piqué

granular surface, raised parallel cords or geometric designs in the fabric are characteristic

polyamide (nylon)

synthetic fibre with high durability, quick drying

polycotton

mix of cotton and polyester, to use benefits of both materials

polyester

most common synthetic fibre, characteristics: tensile strength, fineness, good dimensional stability, low moisture absorption, good wash behaviour, excellent light resistance

polyester pongee

fabric made from polyester filaments, thin, sleek fabric, formerly made from silk

poplin

plain-weave fabric, breathable, durable, smooth, lightweight and densely woven material, one of the most common fabrics for shirts and blouses

preshrunk

procedure to reduce shrinkage after washing (permitted tolerances)

raglan sleeves

diagonale seams course starting from the collar

recycled polyester (= rPET)

Plastic bottles and other plastic waste are shredded and melted down in order to produce new polyester fibers from them, recycling greatly reduces water consumption, CO2 emissions and waste, but the use of different plastic products leads to difficulties in the dyeing process and rPET often requires repeated dyeing processes, in addition the material is not biodegradable and releases microplastics into the environment, for these reasons experts disagree about the sustainability of the material, general characteristics like conventional polyester

rib knit

right/right product, equal in- and outside, often used for collar and cuffs, high elasticity, low material weight, difference between 1x1 rib (alternately knitted left and right) and 2x2 rib (alternately 2 left and 2 right stitches)

ring-spun cotton

softer, finer, smoother and more shiny than open end yarn, optimal printability

rip stop

typical chequered structure due to a special weaving technique, mostly made of nylon, characteristics: particular tear-resistant and strong

semi combed cotton

instead of 3 combing processings there is only one, result is a semi-finished product between carded (not combed) and combed cotton

set-in sleeves

straight set sleeves

single jersey

fine knitted, stretchy, breathable material, inside and outside different (left/right loops), material of most t-shirts

single ply terry

made of fine single yarns, fine loops get twisted and connected, softer and more absorbent fabric, more resistant against pulling out threads

softshell jackets

functional jackets, usually made of 2 or 3 layers (with membrane), inside material (e.g. microfleece) provides isolation and transports the moisture away from skin, if existing, the membrane has windproof and breathable function, outside is made of water repellent material, that transports moisture to the outside, softshell jackets without membrane are more breathable, jackets with membrane are more wind and rain proof

stretch

marks stretchable fabrics including a share of certain materials like for example elastane or Lycra®

Teflon®

used for coatings, water and dirt repellent, not printable

terry cloth

cotton fabric typically used for towels, small loops on one or both sides, very soft, bulky and absorbent material

(T)PU coating

through an inside coating the material gets breathable and water repellent or even waterproof

tubular construction

if not specified differently, all models have side seams to adapt the fit, items without side seams are declared as tubular construction

twill

twill weave fabric, pattern of diagonal parallel ribs, most common use in denim fabrics, durable fabric with a warm and soft touch

viscose (rayon)

chemical fibre made from a natural basic material (cellulose), often referred to as artificial silk, eudemic, not stretchable, strong wrinkling, flowing fabric, very even surface, perfect for dyeing and printing

windproof

keeps the wind completely out, windproof products are not always waterproof, but waterproof articles are always windproof, materials that allow a maximum of 5 liters of air per second through one square meter of fabric are called windproof, windproof materials are often uncomfortable to wear due to the lack of breathability during activity

available for men, women and children, unisex

Poplin cotton - light smooth material

heavy, T-Shirts from 180g/m², Polos from 200g/m², Sweats and Fleece from 300g/m²

Poplin mix - light smooth material, low shrinkage

60° / 90° / 95° washable

Twill - diagonal yarn

neutral size label (no brand label) in neckline

oxford – plain-weave fabric, two-tone appearance

article made of combed cotton

membrane

Polo with smooth surface

winter product

Sweats, not roughened inside

zip for decoration

stretch fabric, e.g. with elastane

waterproof, sealed seams

organic cotton

recycled polyester
