Bioidentical hormone replacement therapy (BHRT) may offer relief for many common and debilitating symptoms that are often overlooked by medical providers. Some of these symptoms include exhaustion, stress, foggy thinking, weight gain, sleep disturbances, and so much more. Often, people with symptoms like these are suffering from hormonal imbalance. These ailments may be managed by getting to the root cause of these complex conditions and returning the patient to a state of hormone balance. BHRT may be a simple method for correcting these complex issues through hormone optimization.
