Clenbuterol Sopharma (0.02 mg / tab) 100 tabs. Description and Uses. Clenbuterol is a well-known and powerful orally taken bronchodilator (an agent used to widen the airway) belongs to the class of drugs known as sympathomimetic. It is known to imitate the activity of adrenaline and noradrenaline.

The reason you can't stick to it is pretty simple and has nothing to do with your willpower or motivation. You probably need a VERY different approach, a better understanding of food and balance, lots of mindset work, and strategies that are formulated specifically for YOU and YOUR life.
