mm
Muzzle ring:22mm

State: ..USA/Netherlands
Weapon:.....AR-10
Rarity:R1-2

M4

Variations: First model has a grip locked with two brass rivets, the second model has a grip with two screws, the third model is identical as the second model but has no rivets in the crossguard.
Blade: No fuller, long false edge.
Hilt/Grips: Plastic grips with 2 screws/rivets..
Scabbard: US M8 type (Plastic-wood composite).

Length:295mm
Blade length:171mm
Blade width:21,6mm
Blade thickness:.....5mm
Muzzle ring:15mm
Weight:300g

State:Netherlands
Weapon:.....M1 Carbine.
Rarity:R2

FN FAL Type C

Blade: Convex on one side, flat on the other side.
Hilt/Grips: Hollow socket hilt.
Scabbard: The Dutch scabbard can be identified by a black steel body with a green web belt loop, secured by rivets.

Length:290mm
Blade length:170mm
Muzzle ring:22,5mm

State:Netherlands
Weapon:.....FN FAL
Rarity:R1

KCB-70

The KCB-70 can be identified by the NWM logo underneath the Eickhorn logo. Also this type of bayonet has a hollow grip in which a sight adjustment tool can be inserted. Parkerised metal.
Blade: Bowie shaped, hole for cutting wire.
Hilt/Grips: Black plastic.
Scabbard: Plastic, metal, integrated frog.

Length:302mm
Blade length:175mm
Blade width:30mm
Blade thickness:...3,5mm
Muzzle ring:22mm

State:Netherlands
Weapon:.....Stoner 63A1
Rarity:R1-2

M9 Buck

Dutch M9 bayonets can be identified by the so called "KL" number on the ricasso. The serial number starts with KL with a five digit number, which always starts with a zero.
Blade: Bowie shaped, hole for cutting wire. Short fuller.
Hilt/Grips: Olive green plastic.
Scabbard: Plastic, metal, integrated frog. With a pouch in which a pocketknife could be inserted.

Length:309mm
Blade length:181mm
Muzzle ring:22,1mm

State:Netherlands
Weapon:.....Diemaco C7 & C8.
Rarity:R2

2000 WC

Dutch versions can be identified by a "NLD" marking followed by a five digit serial number on the ricasso of the bayonet. The blade is extremely flexible and is isolated up to a 1000 volts for using bayonet and scabbard as a wire cutter.
Blade: Bowie shaped, hole for cutting wire. Parkerised
Hilt/Grips: Olive green plastic, 1 screw.
Scabbard: Plastic and metal, strapped to a pouch.

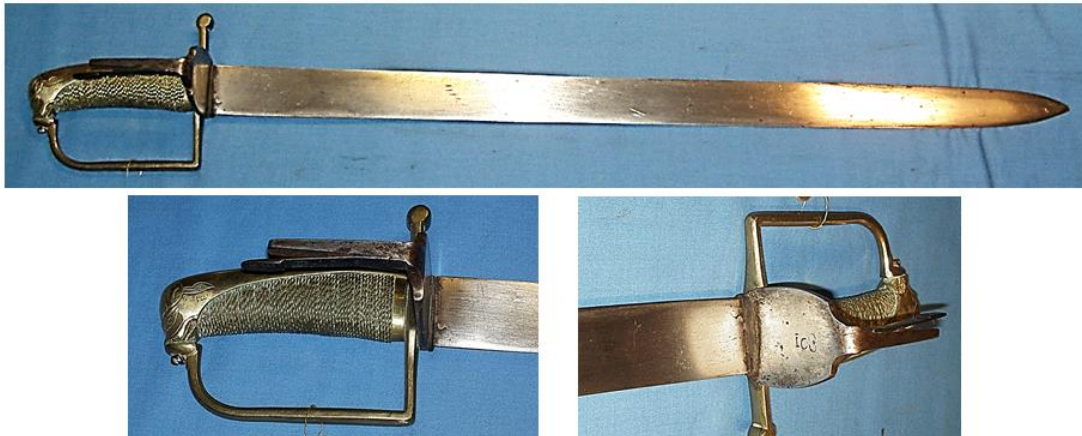

Length:310mm
Blade length:184mm
Muzzle ring:22mm

State:Netherlands
Weapon:.....Diemaco C7(A1) & C8(A1)
Rarity:R2

NORWAY

M 1801

Variations: Long, shortened. Internal spring, external spring.
Blade: No fuller, double sided edge.
Hilt/Grips: Brass with hand guard. grips of twinned brass threads.
Scabbard: Leather with brass mounts.

Length:.....760mm
Blade length:620mm

State:.....Denmark, Norway
Weapon.....M1801, M1803, M1807 hunting rifle
No. made:10400

M 1848 Cadet

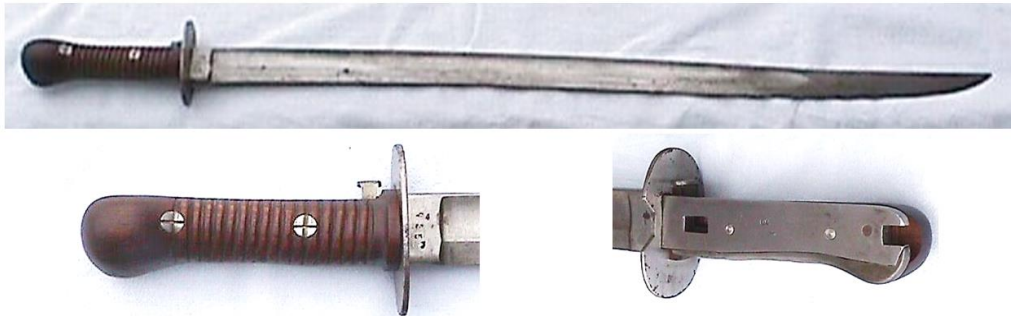

For the War Academy M1848 chamber loader.
Blade: Yatagan, wide fuller.
Hilt/Grips: Brass hilt and handguard, 15 circumferential grooves.
Scabbard: Leather with brass mounts, side lip.

Length:.....700mm
Blade length:572mm
Muzzle ring:21,5

State:..... Norway
Weapon..... M1848 chamber loader.
No. made:cca. 110

M 1851

Blade: Yatagan, fullered.

Hilt/Grips: Wooden grip with 17 grooves on the right and locking mechanism on the left side of the hilt. 2 screws. Crossguard has semi-octagonal cutout on the left side.

Scabbard: Leather with brass mounts.

Length:.....789mm

Blade length:655mm

Blade width:.....32mm

Blade thickness:....10,2mm

Weight:770g

State:..... Norway

Weapon:..... M/1821-51

Rarity:R4

M 1859

Marked with serial number and crowned 'K' on the ricasso. Similar to the M1860, but with a larger muzzle ring.

There is also a smaller cadet version for War Academy . (Length: 631mm, Blade length: 506mm, Muzzle ring: 23mm.)

Blade: Yatagan, fullered.

Hilt/Grips: Wooden grips,4 rivets. Brass pommel and crossguard, hole in the pommel.

Scabbard: Leather with internal brass mounts.(some with external)

Length:.....705mm

Blade length:565mm

Muzzle ring:23,2mm

State:..... Norway

Weapon:..... M1859

Chamber loader

Rarity:R4

M 1857 Cadet

for the War Academy chamber loader M/1848/57. The main differences from M1859 is (apart from the serial number) the much shorter ricasso and more straight end of the fuller. Similar to the M1859 but with some minor differences in the dimensions. The rifle is manufactured in four different lengths, and so is the bayonet.

State:..... Norway

Weapon:..... M1859 /57

Chamber loader

Model	Number	Blade length	Grip length
Type I	1-25	567mm	76mm
Type II	26-55	547mm	71mm
Type III	56-75	527mm	66mm
Type IV	76-80	507mm	61mm

M 1860

Similar to the M1859, but with a smaller muzzle ring. Serial number on the ricasso. Few of these bayonets was modified to M1876, or to M1905 in a very limited number.

Blade: Yatagan, fullered.

Hilt/Grips: Wooden grips, 4 rivets. Brass pommel and crossguard, hole in the pommel.

Scabbard: Leather with internal brass mounts.

Length:.....710mm

Blade length:570mm

Muzzle ring:18,7mm

State:..... Norway

Weapon:..... M1860,

Remington M1867.

Rarity:R3

M 1862/66

Yatagan blade. Similar to the M1860 but has a shorter hilt. Steel scabbard with a loop for the frog.

Length:.....698mm

Blade length:570mm

Muzzle ring:19mm

State:..... Norway

Weapon:..... M1862/

66 Carbine.

M 1905

Was modified from M1860 in a very limited numbers. The modification consisted in adding sawtooth to the back of the blade, shortening the blade and in some examples the locking stud was ground off. Not intended as a bayonet, but as a tool for pioneers/Sappers. In 1912 it was used by the sanitary and medical personal.

M 1867

Similar to the 1860, but with shorter blade.
 The bayonet was only submitted to the navy.
 Similar to the M1859, but with a smaller muzzle ring. Serial number on the ricasso. Few of these bayonets was modified to M1876, or to M1905 in a very limited number.
Blade: Yatagan, fullered.
Hilt/Grips: Wooden grips, 4 rivets. Brass pommel and crossguard, hole in the pommel.
Scabbard: Leather with internal brass mounts.

Lenght:.....635mm
Blade length:500mm
Muzzle ring:18,7mm

State:Norway, Sweden
Weapon.... Remington M1867.
No Made:.....4200

M 1860/67 (For M 1894 Carbine)

A few m/1867 bayonets was modified for the M1894 carbine. The brass crossguard was replaced with a steel guard. The bayonet was intended to be mounted beside the pipe, and the carbine was modified with a new mounting, modified pommel. Only 400 bayonets were modified.

M 1876

Similar to the M1860, but with a serial number on the crossguard, instead of the ricasso. Some M1860 bayonets were modified into M1976, and had the serial number on the ricasso was ground off.

Blade: Yatagan, fullered.

Hilt/Grips: Wooden grips, 4 rivets. Brass pommel and crossguard, hole in the pommel.

Scabbard: Leather with internal brass mounts.

Length:.....710mm

Blade length:.....570mm

Muzzle ring:18,7mm

State:..... Norway

Weapon:.....Krag
Petterson M1876.

No. Made:975

M 1884 Army

A notch on the right side of the muzzle ring. 28162 made, most of them were scrapped. Very uncommon.

Blade: Cruciform blade.

Hilt/Grips: Wooden grips, 3 screws.

Scabbard: Leather with internal brass mounts.

Length:.....610mm

Blade length:.....497mm

Muzzle ring:17,3mm

State:..... Norway

Weapon:.....Jarman
M1884

No. Made: ...28162

M 1884 Army (Plated)

Without a notch on the muzzle ring. 28162 made, most of them were scrapped. Nickel/chrome plated. Very uncommon.

Blade: Cruciform blade.

Hilt/Grips: Wooden grips, 3 screws.

Scabbard: Leather with internal brass mounts.

Length:.....610mm

Blade length:.....497mm

Muzzle ring:17,3mm

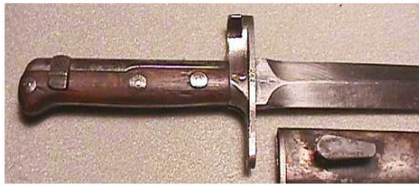

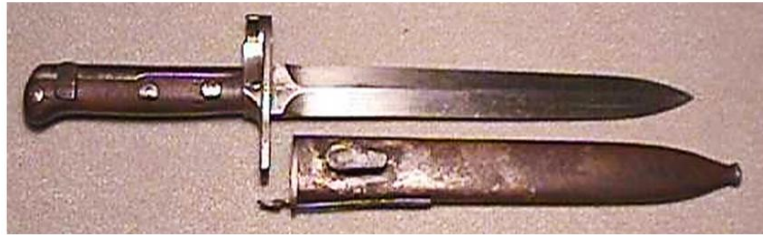

State:..... Norway

Weapon:.....Jarman
M1884

No. Made: ...28162

M 1884 Navy

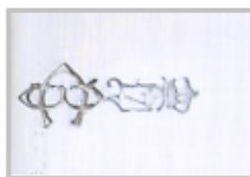

A notch on the right side of the muzzle ring. Very uncommon.
Blade: Double edged.
Hilt/Grips: Wooden grips, 3 screws.
Scabbard: Metal, elongated frog stud.

Lenght:.....313mm
Blade lenght:....200mm
Muzzle ring:17,3mm

State:..... Norway
Weapon:.....Jarman M1884
No. Made:729

M 1894

Metal in blued/white finish. Serial No. on the crossguard and scabbard, elaborate Kongsberg proofmark and inspection marks on the ricasso.
Blade: Single edged, no fuller, with false edge.
Hilt/Grips: Wooden grips, 1 screw.
Scabbard: Metal painted black, ball on the tip of the scabbard.

Lenght:.....334mm
Blade lenght:....215mm
Blade width:.....19mm
Blade thickness:...4mm
Weight:225g

State:..... Norway
Weapon:..Krag Jorgensen M1894, M1912.
No. Made:140.000

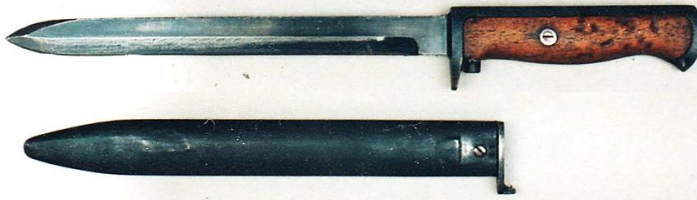

Parade

Parade/dress variation. Chromed, replaced grips. (This example was converted from M1916)

M 1894/43 (1943-1944)

Made during German occupation (1943-44). Metal in blued finish.
Compared to the M1894: Very few had serial number, some have german WaA proofmarks, rough overall finish (some without false edge), has more crude and less elaborate Kongsberg mark, no control marks, grip scales made from a lighter wood. Many were later modified to fit on a M1 Carbine.
Blade: Single edged, no fuller, some without false edge.
Hilt/Grips: Wooden grips, 1 screw.
Scabbard: Blued metal, without the ball on the tip.

Length:.....334mm
Blade length:.....215mm
Blade width:.....19mm
Blade thickness:.....4mm
Weight:225g

State:..... Norway
Weapon:..Krag Jorgensen M1894, M1912.
No. Made:34.200

M 1913

Has a single fuller extending all the way to the tip of the blade.
Blade: Fuller only on one side.
Hilt/Grips: Wooden grips, 1 screw.
Scabbard: Black leather with sewn frog.

Length:.....490mm
Blade length:.....370mm

State:..... Norway
Weapon:..Krag Jorgensen M1894, M1912.
No. Made:cca. 3000

M 1916

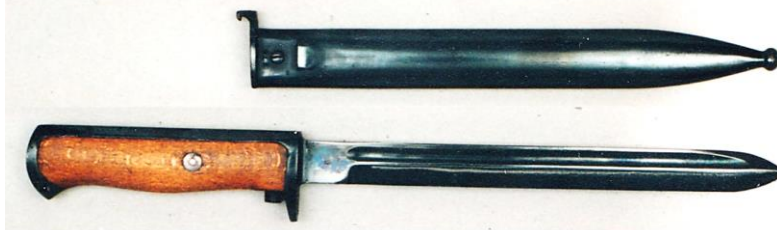

Serial No. on the crossguard and scabbard.
Blade: Fuller ends circa 105 mm from the point.
Hilt/Grips: Wooden grips, 1 screw.
Scabbard: Blued/painted steel with separate frog. The first 3720 bayonets was delivered with leather scabbard.

Length:.....488mm
Blade length:.....365mm

State:..... Norway
Weapon:..Krag Jorgensen M1894, M1912.
No. Made:43.160

M 1916 (Shortened)

M1916 shortened to the length of M1894. The modification was made in 1943-45 on German orders. There are some bayonets shortened to a length between the short and the long bayonet. Metal usually blued in black/grey.
Blade: Shortened, fuller extending to the tip of the blade.
Hilt/Grips: Wooden grips, 1 screw.
Scabbard: Blued/painted steel with separate frog or leather.

Length:.....337mm
Blade length:.....215mm
Blade width:.....19mm
Blade thickness:4,4mm
Weight: 280g

State:..... Norway
Weapon:..Krag Jorgensen M1894, M1912.

M 1956 SLK (Converted M 1894)

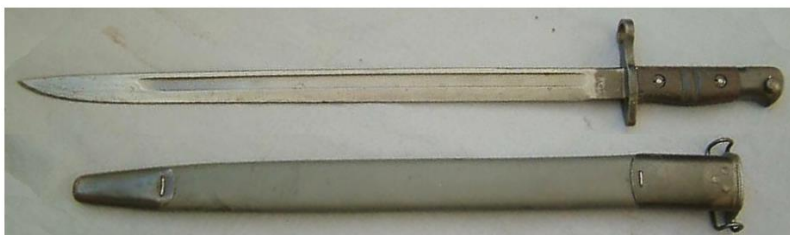

Modified M1894 with a muzzle ring welded and web belt frog. Metal usually blued in black/grey. Relatively many of the bayonets are of the war production. May be found with Waffenamt stamp.
Blade: Single edged, no fuller, some without false edge.
Hilt/Grips: Wooden grips, 1 screw.
Scabbard: Blued metal, web belt frog.

Length:.....334mm
Blade length:.....215mm
Blade width:.....19mm
Blade thickness:.....4mm
Weight:240g

State:..... Norway
Weapon:.....M1 Carbine.
No. Made:cca. 30.000

M 1913 Remington

US 1913 issued to Norway after WW2. Norwegian markings on the crossguard. Scabbard has grey painted leather body with 1907 chape and belt attachment.

M 1944

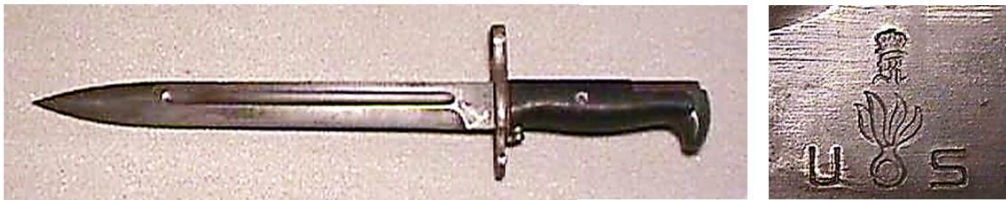

Made from 1944-1945. Serial numbered 001-4600, there were 10-20 trial pieces without serial numbers.
Blade: Double edged, no fuller.
Hilt/Grips: Wooden grips, 2 screws, blued pommel and crossguard.
Scabbard: Matt parkerised metal, round frog stud.

Length:.....315mm
Blade length:.....210mm
Muzzle ring:15

State:..... Norway
Weapon:..Krag Jorgensen M1894, M1912.
No. Made:cca. 4600

M1 SLG

Variations: -War Academy: Grips, crossguard and scabbard are painted black, frog in black plastic material with red edges. - The Royal Guard: Black leather scabbard attached to the ordinary frog.
Blade: Rounded fuller, Kronsberg mark on the ricasso.
Hilt/Grips: Bakelite grips.
Scabbard: US M8 style.

Length:.....368mm
Blade length:.....252mm
Muzzle ring:15mm

State:..... Norway
Weapon:.....M1 Garand, Springfield M1903.
No. Made: ...cca. 50.000

M 1957 SLG

Modified German 98k. The modification consists in a steel angle with a stud welded to the guard. All blued metal.
Blade: Rounded fuller.
Hilt/Grips: Wooden/bakelite grips, 2 screws.
Scabbard: Blued metal, belt attachment.

Length:.....384mm
Blade length:.....251mm
Blade width:.....25mm
Blade thickness:...5,7mm
Weight:410g

State:..... Norway
Weapon:.....M1 Garand
No. Made:cca. 5000

1884/98 (k98)

There are a number of 98k bayonets with an American belt hook soldered to the original scabbard. Belt hook is the only difference between original German and reissued Norwegian bayonet.

Blade: Rounded fuller.

Hilt/Grips: Wooden/bakelite grips, 2 screws.

Scabbard: Blued metal, belt attachment. American belt hook soldered to the original scabbard.

Length:.....384mm

Blade length:.....250mm

Blade width:.....25mm

Blade thickness:...5,7mm

Weight:405g

State:..... Norway

Weapon:.....Gev. 98

Rarity:R2

Air Force

Serial numbers on the pommel and scabbard.

M4 SLK

Kronsberg markings on the scabbard, pommel and crossguard. All metal blued. US manufactured.

Blade: No fuller, long false edge.

Hilt/Grips: Compressed leather rings, 6 circumferential grooves.

Scabbard: US M8A1 with Kronsberg stamp.

Length:.....290mm

Blade length:.....170mm

Muzzle ring:15mm

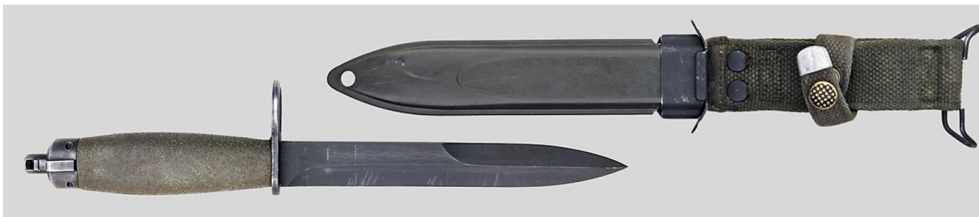

State:..... Norway

Weapon:.....M1

Carbine.

Rarity:R2

AG3 (M 1968)

<p>Differs from the German G3 in having a 13 mm shorter hilt, no flashguard. Edge facing different direction. Some have Kongsberg markings. Blade: No fuller, long false edge. Hilt/Grips: Olive green plastic. Scabbard: US M8A1 without labeling.</p>	<p>Lenght:.....292mm Blade length:.....167mm Blade width:.....22mm Muzzle ring:22,3mm Weight:230g</p>	<p>State:..... Norway Weapon:.....AG3 Rarity:R2</p>
---	--	--

Type 2

Olive green, 7 groove plastic grip. It has the standard-length hilt and flashguard common to most G3 bayonets. Produced in the 1990s by AES in Germany.

AG3 (Royal Guard)

Type 2 AG3 bayonet, distinctive leather integral frog and scabbard in all black finish.

Trial/Experimental

Bayonets, that were produced in limited numbers for trial/prototype purposes. Generally these bayonets are very rare.

M 1878

Wooden grips, brass pommel and guard. The blade is straight. The scabbard id clearly inspired by the german SG71.

Lenght:605mm
Blade length: ...470mm
Muzzle ring:17mm

State:...Norway, Sweden
Weapon:.....M1876-1889
No. made:75

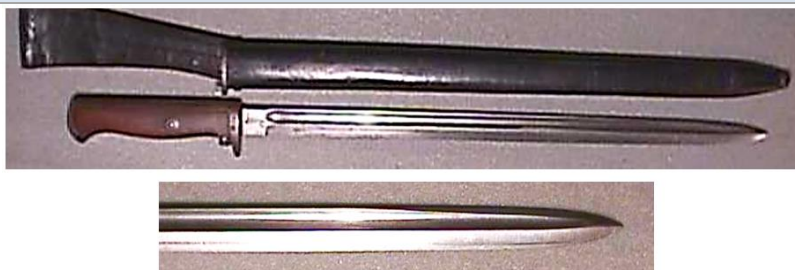

M 1912 Folding

Folding bayonet, cruciform blade like M1884. The bayonet was folded like the Italian Carcano bayonet. It was the cavalry that wanted a folding bayonet as the long bayonet could get stuck/was in the way. It was also tried a bayonet that could be slided back.

Blade length: ...430mm

State:.....Norway
Weapon.....Krag Jorgensen M1912

M 1912

Similar to the M1913, but it has double fullers (fullers on both sides). With steel scabbard instead of the M1913's leather one.

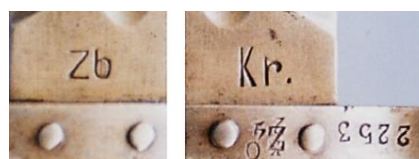

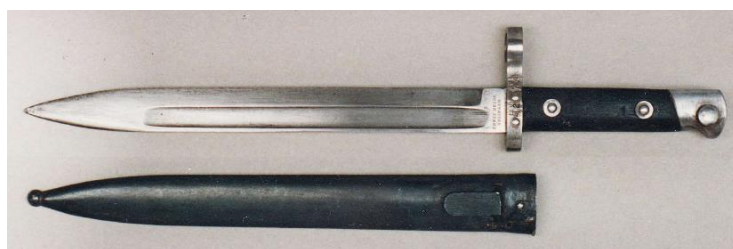

Lenght:490mm
Blade length: ...370mm

State:.....Norway
Weapon.....Krag Jorgensen M1912
No. made:cca. 30

POLAND

Mannlicher M1895

Polish markings on crossguard and ricasso.
Blade: Fullered, edge facing upwards
Hilt/Grips: Wooden grips, 2 rivets
Scabbard: Painted/blued metal with U-shaped frog stud.

Length:359mm
Blade length:248mm
Blade width:22,9mm
Blade thickness:5,3mm
Muzzle ring:15mm
Weight:285-300g

State: AH, Poland.
Weapon:Mannlicher M1895
Rarity:.....R1

Wz 1898/05

German 98/05 rework. In blued/white finish. Polish WZ markings on the pommel, number on the ricasso/crossguard.
Blade: Fullered, butcher blade.
Hilt/Grips: Smooth wooden grips, 2 screws. Flashguard removed.
Scabbard: Blued metal with U-shaped frog stud.

Length:500mm
Blade length:368mm
Blade width:... 25,5/33,5mm
Blade thickness:7mm
Weight:520g

State: Poland
Weapon:Gew. 98
Rarity:.....R2

Wz. 22

More or less copied from German and Austro-Hungarian bayonets. Fragile and often these bayonets were damaged in field use. Each bayonet required individual fitting to its rifle
Blade: Round fuller.
Hilt/Grips: Wooden grips, 2 screws.
Scabbard: Blued/painted metal with teardrop shaped frog stud.

Length:383mm
Blade length:249mm
Blade width:..... 23,5mm
Blade thickness:5,6mm
Weight:360g

State: Poland
Weapon:Wz. 1898, Mosin 1891/98/25.
Rarity:.....R3

Early		Late	
Upside down ricasso markings.		Right side up ricasso markings.	

Wz. 24

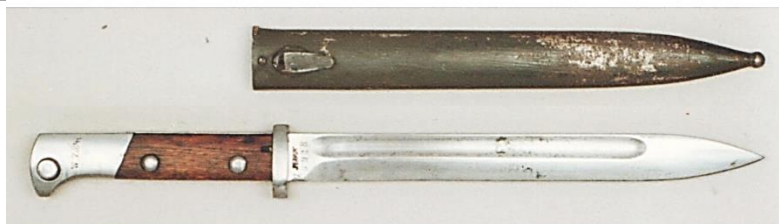

Because of fragility of the Wz. 22, a new model was designated. More solid and had a flashguard on the top of the grip. Construction was much improved, but still required individual fitting to the rifle. Late manufacture Wz.24 bayonets were interchangeable with any rifle/carbine. These interchangeable bayonets were stamped with a small eagle under the pommel. Often these bayonets were marked with model designation on the pommel - "bg.wz.24" or "wz.24". The font can be different on each bayonet due to the fact the stamping was done separately by each unit's armourer.
Blade: Round fuller.
Hilt/Grips: Wooden grips, 2 screws.
Scabbard: Painted metal with teardrop shaped frog stud. Some scabbards were two-sided, having also a side lip on the other side .

Length:381mm
Blade length:246mm
Blade width:..... 25mm
Blade thickness:6mm
Weight:495g

State: Poland
Weapon:Wz. 1898, Mosin 1891/98/25.
Rarity:.....R2

Wz. 27

For Mauser wz.1898 rifle and carbine & Mosin 1891/98/25. Exactly same construction as wz.24. Only one difference is that all bayonets are interchangeable with different rifles. They were marked similar to the late wz.24 with eagle on the pommel. They were also marked with model designation - "bg.wz.27" or "wz. 27". The serial number is very useful in identifying the wz.27. Model 27's are in the s/n range 342.751 to 378.110. (Not common bayonet).

Wz. 28

First Polish bayonet with muzzle ring. It was necessary because of the production of the Polish Mauser wz.29 carbine. This model still has a muzzle flash protector on top, although it was no longer necessary.

Blade: Round fuller.

Hilt/Grips: Wooden grips, 2 screws.

Scabbard: Painted metal with teardrop shaped frog stud.

Length:385mm

Blade length:251mm

Blade width:.....25,7mm

Blade thickness:6mm

Weight:480g

State:Poland

Weapon:Wz. 1898, PFK Wz.29.

Rarity:.....R2

Simplified

Simplified version of bayonet wz.28 was exactly the same as regular wz.28, but without flashguard.

Invert markings

Made only by Perkun. Ricasso markings are on the opposite side ("W.P." on the right ricasso, "Perkun" on the left.) compared to the standard Wz. 28. Serial number on that type always consists of 5 digits starting with "0". Grip nuts and bolts were factory parkerized.

Wz. 29 (1939)

Commonly call “mobilization model” by collectors. Bayonets marked with a date were made only in 1939. Most had their blades “combat” sharpened. About 10.000 were made, but it is considered quite rare. Many examples were made in the 2000’s as comemorative repro pieces. These look new, no signs of age, some are parkerised.

Made by Radom: Factory parkerized grip nuts and bolts. Catch nut with a hole.

Made by Perkun: Marked “PERKUN WARSZAWA”. Nuts and bolts are also factory parkerized. Serial numbers are 5 digit always starting with “0”.

Blade: Round fuller.

Hilt/Grips: Wooden grips, 2 parkerised screws.

Scabbard: Dark olive green painted metal with teardrop shaped frog stud.

State:Poland

No. Made::cca. 10.000

Parkerised

Only made in the RADOM factory. Matt grey-green parkerised finish. Very rare.

Simplified markings

The rarest Polish bayonet. Referred to by collectors as the “May bayonet” because the production contract was approved on May 31st 1939. This bayonet is marked only with a small Polish eagle and familiar acceptance mark circumscribed in an oval. The serial number always consists of 5 digits and is in the 7xxxx to 8xxxx range. On some you can just discern evidence of the original full standard Radom factory markings which later were removed.

AK-47

<p>Radom markings and year on the crossguard, serial number on the tang.</p> <p>Blade: Fullered, edge facing upwards.</p> <p>Hilt/Grips: Wood-bakelite composite grips, 2 screws.</p> <p>Scabbard: Blued metal with detachable leather belt hanger.</p>	<p>Length:311mm</p> <p>Blade length:203mm</p> <p>Muzzle ring:17,7mm</p>	<p>State: Poland</p> <p>Weapon:AK-47</p> <p>Rarity:.....R1</p>

Made at *Arteria Fca De Toledo*, Spain.

Blade: Squared fuller extending to the tip of the blade.

Hilt/Grips: Wooden grips with 2 screws. Flat back of the hilt and different pommel compared to M1892/93.

Scabbard: Leather with metal fittings, teardrop shaped frog stud.

Length:.....378mm

Blade length:.....251mm

Blade width:.....26,7mm

Blade thickness: ...6,6mm

Weight: 420g

State:..... Spain

Weapon:.....Mauser
M1893

Rarity: R1-2

M 1892/93

German production.

Blade: Squared fuller extending to the tip of the blade.

Hilt/Grips: Wooden grips with 2 screws. Hump on the back of the hilt (also called "humpback bayonet").

Scabbard: Leather with metal fittings, long teardrop shaped frog stud.

Length:.....373mm

Blade length:.....248mm

Blade width:.....26,6mm

Blade thickness: ...6,2mm

Weight: 365g

State:..... Spain

Weapon:.....Mauser
M1893

Rarity: R3

M 1893 (Dress)

All chromed, parallel grips with 2 rivets, thick tang. Blade has shorter, rounded fuller.

M 1913

Marked *Artilleria Fca De Toledo* on the left ricasso, serial number on the right.

Blade: Rounded, unsharp fuller.

Hilt/Grips: Checkered wood grips, 2 screws.

Scabbard: Leather with metal fittings, teardrop shaped frog stud.

Length:.....525mm

Blade length:.....400mm

Blade width:.....24,9mm

Blade thickness: ...7,3mm

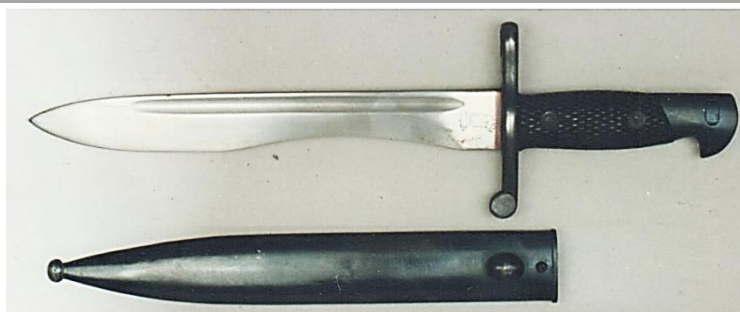

Weight: 530g

State:..... Spain

Weapon:.....Mauser M1893

Rarity: R1-2

M 1941 (Wooden grips)

Marked *FNT (FN Toledo)* logo on the left ricasso, serial number on the right.

Blade: Bolo shaped, narrow rounded fuller. White finish.

Hilt/Grips: Checkered wood grips, 2 screws. Blued cross guard andommel.

Scabbard: Blued metal, oval frog stud.

Length:.....373mm

Blade length:.....249mm

Blade width:.....32,3mm

Blade thickness: ...6,7mm

Weight: 495g

State:..... Spain

Weapon:.....Mauser M1893, M1916.

Rarity: R1

M 1941 (Plastic grips)

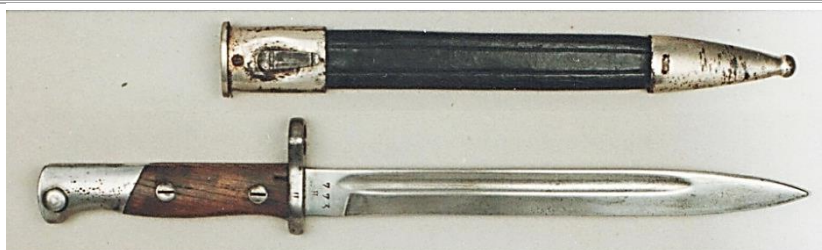

Marked *FNT (FN Toledo)* logo on the left ricasso, serial number on the right. **Variations:** -All blued. -Blued cross guard and pommel, blade in white finish.
Blade: Bolo shaped, narrow rounded fuller. Blued/white finish.
Hilt/Grips: Checkered plastic grips, 2 screws. Blued cross guard and pommel.
Scabbard: Blued metal, oval frog stud.

Length:.....373mm
Blade length:.....249mm
Blade width:.....31mm
Blade thickness: ...6,3mm
Weight: 490g

State:..... Spain
Weapon:.....Mauser M1893, M1916.
Rarity: R1

M 1943

Derivative of the german k98. Marked *FNT (FN Toledo)* logo on the left ricasso, serial number on the right.
Blade: Rounded fuller.
Hilt/Grips: Wooden grips, 2 screws.
Scabbard: Leather with metal fittings (German71/84 style) / blued metal (German k98 style). Teardrop shaped frog stud.

Length:.....384mm
Blade length:.....250mm
Blade width:.....24,5mm
Blade thickness:5mm
Weight: 360g

State:..... Spain
Weapon:.....Mauser M1943.
Rarity: R2-3

M 1944

Identical to the German k98, except that the blade is thinner. The bluing on the has a reddish hue. The quality of construction is poor. Marked PR8 and serial number on the cross guard.
Blade: Rounded fuller.
Hilt/Grips: Wooden grips, 2 screws.
Scabbard: Identical to the k98, but without throatpiece.

Length:.....386mm
Blade length:.....251mm
Blade width:.....23,5mm
Blade thickness:5mm
Weight: 395g

State:..... Spain
Weapon:.....Mauser M1943.
Rarity: R2-3

Composite grips

Rarer composite grips. This example in white finish and with no markings.

M 1969 CETME

All parkerised finish. Marked with Toledo makers logo and serial number on the left ricasso, and army eagle logo on the right (some examples are found with a navy anchor symbol).

Blade: Bolo shaped, no fuller.

Hilt/Grips: Checkered plastic grips.

Scabbard: Olive green plastic, metal throatpiece, riveted frog.

Length:.....338mm

Blade length:.....223mm

Blade width:.....27,2mm

Blade thickness: ...5,2mm

Weight: 435g

State:..... Spain

Weapon:.....CETME M1958

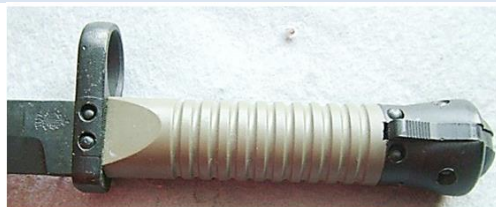

Rarity: R1

CETME L - Navy

Naval Issue of the CETME L bayonet. It has a press button catch and a Navy anchor on the blade.

CETME L - Air force

Air Force of the CETME L bayonet. It features a distinctive hilt catch similar to the G3 types

SWEDEN

m/1692

Plug bayonet.

Blade: No fuller, double sided edge.

Hilt/Grips: Wooden handle with a catch spring.

Lenght:.....790mm

Blade lenght:580mm

State:.....Sweden

No. made:3000

m/1793

Blade: Narrow fuller near the spine of the blade.

Hilt/Grips: Brass hilt, metal handguard, octagonal muzzle ring with locking bolt.

Scabbard: Leather with brass fittings, elongated frog stud.

Lenght:780mm

Blade lenght:660mm

State:.....Finland, Sweden

Weapon:.....M1793 Flintlock.

Rarity:.....R4-5

m/1815/20

Blade: No fuller, double sided edge.
Hilt/Grips: Brass hilt with leather grips.

Length:.....730mm
Blade length:617mm
Muzzle ring:23mm

State:.....Sweden
Weapon:.....M1815/20,
M1815/38
No. made:cca. 800

m/1826

Blade: No fuller, double sided edge. Blade from cavalry pallasch M1773 or M1775.
Hilt/Grips: Brass hilt with iron cross guard (hand guard).

Length:.....735mm

State:.....Sweden
Weapon:.....M1826,
M1826/38 flintlock rifle.
Rarity:R4

m/1860/67 (For M 1894 Carbine)

A few m/1867 bayonets was modified for the M1894 carbine. The brass crossguard was replaced with a steel guard. The bayonet was intended to be mounted beside the pipe, and the carbine was modified with a new mounting, modified pommel. Only 400 bayonets were modified.

m/1867

(More on page 141)

Blade: Yatagan, fullered.

Hilt/Grips: Wooden grips, 4 rivets. Brass pommel and cross guard, hole in the pommel.

Scabbard: Leather with internal brass fittings.

Lenght:.....635mm

Blade lenght:500mm

Muzzle ring:18,7mm

State:Norway, Sweden

Weapon:... Remington M1867.

No Made:.....4200

M 1903 Cutlass (Coast Artillery)

Modified M1867. The T-slot was filled with brass. The locking spring stud was removed and the hole was plugged, wooden grips replaced. Used by coast artillery unit. Regimental markings on the muzzle ring finial and throat of the scabbard.

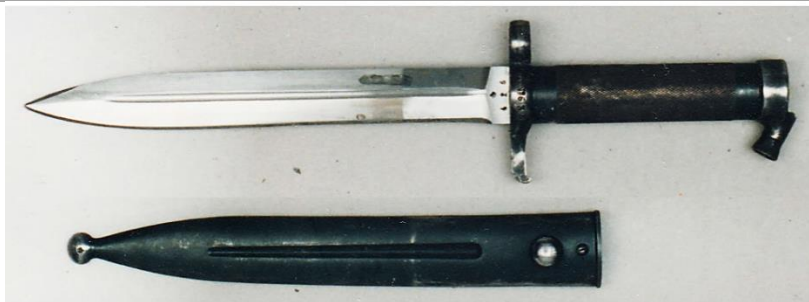

m/1896 (Dress)

Several different dress variations of M1896 bayonet. No mounting stud and no muzzle ring (left). Chromed with engraved blade and scabbard (right).

m/1896

Earlier examples have regimental markings on the cross guard and scabbard. Other variations: Dress, dagger, flag instead of the blade, with a bolt to connect an earth cable (issued to signalers).
Makers: EJAB (Until 1912), Carl Gustav (from 1913 onwards).
Blade: Narrow fuller in the centre of the blade, single edged.
Hilt/Grips: Hollow metal tube with, checkered.
Scabbard: Blued metal, longitudinal groove, round frog stud.

Length:.....327/335mm
Blade length:...208-212mm
Blade width:.....24,5mm
Blade thickness:6mm
Muzzle ring: 15,5mm
Weight: 270g

State:.....Sweden
Weapon:..... M1869, M1938, M1942.
Rarity: R1

Early

Rare early example. The first years this bayonet was manufactured with a flat locking stud and was in a more brown colour rather than blued. Some also with double edged blade.

m/1914

The earlier examples have a scabbard that is more narrow towards the point, more glossy finish (bottom) and smaller and more rounded scabbard locking stud. The scabbards of the later bayonets are wider close to the point, matt finish (top). Scabbard locking stud is larger, more angular. Grips screwed from other side (screws on the right side of the grip).
Blade: No fuller, double edged.
Hilt/Grips: Wooden grips, 2 screws, blued cross guard and pommel..
Scabbard: Blued metal, longitudinal groove, round frog stud.

Length:.....457mm
Blade length:....329mm
Blade width:....24,5mm
Blade thickness:....6mm
Weight: 420g

State:.....Sweden
Weapon:....M1894/14 Carbine, MP M1945.
Rarity: R2-3

m/1915 - Navy

Designed for navy M1894/14 carbines. Makers: EJAB, EAB, Carl Gustav. Fuller design is different among different makers.
Blade: Narrow fuller, single edged, edge facing upwards.
Hilt/Grips: Wooden grips, 2 screws. Blued cross guard and pommel.
Scabbard: Blued steel, round frog stud.

Length:.....630mm
Blade length:500mm
Muzzle ring:15,5mm

State:.....Sweden
Weapon:.....M1894/14, SMG M1945C.
Rarity:R4

m/1915/52

Shortened M1915, the work is very rough. All blued finish.
Blade: Narrow fuller, single edged. Shortened M1915 blade.
Hilt/Grips: Wooden grips, 2 screws.
Scabbard: Blued steel, round frog stud.

Length:.....315mm
Blade length:186mm
Muzzle ring:15,5mm

State:.....Sweden
Weapon:.....M1894/14.
No. made:30-50

AG3 (m/1965)

Stamped with three crowns on the flashguard.
Blade: No fuller, white finish.
Hilt/Grips: Dark plastic, blued cross guard and pommel.
Scabbard: Early: Wood-plastic composite with lock on the front side. Late: Black plastic with lock on the rear side.

Length:.....310mm
Blade length:168mm
Muzzle ring:22mm

State:.....Sweden
Weapon:.....AK4, AK5
Rarity:R1-2

AK 5C

Introduced in 2008.

Blade: Bowie shape, no fuller, blued. Available with etched "Viktoria & Daniel, 2010, XX von 250" on the blade (250 examples).

Hilt/Grips: Plastic grips, chrome plated cross guard and pommel.

Scabbard: Plastic with metal throat.

Lenght:.....325mm

Blade lenght:185mm

Muzzle ring:22mm

State:.....Sweden

Weapon:.....AK 5C

Trial/Experimental

Bayonets, that were produced in limited numbers for trial/prototype purposes. Generally these bayonets are very rare.

fm/1880

Wooden grips, 2 rivets. Brass/steel pommel and cross guard. The blade is a machete style.

Lenght:642mm

Blade lenght: ...499mm

Muzzle ring:16mm

State:.....Sweden

Weapon:.....Jarmann rifle.

fm/1877/78 Kropatschek

Muzzle ring and mortise slot on the inside of the hilt.

Lenght:614mm

Blade lenght: ...470mm

Muzzle ring:17,2mm

State:.....Sweden

Weapon:.....fm/1877/78 Portugal.

fm/1878 Jarmann

Wooden grips, brass pommel and cross guard. The blade is straight. The scabbard id clearly inspired by the german SG71.

Lenght:605mm
Blade lenght: ...470mm
Muzzle ring:17mm

State:...Norway, Sweden
Weapon.....M1876-1889
No. made:75

fm/1888 Bergman

Cruciform blade and scabbard from French M1886 Lebel. Wooden grips with 2 screws.

Lenght:625mm
Blade lenght: ...520mm
Muzzle ring:15mm

State:..... Sweden
Weapon.....Bergman rifle.

fm/1910 - long

Single edged blade facing downwards, narrow fuller in the centre.

Lenght:645mm
Blade lenght:503mm
Muzzle ring:15,5mm

State:.....Sweden
Weapon..... m/1894 modified carbine.
No. Made:cca. 50

fm/1910 - medium

Single edged blade facing upwards, narrow fuller in the centre.

Lenght:475mm
Blade lenght:331mm
Muzzle ring:15,5mm

State:.....Sweden
Weapon:..... m/1894 modified carbine.
No. Made:cca. 70

fm/1910 - short

Similar to the m/1896, but with a different pommel (same as fm/1910 - medium and fm/1910 - long).

fm/1913

Double edged blade without fullers. Similar to the m/1914, but the tip of the blade tip is more pointed and asymmetrical. Press stud is positioned higher and more rounded compared to the m/1914 and muzzle ring is thicker. Scabbard is same as m/1914 early pattern.

Lenght:460mm
Blade lenght:332mm
Muzzle ring:15,5mm

State:.....Sweden
Weapon:..... m/1894/14
No. Made:500

m/1915 - Navy trial (m/1894 Carbine)

Similar to the standard m/1915, but the press stud is positioned higher and more rounded compared to the m/1914 and muzzle ring is thicker.

Lenght:.....630mm
Blade lenght:500mm
Muzzle ring:15,5mm

State:.....Sweden
Weapon:.....M1894/14
No. Made:Single

fm/1915 trial - short

Blade similar to the m/1896. Wooden grips with single screw, blued cross guard and pommel. **Variations:** -Short pommel, round muzzle ring that fits tight to the barrel. -Long pommel with an oval muzzle ring, that keeps the bayonet free from the barrel.

Length:326mm
Blade length:210mm
Muzzle ring:15mm

State:.....Sweden
Weapon:..... m/1896 Modified rifle

fm/1915 trial - medium

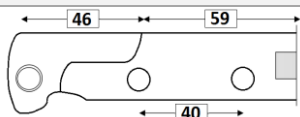

Blade similar to the m/1914. Wooden grips with 2 screws, blued cross guard and pommel. **Variations:** -Short pommel, round muzzle ring that fits tight to the barrel. -Long pommel with an oval muzzle ring, that keeps the bayonet free from the barrel. Hilt also occurs in 3 different variations.

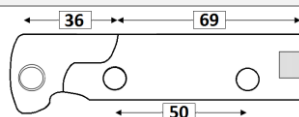

Length:448mm
Blade length:333mm
Muzzle ring:15,5mm

State:.....Sweden
Weapon:..... m/1896 Modified rifle

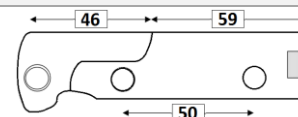

HILT VARIATIONS

Type 1

Type 2

Type 3

fm/1915 trial - long

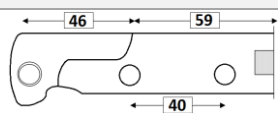

Blade similar to the m/1915. Wooden grips with 2 screws, blued cross guard and pommel. **Variations:** -Short pommel, round muzzle ring that fits tight to the barrel. -Long pommel with an oval muzzle ring, that keeps the bayonet free from the barrel. Hilt also occurs in 4 different variations.

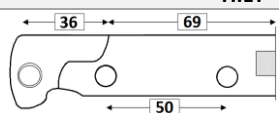

Length:595mm
Blade length:480mm
Muzzle ring:15,5mm

Stat:.....Sweden
Weapon:..... m/1896 Modified rifle

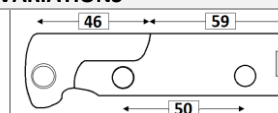

HILT VARIATIONS

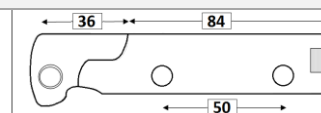

Type 1

Type 2

Type 3

Type 4 (Only one example known)

fm/1940 Lundin

Similar to the m/1914, but with a T-slot instead of the muzzle ring.

Lenght:460mm
Blade lenght:330mm

State:.....Sweden
Weapon.....Lundin semi automatic rifle.
No. Made:Very few

fm/1961 G3

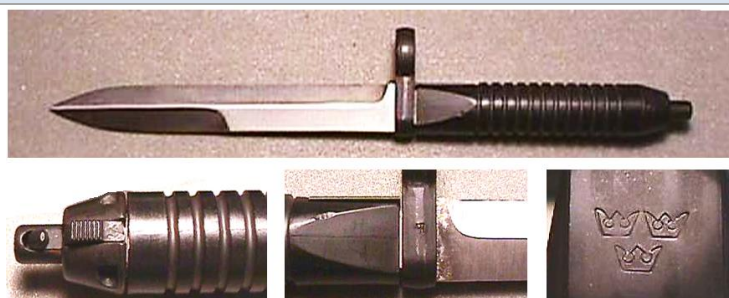

A number of bayonets with green plastic handle were tested for the AK4 (G3).

Lenght:305mm
Blade lenght:166mm
Muzzle ring:22mm

State:.....Sweden
Weapon..... AK4 (G3)

fm/G3

Made in 1963 in at least 3 series (marked L, S or O on the guard). Stamped with three crowns on the flashguard. Similar to the m/1965 but with the following differences: -Thinner grip with 12 grooves. -Cross guard doesn't have the slot for scabbard lock. - Scabbard is the same of the early m/1965, but without the lock. -Grip is slightly loose.

Lenght:305mm
Blade lenght:166mm
Muzzle ring:22mm

State:.....Sweden
Weapon.....AK4 (G3)

SWITZERLAND

Vetterli 1878

Cross guard thickness: 6mm. Variations: Sawback (more common), plain (uncommon).

Blade: Fuller on right side, left side is flat.

Hilt/Grips: Leather grips with 4 rivets..

Scabbard: Leather with metal fittings, held together with wire.

Lenght:.....594mm

Blade lenght:.....473mm

Blade width:.....28mm

Blade thickness: ...6,3mm

Muzzle ring:18mm

Weight: 575g

State:.....Switzerland

Weapon:.....Vetterli 1878

Rarity: R3-4

Other variations

- Variation with rivets in the fuller.
- Border guard variation with slightly shorter blade and plain back.
- Variation with fullers on both sides.

Vetterli 1881

Similar to the 1878, but with a thicker cross guard (7mm). Scabbard is held together with rivets, rather than wire. Variations: Sawback (more common), plain (uncommon).

Blade: Fuller on right side, left side is flat.

Hilt/Grips: Leather grips with 4 rivets..

Scabbard: Leather with metal fittings, held together with rivets.

Lenght:.....594mm

Blade lenght:.....473mm

Blade width:.....28mm

Blade thickness: ...6,3mm

Muzzle ring:18mm

Weight: 575g

State:.....Switzerland

Weapon:.....Vetterli 1881

Rarity: R3

Vetterli 1887

Similar to the 1881, but with 3 rivets fixing the grips.
Variations: Sawback (more common), plain (uncommon).

Blade: Fuller on right side, left side is flat.

Hilt/Grips: Leather grips with 3 rivets..

Scabbard: Leather with metal fittings, held together with rivets.

Length:.....594mm

Blade length:.....473mm

Blade width:.....28mm

Blade thickness: ...6,3mm

Weight: 575g

State:.....Switzerland

Weapon:.....Vetterli 1878, 1881.

Rarity: R3

Other variations

-Variation with rivets in the fuller.

-Police variation with sawback removed.

Vetterli 1878/1881/1887 Dress (For musicians)

A musician variant where the mortise was filled in (with wooden wedge), press stud removed and the muzzle ring without "ears" to fit around the front sight. Another variation filled in both the muzzle ring and the handle groove.

Blade: Fuller on right side, left side is flat.

Hilt/Grips: Leather grips with 3/4 rivets..

Scabbard: Leather with metal fittings, held with wire/rivets.

Length:.....594mm

Blade length:.....473mm

Blade width:.....28mm

Blade thickness: ...6,3mm

Muzzle ring:18mm

Weight: 575g

State:.....Switzerland

Rarity: R2-3

M 1889/92 Cyclist

The conversion by removing the socket, adding a crosspiece, and welding a pommel to the end of the bayonet. All blued finish.

Blade: Cruciform blade (converted from 1863/1871 socket bayonets)

Hilt/Grips: Cruciform blade with cross guard and pommel added.

Scabbard: Blued metal/leather. Leather loop to retain bayonet in it's scabbard.

Length:.....504mm

Blade length:.....385mm

Blade width:.....14,5mm

Blade thickness: 11,4mm

Muzzle ring:14/15mm

Weight: 280g

State:.....Switzerland

Weapon:Schmidt-Rubin M1900, M1911

Rarity: R3

Schmidt-Rubin M 1889

There were problems with the bayonet staying in the scabbard leading to the modifications made to the following models.
Blade: Plain fuller.
Hilt/Grips: Wooden grips with 2 rivets. Some examples with chrome-plated pommel, cross guard and ricasso.
Scabbard: Blued metal with side lip with leather strap attached to it.

Length:.....418/422mm
Blade length:296/300mm
Blade width:.....26,7mm
Blade thickness: .6,1mm
Muzzle ring:15mm
Weight: 475g

State:.....Switzerland
Weapon:Schmidt-Rubin 1889, 1896/11.
Rarity: R2-3

Schmidt-Rubin M 1889/18

There were problems with the M1889 bayonet staying in the scabbard leading to the modifications where a rivet or spot weld has been added inside the fuller.
Blade: Fuller with rivet/spot weld.
Hilt/Grips: Wooden grips with 2 rivets.
Scabbard: Blued metal with side lip with leather strap attached to it.

Length:.....418/422mm
Blade length:296/300mm
Blade width:.....26,7mm
Blade thickness: .6,1mm
Muzzle ring:15mm
Weight: 470g

State:.....Switzerland
Weapon:Schmidt-Rubin 1889, 1896/11.
Rarity: R2

Schmidt-Rubin M 1899

There were problems with the M1889 bayonet staying in the scabbard. M1899 was made with the retaining bar in the fuller (both sides) to help keep the bayonet in the scabbard.
Blade: Fuller with retaining bar.
Hilt/Grips: Wooden grips with 2 rivets.
Scabbard: Blued metal with side lip with leather strap attached to it.

Length:.....418mm
Blade length:.....296mm
Blade width:.....27mm
Blade thickness: .6,1mm
Muzzle ring:15mm
Weight: 450g

State:.....Switzerland
Weapon:Schmidt-Rubin 1889, 1896/11, 1911.
Rarity: R2

Schmidt-Rubin M 1906 (Pioneer)

Blade and scabbard similar to the Vetterli 1881, 1887. Hilt similar to the M1914.

Blade: Fuller on right side, left side is flat, sawback.

Hilt/Grips: Wooden grips with 2 rivets.

Scabbard: Leather with metal fittings, held together with rivets. Side lip with leather strap attached to it.

Length:.....610mm
Blade length:.....481mm
Blade width:.....28mm
Blade thickness: .6,5mm
Muzzle ring:14,2mm
Weight: 620g

State:.....Switzerland
Weapon:Schmidt-Rubin 1896/11, 1900, 1911.
Rarity: R3

Schmidt-Rubin M 1914 (Pioneer)

Issued to engineers, artillery, drivers, horse transport, corporals... A musician's variant also exists, where the mortise is filled in.

Blade: Sawback. Fuller on right side, left side is flat. Swell-point blade profile, where the blade is wider at the point than at the ricasso.

Hilt/Grips: Wooden grips with 2 rivets. Some examples with chrome-plated pommel, cross guard and ricasso.

Scabbard: Blued metal/brown leather with metal fittings, held together with rivets. Side lip with leather strap attached to it.

Length:.....608mm
Blade length:.....480mm
Blade width:.....30mm
Blade thickness: .6,6mm
Muzzle ring:14,2mm
Weight: 735g

State:.....Switzerland
Weapon:Schmidt-Rubin 1911, 1931.
Rarity: R2-3

Schmidt-Rubin M 1918

With two different blade lengths.
Blade: Double edged, no fuller.
Hilt/Grips: Wooden grips with 2 rivets.
Scabbard: Blued metal. Side lip with leather strap attached to it.

Length:.....432/451mm
Blade length:...300/324mm
Blade width:.....27mm
Blade thickness:6mm
Muzzle ring:14,2mm

State:.....Switzerland
Weapon:Schmidt-Rubin 1911, 1931.
Rarity: R1-2

M 1918/55

Elsener began producing the M1918/55 variant that combined the M1914 hilt with the M1918 blade. Hilt on the M 1918/55 (left) is 1-3mm thicker compared to the standard M1918 (right).

Stgw. 57 (M 1957)

Blade: Double edged, no fuller.
Hilt/Grips: Round rubber grips with 10 circumferential grooves.
Scabbard: Black plastic with side lip for frog belt.

Length:.....372mm
Blade length:.....240mm
Blade width:.....22mm
Blade thickness:6mm
Muzzle ring:22mm
Weight: 340g

State:.....Switzerland
Weapon:Stgw.57

TURKEY

Peabody Martini M1874

Blade: Yatagan, rounded fuller.

Hilt/Grips: Leather grips, fish scale pattern, 5 rivets.

Scabbard: Leather with metal mounts, round frog stud.

Length:.....718mm

Blade length:.....576mm

Blade width:.....32,1mm

Blade thickness: ..8,7mm

Weight: 920g

State:.....Turkey

Weapon: ...Peabody-Martini M1874

Rarity:R3-4

Dress

Converted into a dress saber, by filling the mounting slot and press stud, nickel-plating the entire bayonet, and replacing the original gutta-percha grips with satinwood with 2 diamond shaped mother-of-pearl inlays.

Dress

Converted to side arm status by removing the locking stud and replacing the leather grips with replacement wooden ones. The replacement grips can be plain or chequered. All metal surfaces have been refinished in a matt black finish.

Shortened and straightened

Peabody-Martini M1874 with shortened and straightened blade. Steel/leather scabbard.

M 1887

Similar to the M1890, except the muzzle ring is positioned lower,
Blade: Rounded fuller, narrower at the tip.
Hilt/Grips: Wooden grips, 2 rivets.
Scabbard: Leather with metal mounts, rounded frog stud.

Length:.....583mm
Blade length:.....458mm
Blade width:.....26mm
Blade thickness:8mm
Weight: 595g

State:.....Turkey
Weapon:Mauzer M1887.
Rarity:R4

M 1890

Long

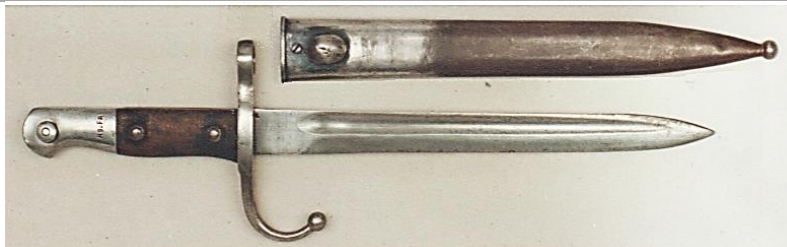

Similar to the M1887, except the muzzle ring is positioned higher.
Blade: Rounded fuller, narrower at the tip.
Hilt/Grips: Wooden grips, 2 rivets.
Scabbard: Leather with metal mounts, rounded frog stud.

Length:.....588mm
Blade length:.....462mm
Blade width:.....26mm
Blade thickness: ..7,7mm
Weight: 625g

State:.....Turkey
Weapon:..... Mauzer M1890.

Shortened

Shortened M1890 with quillion intact.
Blade: Rounded fuller, shortened blade.
Hilt/Grips: Wooden grips, 2 rivets.
Scabbard: Blued metal with rounded frog stud..

Length:.....cca. 376mm
Blade length:.....cca. 250mm
Blade width:.....26mm
Blade thickness:7,7mm
Weight:cca. 465g

State:.....Turkey
Weapon:..... Mauzer M1890, M1893.

Shortened, quillion removed

Shortened M1890 with quillion removed.
Blade: Rounded fuller, shortened blade.
Hilt/Grips: Wooden grips, 2 rivets.
Scabbard: Blued metal with rounded frog stud..

Lenght:.....cca. 369mm
Blade lenght:.....cca. 242mm
Blade width:.....26mm
Blade thickness:7,7mm
Weight:cca. 430g

State:..... Turkey
Weapon:..... Mauzer
 M1890, M1893.

M 1903

Long

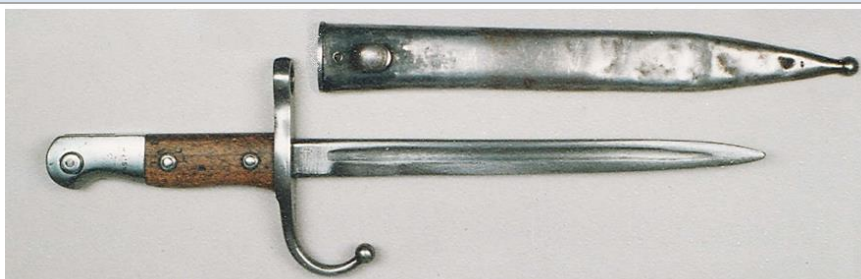

Blade: Quillback, similar to the German M1898.
Hilt/Grips: Wooden grips, 2 rivets.
Scabbard: Leather with metal mounts, teardrop shaped frog stud.
 Similar to the German M1898 scabbard.

Lenght:.....652mm
Blade lenght:.....525mm
Blade width:.....20mm
Blade thickness:...8,9mm
Weight: 600g

State:.....Turkey
Weapon:..... Mauzer
 M1903, M1905.

Shortened

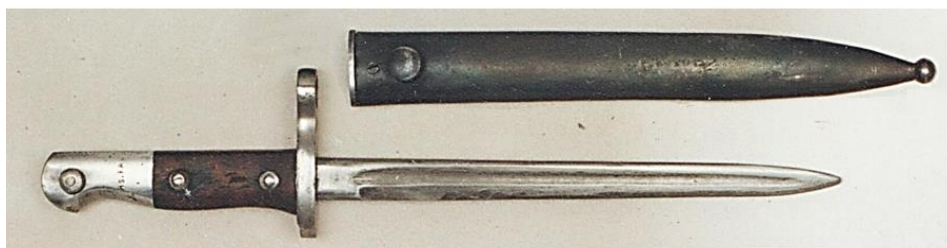

Shortened M1903 with quillion intact.
Blade: Quillback, shortened blade.
Hilt/Grips: Wooden grips, 2 rivets.
Scabbard: Blued metal with rounded frog stud.

Lenght:.....cca. 363mm
Blade lenght:.....cca. 236mm
Blade width:.....20mm
Blade thickness:8,9mm
Weight:cca. 455g

State:.....Turkey
Weapon:..... Mauzer
 M1903, M1905.

Shortened, quillion removed

Shortened M1903 with quillion removed.
Blade: Quillback, shortened blade.
Hilt/Grips: Wooden grips, 2 rivets.
Scabbard: Blued metal with rounded frog stud.

Length:.....cca. 369mm
Blade length:.....cca. 241mm
Blade width:.....19,8mm
Blade thickness:8,6mm
Weight:cca. 425g

State:.....Turkey
Weapon:..... Mauzer M1903, M1905.

Converted for telegraphers

1903 converted by adding a plug o the muzzle ring into which a screwed rod can be fitted to take the earthing strap for telegraphy

M 1913 (M 1903 - Short)

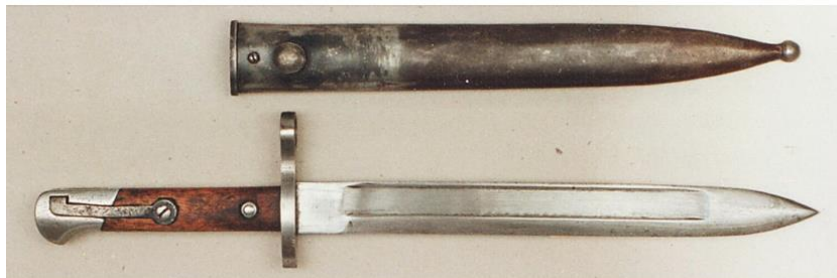

Not a cut-down M1903 bayonet. It was produced with a short blade. Unlike the long M1903 bayonet, the blade is only 6.5 mm thick at the ricasso, tapering down to 4 mm before thinning out to it's point. The bayonet once had a hooked quillion, which was subsequently removed.
Blade: Short, rounded fuller.
Hilt/Grips: Wooden grips, 2 rivets.
Scabbard: Blued metal with rounded frog stud. Many are in modified 1935 scabbards.

Length:.....368mm
Blade length:.....244mm
Muzzle ring:15,6mm

State:.....Turkey
Weapon:Mauzer M1893, M1903.

M 1935

G3

All metal in blued finish.

Blade: Green round plastic grips with 19 circumferential grooves.

Hilt/Grips: Wooden grips, 2 rivets.

Scabbard: Stamped metal with blued/green painted finish.

Length:.....380mm

Blade length:.....236mm

Blade width:.....25mm

Blade thickness: ..5,3mm

Weight: 330g

State:.....Turkey

Weapon:Heckler & Koch G3.

AKM Type I

Rare AKM bayonet produced by Turkish Mitas Makina company. Produced since 1977. Its rarity is the result of strict Turkish export laws. The grips are a wood and resin composite, metal parts are parkerised, scabbard is without rubber guard and belt hanger attachment.

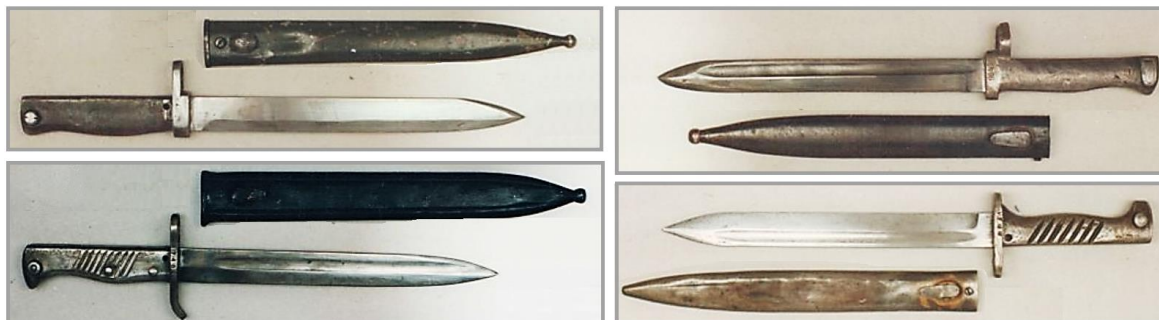

TURKISH ERSATZ/CONVERTED

The Turks converted large numbers of bayonets to fit their own weapons, you can find most variations of WWI German made bayonets, Rumanian, Yugoslavian, Czechoslovak and British (also Australian). They also converted their own 1890 and 1903 pattern bayonets. Many were converted to the "1935" pattern to fit a Spanish version of the standard Mauser rifle, these typically have a 250mm blade and crossguard modifications to mount onto this rifle. Some of these blades were also converted to mount onto the US M1 rifle, these typically have a straight sided crossguard.

The ASFA markings found on the hilt of Turkish bayonets is the stamp indicting its manufacture/conversion by the army arsenal that came into existence in 1929, converted blades without the ASFA stamp were converted before this time.

Modified German Ersatz

Shortened

Shortened German Ersatz bayonets. Many German bayonets were exported to Turkey after WW1, where they were modified. The blade is shortened to cca. 250mm. Shortened German ersatz are typical of Turkish reworks (also known as "Turked" bayonets). German proof stamps are visible on the blade. Scabbards were appropriately shortened and some have replaced frog studs by an oval stud one. Some scabbards are Turkish made M1890/M1903/M1935. Stamped sheet-metal scabbards are also found.

Variations: All German ersatz variations (page 95-103) can be found "Turked".

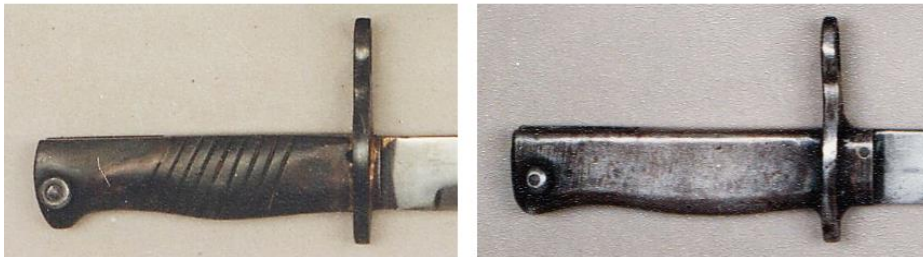

Serial number on the crossguard

Any German ersatz bayonets found with a serial number on the crossguard are Turkish issue (Turked). Numbers can be eastern Arabic (left) or western Arabic (center, right). They can be found in original length or shortened. Many German bayonets were exported to Turkey after WW1, where they were modified/restamped. German proof stamps are visible on the blade.

Variations: All German ersatz variations (page 95-103) can be found "Turked".

Modified crossguard

Modified crossguards - initially to fit the bayonets on the export pattern Mauser rifle or Turkish rifles, subsequently some were further modified to fit the US M1 Garand, these modifications can be quite extensive. Original crossguard has been removed and new one brazed on. Blades can be original length or shortened.

Converted German

1898

Converted/modified German SG 1898 bayonet. Most of them were crudely shortened (compared to German shortened navy issued, where shortening was more delicate). Some are modified to fit on Turkish rifles. Some examples found with replaced/modified crossguards/replaced wooden grips. Examples with intact sawback/sawback crudely removed are also found. Scabbards are often Turkish M1890/M1903/M1935 or modified foreign ones.

1871/84

Reissued German SG 1871/84. Similar to the original German 71/84, the only difference is crossguard serial number on the "Turked" examples.

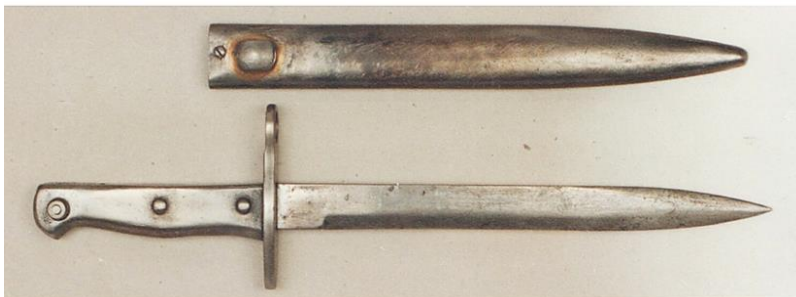

1898/05

Converted/modified German SG 1898/05 bayonet. Crudely shortened. Some modified to fit on Turkish rifles. Some examples found with replaced/modified crossguards/replaced wooden grips. Examples with intact sawback/sawback crudely removed are also found. Some are found with added serial numbers on the crossguard/pommel. Scabbards are often Turkish M1890/M1903/M1935, shortened 1898/05 or modified foreign ones.

M 1903 Ersatz (M 1916)

Scabbard and hilt painted in the same color. Turkish markings and serial number on the crossguard. Some made in Germany (German proof stamps).

Blade: No fuller.

Hilt/Grips: Ersatz-style metal hilt, 2 rivets. Hilt is painted.

Scabbard: Painted metal. Turkish style scabbard (some are found with Austrian/German scabbards).

Length:.....367mm
Blade length:.....246mm
Blade width:.....23mm
Blade thickness:5mm
Weight:465g

State:.....Turkey
Weapon:.....Mauzer M1903.

Twist handle Ersatz

Similar to the Austrian M1895 twist handle ersatz, except the crossguard is much thicker, massive and roughly made (the muzzle ring is not even centered in the cross guard). The scabbard of this example is an Austrian Ersatz.

FN FAL G1

Variations: Fullered, unfullered. Serial number on the side of the pommel.
Blade: Recycled blade from an earlier Mauser bayonet. Fullered/ unfullered.
Hilt/Grips: Ersatz-style metal hilt. 2 muzzle rings (on the crossguard and on the pommel).
Scabbard: Blued metal. Turkish style scabbard with rounded frog stud.

Muzzle ring:.....18mm

State:.....Turkey
Weapon:.....FN FAL G1

VZ-24 (Reissued)

Pommel serial numbers show multiple reissues. Old serial number has been crudely ground off.

Czech VZ (Converted)

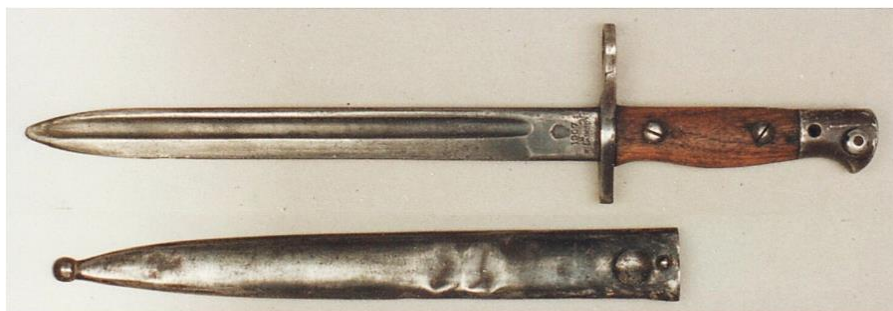

Czech VZ bayonet with modified crossguard and hilt. Crossguard has been replaced (muzzle ring is positioned higher compared to the original VZ). Hilt has been shortened, replaced wooden grips.

M 1907 (Shortened)

Shortened 1907's/1919's without any further modifications, indicating that they were used on SMLE rifles. Bayonets can be reworked UK, Australian, Canadian, South African examples. Scabbards can be shortened 1907 ones (leather) or Turkish steel ones. Shortened leather scabbards are also found without metal mount on the tip, where it was hand stitched. Another scabbard example is 1907 throat welded to a new steel body. Blades can be shortened into bowie or point shaped. Some are also in white finish.

M 1907 (Converted)

Captured and converted British/Australian M1907. Shortened blade, replaced crossguard with stamped serial number. Blued finish.
Blade: Shortened 1907 blade.
Hilt/Grips: Wooden grips, 2 screws, replaced crossguard.
Scabbard: Turkish metal scabbard / shortened 1907 leather scabbard.

Length:.....cca. 375mm
Blade length:...cca. 253mm
Blade width:.....24mm
Blade thickness:7mm
Weight:cca. 395g

State:.....Turkey
Weapon:..Mauzer M1935.

1880/81 Milanovic (Converted)

Converted Serbian Mauser Milanovich bayonet to fit on the M1935 rifle. Blade has been shortened, crossguard has been replaced and stamped with Turkish serial numbers. Similar to the M1880/07 Duric bayonet, except the muzzle ring is positioned higher.

Mannlicher M 1893 (Converted)

Romanian M1893 bayonet converted to fit on a Turkish rifle. Similar to the Romanian M1893, except the crossguard has been replaced (muzzle ring is positioned higher) and stamped with Turkish serial number.

Blade: Wide squared fuller.

Hilt/Grips: Wooden grips with 2 rivets..

Scabbard: Turkish style metal scabbard with round/rounded frog stud / Austrian style scabbard / leather scabbard with metal mounts.

Length:.....370mm

Blade length:.....243mm

Blade width:.....27mm

Blade thickness:.. 5,8mm

Weight:365g

State:.....Turkey

M 1924 (Shortened)

Shortened Yugoslavian M1924 bayonet. Scabbard has been made by adding M1924's throat to unknown scabbard body and painted grey.

M 1935 (Squared fuller)

M1935 with squared fuller (blade from unknown bayonet).

M 1935 (Modified for M1 Garand)

M1935 modified for M1 Garand rifle. Modified by adding an additional plate onto the existing crossguard of a M1935, this new plate has a smaller off centre hole designed to mate with the Garand flash hider.

M 1890 / M 1903 (Converted for M 1935)

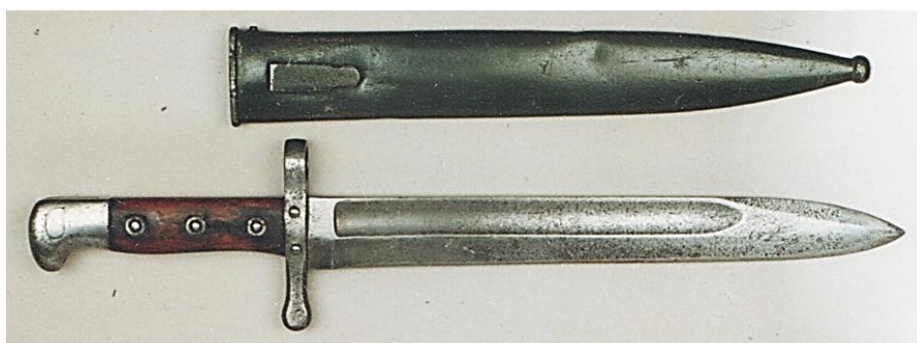

Turks also converted their own 1890 and 1903 pattern bayonets. Many were converted to the "1935" pattern to fit a Spanish version of the standard Mauser rifle, these typically have a 250mm blade and cross guard modifications to mount onto this rifle.

YUGOSLAVIA

M 1880

Made by Steyr (OEWG) in Austria. Serial number on the crossguard.
Blade: Wide blade. Right side is fullered, left side is flat.
Hilt/Grips: Wooden grips, 3 rivets.
Scabbard: Blued metal, Werndl/Kropatschek style frog stud.

Length:.....418mm
Blade length:... 287mm
Blade width:.....35mm
Blade thickness: ..8mm
Weight:630g

State:..... Yugoslavia.
Weapon:.....Mauser
 Milanovic M1878/80.
Rarity:R4-5

M 1880/81 Milanovic

Foreign made (Solingen) with added Yugoslav markings on the blade.
Blade: Yatagan, rounded fuller.
Hilt/Grips: Wooden grips, 2 rivets.
Scabbard: Blued metal, Werndl style.

Length:.....564mm
Blade length:... 474mm
Blade width:.....28,7mm
Blade thickness: ..8,2mm
Weight:620g

State:..... Yugoslavia.
Weapon:.....Mauser
 Milanovic M1878/80.
Rarity:R4

M 1880/07 Djuric

A bayonet for the Mauser-Djurich M1880/1907. Shortened M1880/81 Milanovic bayonet with replaced crossguard. Similar to the Turkish M1880/81 rework, except the muzzle ring is positioned lower. The scabbard is specially made for this conversion and won't fit any other bayonet. Very rare bayonet.

Mannlicher M 1895M

Bayonet for the Yugoslav M95M rifle. Rifle is similar to the standard M95, except the barrel is from M1924. Bayonet has larger muzzle ring to fit on the M1924 barrel. Wooden grips were replaced and fixed with 2 screws (instead of 2 rivets on the standard M95 bayonet). Many are found with Yugoslav "AT3" markings on the ricasso.

Blade: Fullered, edge facing upwards.

Hilt/Grips: Wooden grips, 2 screws.

Scabbard: Blued metal. Austrian/Yugoslav made.

Length:.....354mm

Blade length:... 240mm

Blade width:.....23,5mm

Blade thickness:..5,3mm

Muzzle ring:15,6mm

Weight:320g

State:.....Yugoslavia

Weapon: Mannlicher M1895M

Rarity:R3

M1888/16 Converted

Made from the parts of former Austro-Hungarian M1888/16 bayonets and are quickly identified by the long pommel and short grips.

M1888/90 Converted

Yugoslavian conversion of a leftover Austrian M1890 bayonet to fit the M95M rifle. The hilt was shortened and with replaced crossguard. Muzzle ring is positioned higher, compared to the standard M1888/90 bayonet.

M1899 Converted

Converted M1899 to fit on the M95M rifle. Replaced crossguard with set muzzle ring to locking distance and muzzle ring height.

M1924 Converted (Shortened hilt)

Converted M1924 with M95M crossguard installed and hilt shortened. Pommel is in original M1924 length, grips are very short.

M1924 Converted (Shortened pommel)

Based on the M1924 bayonet but with the tang in its normal length and a shorter pommel to compensate for the locking distance. Found with muzzle ring/muzzle ring removed.

M 1899

Makers: Simpson & Co. Suhl, Steyr (OEWG), Plumb Co. (Any bayonets marked with AT3 are reworked and are designated as M1889C).

Blade: Rounded fuller.

Hilt/Grips: Wooden grips, 2 rivets.

Scabbard: Blued metal with teardrop shaped frog stud.

Length:.....371mm

Blade length:... 250mm

Blade width:....23,6mm

Blade thickness:..5,6mm

Muzzle ring: ... 15,6mm

Weight:310g

State:.....Yugoslavia

Weapon:.....Mauser M1899, M1899/07, M1910.

Rarity:R3-4

M 1899/07

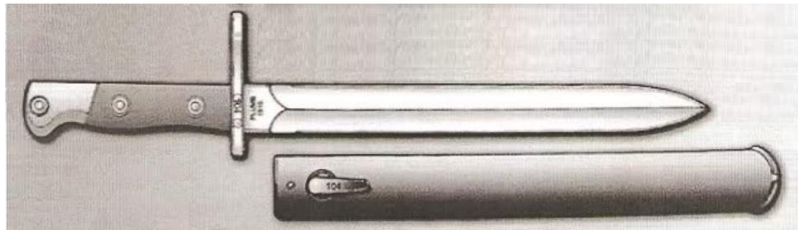

Most of them were reworked after WW1 (designated as 1899C).
Makers: Simpson & Co. Suhl, Steyr (OEWG), Plumb Co. (Any bayonets marked with AT3/BT3 are reworked and are designated as M1889C).
Blade: Double edged.
Hilt/Grips: Wooden grips, 2 rivets. Crossguard fixed with 2 protruding rivets.
Scabbard: Blued metal with teardrop shaped frog stud.

Length:.....366mm
Blade length:... 247mm
Blade width:.....24,5mm
Blade thickness:...6mm
Muzzle ring: ... 15,6mm
Weight:350g

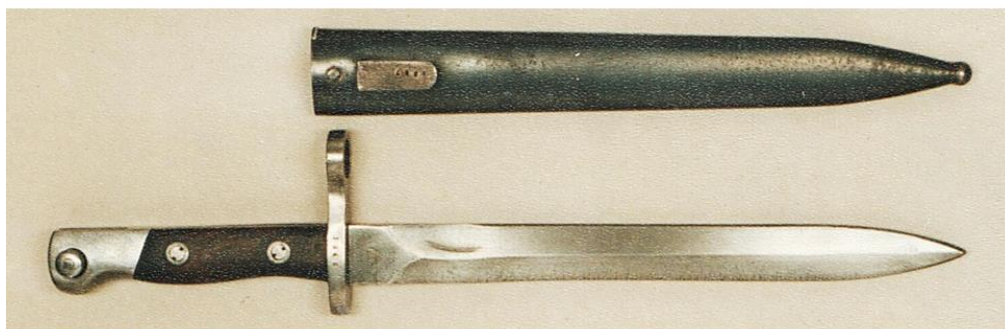

State:.....Yugoslavia
Weapon:.....Mauser M1899, M1899/07, M1910.
Rarity:R4

Made by Plumb Co.

Made by Fayette R. Plumb Co. of St. Louis, USA. Marked with "Plumb" and a year of production on the ricasso.
 Interesting scabbard design with crimped end.

M 1899C

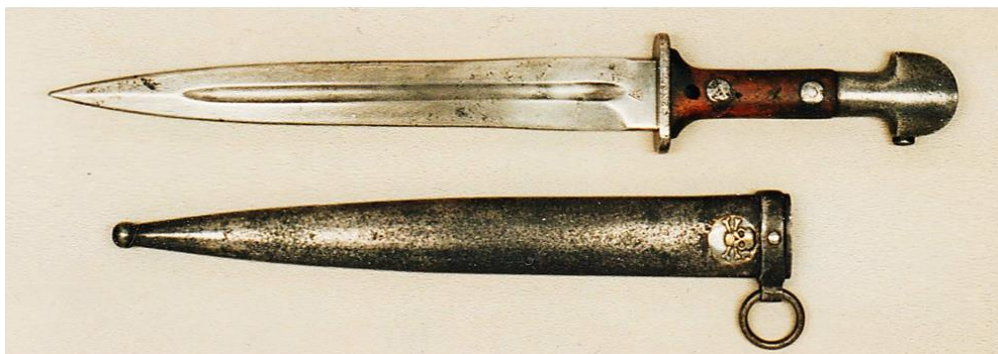

Most M1889/07 bayonets were reworked after WW1 and designated as M1899C. Similar to the M1899, except the grips are secured by screws and spanner nuts, crossguard is fixed with flush (unprotruding) rivets and the ricasso is marked "AT3".
Blade: Double edged.
Hilt/Grips: Wooden grips, 2 rivets.
Scabbard: Blued metal with teardrop shaped frog stud. Some are without ball finial and the end is welded closed.

Length:.....366mm
Blade length:... 247mm
Blade width:.....24,5mm
Blade thickness:...6mm
Muzzle ring: ... 15,6mm
Weight:360g

State:.....Yugoslavia
Weapon:.....Mauser M1899C, M1910C.
Rarity:R3

M 1924 Chetniks

Used by the "Chetniks" royal guard. Marked with "BT3" on the ricasso and scabbard. Serial number on the crossguard and scabbard.
Blade: Double edged, narrow fuller in the centre.
Hilt/Grips: Wooden grips, 2 screws.
Scabbard: Blued metal with round ring. Chetnik "skull and bones" symbol on the throat.

Length:.....361mm
Blade length:... 241mm
Blade width:....29,3mm
Blade thickness:..5,3mm
Weight:335g

State:.....Yugoslavia
Weapon:.....Mauser M1924.
No. Made: ..5000-6000

M 1924

Marked with AT3 (ATZ) or BT3 (VTZ) on the ricasso, serial number on the crossguard and frog stud. Examples without ricasso markings are Belgian made exports. All white finish.
Blade: Rounded fuller.
Hilt/Grips: Wooden grips, 2 screws.
Scabbard: Blued metal with teardrop shaped frog stud.

Length:.....515mm
Blade length:... 383mm
Blade width:....25,8mm
Blade thickness:..6,5mm
Weight:470g

State:.....Yugoslavia
Weapon:.....Mauser M1924.
Rarity:R2

Post war rework

Post WW2 rework. All metal in deep blued finish.

MAKERS

AT3 (ATZ): *Artiljerijsko Tehnicki Zavod* (Artillery Technical Institute) Kragujevac. Made 1923 - 1931.

BT3 (VTZ): *Vojno Tehnicki Zavod* (Military Technical Institute) Kragujevac.. Made 1918 - 1923 and 1931 - 1941.

M 1924b

M1924b made from German 98/05 with blade ground parallel, these often have replaced grips with grooves slanting in reverse to the German originals. Bayonets can be found in different variations (with / without muzzle ring), different finishes (white/blued), serial number and most are marked M24b on the crossguard. Some have AT3/BT3 markings on the ricasso, original German markings are often visible.

Blade: Rounded fuller.

Hilt/Grips: Wooden grips, 2 screws.

Scabbard: Blued metal with teardrop shaped frog stud.

Length:.....489mm
Blade length:... 359mm
Blade width:....25,7mm
Blade thickness:.6,5mm

State:....Yugoslavia
Weapon:...Mauser M1924.
Rarity:R3

White finish, muzzle ring, original grips

Example in white finish, with muzzle ring and with original German 98/05 grips.

SG 1889

German SG 1889 converted to M1924b. Red tinted bluing, crossguard marked with M24b.

1884/98 III (Reworked)

German k98 bayonet reworked after WW2 for use on Yugoslav M1948 or on captured k98 rifles. Reblued, replaced grips, flashguard removed and stamped serial number on the crossguard and frog stud. Original German markings are less sharp, often barely visible.

Blade: Fullered.

Hilt/Grips: Wooden grips, 2 screws.

Scabbard: Blued metal with

Length:.....384mm
Blade length:... 250mm
Blade width:.....25mm
Blade thickness:.5,6mm
Weight:385g

State:.....Yugoslavia
Weapon:.....Mauser M1948.
Rarity:R2

With flashguard

Yugoslav reworked k98 with flashguard. Reblued, bakelite/wooden grips and stamped serial number on the crossguard and frog stud. Original German markings are less sharp, often barely visible. Used on captured German k98 rifles.

M 1948

All blued finish. Stamped "Preduzece 44" on the ricasso, serial number on the crossguard and frog stud.

Blade: Rounded fuller.

Hilt/Grips: Wooden grips, 2 screws.

Scabbard: Blued metal with teardrop shaped frog stud.

Length:.....380mm
Blade length:... 250mm
Blade width:....25,5mm
Blade thickness:..5,5mm
Weight:370g

State:.....Yugoslavia
Weapon:.....Mauser M1948.
Rarity:R1-2

Pommel serial number

Scarce example with serial number stamped on the side of the pommel.

M 1956

All blued metal, it is small, light and simply manufactured that it seems like a toy.

Blade: Double edged.

Hilt/Grips: Plastic grips.

Scabbard: Blued metal with U-shaped frog stud.

Length:.....285mm
Blade length:... 175mm
Blade width:....21,5mm
Blade thickness:...3mm
Weight:160g

State:.....Yugoslavia
Weapon:.....M1956 SMG.
Rarity:R2

M 1970 (AKM Type II)

AKM Type II bayonet for Yugoslav version of AKM rifle. Stamped serial number on the plastic grips and scabbard.

Blade: Bowie shaped, sawback, hole for cutting wire.

Hilt/Grips: Black plastic grips, 1 plastic rivet. Olive green hand strap.

Scabbard: Black plastic with leather belt hanger.

Length:.....271mm

Blade length:... 147mm

Blade width:.....29,3mm

Blade thickness:..3,6mm

State:.....Yugoslavia

Weapon:.....M1970

Rarity:R1
