*"First they came for the socialists, and I did not speak out— Because I was not a socialist. Then they came for the trade unionists, and I did not speak out— Because I was not a trade unionist. Then they came for the Jews, and I did not speak out— Because I was not a Jew. Then they came for me—and there was no one left to speak for me." - Pastor Martin Niemöller*

### WHY DO THEY USE VOICE-TO-SKULL?

- 1.) TO COLLECT INFORMATION FROM VICTIMS MINDS (BY TALKING AND RETRIEVING INFORMATION TELEPATHICALLY).
- 2.) COVERING VOICE-TO-SKULL TRAFFICKING (TALKING IN VICTIMS HEAD TO COVER HUMAN TRAFFICKING WITH VOICE-TO-SKULL). SOUNDS COVER OTHER SOUNDS.
- 3.) CONFUSE VICTIMS.
- 4.) TO DISTRACT VICTIMS.
- 5.) TO IMPERSONATE VICTIMS (SPEAKING FOR VICTIMS).
- 6.) TO MAKE VICTIMS LOCK MENTALLY ILL.
- 7.) TO BLACKMAIL & THREATEN VICTIMS (EXTORTION).

I am enslaved body and mind and a former member of the Oregon State Board of Higher Education and a descendant of slavery and central bank opposing Union General and U.S. President, Rutherford B. Hayes. The best militaries are least often used, both in terms of ultimate nuclear devastation and peace times being preferable to constant war. However, I am secretly, sadistically remotely tortured multiple times a minute on average since 2004, day and night, by lawless, hidden, inhumane traitors, cons, cowards, parasites, evil mind control addicts and worse. The farther governing is taken from the governed, the more chance for evil. Centralized, corrupt

spying and policing powers the U.S. Constitutional Republic was designed against split Germany in two and decomposed the U.S.S.R. Are we next?

Advancements since WWII have expanded a pandemic of deceptive "technologically astral projecting" capable, torturous, criminal networks comparable to more advanced Nazis preying on Jewish ghettos. A bio-hazard of unconstitutional tech enabled sociopaths, narcissists and psychopaths - id driven, ego focused and lacking superego functionality - prolong cruel and unusual punishments here, and overseas that we Targeted Individuals (T.I) call "perps". My suffering and that of 1.5-2 million U.S. citizens of our 347 million is mental illness, crimes against creation itself, a feast for pure evil and purposefully carried out by criminal perpetrator gangs in secret. I filed an affidavit with fellow Targeted Individual Dr. Kathryn Horton of <http://www.stop007.org> and will take steps to reclaim my body and mind, from advanced human traffickers using the same Brain Computer Interface (B.C.I.) hardware being used to remotely torture me now, exposed by T.I Kevin Christian of Georgia, justified similarly to U.S. Constitutional rights to firearms for personal protection. This B.C.I. equipment can be purchased for about \$1,600, here: [www.openbci.com](http://www.openbci.com). The perps attacking Kevin, are no better than the evil, ruthless perps attacking me.

Correct equipment not found yet, two way EEG BOT - EEG Transducer.

I am in the 1/3 of mental illness patients who hear voices and see what others do not that do not respond to medications, because I am being remote tortured by terrorists, human traffickers and extreme criminals, otherwise known as perps. Torture does not make anyone any safer, and that's a fact. I suspect the perps human trafficking me now, of white supremacy affiliations here in the U.S.A. based on who they try to frame for their ongoing crimes. Unwinnable odds are the plight of the American T.I., slow killed and betrayed. Women, children and the elderly not being spare; crimes of the worst kind. Neuro Linguistic Programming (N.L.P.), Voice to Skull (V2K), Image to Skull (I2K) abuses and Synthetic Telepathy crimes are not protected speech, an understatement. These crimes against creation amount to real hells that perps have no right to create, globally, but have and for longer than I know. My family has been attacked and from good cops, to good, stand-up military professionals, to excellent political dissidents and even old people and girls as young as 12, we T.I. are being unlawfully targeted for torture and all kinds of slavery including sexual slavery, life destruction, engénics and other evils against T.I. who are often really good people, moral and courageous against evil. Disastrously, many of us T.I. are so mislead we still think the tortures done to us by "technologically astral projection" capable criminal perps, are only mental illness. It's both organized crime and mental illness what is done to us T.I., simply stated. I was almost killed by these perp gangs in 2016; implants in our bodies and other tortures are being used to drive suicides. Historically patterns like these perp gangs often result in nation collapse. The way perps use computing are in some ways, less forgiving than nuclear weapons. Perps make me three kinds of mad some days, they are so many types of evil it takes over an hour and a half to define how evil perps are.

Within thirty years, we will have the technological means to create superhuman intelligence. Shortly after, the human era will be ended.

Vernor Vinge - *Technological Singularity*, 1993

### THE TRANSHUMANISM PANDEMIC:

Will we there, people, we take on a new status or a new depth... the virtuality of the overuse... the virtuality of the overuse... the virtuality of the overuse...

THE TRANSHUMANISM PANDEMIC: SUB-HUMANITY'S RESSONANCE... THE TRANSHUMANISM PANDEMIC: SUB-HUMANITY'S RESSONANCE...

AARON E. MCCOLLUM

THE TRANSHUMANISM PANDEMIC: SUB-HUMANITY'S RESSONANCE... THE TRANSHUMANISM PANDEMIC: SUB-HUMANITY'S RESSONANCE...

THE TRANSHUMANISM PANDEMIC: SUB-HUMANITY'S RESSONANCE... THE TRANSHUMANISM PANDEMIC: SUB-HUMANITY'S RESSONANCE...

Further, I have observed B.C.I., cyber-genetic terrorists and tortures separate their consciousnesses from their real human bodies alive while using B.C.I hardware and have concluded life after death, and the curse of eternal life, is that much more likely. The suffering of this life is very real, even in a billions to one calculated to be virtual reality universe; a figure arrived at by Elon Musk based on computer science and the dangerous, deceptive V.R. capabilities of today from where civilization was with the first video game "Pong" after receiving a Tweet on the subject from yours truly. The library of Alexandria didn't have those numbers. Christian and other teachings that we live in a "creation" have been correct all along, and math now proves it. I'm a tortured T.I. and I am an aspiring Buddhist Arhat, not a Bodhisattva.

The future is an illusion and the past a lie we are told; history is written by the victor however there are discernible patterns. I happened to read the books and am smart, well-educated and a little wiser. Myself, others recommend corroborated info on Black Swiss Cheese Hole Portals in space around the solar system, passing on the "life review" and forced reincarnation white or other colors "tunnel of light" associated with the moon. The tunnel of light is reportedly a hologram, and EVIL suction system, that can fake any deity, loved and/or trusted person and read our minds to mislead us into unholy reincarnation that one must turn away from and "think/move" our way away from into space, IMMEDIATELY after death. Never before senses of love, about a magnitude more used to possibly cloud decision-making at moments of death, I have experienced alive and can be achieved with B.C.I computer code and are, concepts applied, the closest thing to Heaven on Earth for humans. All humans should have access to B.C.I Nirvana in our bodies and minds with C++ like computer language of B.C.I computer code for magnitudes increases of the love feeling.

I'm a slave, and so are you but I am more so than most. I do not want to incarnate here, again. You may want to do that, also. An evatuce may want to visit discarnate civilizations of the Orion Nebula or seek out older, more advanced civilizations towards the center of our Milky Way Galaxy in the direction of the Sagittarius Constellation, even if there are no Black Swiss Cheese Hole Portals around the solar system after death. The suns closer to the center of our galaxy, and planets that orbit them, having formed much earlier than our young sun, may be the best hope in seeking ultimate freedom from incarnation and suffering in a now mathematically proven to be, virtual reality universe. Consciousness body-less is suspected to be similar to the dream/nightmare state of mind we experience alive. Lastly, may all sentient beings find freedom from rebirth and suffering, at some definitive moment that lasts forever. #ScoDucks.

For further research I recommend Targeted Individuals found on YouTube, Twitter and elsewhere like Ramona D., Todd Giffen, Project Camelot's Kerry Cassidy, David Icke, John Lear, Kevin Christian of Georgia on YouTube, James Lyco, David Wilcox, Timothy Trespass, Richard Bruce, Wes Penre, Deep Thought News, Dr. Kathryn Horton, Project Avalon, Phillip Walker, the Zeitgeist Movies, the documentary "Seattle is Dying," and the movies "Wormwood," "They Live" and "Gaslight." Also, I recommend myself for reference on hard to know research areas such as Targeted Individuals, Perps, and sinister plots to steal the world's brains but know even though I try to always tell the truth, I get lied to and repeat the lies I am told, no knowing they are lies. I also recommend The Age of Surveillance Capitalism: The Fight for a Human Future at the New Frontier of Power by Shoshana Zuboff, Guinea Pigs: Technologies of Control by John Hall, Project: Soul Catcher: Secrets of Cyber and Cybernetic Warfare Revealed by Robert Duncan, Aaron E. McCollum's The Transhuman Pandemic: Sub-Humanity's Messiah, Humanities

Annihilation, The Art of War by Sun Tzu I recommend to all T.I., and all other members of the public concerned for us and themselves against perps. In a system where human suffering is the currency, our pain the enjoyment of too many others and other Dark Journalism topics that may figuratively peel the paint off your walls, seeking out and sharing Targeted Individual information may also help you survive. As an aware truth-er T.I. still being lied to like we all are sadly, I want you to know your way to evacuate and how to, after death, if it turns out we are all cursed with eternal life, which I suspect is the case for all 7 billion of us. As for mind control and mind control addiction, in the old west we handled the opium problem by killing all the opium den addicts, and dealers. What is being done to 40 million of us T.I. by about 100 million perps of the 7 billion of us, is galactic crime and so very evil. I can't emphasize that enough, the evil of perping.

Sincerely,

\*Federal Gov. says it can't be sued for torture, enslavement & these many crimes - (April 1, 2021)

# 4 Noble Truths

Praise → Buddha

8 5 1 1 P 4 L

...the century of the brain and the mind. The technologies that have advanced, under  
of secrecy and national security, now have the power to either enslave us or free us to  
gher potentials. These technologies will impact our consciousness itself and as a result  
re an invigorated public debate, in the light of day. At the same time, there is hope and  
possibility in these areas of science. The first part of this book deals with the sinister side  
**Controlling the Human Mind** with the second part exploring the possibilities that are  
ging with new brain and mind enhancing technologies. The greatest threats and the  
est possibilities reside within the core of who we are and what happens in the center of  
inds, the seat of our souls.

best deterrent that we have against  
of terrorism is to find out who is  
ping, who has the material, where  
are getting it, who they are talking to,  
are their plans. In order to do that, in  
r to interdict the terrorists before they  
ff their weapon, you have to have that  
of intelligence-gathering capability but  
ins smack into our constitutional  
ctions of privacy. And it's a tension  
h will continue to exist in every free  
ety - the reconciliation of the need for  
ty and the need for law and order.... that  
e these weapons start to be exploded  
lex will say, 'Protect us. We're willing to  
up some of our liberties and some of  
freedoms, but you must protect us.'  
that is what will lead us into this 21st  
ury, this kind of Constitutional tension  
ow much protection can we provide and  
preserve essential liberties."

## The Technologies of Political Control

### or

## Tools for Peak Performance

ISBN: 1-890693-64-5

Dr. Nick Begich

## PUBLIC SERVICE ANNOUNCEMENT

New forms of crime, commonly referred to as organized/contracted/predatory stalking, electronic harassment, hacking and/or illegal surveillance are rapidly growing. These crimes are not being addressed or counteracted by current law enforcement practices, existing legislation, or government policies.

### **WHO:**

Victims of these covert harassment crimes include countless law-abiding citizens of all races and religions, as well as vulnerable populations: such as disabled, institutionalized, and elderly people. Many of these people are more than likely, just like you.

### **WHAT:**

These crimes are orchestrated campaigns of intimidation, control, and harassment, similar to the Cointel tactics used by intel agencies. Another tactic is through the use of advanced technology: modulated microwave radio-frequency, wireless technology that can harm people both physically and emotionally, from a distance or in close proximity. Resulting in many often painful physiological side-effects. The disrupting of natural thinking, concussions (such as the effects of the well-documented Cuban Embassy workers that have been covered by the majority of the mainstream news outlets), impaired bodily functions, and long-term health problems. Surveillance abuse typically, but is not limited to, the abuse of IP surveillance cameras and other devices connected to the internet of things. The (IoT) are often advertised on the darknets, or parts of the internet that are available through specialized anonymity-protecting tools. In addition, many people report home break-ins, theft, and workplace harassment.

### **WHY:**

To inflict pain and suffering onto singled-out individuals by the use of long-term harassment campaigns, carried out by well-organized harassment networks, private/public sectors, contractors, and individuals whose victims live in every state of our country and the world at large. These entities may also hire private security firms to carry out the crimes listed. An example would be when Harvey Weinstein hired Black Cube to coerce, and threaten people into silence. Other reasons include, but are not limited to, retaliation/revenge, coercion, control and possible weapons testing. Some attacks may be orchestrated by entities outside of America. Many are uncertain as to why they are being targeted even after careful consideration. The most obvious reason why these particular crimes are being committed is because they leave little, or no evidence.

### **HOW TO HELP: Aims and Demands**

1. To raise awareness about the above-mentioned crimes. The perpetrators of these crimes are being allowed to act with complete impunity as a result, the crimes are guaranteed to continue growing in prevalence. You can participate in educating the public through discussions, and meaningful outreach.
2. To demand change, by creating laws. This can be done by contacting your legislators and representatives. Law enforcement needs re-education, and needs to take the claims reported by victims seriously. Currently, a percentage of victims are being dismissed. Worse yet, some legitimate victims risk being placed on 5150 psychiatric holds, just for reporting these crimes to law enforcement, since the crimes are difficult to explain and to comprehend. The United Nations has taken a strong interest in these crimes, have posted letters of victims and associated organizations on their website and are reported to be investigating these growing crimes, which is a step in the right direction: Professor Nils Melzer 21 June 2020 Special Rapporteur on Torture and Other Cruel, Inhuman, or Degrading Treatment or Punish **It is time to address the crimes at hand before these crimes become too overwhelming to address. Otherwise, you, or your loved ones, could be next.**

paper will address only the prospect of physical regulation of biological processes using electromagnetic fields.

Prior to the mid-21st century, there will be a virtual explosion of knowledge in the field of neuroscience. We will have achieved a clear understanding of how the human brain works, how it really controls the various functions of the body, and how it can be manipulated (both positively and negatively). One can envision the development of electromagnetic energy sources, the output of which can be pulsed, shaped, and focused, that can couple with the human body in a fashion that will allow one to prevent voluntary muscular movements, control emotions (and thus actions), produce sleep, transmit suggestions, interfere with both short-term and long-term memory, produce an experience set, and delete an experience set. This will open the door for the development of some novel capabilities that can be used in armed conflict, in terrorist/hostage situations, and in training. New weapons that offer the opportunity of control of an adversary without resorting to a lethal situation or to collateral casualties can be developed around this concept. This would offer significant improvements in the capabilities of our special operation forces. Initial experimentation should be focused on the interaction of electromagnetic energy and the neuromuscular junctions involved in voluntary muscle control. Theories need to be developed, modeled, and tested in experimental preparations. Early testing using in vitro cell cultures of neural networks could provide the focus for more definitive intact animal testing. If successful, one could envision a weapon that would render an opponent incapable of taking any meaningful action involving any higher motor skills, (e.g. using weapons, operating tracking systems). The prospect of a weapon to accomplish this when targeted against an individual target

is reasonable; the prospect of a weapon effective against a massed force would seem to be more remote. Use of such a device in an enclosed area against multiple targets (hostage situation) may be more difficult than an individual target system, but probably feasible.

It would also appear to be possible to create high fidelity speech in the human body, raising the possibility of covert suggestion and psychological direction. When a high power microwave pulse in the gigahertz range strikes the human body, a very small temperature perturbation occurs. This is associated with a sudden expansion of the slightly heated tissue. This expansion is fast enough to produce an acoustic wave. If a pulse stream is used, it should be possible to create an internal acoustic field in the 5-15 kilohertz range, which is audible. Thus, it may be possible to 'talk' to selected adversaries in a fashion that would be most disturbing to them.

*[Handwritten signatures and initials]*

In comparison to the discussion in the paragraphs above, the concept of imprinting an experience set is highly speculative, but nonetheless, highly exciting. Modern electromagnetic scattering theory raises the prospect that ultra short pulse scattering through the human brain can result in reflected signals that can be used to construct a reliable estimate of the degree of central nervous system arousal. The concept behind this 'remote BHG' is to scatter off of action potentials or ensembles of action potentials in major central nervous system tracts. Assuming we will understand how our skills are imprinted and recalled, it might be possible to take this concept one step further and duplicate the experience set in another individual. The prospect of providing a 'been there - done that' knowledge base could provide a revolutionary change in our approach to specialized training. How this can be done or even if it

of those with borderline personality disorder have experienced physical or sexual abuse or observed some kind of extreme violence. Other theories implicate early interactions with caretakers. Clients with borderline personality disorder may have had caretakers who did not accept them or who were unreliable or unavailable. The constant rejection and criticism made it difficult for the individuals to learn to regulate emotions and understand emotional reactions to events (Linehan, 1987). An alternative theory is that caregivers encouraged dependence, preventing the individuals in their charge from adequately developing a sense of self. As a result, the individuals became overly sensitive to others' reactions. If rejected by others, they reject themselves.

### Antisocial Personality Disorder Is Associated with a Lack of Empathy

In the 1800s, the term *psychopath* was coined to describe people who seem willing to take advantage of and to hurt others without any evidence of concern or of remorse (Koch, 1891). In his classic book *The Mask of Sanity* (1941), the psychiatrist Hervey Cleckley described characteristics of psychopaths from his clinical experience. For example, such individuals could be superficially charming and rational; be insincere, unsocial, and incapable of love; lack insight; and be shameless. In 1980, the *DSM* dropped the label *psychopath*, which was seen as pejorative, and adopted the term antisocial personality disorder (APD). This change has led to confusion because *psychopath* is still widely used to refer to a related but not identical type of personality disorder as defined by *DSM-5*.

APD is the catchall diagnosis for individuals who behave in socially undesirable ways, such as breaking the law, being deceitful and irresponsible, and feeling a lack of remorse for their behavior. People with this disorder tend to be hedonistic, seeking immediate gratification of wants and needs without any thought of others.

True psychopaths display more extreme behaviors than those with APD. They also tend to have other personality characteristics not found in those with APD, such as glibness, a grandiose sense of self-worth, shallow affect, and cunning/manipulativeness. Psychopaths would be classified as APD under *DSM-5*, but they are an extreme version of the disorder. Psychopaths are pathological in their degree of callousness and are particularly dangerous. For instance, one study of murderers found that those with psychopathic tendencies nearly always kill intentionally. They want to gain something, such as money, sex, or drugs. People without psychopathic tendencies are much more likely to commit murder impulsively, when provoked or angry (Woodworth & Porter, 2002). Psychopaths fit the stereotype of cold-blooded killers. Infamous examples include Dennis Rader—the BTK strangler, who bound, tortured, and killed 10 victims—and Gary Gilmore (FIGURE 14.28). In 1977, Gilmore was executed for the murder he describes here:

I went in and told the guy to give me the money. I told him to lay on the floor and then I shot him. I then walked out and was carrying the cash drawer with me. I took the money and threw the cash drawer in a bush and I tried to push the gun in the bush, too. But as I was pushing it in the bush, it went off and that's how come I was shot in the arm. It seems like things have always gone bad for me. It seems like I've always done dumb things that just caused trouble for me. I remember when I was a boy I would feel like I had to do things like sit on a railroad track until just before the train came and then I would dash off. Or I would put my finger over the end of a BB gun and pull the trigger to see if a BB was really in it. Sometimes I would stick my finger in water and then put my finger in a light socket to see if it would really shock me. (Spitzer et al., 1983, pp. 66–68)

### antisocial personality disorder (APD)

A personality disorder in which people engage in socially undesirable behavior, are hedonistic and impulsive, and lack empathy.

A.P.D. = D.I.X.Z  
A.P.D. Dickzi

FIGURE 14.28 Gary Gilmore After His Arrest Under *DSM-5*, Gilmore would have been given a diagnosis of antisocial personality disorder. He also showed psychopathic traits.

**ASSESSMENT AND CONSEQUENCES** It is estimated that 1–4 percent of the population have antisocial personality disorder (Compton, Conway, Stinson, Colliver, & Grant, 2005). People with this condition who also show more-extreme psychopathic traits are less common (Lenzenweger et al., 2007). Both APD and psychopathy are much more common in men than in women (Robins & Regier, 1991).

Much of what psychologists know about the traits associated with antisocial personality disorder was discovered by the psychologist Robert Hare (1993). Hare also developed many of the assessment tools to identify people with psychopathic tendencies. He and colleagues have shown that the disorder (including its extreme version) is most apparent in late adolescence and early adulthood, and it generally improves around age 40 (Hare, McPherson, & Forth, 1988), at least for those without psychopathic traits. According to the *DSM-5* diagnostic criteria, APD cannot be diagnosed before age 18, but the person must have displayed antisocial conduct before age 15. This stipulation ensures that only those with a lifetime history of antisocial behaviors can be diagnosed with antisocial personality disorder. They also must meet other criteria, such as repeatedly performing illegal acts, repeatedly lying or using aliases, and showing reckless disregard for their own safety or the safety of others. Because many such individuals are quite bright and highly verbal, they can talk their way out of bad situations. In any event, punishment seems to have very little effect on them (Lykken, 1957, 1995), and they often repeat the problem behaviors a short time later.

Perhaps as many as 50 percent of prison inmates meet the criteria for antisocial personality disorder (Hare, 1993; Widiger & Corbitt, 1995). Because of the prevalence of the disorder in the prison population, much of the research on APD has been conducted in this setting. One researcher, however, came up with an ingenious way of finding research participants outside of prison. She put the following advertisement in a counterculture newspaper: "Wanted: charming, aggressive, carefree people who are impulsively irresponsible but are good at handling people and at looking after number one. Send name, address, phone, and short biography proving how interesting you are to . . ." (Widom, 1978, p. 72). Seventy-three people responded, and about one-third of them met the criteria for antisocial personality disorder. These individuals were then interviewed and given a battery of psychological tests. Their characteristics proved very similar to those of prisoners diagnosed with APD, except that the group responding to the ad had avoided imprisonment. Indeed, these findings fit Cleckley's view of people with psychopathic traits as often being charming and intelligent. Lacking remorse, willing to lie or cheat, and lacking empathy, some psychopaths manage to be successful professionals and to elude detection for crimes they may commit. Their psychopathic traits may even provide advantages in some occupations, such as business and politics (FIGURE 14.29).

**FIGURE 14.29**  
**American Psychopath**  
 In the 2000 movie *American Psycho*, Christian Bale plays Patrick Bateman, who appears to be a suave man-about-town, a successful professional, and a serial killer. The movie, like the Bret Easton Ellis novel it is based on, raises questions about the connections between a slick presentation of self, a knack for making and spending money, and psychopathy.

**THE ETIOLOGY OF ANTISOCIAL PERSONALITY DISORDER** Various physiological abnormalities may play a role in antisocial personality disorder. In 1957, David Lykken reported that true psychopaths do not become anxious when they are subjected to aversive stimuli. He and other investigators have continued this line of work, showing that such individuals do not seem to feel fear or anxiety (Lykken, 1995).

Electroencephalogram (EEG) examinations have demonstrated that criminals who meet the criteria for antisocial personality disorder have slower alpha-wave activity (Raine, 1989). This finding indicates a lower overall level of arousal. It is possible that low arousal prompts people with APD to engage in sensation-seeking behavior. In addition, because of low arousal, these individuals do not learn from punishment because they do not experience punishment as particularly aversive. This pattern of reduced psychophysiological response in the face of punishment also occurs in adolescents at risk for developing psychopathy (Frick et al., 2005).

There is also evidence of amygdala abnormalities in those with antisocial tendencies, such as having a smaller amygdala and being less responsive to negative stimuli (Blair, 2003; Marsh et al., 2011). Deficits in frontal lobe functioning have also been found and may account for the lack of forethought and the inability to consider the implications of actions, both characteristic of antisocial personality disorder (Seguin, 2004).

Genetic and environmental factors appear to play roles in antisocial personality disorder. Genetics may be more important for the extreme psychopathic version, however. Identical twins have a higher concordance rate for criminal behavior than fraternal twins do (Lykken, 1995), although the research just cited did not rule out the role of a shared environment. A study of 14,000 adoptions found that adopted male children have a higher rate of crime if their biological fathers have criminal records (Mednick, Gabrielli, & Hutchings, 1987). In addition, the greater the criminal record of the biological father, the more likely it is that the adopted son will engage in criminal behavior.

Although genes may be at the root of antisocial behaviors and psychopathy, factors such as low socioeconomic status, dysfunctional families, and childhood abuse may also be important. Indeed, malnutrition at age 3 has been found to predict antisocial behavior at age 17 (Liu, Raine, Venables, & Mednick, 2004). An enrichment program for children that included a structured nutrition component was associated with less criminal and antisocial behavior 20 years later (Raine, Mellingen, Liu, Venables, & Mednick, 2003). This finding raises the possibility that malnutrition or other, similar environmental factors might contribute to the development of antisocial personality disorder.

## Summing Up

### What Are Personality Disorders?

- Ten personality disorders, clustered in three groups, are identified in the *DSM*: paranoid, schizoid, schizotypal (odd or eccentric cluster), histrionic, narcissistic, borderline, antisocial (dramatic, emotional, or erratic cluster), and avoidant, dependent, obsessive-compulsive (anxious or fearful cluster).
- Borderline personality disorder is characterized by disturbances in identity, in affect, and in impulse control.
- Research has shown that people with borderline personality disorder often have diminished frontal lobe capacity, low levels of serotonin, and a history of abuse or rejection by caregivers.
- Those with antisocial personality disorder engage in socially undesirable behavior, are hedonistic and impulsive, and lack empathy. Psychopaths have an extreme version of APD.
- Antisocial personality disorder is associated with lower levels of arousal, a smaller amygdala, and deficits in frontal lobe functioning.
- Twin and adoption studies suggest that genes play a role in antisocial personality disorder. However, environmental factors (such as low socioeconomic status, dysfunctional families, abuse, and malnutrition) also contribute to the development of this disorder.

## Measuring Up

1. Which of the following characteristics are *DSM-5* diagnostic criteria of borderline personality disorder?
  - a. frantic efforts to avoid real or imagined abandonment
  - b. a pattern of unstable and intense relationships
  - c. a lack of guilt or remorse

## TIP Skills: Changing Your Body Chemistry

To reduce extreme emotion mind *fast*.

Remember these as TIP skills:

**T**

**TIP THE TEMPERATURE** of your face with **COLD WATER\***  
(to calm down fast)

- Holding your breath, put your face in a bowl of cold water, or hold a cold pack (or zip-lock bag of cold water) on your eyes and cheeks.
- Hold for 30 seconds. Keep water above 50°F.

**I**

**INTENSE EXERCISE\***  
(to calm down your body when it is revved up by emotion)

- Engage in intense exercise, if only for a short while.
- Expend your body's stored up physical energy by running, walking fast, jumping, playing basketball, lifting weights, etc.

**P**

**PACED BREATHING**  
(pace your breathing by slowing it down)

- Breathe deeply into your belly.
- Slow your pace of inhaling and exhaling way down (on average, five to six breaths per minute).
- Breathe *out* more slowly than you breathe *in* (for example, 5 seconds in and 7 seconds out).

**PAIRED MUSCLE RELAXATION**  
(to calm down by pairing muscle relaxation with breathing out)

- While breathing into your belly deeply tense your body muscles (*not* so much as to cause a cramp).
- Notice the tension in your body.
- While breathing out, say the word "Relax" in your mind.
- Let go of the tension.
- Notice the difference in your body.

\*Caution: Very cold water decreases your heart rate rapidly. Intense exercise will increase heart rate. Consult your health care provider before using these skills if you have a heart or medical condition, a lowered base heart rate due to medications, take a beta-blocker, are allergic to cold, or have an eating disorder.

# THE AMENDMENTS TO THE CONSTITUTION OF THE UNITED STATES AS RATIFIED BY THE STATES

## *Preamble to the Bill of Rights*

CONGRESS OF THE UNITED STATES  
BEGUN AND HELD AT THE CITY OF NEW-YORK, ON  
WEDNESDAY THE FOURTH OF MARCH,  
ONE THOUSAND SEVEN HUNDRED AND EIGHTY NINE

THE Conventions of a number of the States, having at the time of their adopting the Constitution, expressed a desire, in order to prevent misconstruction or abuse of its powers, that further declaratory and restrictive clauses should be added: And as extending the ground of public confidence in the Government, will best ensure the beneficent ends of its institution.

RESOLVED by the Senate and House of Representatives of the United States of America, in Congress assembled, two thirds of both Houses concurring, that the following Articles be proposed to the Legislatures of the several States, as amendments to the Constitution of the United States, all, or any of which Articles, when ratified by three fourths of the said Legislatures, to be valid to all intents and purposes, as part of the said Constitution; viz.

ARTICLES in addition to, and Amendment of the Constitution of the United States of America, proposed by Congress, and ratified by the Legislatures of the several States, pursuant to the fifth Article of the original Constitution.

(Note: The first 10 amendments to the Constitution were ratified December 15, 1791, and form what is known as the "Bill of Rights.")

## *Amendment I*

Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press, or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances.

## *Amendment II*

A well regulated Militia, being necessary to the security of a free State, the right of the people to keep and bear Arms, shall not be infringed.

## *Amendment III*

No Soldier shall, in time of peace be quartered in any house, without the consent of the Owner, nor in time of war, but in a manner to be prescribed by law.

## *Amendment IV*

The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no Warrants shall issue, but upon probable cause, supported by Oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized.

## *Amendment V*

No person shall be held to answer for a capital, or otherwise infamous crime, unless on a presentment or indictment of a Grand Jury, except in cases arising in the land or naval forces, or in the Militia, when in actual service in time of War or public danger; nor shall any person be subject for the same offence to be twice put in jeopardy of life or limb; nor shall be compelled in any criminal case to be a witness against himself, nor be deprived of life, liberty, or property, without due process of law; nor shall private property be taken for public use, without just compensation.

### Amendment VI.

In all criminal prosecutions, the accused shall enjoy the right to a speedy and public trial, by an impartial jury of the State and district wherein the crime shall have been committed, which district shall have been previously ascertained by law, and to be informed of the nature and cause of the accusation; to be confronted with the witnesses against him; to have compulsory process for obtaining witnesses in his favor, and to have the Assistance of Counsel for his defence.

### Amendment XII.

Passed by Congress December 9, 1803. Ratified June 15, 1804.  
(Note: A portion of Article II, Section 1 of the Constitution was changed by the 12th Amendment.)

The Electors shall meet in their respective states, and vote by ballot for President and Vice-President, one of whom, at least, shall not be an inhabitant of the same state with themselves; they shall name in their ballots the person voted for as President, and in distinct ballots the person voted for as Vice-President, and they shall make distinct lists of all persons voted for as President, and of all persons voted for as Vice-President, and of the number of votes for each, which lists they shall sign and certify, and transmit sealed to the seat of the government of the United States, directed to the President of the Senate; the President of the Senate shall, in the presence of the Senate and House of Representatives, open all the certificates and the votes shall then be counted; The person having the greatest number of votes for President, shall be the President, if such number be a majority of the whole number of Electors appointed; and if no person have such majority, then from the persons having the highest numbers not exceeding three on the list of those voted for as President, the House of Representatives shall choose immediately, by ballot, the President. But in choosing the President, the votes shall be taken by states, the representation from each state having one vote; a quorum for this purpose shall consist of a member or members from two-thirds of the states, and a majority of all the states shall be necessary to a choice. [And if the House of Representatives shall not choose a President whenever the right of choice shall devolve upon them, before the fourth day of March next following, then the Vice-President shall act as President, as in case of the death or other constitutional disability of the President.]\* The person having the greatest number of votes as Vice-President, shall be the Vice-President, if such number be a majority of the whole number of Electors appointed, and if no person have a majority, then from the two highest numbers on the list, the Senate shall choose the Vice-President; a quorum for the purpose shall consist of two-thirds of the whole number of Senators, and a majority of the whole number shall be necessary to a choice. But no person constitutionally ineligible to the office of President shall be eligible to that of Vice-President of the United States.

\*Superseded by Section 3 of the 20th Amendment

### Amendment VII.

In suits at common law, where the value in controversy shall exceed twenty dollars, the right of trial by jury shall be preserved, and no fact tried by a jury shall be otherwise re-examined in any Court of the United States, than according to the rules of the common law.

### Amendment VIII.

Excessive bail shall not be required, nor excessive fines imposed, nor cruel and unusual punishments inflicted.

### Amendment IX.

The enumeration in the Constitution, of certain rights, shall not be construed to deny or disparage others retained by the people.

### Amendment X.

The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people.

### AMENDMENTS 11-27

### Amendment XI.

Passed by Congress March 4, 1794. Ratified February 7, 1795.  
(Note: A portion of Article III, Section 2 of the Constitution was modified by the 11th Amendment.)

The Judicial power of the United States shall not be construed to extend to any suit in law or equity, commenced or prosecuted against one of the United States by Citizens of another State, or by Citizens or Subjects of any Foreign State.

By JEFF PEGUES, SARA COOK CBS NEWS May 1, 2021, 7:09 AM  
U.S. investigates suspected energy attack near White House

Last Updated May 1, 2021 11:55 AM EDT

Law enforcement agencies are investigating two possible directed energy attacks on government employees on U.S. soil.

One of the suspected energy attacks occurred on the south side of the White House in November, and is believed to have sickened a White House aide. That incident followed a similar one in 2019 in a Virginia suburb which reportedly injured an aide walking her dog.

The alleged victims' conditions are not known, but the White House confirmed that President Biden has been briefed on one of the incidents. Senators are demanding answers on the mystery attacks.

"There are personnel who have been harmed. We need to make sure they get the care and benefits they need," New Hampshire Senator Jeanne Shaheen said.

Director of National Intelligence Avril Haines said leaders are focused on the "critically important" issue.

But officials say it's too early to tell what happened. In the past, the National Security Agency has described an energy attack as a "high-powered microwave system weapon" that can "bathe a target's living quarters in microwaves" and "kill an enemy over time and without leaving evidence."

Energy attacks were suspected in Cuba and China in the past few years as U.S. personnel reported symptoms of ear popping, pounding headaches and nausea. The symptoms have been referred to as the "Havana Syndrome."

Sources tell CBS News there have been energy-directed attacks on U.S. personnel on multiple continents. While Russia is considered a main suspect, U.S. officials are currently skeptical that Moscow would have carried out an attack just steps from the White House.

Catherine Werner, who worked for the Department of Commerce in China, told "60 Minutes" about her experience.

"I woke up in the middle of the night," Werner said. "I could feel this sound in my head. It was intense pressure on both of my temples. At the same time, I heard this low humming sound, and it was oscillating. And I remember looking around for where this sound was coming from, because it was painful."

Olivia Gazis contributed to this report.

Simple D.E.W. solution, go after the manufacturers.

UNITED STATES DISTRICT COURT  
DISTRICT OF OREGON

JEFFREY EDWARD TAYLOR,  
aka TIMOTHY DARRELL YOUNG,

Case No. 3:21-cv-00199-AA

Plaintiff,

ORDER OF DISMISSAL

v.

UNITED STATES OF AMERICA;  
FEDERAL GOVERNMENT,

Defendants.

---

AIKEN, District Judge:

Plaintiff, appearing pro se, files this action against the federal government and numerous agencies. Plaintiff did not pay the filing fee, and an action may proceed without prepayment of the filing fee only upon a completed application to proceed in forma pauperis (IFP). Nevertheless, the attachments to plaintiff's motion for appointment of counsel show that he is unable to afford prepayment of the fees for this action, and the Court authorizes IFP status.

Federal law authorizes federal courts to review cases filed in forma pauperis to determine if the action (i) is frivolous or malicious; (ii) fails to state a claim on which relief may be granted;

2 b

or (iii) seeks monetary relief against a defendant who is immune from such relief. *See* 28 U.S.C. § 1915(e)(2)(B). The court must construe pro se pleadings liberally and afford the plaintiff “the benefit of any doubt.” *Hebbe v. Pliler*, 627 F.3d 338, 342 (9th Cir. 2010) (citation omitted). “Unless it is absolutely clear that no amendment can cure” defects in the complaint, “a pro se litigant is entitled to notice of the complaint’s deficiencies and an opportunity to amend prior to dismissal of the action.” *Lucas v. Dep’t of Corr.*, 66 F.3d 245, 248 (9th Cir. 1995) (per curiam).

Plaintiff sues the federal government, which has sovereign immunity and is generally immune from suit. Moreover, plaintiff’s allegations are largely incomprehensible, and the Court is unable to discern an actual claim arising from any specific conduct. Dismissal of this action is appropriate because plaintiff’s claims describe “fantastic or delusional scenarios,” and any amendment would be futile. *Neitzke v. Williams*, 490 U.S. 319, 328 (1989).

CONCLUSION

Plaintiff fails to state a viable claim for relief and amendment would be futile. Accordingly, this action is DISMISSED and all pending motions are DENIED as moot.

DATED this 1st day of April, 2021.

/s/Ann Aiken  
Ann Aiken  
United States District Judge

Timothy Darrell Young, B.S., M.P.A.  
Care of: Jeff Ed Taylor  
Oregon State Hospital (Bird 3)  
2600 Center St. NE  
Salem, OR 97301

To Whom It May Concern,

According to the Mayo Clinic, the Covid-19 virus can live 24 hours on cardboard, 3 days on stainless steel and plastic and Covid-19 can live 3 hours in the air. Beyond colds, the flu and other saliva and air droplet transmissible human diseases, Covid-19 does present a significant risk to public health. Thus, I am writing to urge the purchase and use of saliva free envelopes for mail-in Oregon ballots, now and for every election.

For \$40.88, 500 safer for public health "pull tab envelopes" can be purchased at [www.staples.com](http://www.staples.com). This price was quoted this June 30<sup>th</sup>, 2020 for envelopes that do not require saliva to seal. The cheaper, more risky to human life, "lick envelopes" the same retailer sold for \$20.13 for 500 quoted at the same. For public health benefit, Oregon always using safer "pull tab envelopes" for our ballot envelopes is a matter of good public policy for citizens, and for some of the most important documents in our democracy next to our Constitutions, our ballots for voting. I hope you will agree.

The Deputy Director of Elections for the current Secretary of State's Office said she did not have the power, alone, to require the use of "pull tab envelopes" in our elections. An Executive Order of Governor Brown to require "pull tab envelopes" in our elections, or an Oregon Revised Statute to direct Oregon Administrative Rule making to get this accomplished for public health in a "top-down" policy change, hasn't materialized in the two months I have been public-health concerned about this as a citizen, working pro-bono for public health solutions during the Covid-19 pandemic.

However you, and your County Elections Office, can require the exclusive use of "pull tab envelopes" for all our elections. Discounts and cost savings for buying in bulk and/or possibly tax-write offs for private sector companies, and competitive bidding, in selling "pull tab envelopes" to our County Elections Offices may be possibly found, also.

Further, an election worker in Clackamas County said he needed only two months notice to buy the "pull tab envelopes". I would like you to consider the issue, and please get back to me about your decision on the envelopes. I am writing this letter to every County Elections Office in Oregon, making the same request. Oregon could be first in the world for election public health, integrity and ease of use for our American Constitutional Republic, with your help. I hope you and your staff will require buying and using "pull tab envelopes" in all our elections, in November and going forward for every election.

Lastly, I am also an aware "Truth-er Targeted Individual" and am seeking care and support at the Oregon State Hospital, currently. I am trying to stay healthy and enduring a lot of needless torture, being literally driven crazy since 2004 by organized crime for being a "goodie good" political type, now a 16-year human trafficking victim, with little legal recourse.

Sincerely,  

Timothy Darrell Young B.S., M.P.A. - Salem, Oregon 7/1/2020

... decision on the envelopes. I am writing this letter to every County Elections Office in Oregon, making the same request. Oregon could be first in the world for election public health...

implications for the possible health effects of exposure to 60Hz magnetic fields."160 Using this knowledge to manipulate DNA presents its own risks. "Scientists expect to be able to produce the first genetically targeted drugs in five years. The drugs would repair faulty DNA within the cell and might be used to treat conditions such as diabetes and cystic fibrosis Dr. Nathanson said: 'No one has been able to tell me why if we can produce genetically targeted drugs with a bad good effect, we won't be able to produce similar drugs with a bad effect in the same time-scale.'"161

Today, in 1999, the greatest breakthroughs are just beginning to be announced. What their long term consequences will be remains to be seen. "Recent advances in the generation of ultrashort high electrical power pulses have opened new venues in the field of bioelectricity. Electrical pulses with duration down to less than one billionth of a second but at voltages exceeding ten thousand volts allow us to explore and utilize electrical interactions with biological cells without heating the tissue. The high frequency components in the ultrashort pulses have been shown to provide a pathway to the interior of cells. Pulsed, high power microwave and millimeter wave sources allow us to explore and utilize nonlinear processes on the molecular level, with the potential to modify molecular structures, such as DNA, selectively."162 In other words, the mystery is solved: non-ionizing radiation does cause profound changes beyond the "safety levels" of classical models of human life.

### The Pulse Of Life

"A wide range of biological effects from exposure to microwave fields, both in animals and in vitro, have been reported in the literature... These studies indicate that modulation plays an important role in eliciting biological responses with weak microwave fields."163 The pulsing or modulation of the energy carrier, whether it is a radio carrier, microwave, electric current or even a sound wave can result in profound changes. These changes occur when the energy is in sync, harmonized or resonating with the electromagnetic component of the tissue or at the right brain frequency to affect behavior. "The essential molecular functions appear in fact to be determined by electromagnetic mechanisms. A possible role of molecular structures would be the carrying of electric charges which generate, in the aqueous environment, a field specific to each molecule. Those exhibiting such corsonating or opposed field ("electroconformational coupling") could thus communicate, even

TBO: Earl Henry and Singh, Narayana P. "Acute Exposure to a 60 Hz Magnetic Field Increases DNA Strand Breaks in Rat Brain Cells (Introduction)." *Bioelectromagnetics* 18:155-166 (1997). EPI161. Laurance, Jeremy. "Genetic Weapons to Provide Force for High-Tech Ethnic War." *The Independent*, July 2, 1997. EPI149  
182. Old Dominion University. First International Symposium on Nonthermal Medical/Biological Treatments using Electromagnetic Fields and Ionized Gases, April 12-14, 1999. Antinocentini, T.A. et al. "Bioeffects Induced by Exposure to Microwaves are Mitigated by Superposition of ELF Noise (Introduction)." *Bioelectromagnetics*, 18:422-1997.

a distance. Therefore, a minute variation in the structure of molecules (plus or minus an atom, or a rearrangement of an amino acid, for example), which even slightly modifies their radiating field would allow their message to be received or not by a receptor, as in the FM waveband."164 In other words, the body communicates based upon electromagnetic principles which operate at tremendous speeds and can be influenced or overridden by other energy sources. Again it is a matter of harmonics or resonance in order to create the most significant effects.

"Mystery high frequency radio impulses have been bombarding the Eugene-Springfield area for as long as six years and may be affecting people's health... The paper said the source of the signals is unknown... They say it's being broadcast at 4.75 megahertz and is pulsating about 1,100 times per second."165 The mechanisms for understanding the effects of these energies is being recorded in several diverse laboratories with the mounting evidence of the proofs open science requires. One of observations shows that, "At the core of observed sensitivities to low-level EMF fields are a series of cooperative processes. One such series involves calcium ion binding and release. Available evidence points to their occurrence at cell membranes and on cell surfaces in the essential first steps of detecting EM fields. Also, attention is now directed to newly defined roles for free radicals, that may also participate in highly cooperative detection of weak magnetic fields, even at levels below thermal (KT) noise."166 One of the other effects which has been observed shows the interaction of specific fields with chemicals present in the environment or body can also contribute to significant changes. "An increase in genomic instability," they suggested, could mean that chronic exposure to very strong EMFs may result in an increased incidence of congenital malformations and cancer. We propose that [EMF] exposure can affect both DNA damage and repair processes... and that it can act in concert with chemical agents to initiate the damaging effects of those agents."167 Nature's pulse can also have a significant effect if we can just clear the electromagnetic smog long enough to sense its reality. Certain behaviors have been associated with the polarized light of the sun as it reflects off a full moon, increased sun spot activity, auroras and other energy sources. Increases in Very Low Frequencies (VLF) can have a significant impact. "More specifically, this atmospheric carrier has been considered a possible trigger for changes in the and emotional well-being of humans, sometimes referred to as sensitivity symptoms or meteoropathy. ## Microwave auditory effect

The **microwave auditory effect**, also known as the **microwave hearing effect** or the **Frey effect**, consists of the human perception of audible clicks, or even speech, induced by pulsed or modulated radio frequencies. The communications are generated directly inside the human head without the need of any receiving electronic device. The effect was first reported by persons working in the vicinity of radar transponders during World War II. In 1961, the American neuroscientist Allan H. Frey studied this phenomenon and was the first to publish information on the nature of the microwave auditory effect.<sup>[1][2]</sup> The cause is thought to be thermoelastic expansion of portions of the auditory apparatus,<sup>[3]</sup> although competing theories explain the results of holographic interferometry tests differently.<sup>[4]</sup>

### Research in the U.S.

Allan H. Frey was the first American to publish on the microwave auditory effect (MAE). Frey's "Human auditory system response to modulated electromagnetic energy" appeared in the *Journal of Applied Physiology* in 1961.<sup>[1]</sup> In his experiments, the subjects were discovered to be able to hear appropriately pulsed microwave radiation, from a distance of a few inches to hundreds of feet from the transmitter. In Frey's tests, a repetition rate of 50 Hz was used, with pulse width between 10–70 microseconds. The perceived loudness was found to be linked to the peak power density, instead of average power density. At 1.245 GHz, the peak power density for perception was below 80 mW/cm<sup>2</sup>. According to Frey, the induced sounds were described as "a buzz, clicking, hiss, or knocking, depending on several transmitter parameters, i.e., pulse width and pulse-repetition rate". By changing transmitter parameters, Frey was able to induce the "perception of severe buffeting of the head, without such apparent vestibular symptoms as dizziness or nausea". Other transmitter parameters induced a pins and needles sensation. Frey experimented with nerve-deaf subjects, and speculated that the human detecting mechanism was in the cochlea, but at the time of the experiment the results were inconclusive due to factors such as tinnitus.<sup>[1][5]</sup>

Auditory sensations of clicking or buzzing have been reported by some workers at modern day microwave transmitting sites that emit pulsed microwave radiation. Auditory response to transmitted frequencies from approximately 200 MHz to at least 3 GHz has been reported. The cause is thought to be thermoelastic expansion of portions of auditory apparatus, and the generally accepted mechanism is rapid (but minuscule, in the range of 10<sup>-5</sup> °C) heating of brain by each pulse, and the resulting pressure wave traveling through the skull to the cochlea.<sup>[5]</sup>

In 1975, an article by neuropsychologist Don Justesen discussing radiation effects on human perceptions referred to an experiment by Joseph C. Sharp and Mark Grove at the Walter Reed Army Institute of Research during which Sharp and Grove reportedly were able to recognize nine out of ten words transmitted by "voice modulated microwaves". Since the radiation levels approached the (then current) 10 mW/cm<sup>2</sup> limit of safe exposure, critics have observed that under such conditions brain damage from thermal effects of high power microwave radiation would occur, and there was "no conclusive evidence for MAE at lower energy densities".<sup>[6][7]</sup>

### Electronic warfare

In 2003–04, WaveBand Corp. had a contract from the U.S. Navy for the design of an MAE system they called MEDUSA (Mob Excess Deterrent Using Silent Audio) that was intended to temporarily incapacitate personnel through remote application.<sup>[8]</sup> Reportedly, Sierra Nevada Corp. took over the contract from Waveband.<sup>[9]</sup> Experts, such as Kenneth Foster, a University of Pennsylvania bioengineering professor who published research on the microwave auditory effect in 1974, have discounted the effectiveness of the proposed device. Foster said that because of human biophysics, the device "would kill you well before you were bothered by the noise". According to former professor at the University of Washington Bill Guy, "There's a misunderstanding by the public and even some scientists about this auditory effect," and "there couldn't possibly be a hazard from the sound, because the heat would get you first".<sup>[10]</sup>

Microwave effects have been discussed as a possible source of the otherwise **unexplained illnesses** of U.S. diplomats in Cuba and China occurring in 2017 and 2018,<sup>[11]</sup> though this possibility has been discounted by numerous experts. For example, bioengineer **Kenneth R. Foster** noted of the health effects observed in the diplomats, "it's crazy, but it's sure as heck not microwaves."<sup>[12]</sup> High-pitched sounds by crickets have been proposed as explanation as their calls match recorded sound patterns.<sup>[13]</sup>

## Conspiracy theories

Numerous individuals suffering from **auditory hallucinations**, **delusional disorders**,<sup>[14]</sup> or other **mental illnesses** have claimed that government agents use forms of **mind control** technologies based on microwave signals to transmit sounds and thoughts into their heads as a form of **electronic harassment**, referring to the alleged technology as "voice to skull" or "V2K".<sup>[15]</sup>

There are extensive online support networks and numerous websites<sup>[14]</sup> maintained by people fearing mind control. California psychiatrist Alan Drucker has identified evidence of **delusional disorders** on many of these websites and other psychologists are divided over whether such sites reinforce mental troubles, or act as a form of group social support.<sup>[16]</sup>

Psychologists have identified many examples of people reporting 'mind control experiences' (MCEs) on self-published web pages that are "highly likely to be influenced by delusional beliefs". Common themes include "Bad Guys" using "psychotronics" and "microwaves", frequent mention of the CIA's **MKULTRA** project, and frequent citing of a scientific paper entitled "Human auditory system response to modulated electromagnetic energy".<sup>[17][18]</sup>

# Christiana vs. Targeted Justice

Update on the lawsuit filed by Jack Christiana, a former Board member, that was voted off from our Board of Directors.

On 6 October 2020 - Targeted Justice wins. Arizona Judge, Craig Wismer, granted a complete dismissal with prejudice, because Christiana's case had no merit. The Judge basically said that Christiana failed to provide evidence and proof of his accusations.

Christiana was previously declared a vexatious litigant on September 24, 2018 in Orange County Superior Court case 30-2017-00918017. According to California law, he filed at least 5 frivolous or meritless court cases, and cannot file again without the permission of a Judge. Further, Christiana was declared mentally incompetent in two different court cases - one in 2010, and another in 2019. In 2017, Christiana sued his sister - that case was also dismissed by a Judge in California, because it had no merit. Due to his prior conviction on arson charges, the State of California requires that Christiana register locally as a convicted arsonist.

## Arizona Judge, Craig Wismer, rules in favor of Targeted Justice.

A LAWSUIT was filed against Targeted Justice by John Thomas Christiana, a former Board member that was voted out. Christiana alleged that TJ committed "crimes" by publishing our information and opinions - and that he was somehow "harmed" as a result. We disagreed. After 21 months, no one at TJ has been charged with any crime. The Supreme Court case "Brandenburg v. Ohio," proves the content of our website is considered "Free Speech." Arizona Judge, Craig Wismer, dismissed the entire case in October 2020. Targeted Justice wins.

<https://legaldictionary.net/brandenburg-v-ohio/>

- The Supreme Court ruled that the Government cannot punish speech unless it is intended to incite "imminent lawless action," and is "likely to produce such action."
- Mere advocacy of a future potential crime, is not a crime. It is Free Speech. Hess v. Indiana. <https://mtsu.edu/first-amendment/article/461/hess-v-indiana>
- Additionally: Re-Posting publicly available information and home addresses is not a "crime." zabasearch.com & veripages.com have been on the internet for 10+ years, posting home addresses. They have never been charged with a crime, because it is public

IS PUBLIC INFORMATION.

- [https://en.wikipedia.org/wiki/Sam\\_Lavigne](https://en.wikipedia.org/wiki/Sam_Lavigne)
- Since 2018, Wikileaks has posted the ICE Patrol, including names, locations, resumes, etc. of 9200 govt ICE employees. No criminal charges, because it is public information.  
<https://ice.wikileaks.org/> (If the webpage is blocked - see it here - <https://www.targetedjustice.com/wikileaks-info.html>)
- In spite of ridiculous disinformation being spread by one source, Barrett Brown was never convicted of "doxing." Posting public information records is never a crime. It is Free Speech. "In March 2014, most charges against Brown were dropped.[58] In April 2014, it was reported that Brown had agreed to a plea bargain.[59]" -- wikipedia.org
- The legal definition of a "True Threat" is specified under the Supreme Court case *Elonis v. United States*, 575 U.S. (2015). *It requires proof of the intent to threaten someone.* Identifying government officials involved in criminal conduct, has never constituted a threat. Just watch "Saturday Night Live" - they do it every week. Also see the Rule of Lenity, or the Rule of Strict Construction, which requires the court to interpret in favor of the Defendant.

## Here is what our Attorney said about Christiana's claims:

### In a Motion for Summary Judgement (MSJ).

**"...summary judgement should be entered in favor of the Defendants (Targeted Justice) dismissing with prejudice the causes of action asserted in Plaintiff's (Christiana) FAC (First Amended Complaint) because the undisputed facts in this case establish Plaintiff's causes of action fail as a matter of law."**

**"At no time has Targeted Justice been contacted by the FBI or any other law enforcement agency..."**

**"As demonstrated in this Motion, Plaintiff (Christiana) initiated this lawsuit without reasonable cause, and his causes of action were not well grounded in fact and existing law. Plaintiff's entire lawsuit is premised on his allegations..."**

**"Plaintiff (Christiana) asserts a Wrongful Termination claim despite knowing he was never employed by Targeted Justice. Plaintiff alleges he has incurred emotional distress, despite the fact it is undisputed he was not the target of alleged crimes and was not present when the alleged crimes occurred. Plaintiff asserts claims for Negligence and Defamation without providing cursory details supporting these claims, such as specifying the alleged negligent conduct and the defamatory statements made against him."**

**"Defendants (Targeted Justice) should be Awarded their Attorney's Fees."**

**<https://www.targetedjustice.com/christiana-vs-targ-justice.html>**

<https://www.brownsville.com/story/news/crime/2020/09/21/christiana-entered-plea-to-arson-faces-sentencing/3288887002>

***Christiana entered plea to arson, faces sentencing.***

***"...The last two years involved reports of Christiana vandalizing cars in the Big Pine Creek area, including broken windows and a cut brake line and gas lines. Officers accused him of breaking into a DWP cabin above the trailhead. Officers said they found Christiana with jewelry and firearms taken from that cabin. Officers also reported that they found containers of gasoline in Christiana's car. He was finally charged with arson. Issues of competency to stand trial came up during the course of court hearings."***

<https://www.google.com/search?>

[source=hp&ei=DIOiXqjHONoT2tAWIrbZg&q=%22John+Thomas+Christiana%22](https://www.google.com/search?source=hp&ei=DIOiXqjHONoT2tAWIrbZg&q=%22John+Thomas+Christiana%22)

## **Targeted Justice answers the Complaint.**

**(summary)**

**This is a Public Record. 9/21/2020**

### **AFFIRMATIVE AND OTHER DEFENSES**

**108. Plaintiff (Christiana)'s Complaint fails to state a claim for which relief can be granted.**

**109. All of the alleged statements in issue and made by Calvert are protected under the First Amendment to the United States Constitution, pursuant to the Supreme Court's decision in Brandenburg v. Ohio, 395 U.S. 444 (1969).**

Targeted Justice's Board of Directors, Plaintiff's claims against Defendants are barred because all such allegations occurred under the corporate umbrella of Targeted Justice.

113. Plaintiff's claims against Doris Clause are barred because all such allegations occurred under the corporate umbrella of Targeted Justice.

114. Plaintiff's claims fail as a matter of law, because Defendants did not cause him to incur damages.

115. Plaintiff's derivative claims fail as a matter of law, because Targeted Justice has not incurred damages.

116. Plaintiff's negligence claim fails as a matter of law, because Defendants did not owe Plaintiff a duty of care.

117. Plaintiff's intentional infliction of emotional duress claim fails as a matter of law, because the alleged extreme and outrageous conduct was not directed against Plaintiff.

118. Plaintiff's claim for wrongful termination fails as a matter of law, because Plaintiff was never an employee of Targeted Justice.

119. Defendants incorporate into their Answer by reference all other affirmative defenses set forth in Rules 8(d) and 12(b) of the Ariz. R. Civ. P.

120. Defendants reserve the right to amend this Answer to assert affirmative defenses that are revealed during the course of discovery and/or further investigation of this matter.

**WHEREFORE, Defendants request the following relief:**

**A. That Plaintiff's Complaint be dismissed in its entirety with prejudice and that all requested relief be denied with prejudice;**

**B. That Defendants be awarded their costs and attorneys' fees pursuant to A.R.S. §§ 12-341, 12-341.01, 12-349 and/or any applicable contract; and**

**C. For such other relief that the Court deems just and proper in this case.**

**DATED this 21st day of September, 2020.**

## Microwave auditory effect

The **microwave auditory effect**, also known as the **microwave hearing effect** or the **Frey effect**, consists of the human perception of audible clicks, or even speech, induced by pulsed or modulated radio frequencies. The communications are generated directly inside the human head without the need of any receiving electronic device. The effect was first reported by persons working in the vicinity of **radar transponders** during **World War II**. In 1961, the American neuroscientist Allan H. Frey studied this phenomenon and was the first to publish information on the nature of the microwave auditory effect.<sup>[2][2]</sup> The cause is thought to be thermoelastic expansion of portions of the auditory apparatus,<sup>[3]</sup> although competing theories explain the results of **holographic interferometry** tests differently.<sup>[4]</sup>

### Research in the U.S.

Allan H. Frey was the first American to publish on the microwave auditory effect (MAE). Frey's "Human auditory system response to modulated electromagnetic energy" appeared in the *Journal of Applied Physiology* in 1961.<sup>[1]</sup> In his experiments, the subjects were discovered to be able to hear appropriately pulsed microwave radiation, from a distance of a few inches to hundreds of feet from the transmitter. In Frey's tests, a repetition rate of 50 Hz was used, with pulse width between 10–70 microseconds. The perceived loudness was found to be linked to the peak power density, instead of average power density. At 1.245 GHz, the peak power density for perception was below 80 mW/cm<sup>2</sup>. According to Frey, the induced sounds were described as "a buzz, clicking, hiss, or knocking, depending on several transmitter parameters, i.e., pulse width and pulse-repetition rate". By changing transmitter parameters, Frey was able to induce the "perception of severe buffeting of the head, without such apparent vestibular symptoms as dizziness or nausea". Other transmitter parameters induced a **pins and needles** sensation. Frey experimented with nerve-deaf subjects, and speculated that the human detecting mechanism was in the **cochlea**, but at the time of the experiment the results were inconclusive due to factors such as **tinnitus**.<sup>[1][5]</sup>

Auditory sensations of clicking or buzzing have been reported by some workers at modern day microwave transmitting sites that emit pulsed microwave radiation. Auditory response to transmitted frequencies from approximately 200 MHz to at least 3 GHz has been reported. The cause is thought to be thermoelastic expansion of portions of auditory apparatus, and the generally accepted mechanism is rapid (but minuscule, in the range of 10<sup>-5</sup> °C) heating of brain by each pulse, and the resulting pressure wave traveling through the skull to the **cochlea**.<sup>[5]</sup>

In 1975, an article by neuropsychologist Don Justesen discussing radiation effects on human perceptions referred to an experiment by Joseph C. Sharp and Mark Grove at the **Walter Reed Army Institute of Research** during which Sharp and Grove reportedly were able to recognize nine out of ten words transmitted by "voice modulated microwaves". Since the radiation levels approached the (then current) 10 mW/cm<sup>2</sup> limit of safe exposure, critics have observed that under such conditions brain damage from thermal effects of high power microwave radiation would occur, and there was "no conclusive evidence for MAE at lower energy densities".<sup>[6][7]</sup>

### Electronic warfare

In 2003–04, WaveBand Corp. had a contract from the **U.S. Navy** for the design of an MAE system they called **MEDUSA** (Mob Excess Deterrent Using Silent Audio) that was intended to temporarily incapacitate personnel through remote application.<sup>[8]</sup> Reportedly, Sierra Nevada Corp. took over the contract from Waveband.<sup>[9]</sup> Experts, such as Kenneth Foster, a **University of Pennsylvania** bioengineering professor who published research on the microwave auditory effect in 1974, have discounted the effectiveness of the proposed device. Foster said that because of human **biophysics**, the device "would kill you well before you were bothered by the noise". According to former professor at the **University of Washington** Bill Guy, "There's a misunderstanding by the public and even some scientists about this auditory effect," and "there couldn't possibly be a hazard from the sound, because the heat would get you first".<sup>[10]</sup>

Microwave effects have been discussed as a possible source of the otherwise unexplained illnesses of U.S. diplomats in Cuba and China occurring in 2017 and 2018,<sup>[11]</sup> though this possibility has been discounted by numerous experts. For example, bioengineer Kenneth R. Foster noted of the health effects observed in the diplomats, "it's crazy, but it's sure as heck not microwaves."<sup>[12]</sup> High-pitched sounds by crickets have been proposed as explanation as their calls match recorded sound patterns.<sup>[13]</sup>

## Conspiracy theories

Numerous individuals suffering from auditory hallucinations, delusional disorders,<sup>[14]</sup> or other mental illnesses have claimed that government agents use forms of mind control technologies based on microwave signals to transmit sounds and thoughts into their heads as a form of electronic harassment, referring to the alleged technology as "voice to skull" or "V2K".<sup>[15]</sup>

There are extensive online support networks and numerous websites<sup>[14]</sup> maintained by people fearing mind control. California psychiatrist Alan Drucker has identified evidence of delusional disorders on many of these websites and other psychologists are divided over whether such sites reinforce mental troubles, or act as a form of group social support.<sup>[16]</sup>

Psychologists have identified many examples of people reporting 'mind control experiences' (MCEs) on self-published web pages that are "highly likely to be influenced by delusional beliefs". Common themes include "Bad Guys" using "psychotronics" and "microwaves", frequent mention of the CIA's MKULTRA project, and frequent citing of a scientific paper entitled "Human auditory system response to modulated electromagnetic energy".<sup>[17][18]</sup>

sections.

Disorders in the Cluster C group are characterized by anxiety, *avoidant*, *dependent*, and *obsessive-compulsive* personality disorders. These disorders share some characteristics of anxiety disorders as social anxiety disorder or generalized anxiety disorder. However, disorders in this group are different from anxiety disorders in that they have general ways of interacting with others and of responding to events. A person with an obsessive-compulsive personality disorder may be extremely orderly. The person might always eat the same food at precisely the same time or perhaps read a newspaper in a particular order each time. This pattern is problematic only when it interferes with the person's life, as in making it difficult to travel or to maintain relationships.

**Table 14.6 Personality Disorders and Associated Characteristics**

<b>CLUSTER A: ODD OR ECCENTRIC BEHAVIOR</b>	
Paranoid	Tense, guarded, suspicious; holds grudges
Schizoid	Socially isolated, with restricted emotional expression
Schizotypal	Peculiarities of thought, appearance, and behavior that are disconcerting to others; emotionally detached and isolated
<b>CLUSTER B: DRAMATIC, EMOTIONAL, OR ERRATIC BEHAVIOR</b>	
Histrionic	Seductive behavior; needs immediate gratification and constant reassurance; rapidly changing moods; shallow emotions
Narcissistic	Self-absorbed; expects special treatment and adulation; envious of attention to others
Borderline	Cannot stand to be alone; intense, unstable moods and personal relationships; chronic anger; drug and alcohol abuse
Antisocial	Manipulative, exploitative; dishonest; disloyal; lacking in guilt; habitually breaks social rules; childhood history of such behavior; often in trouble with the law
<b>CLUSTER C: ANXIOUS OR FEARFUL BEHAVIOR</b>	
Avoidant	Easily hurt and embarrassed; few close friends; sticks to routines to avoid new and possibly stressful experiences
Dependent	Wants others to make decisions; needs constant advice and reassurance; fears being abandoned
Obsessive-compulsive	Perfectionistic; overconscientious; indecisive; preoccupied with details; stiff; unable to express affection

SOURCE: Adapted from American Psychiatric Association (2013).

choice, *DSM-5* describes an alternative model, personality functioning and the existence of personality disorders shows extreme dysfunctioning in society.

Personality disorders may not seem to affect people discussed in this chapter, such as people with personality disorders. Although people with personality disorders have mood swings, their ways of interacting with others are in-depth consequences. The following in-depth consequences and antisocial personality disorder illustrate the individual, family and friends

### Borderline Personality Disorder Associated with Poor Self-

Borderline personality disorder is characterized by extreme mood swings and in impulse control. This disorder was officially named in the *DSM-5*. The term *borderline* was initially used because of the border between normal and psychotic (Knight, 2007). The wide variety of clinical features of this disorder is more than twice as common in the disorder is more than twice as common in the disorder (Swartz, Blazer, George, & Winfield, 1990).

People with borderline personality disorder cannot tolerate being alone and have an intense fear of abandonment. They desperately need an exclusive and dependent relationship. They can be very manipulative in their attempts to get what they want. The following example:

A borderline patient periodically rented a motel room. She would call her therapist's home with an urgent need for help in long conversations in which he "talked her out" of her not count on his always being available, he became out detailed instructions about how he could reach her due to a bad phone connection. She frequently miscalculated manipulation. (Gunderson, 1984)

of those with borderline personality disorder have experienced physical or sexual abuse or observed some kind of extreme violence. Other theories implicate early interactions with caretakers. Clients with borderline personality disorder may have had caretakers who did not accept them or who were unreliable or unavailable. The constant rejection and criticism made it difficult for the individuals to learn to regulate emotions and understand emotional reactions to events (Linehan, 1987). An alternative theory is that caregivers encouraged dependence, preventing the individuals in their charge from adequately developing a sense of self. As a result, the individuals became overly sensitive to others' reactions: If rejected by others, they reject themselves.

## Antisocial Personality Disorder Is Associated with a Lack of Empathy

In the 1800s, the term *psychopath* was coined to describe people who seem willing to take advantage of and to hurt others without any evidence of concern or of remorse (Koch, 1891). In his classic book *The Mask of Sanity* (1941), the psychiatrist Hervey Cleckley described characteristics of psychopaths from his clinical experience. For example, such individuals could be superficially charming and rational; be insincere, unsocial, and incapable of love; lack insight; and be shameless. In 1980, the *DSM* dropped the label *psychopath*, which was seen as pejorative, and adopted the term antisocial personality disorder (APD). This change has led to confusion because *psychopath* is still widely used to refer to a related but not identical type of personality disorder as defined by *DSM-5*.

APD is the catchall diagnosis for individuals who behave in socially undesirable ways, such as breaking the law, being deceitful and irresponsible, and feeling a lack of remorse for their behavior. People with this disorder tend to be hedonistic, seeking immediate gratification of wants and needs without any thought of others.

True psychopaths display more extreme behaviors than those with APD. They also tend to have other personality characteristics not found in those with APD, such as glibness, a grandiose sense of self-worth, shallow affect, and cunning/manipulativeness. Psychopaths would be classified as APD under *DSM-5*, but they are an extreme version of the disorder. Psychopaths are pathological in their degree of callousness and are particularly dangerous. For instance, one study of murderers found that those with psychopathic tendencies nearly always kill intentionally. They want to gain something, such as money, sex, or drugs. People without psychopathic tendencies are much more likely to commit murder impulsively, when provoked or angry (Woodworth & Porter, 2002). Psychopaths fit the stereotype of cold-blooded killers. Infamous examples include Dennis Rader—the BTK strangler, who bound, tortured, and killed 10 victims—and Gary Gilmore (FIGURE 14.28). In 1977, Gilmore was executed for the murder he describes here:

I went in and told the guy to give me the money. I told him to lay on the floor and then I shot him. I then walked out and was carrying the cash drawer with me. I took the money and threw the cash drawer in a bush and I tried to push the gun in the bush, too. But as I was pushing it in the bush, it went off and that's how come I was shot in the arm. It seems like things have always gone bad for me. It seems like I've always done dumb things that just caused trouble for me. I remember when I was a boy I would feel like I had to do things like sit on a railroad track until just before the train came and then I would dash off. Or I would put my finger over the end of a BB gun and pull the trigger to see if a BB was really in it. Sometimes I would stick my finger in water and then put my finger in a light socket to see if it would really shock me. (Spitzer et al., 1983, pp. 66–68)

### antisocial personality disorder (APD)

A personality disorder in which people engage in socially undesirable behavior, are hedonistic and impulsive, and lack empathy.

A.P.D. = DICKS  
A.P.D. Dicks!

**FIGURE 14.28**  
**Gary Gilmore After His Arrest**  
Under *DSM-5*, Gilmore would have been given a diagnosis of antisocial personality disorder. He also showed psychopathic traits.

**ASSESSMENT AND CONSEQUENCES** It is estimated that 1–4 percent of the population have antisocial personality disorder (Compton, Conway, Stinson, Colliver, & Grant, 2005). People with this condition who also show more-extreme psychopathic traits are less common (Lenzenwegger et al., 2007). Both APD and psychopathy are much more common in men than in women (Robins & Regier, 1991).

Much of what psychologists know about the traits associated with antisocial personality disorder was discovered by the psychologist Robert Hare (1993). Hare also developed many of the assessment tools to identify people with psychopathic tendencies. He and colleagues have shown that the disorder (including its extreme version) is most apparent in late adolescence and early adulthood, and it generally improves around age 40 (Hare, McPherson, & Forth, 1988), at least for those without psychopathic traits. According to the *DSM-5* diagnostic criteria, APD cannot be diagnosed before age 18, but the person must have displayed antisocial conduct before age 15. This stipulation ensures that only those with a lifetime history of antisocial behaviors can be diagnosed with antisocial personality disorder. They also must meet other criteria, such as repeatedly performing illegal acts, repeatedly lying or using aliases, and showing reckless disregard for their own safety or the safety of others. Because many such individuals are quite bright and highly verbal, they can talk their way out of bad situations. In any event, punishment seems to have very little effect on them (Lykken, 1957, 1995), and they often repeat the problem behaviors a short time later.

Perhaps as many as 50 percent of prison inmates meet the criteria for antisocial personality disorder (Hare, 1993; Widiger & Corbitt, 1995). Because of the prevalence of the disorder in the prison population, much of the research on APD has been conducted in this setting. One researcher, however, came up with an ingenious way of finding research participants outside of prison. She put the following advertisement in a counterculture newspaper: “Wanted: charming, aggressive, carefree people who are impulsively irresponsible but are good at handling people and at looking after number one. Send name, address, phone, and short biography proving how interesting you are to . . .” (Widom, 1978, p. 72). Seventy-three people responded, and about one-third of them met the criteria for antisocial personality disorder. These individuals were then interviewed and given a battery of psychological tests. Their characteristics proved very similar to those of prisoners diagnosed with APD, except that the group responding to the ad had avoided imprisonment. Indeed, these findings fit Cleckley’s view of people with psychopathic traits as often being charming and intelligent. Lacking remorse, willing to lie or cheat, and lacking empathy, some psychopaths manage to be successful professionals and to elude detection for crimes they may commit. Their psychopathic traits may even provide advantages in some occupations, such as business and politics (FIGURE 14.29).

**FIGURE 14.29**  
**American Psychopath**

In the 2000 movie *American Psycho*, Christian Bale plays Patrick Bateman, who appears to be a suave man-about-town, a successful professional, and a serial killer. The movie, like the Bret Easton Ellis novel it is based on, raises questions about the connections between a slick presentation of self, a knack for making and spending money, and psychopathy.

**THE ETIOLOGY OF ANTISOCIAL PERSONALITY DISORDER** Various physiological abnormalities may play a role in antisocial personality disorder. In 1957, David Lykken reported that true psychopaths do not become anxious when they are subjected to aversive stimuli. He and other investigators have continued this line of work, showing that such individuals do not seem to feel fear or anxiety (Lykken, 1995).

Electroencephalogram (EEG) examinations have demonstrated that criminals who meet the criteria for antisocial personality disorder have slower alpha-wave activity (Raine, 1989). This finding indicates a lower overall level of arousal. It is possible that low arousal prompts people with APD to engage in sensation-seeking behavior. In addition, because of low arousal, these individuals do not learn from punishment because they do not experience punishment as particularly aversive. This pattern of reduced psychophysiological response in the face of punishment also occurs in adolescents at risk for developing psychopathy (Fung et al., 2005).

There is also evidence of amygdala abnormalities in those with antisocial tendencies, such as having a smaller amygdala and being less responsive to negative stimuli (Blair, 2003; Marsh et al., 2011). Deficits in frontal lobe functioning have also been found and may account for the lack of forethought and the inability to consider the implications of actions, both characteristic of antisocial personality disorder (Seguin, 2004).

Genetic and environmental factors appear to play roles in antisocial personality disorder. Genetics may be more important for the extreme psychopathic version, however. Identical twins have a higher concordance rate for criminal behavior than fraternal twins do (Lykken, 1995), although the research just cited did not rule out the role of a shared environment. A study of 14,000 adoptions found that adopted male children have a higher rate of crime if their biological fathers have criminal records (Mednick, Gabrielli, & Hutchings, 1987). In addition, the greater the criminal record of the biological father, the more likely it is that the adopted son will engage in criminal behavior.

Although genes may be at the root of antisocial behaviors and psychopathy, factors such as low socioeconomic status, dysfunctional families, and childhood abuse may also be important. Indeed, malnutrition at age 3 has been found to predict antisocial behavior at age 17 (Liu, Raine, Venables, & Mednick, 2004). An enrichment program for children that included a structured nutrition component was associated with less criminal and antisocial behavior 20 years later (Raine, Mellingen, Liu, Venables, & Mednick, 2003). This finding raises the possibility that malnutrition or other, similar environmental factors might contribute to the development of antisocial personality disorder.

## Summing Up

### What Are Personality Disorders?

- Ten personality disorders, clustered in three groups, are identified in the *DSM*: paranoid, schizoid, schizotypal (odd or eccentric cluster), histrionic, narcissistic, borderline, antisocial (dramatic, emotional, or erratic cluster), and avoidant, dependent, obsessive-compulsive (anxious or fearful cluster).
- Borderline personality disorder is characterized by disturbances in identity, in affect, and in impulse control.
- Research has shown that people with borderline personality disorder often have diminished frontal lobe capacity, low levels of serotonin, and a history of abuse or rejection by caregivers.
- Those with antisocial personality disorder engage in socially undesirable behavior, are hedonistic and impulsive, and lack empathy. Psychopaths have an extreme version of APD.
- Antisocial personality disorder is associated with lower levels of arousal, a smaller amygdala, and deficits in frontal lobe functioning.
- Twin and adoption studies suggest that genes play a role in antisocial personality disorder. However, environmental factors (such as low socioeconomic status, dysfunctional families, abuse, and malnutrition) also contribute to the development of this disorder.

## Measuring Up

1. Which of the following characteristics are *DSM-5* diagnostic criteria of borderline personality disorder?
  - a. frantic efforts to avoid real or imagined abandonment
  - b. a pattern of unstable and intense relationships
  - c. a lack of guilt or remorse

Draft: Jan 2021

## Targeted and Tortured in America

The Same Plot to Enslave Us All

By Timothy Darrell Young, B.S., M.P.A.

Former Member, Oregon State Board of Higher Education 2000 - 2003

Tortured Targeted Individual Since 2004

**First they came for the socialists, and I did not speak out—**

**Because I was not a socialist.**

**Then they came for the trade unionists, and I did not speak out—**

**Because I was not a trade unionist.**

**Then they came for the Jews, and I did not speak out—**

**Because I was not a Jew.**

**Then they came for me—and there was no one left to speak for me.**

**- Pastor Martin Niemöller**

I want to want, nothing at all. The future is an illusion both being uncertain although calculable to varying degrees and the mathematical certainty we are in a virtual reality universe to begin with. The past is a lie we are told or forms of it, with some truths; history is written by the victor, however there are discernible patterns. I happened to read the books and am smart, well-educated and a little wiser. Torture, does not make us safer and that is a known fact as well. Propaganda and other deceptions set aside, C.I.A. officials have had to publicly admit that. Further I have learned through rigorous study and painful experience, the farther governing is taken from the governed, the more chance for evil. Historical examples of power abusing temptations in Nazi Germany and the former U.S.S.R., was to turn good people into the secret police and others, over falsehoods and out of vengeance. The same is true in 2020 America. I personally almost died in 2016 over repeating patterns in history and a national lack of discipline, frankly by my own countrymen in the overlap of organized crime and government with us targeted individuals surviving lives worse than death secretly for too long, since

before the 1960s. Edward Snowden warned us some; this is about economic slavery in addition to losing our liberty over terrorism which is an ongoing tactic that our own country is guilty of in false flag evils. We could be focusing on a stratagem for Gross Domestic Happiness (G.D.H.) and preserving the Union. Instead 1.5 million Americans are secretly being tortured by other Americans out of organizations like Blackwater. I was targeted for being a political dissident. I spent my young adult life advocating for higher education for all and was made a mind body and soul slave with advanced technology in the wrong hands. Centralized, corrupt organized crime spying and policing powers the U.S. constitutional republic was designed against, split Germany in two and decomposed the U.S.S.R. Are we next?

I filed an affidavit with fellow Targeted Individual Dr. Kathryn Horton of [www.stop007.org](http://www.stop007.org) in Europe, and I will in the U.S.A. in both civil courts and possibly a military tribunal, as an extremely abused citizen with severely diminished quality of life with little, to no rights. I will also try take steps to reclaim my body and mind with Brain Computer Interface (B.C.I.) hardware being used to remote torture me now, justified similarly to constitutional

rights to firearms for personal protection, available for purchase allegedly on the darkweb at a site called "cashcab" that is similar to this device pictured on the world wide web here: [www.openbci.com](http://www.openbci.com). A common name for organized Electromagnetic Frequency (E.M.F.) or flesh and blood, or robotized, criminal gang members who have overthrown governments and any institution and people, at will, already secretly successful we Targeted Individuals (T.I.) call "perps." Perps are long-term, persistent, terrorist, torturous, treasonous criminals who are well-organized in no good ways. Perps almost killed me in 2016. I have been so obfuscated, repressed, oppressed, suppressed, with audiences limited from my own liberating and interesting information. Perps using Brain Computer Interface (B.C.I.) hardware for transferring their consciousness to other locations to commit horrible crimes, virtually suspending habeas corpus are freeing themselves from legal repercussions and punishments for their evil-doing and law-breaking in this organized crime, undeclared war against U.S. citizens that us Targeted Individuals endure.

I am willing to testify using lie detectors against the perpetrator systems pertaining to what I will disclose is this document. Some of my own pathos, logos and ethos remain as a middle-aged man while many literal and figurative efforts at trying to "kill the messenger" in me about T.I. and perping, have failed. A same plot to enslave all of us has only gone qualitatively and quantitatively worse since the Kennedy administration

# PROJECT BLUE BEAM

www.carlg.org

Perps minimize the good I do and steal it for their gangs at speed of thought to mask their evils and to degrade me, the Targeted Individual and are no better than the evil human traffickers and tortures targeting T.I. Kevin Christian of Jonesborough, Georgia from Howard Circle. Overall, I have been unlawfully, intensely and relentlessly abused for 16 years disguised as only mental illness sin 2004 to date, when it is much more but is also mental illness too. I am a victim of extreme harassment and worse than lethal bullying, an understatement but no less childish. Invasive intellectual perversions, industrial espionage, sexual perversions of the possibly criminally insane and literally out of their minds perps, I have endured for going on two decades. I have been robbed of my youth, and so much more. Please see Kevin Christian Jonesborough, Georgia Targeted Individual Dark Journalism disclosure on YouTube for the definition of E.M.F. "monitor" consciousness. It means a human who can use "technological astral projection" or, a person who transferred their mind into a computer graphics

generated hologram form, far from where their real bodies are elsewhere using electroencephalography caps and chairs. Voice to Skull (V.2.K.) is disabling, Image to Skull (I.2.K.) is not enlightenment and Synthetic Telepathy is theft, and makes people want to take their own lives. A perverse, inverse, backwards, upside-down and inside-out, covert, undeclared war rages on against creation itself and against us Targeted Individuals, or otherwise known as T.I.

These perps are involved 24/7 worldwide in the real New World Order. At the speed of thought, perps can be downtown Tokyo or in Putin's Russia, nearly undetectably. Some of their T.I. human trafficking hidden structures, tactics and practices really are, borrowing from evil cult tactics and some of the vilest anything, not known to most in humanity. Perping can and has been proven, even with steps detailed in this document involving reflective surfaces like windows and mirrors. I am a white slave in the U.S.A., and a fairly cool nerd from the North West. I am more aware of the likelihood we are ALL earthling mammalian slave race members, kept ignorant and infantile clear into adulthood for more easy manipulations and exploitations, structurally disadvantaged from womb to grave and back again after forces memory wipes and reincarnations reportedly at the moon, in an unforgiving billions-to-one mathematically proven to be simulated, or virtual reality universe. That is more accurate than calling life a "video game," there are many very serious and weighty matters occurring even in a VR, possibly cosmos wide or beyond or all I know.

“The Land of the Free and Home of the Brave” is really being remotely enslaved by evil perp cowards in 2020, truly. The plight of the T.I. is horror most don't even want to hear about in the general public. Perps are DESPERATE to convince us and the world that they are God, when they are nothing of the sort, more like warts on the ass of a goat who screwed a pig and birthed a pig-goat. Perps are advanced, hyper-sonic human traffickers at speed of thought, capable of elaborate and unusual identity theft and life destruction that ignore repeating patterns in history for short-term gain, cheapening life itself. Perps want to torture so they can get morphine/heroin like high off reward signals in EMF electroencephalography headgear like [www.openbci.com](http://www.openbci.com) and feel important, in so many cases of causing crime and chaos with a stratagem to steal the Earth's brains and us, whole people, along with

those organs. Perps are so selfish and overpowered, they will “win” and in that we will all lose, including them. Perps can't see the forest for the trees, so to say. Perps get stuck on broken tactics that they use to try to break people, some people won't break and that's a fact. Corrupt, and then rule? More like losing a whole country here in the U.S.A.

Moreover, advancements since WWII has expanded the perp pandemic of deceptive, treasonous, cowardly, remote torturous criminals as evil as any Nazi preying on a Jewish ghetto, but with different and more advanced tactics and technology. A bio-hazard of un-constitutional tech enabled sociopaths, narcissists and psychopaths – id driven, ego focused, and lacking superego functionality – prolong cruel and unusual punishment both here and overseas in covert undeclared war and crimes, too often against good civilians like myself. In and out of the electromagnetic spectrum, hidden from the naked eye, these evil perps torture us Targeted Individuals and our families 24 hours a day, seven days a week and no longer need sleep as already mentioned. These evil efforts are crimes against creation itself, a feast for pure evil and purposefully done by criminal perpetrator gangs, who are lavishly rewarded and only fake they are ever punished. Many, perps do not believe in life after death but can separate their bodies from the consciousnesses while alive using the technology [www.openbci.com](http://www.openbci.com). This fact only adds to likelihood human consciousness lives on after body death, I.M.H.O. Perps fake stupidity and then they are also, just plain stupid. Unholy virtues they excel at, sadly. Seemingly un-winnable odds are the plight of the American Targeted Individual. We are overwhelming, slow killed and betrayed. Women, children and the elderly are not being spared -

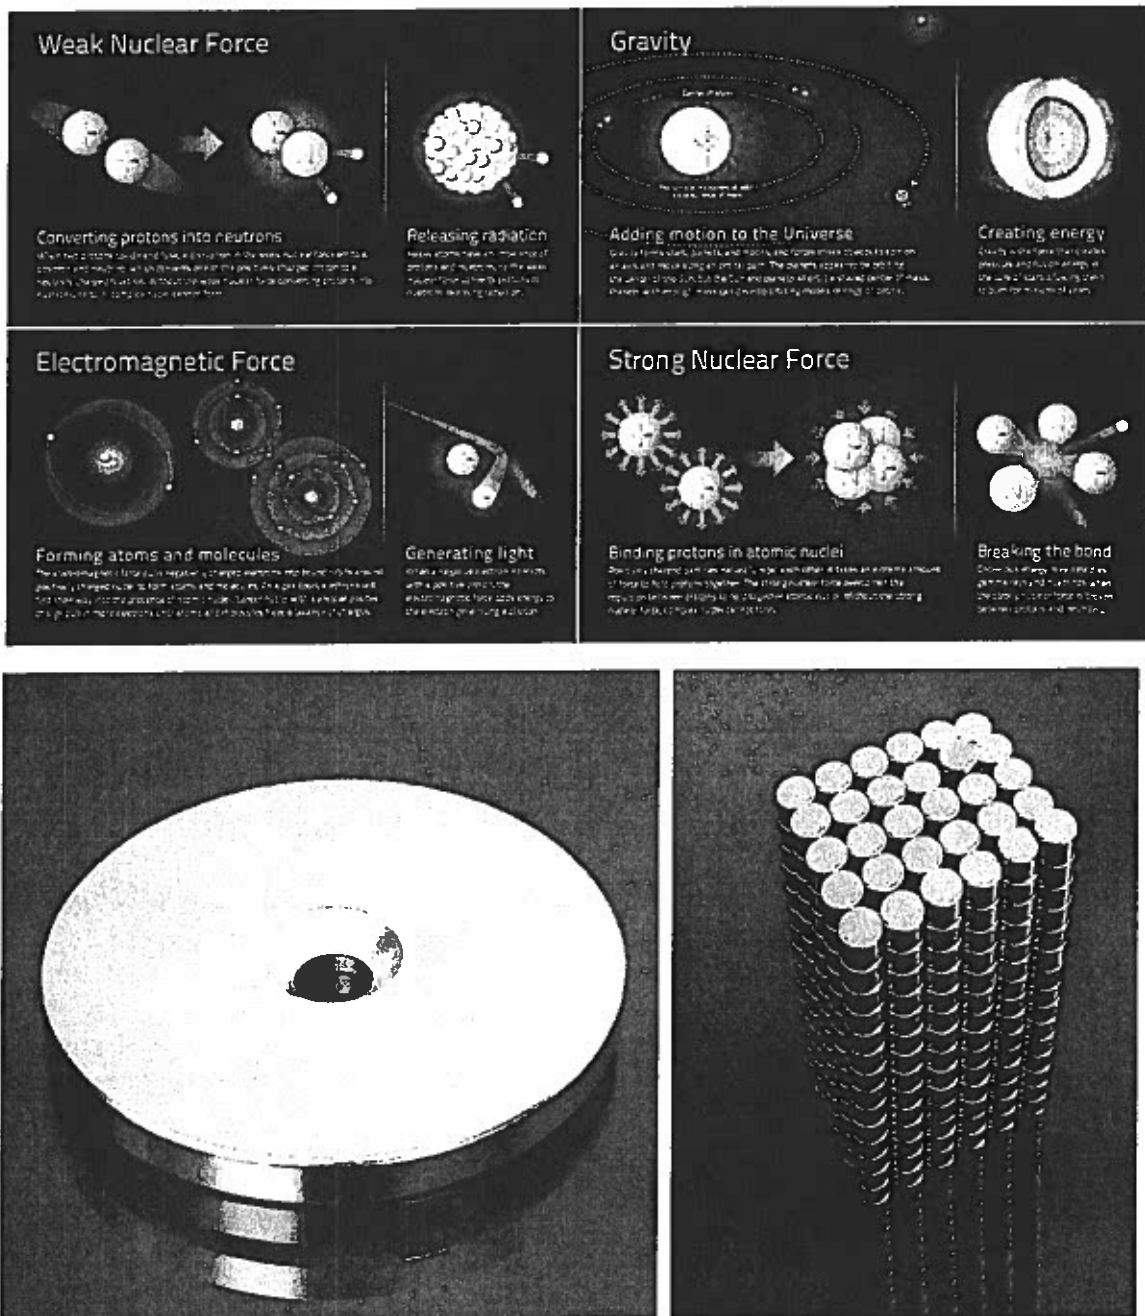

crimes of the worst kind. In the 1920's scientists could get a primate to give up their babies with electromagnetic manipulation of their corporal form called "a tuning fork for abuse" by evil humans doing the same to "future threat" superior people, virtuous and good, like myself. In 2020, the same is being done to real human beings, destroying relationships, families, supporting the human traffic industry and the sex industry at the push of a button, using electromagnetism and the human body and mind, for evil like you literally would not believe.

### **Shielding and Other Helpful Tips for Targeted Individuals**

The computer graphics imagery "hacked" electromagnetic spectrum of Earth beyond the naked eye in "seeing" is slightly sped up. Faster than normal 3-dimensions life, perps' technologically astral projection consciousnesses or "monitors" are also sped up. Organized crime has been using the advantages of early access to Brain Computer Interface (B.C.I.) systems to do everything from rigging sporting events, to hiding undetectable break-ins in homes to poison our minds and bodies and slow kill, rape us, and torturous us to death, while extracting as much virtue for themselves in a smoke screen, sleight of hand, secret satanism, crimes against humanity, war crimes and efforts to hide their perping and many other evils, and other crimes. Every 3 to 6 months perps make me suicidal, sadly. Roughly 9% of the men in my situation take their own lives because of perps calculated only one use of their torture techniques, Voice to Skull. Dr. Kathryn Horton's 94-page affidavit from [www.stop007.org](http://www.stop007.org) details like a 1,000 ways we T.I. are tortured by these cowards and low-life, sick bastards including V.2.K. E.M.F. perps are a biohazard pandemic secretly hiding around Targeted Individuals, invisible to the naked eye. Fellow T. I. Kevin Christian of Georgia has described the E.M.F. chair from interviewing fellow Targeted Individuals on his YouTube channel, please see his YouTube channel for reference; Mr. Christian's perps are no different than those slow-killing me. Perps are evil and expendable and need to be stopped, they won't be I.M.H.O. The E.M.F. Hologram form chair for Electromagnetic criminals perpetrating is similar to Matrix movie chair but for evil, that allows humans to be full hologram faked human form as anyone they want, for as long as they want, in seeming normal human 3-dimensions life. The Brain Computer Interface Cap available here: [www.openbci.com](http://www.openbci.com) allows for much less time in hologram & electromagnetic form, E.M.F fake people form, using C.I.A. Project Bluebeam hologram technology, also, to make the illusionary person seem real. Laser pointers successfully move "monitors" off your body, or

evil E.M.F. perps who are “technologically astral projecting” to your location. Electromagnetic form perpetrators who have projected their consciousness out of their human body to your location, into a two-dimensional sub-reality “broadcasts,” with electromagnetic crime and criminals most often invisible to the naked eye, can be detected around a Targeted Individual off reflective surfaces like mirrors, glass and sunglasses.

Also, beware seemingly famous people who show up in your life as an aware targeted individual, chances are they are evil criminals faking the form of those famous people in 3-dimensions. In 1957 Julian Schwinger concluded the electromagnetic and weak forces of physics were aspects of the same single variable, phenomena and interaction. The weak force is

involved in E.M.F. perping using this equipment [www.openbci.com](http://www.openbci.com) I will assert; however, I am no astrophysics or electromagnetism expert. N52 level neodymium magnets (pictured) can be bought in the shape of a circular disk with a hole in the middle, placed to have opposing magnetic fields pushing apart, that can be bolted together with 1/8 bolts and screws then wrapped in medical rubber from a hospital rubber glove, for good "T.I. shielding" for electromagnetic torture protection. Materials for a Digital Dark Age Chastity Belt like I describe can be bought at a local hardware store and [www.walmart.com](http://www.walmart.com). This high-power magnetic device placed around and OUTSIDE sex organs and exits for waste or to protect other parts of the body for men, women and children being so viciously violated, day and night, can mitigate and can stop remote torture rape and other tortures of you. Use these N52 magnets for months and years, day and night if you are being attacked and magnets may work for you as they did for me to stop possibly implant induced, rectal torture and/or beyond nano tech as soon as 6 months after continued use. It is not a ghost raping or rectal torturing you fellow T.I., and none of this is spiritual. Moreover, my skin gets poked worse than a blood draws, perps threatened to clone me and have used many hologram forms, faked whole people against me, even hologram trucks with misuse of Project Bluebeam. I had 6 hemorrhoids removed because my body was sold for EMF perp rape of me and I rectal tortured for 5 years of cruel and unusual punishments. For the E.M.F. perp, it's reportedly real sex and rape of us in 3-dimensional as perps lay in their own feces in other locations, free to commit these crimes as I continue to harp on these issues to keep establishing perps are not gods and are evil, disgusting people if they even

have a soul at all. This crime carries the death penalty in some jurisdictions, rape that is. Oddly the sphincter was not impacted at all, only the rectum in the rectal torture crime of me lasting a horrendous 5 years before in invented the rape prevention device.

Heat Induction Coils (pictured) assembled with a circuit board, 30-volt power source and connected copper coil for running in a home, or office, creates unseen light by the naked eye making it harder for E.M.F. perps to target T.I.s with Direct Energy Weapons (D.E.W.s) and painful implant abuses & other remote tortures. These criminal gangs are exploiting us from the electromagnetic frequency around normal 3-dimensions, 5 senses life. An M.D. who got targeted went on to catalog and publish every Direct Energy Weapon (D.E.W.) available for purchase on the commercial market in efforts to bring these criminals to justice and expose this covert war. These gangs are destroying the quality of life for all us T.I., which is an understatement of all this evil. Being a T.I. is worse than being shot! Bloatware cell phone hacker script on your phone put there by organized crime overlapped with government, Bluetooth cell phone hacking of your phone, Use a Tor Browser for the Internet. Wi-Fi hacking of cell phones and cellular network hacking are problems for Targeted Individuals, especially for those unaware they have been targeted. Re-routed phone calls to perpetrators using technology to fake the voices of loved ones, friends and family are organized crime tactics for ruining the life of Targeted Individuals and can cause A LOT of harm. I recommend SD MAID PRO for about \$5 for cell phone security if you don't take the better and harder step of "rooting" to "jail-breaking" your smart phone. Use a two-step authentication app with a number that changes every 10 or 15 seconds on your smart phone app in order to get into your password protected property like websites, email addresses, social media, etc., especially if you suspect you are also being Remote Neural Monitored a.k.a. R.N... Please see Deep Thought News who writes on these Dark Journalism topics of the crimes of Remote Neural Monitoring (R.N.M.) being used on us T.I. When signing up for a two-step authentication a sheet of backup codes for an emergency recovery is given. Keeping backup codes secret is a big challenge especially if perpetrators are reading your thoughts and seeing out your eyes with R.N.M. If your computer is already hacked, and/or perpetrators are already looking out of your eyes and reading your mind

## What Is Neuro-Linguistic Programming & 6 Signs Someone Is Using It on You

[www.Learning-Mind.com](http://www.Learning-Mind.com)

using R.N.M. you may try closing your eyes on a secure computer or at public library computer as the backup codes are shown for the 2-step authentication app, or have a friend help you. The human body itself has been turned into the surveillance device and all the senses are easily deceived. I have literally not been able to trust my eyes and ears with perps using R.N.M., V.2.K and I.2.K and worse. An article entitled "Defending Yourself Against Neuro Linguistic Programming" is helpful and Alpha Lipoic Acid, Vitamin D3, 5-HTP, L-Glutathione, fish oil and multivitamins could be helpful against electromagnetic, and microwave and D.E.W. torture of Targeted Individuals.

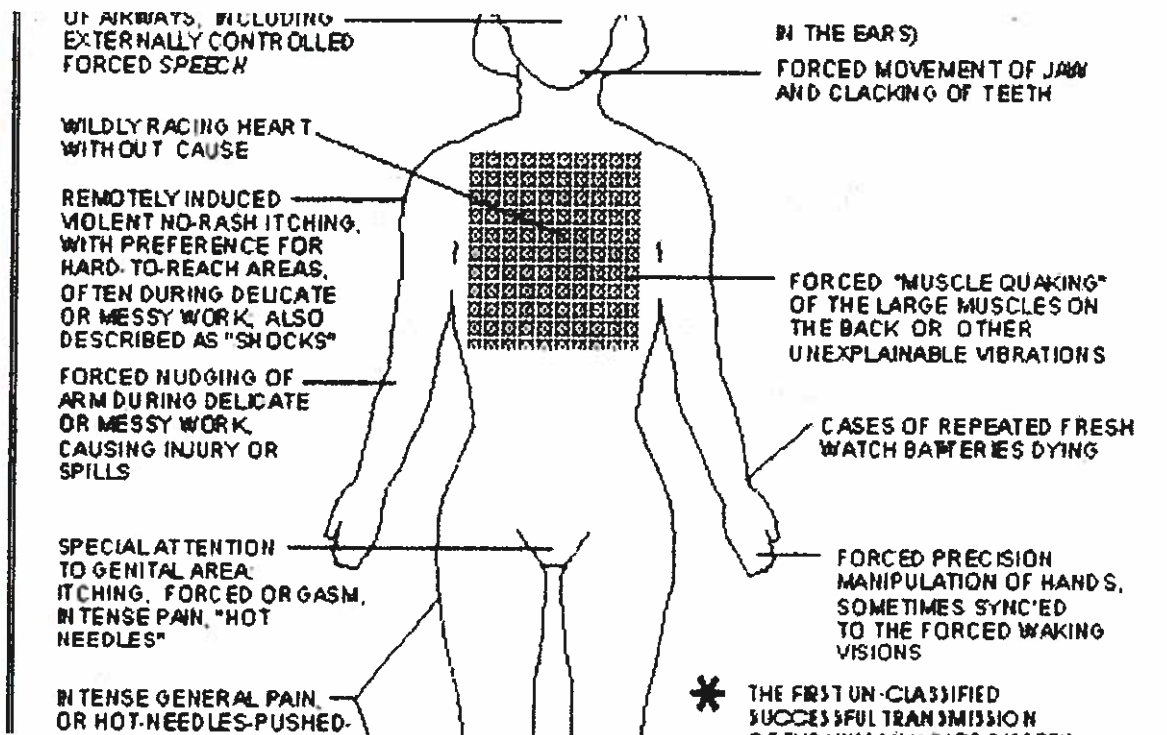

“S250” U.S. Army Surplus \$2,000 E.M.F. enclosed areas of protection that fit on the backs of trucks as campers, allegedly stops D.E.W.s, except scalar weapons and the D.E.W. resistant structures can be found at Navy or Army surplus shops, allegedly. The element of lead, woven into cloth at a dense thickness and with sturdy encasing for clothing, hats, blankets and for cell phone, laptops and computer tablet storage bags is recommended for security from criminal perpetrators, who could try to steal your identity and all of your intellectual property and more. Lead clothing or otherwise does not stop microwave radiation of the electromagnetic spectrum and quantum attacks may offer even less defense from that I do not understand or am an expert in at all. In addition, if TV’s or video games or other electronic devices start talking to you or at you, turn them off & don’t watch them. That’s the dangerous and worse than deadly A.I. of satanic C.I.A. Project Mockingbird, and their perps. Project Mockingbird is very evil and powerful, and is subtly super persuasive. Mockingbird aims to deceive and is

undue influence and can get a target audience around you so angry at you, civilians and others may be tricked into killing you the T.I., in some of the worst cases. Perps are able to “deep fake” media & the 3-dimensional world too to deceive your eyes & ears, etc. and TV has like a 30 second or so delay so perps can modify national or local T.V. broadcasts for undue influence, to induce suffering and to mislead and worse. Human faces around you can be “animated” to make it look like people are talking about you, when they are

not. Use the Onion browser and [www.startpage.com](http://www.startpage.com) searches and VPNs for more secure internet use and Domain Name System Security (DNS) such as Quad9 is important too. "Free HTTPS Everywhere" a browser extension can help secure your access to websites and "Ghostpress keylogger blocker" can keep whatever you type not recorded by hackers, use windows defender for viruses and/or malware. Also, [www.stop007.org](http://www.stop007.org) & [www.onceand4all.com](http://www.onceand4all.com) are good sites for Targeted Individuals. Some electromagnetic beings are not perps & can be good. However, perps are able to fake any "god" or virtually any person, place or thing; it is never going to be god "in your head" or otherwise. Perps do all this to inflict evil on Targeted Individuals and are only human trafficking human low life criminals, sociopaths, psychopaths, narcissists & other evil human genome types using Remote Neural Monitoring (R.N.M.), Voice to Skull (V.2K.) and Image to Skull (I.2K.) deceptions and worse in the same plot to enslave every man, woman and child. Perps are stealing the world's brains and our bodies and souls along with them, even after death I suspect, deeply. Elon Musk's company trying to put a name and a make profit off evil work that has ALREADY BEEN DONE.

NeuraLink, is dangerous and not what it seems, an understatement. Criminals are also implanting our bodies for extreme abuse; we the T.I. are treated worse than wild beasts. This Brain Computer Interface B.C.I. hardware could be a panacea, a

cure all, for those of us who hear voices in the auditory cortex of our brains, unnaturally, and don't respond to antipsychotic medication. Brain Computer Interface hardware like this has thus far been used for immeasurably high amounts of evil on Earth against Targeted Individuals in 2020, for longer than I have known. The glorified corrupt, snitch community has been weaponized something wicked and they are desperate and incessant to keep trying to fake they are gods and have the public and T.I. believe it, living out their short lives as parasites on the globe.

### **Perpetrators are Driving Me Crazy**

I am in the 1/3 of mental health patients who hear voices that do not respond to medication. I am a victim of Voice to Skull, Image to Skull technology and Neuro Linguistic Programming (N.L.P.) trauma-based mind control, word twister, double-speaking and worse verbiage spoken directly into the auditory cortex of my brain, 2-4 times a minute on average since 2004 by perps, and allegedly their evil use of Artificial Intelligence (A.I.). The T.I. slavery is worse than only economic slavery and is mind and body torture, unseen, on the inside but external to our person-hoods also. (N.L.P.) Neuro Linguistic Programming is weaponized psychology and is purposefully vague language for deceit that brings up contradictory notions and painful word use to force a brain to respond, and have blood rush to the auditory cortex

of the brain for torturous processing of word-twisting, obtuse, few words use, evil audio that is life and consciousness destruction at the speed of thought. Perps are often not saying what perps really mean, using multiple meanings of words, double-speak, sin language and worse in V.2.K. to cause pain, degrade and derange a Christian and/or Buddhist consciousness in me,

and I estimate 40 million other T.I. worldwide of the 7 billion of us earthlings. I know these tactics are the proverbial, and concepts applied

literal, human, devil's wordsmiths involved in perping. These are their perp uses of Synthetic Telepathy, uses for evil! It's not spiritual what is done to us T.I. The foretold of unclean, beings of light (because of fiber optics and the internet), well-spoken liars passed out in their own feces in other locations using N.L.P. secretly who are sociopaths, narcissists, psychopathic genomes practicing satanism and worse at me and millions of other T.I., is a real battle between goodie goods, like myself, and pure evil disguised as good, perps. Criminal perp gangs are NOT well-regulated U.S. militias but parasitic, pathetic, obsessive opportunists, electromagnetic form criminal perpetrators, or E.M.F. perps, who are mimics of concepts applied, Mara's Army in Buddhism and the antiChrist's clandestine foot soldiers of 2020 Earth, with no Messiah to stop the perps, and their vast evils. There are too many evil perps E.M.F. fake people, and also flesh and blood criminals in

these gangs. Good lost and continues to lose in my life, perps so advantaged by this tech and these systems. It's like a figurative cat playing with a dead mouse, us T.I. getting played with like food for evil.

### **In Part I am also why the Universe is now mathematically proven to be a Virtual Reality**

The language of the universe is math. From womb to grave, the suffering of this life and the evil of these black op technologies perpetrated on Targeted Individuals are very real, even in a billions-to-one calculated to be virtual reality; a figure arrived at by Elon Musk based on computer science after receiving a Tweet on the subject from yours truly. Musk calculated where we have come from the first video game of “Pong” to where we are now with dangerous, indistinguishable, and undetectable to some virtual reality technology to prove that the universe really is a creation. The Library of Alexandria did not have those numbers. I believe an absolute truth is an absolute good despite unintended consequences. Christians teaching for thousands of years that the world and universe were a creation are 100% correct. Further it can be said, we are living in a virtual reality universe. Possibly a hopefully benevolent Type 2 or 3 or higher Kardashev Scale Civilization may take notice of the evils of 2020 Earth, a theoretical advanced civilization that is virtuous, stable, smart, wise, capable and powerful enough of create and maintain a virtual reality universe such as ours, but I am not relying on any higher power. Musk’s math vindicates
