

Why should we use Microsoft Teams for Online Classes?

To help the students continue their education, even in these crucial times of this destructive disease i.e Covid-19 Microsoft has developed a software named Microsoft Teams. Microsoft Teams helps the students in [custom writing essay service](#) and allows them to make their online courses easy to understand and also to interact with their teachers and other students of the class in a fast and better way.

In this article, we will talk about different reasons that why should you prefer to choose Microsoft Teams to [take my online class](#) instead of other online learning platforms. But before getting into this let's first discuss that what is Microsoft teams.

Microsoft Teams

To help the online learning students in developing virtual face-to-face connections, engaging in different fun activities, and keeping them connected to each other, Microsoft has crafted the best tool which is a part of the Microsoft 360 family. This tool is named Microsoft Teams. Microsoft teams help the students to collaborate with ease, engage learners, motivate students to take my online class, and elevate day-to-day work.

Features

Some features of Microsoft Teams that make it superior to other online learning platforms are listed below.

Personalized reading

By using Microsoft Teams you can easily chat with your teachers and your class-fellows both privately and publicly. You can also create groups in Microsoft Teams for group discussions on [UK Essay](#) Lonon.

Raise your hand

Just like you ask questions by raising your hand in a physical class, you can also use the same procedure when you take my online class and ask your questions. You can use the raise your hand feature in an online meeting in Microsoft Teams to ask questions from your teachers.

Screensharing

If you want to give a presentation when you [take my online exam](#) and you need to share the screen so that you can show your slides to the teacher and give a presentation from there. For this purpose, you can use the share screen feature of Microsoft Teams and can share your screen with the audience.

Assignments and Exams

Microsoft Teams also has a feature of Submitting assignments and exams. So that when students take my online exam or complete my assignments they can easily submit them to me by using the assignments and exams feature of Microsoft Teams.

Group Mode

Group Mode of Microsoft Teams is specially created for group discussions and meetings. In the Group Mode, you can see and communicate with all meeting attendees. The display of the group mode is just like the students sitting in a class to take my online exam.

Whiteboard

To teach the students when I take my online class, I also need a whiteboard so that I can teach them better. Microsoft Teams has given a solution to this problem also and has provided a whiteboard tool that has many features in it. This whiteboard tool is easy to use and makes your teaching better.

Apart from that, there are many other awesome features of Microsoft teams that you can get benefited from. If you want to take my online course online, I will highly recommend Microsoft Teams.
