
ID's expression for its own building military strength and the future use of the ID's military forces to support UNSC security interests in accordance with, International rules and create a step to full alliance cooperation under the UN Charter and article on military cooperation UN members, even if the ID's government is not member of the UN and the UNSC.

I King Gottwald Peter representing the federal government Imperium of Diamond's, as the government and state recognized principles of international rules, by and with the demands for the development of its own powers and rights in the form of army interests. The King of federal government Imperium Diamonds confirms in representing the government and the state, to acknowledge respect for the UN Charter and the UNGA conventions, and together with the UNSC resolutions.

In the same interest will be confirmed and the main peacekeeping law establishing the Geneva treaties, Hague treaties and International Humanitarian Law.

Today, in the interest arises goal of creating military development and evolution of military technology and international military industrial structure and partnerships, the ability to achieve full dominance against crime and the cessation of all forms of violations of international law and a just interests of states and their security.

That's why I accepted and it is in my interest to use their own purpose and that purpose, to develop their own armies, thus ensuring full international cooperation for the elimination of all international crimes at the international parties and military conflicts, thereby ensuring full power stabilization of international law and political world diplomacy, conflict prevention, and prevention against wars.

King of Imperium Diamond's Federal Government therefore confirms purpose to develop their own armies, to promote world peace and security, justice and order schedule.

King federal government Imperium of Diamond's therefore confirms that it is in the willingness of the government, even if confirmation of this purpose of the government to fully support the cardinal, and thus allowing full functionality of cooperation with the United Nations, and such security interest, if ID's membership or non membership in the UN.

Imperium of Diamond's book also calls for maintaining the rights of its own integrity of state and government, the foundations of international law, and allows the use of ID's armies in use on behalf of the interests of the UNSC, as the ID's army in direct involvement in peaceful struggle, but as a neutral cooperation to ensure the armed forces of own party ID's capacity be UNSC mobilizing.

Imperium of Diamond's federal government can already develop their own forces armies on high levels of capacity, but it is therefore necessary to achieve the ability to use international legal rights and political rights without blocking the current status at the international level communications, intellectual development and partnerships.

That is why I am also asking for support for the opening of an open development rights, and ensuring act against crimes of terrorist states in the alliance, violates the UN Charter and the UNGA convention. This development can begin.
