

Binford Storage Solar Farm

Marin Clean Energy

Integrated Resource Plan Annual Update

Approved by MCE Board of Directors on **November 6, 2014**

Binford Storage Feed-In Tariff Project, renewable energy, capacity

A proposed building integrated 990 kW PV project is under development in Novato, CA. The agreement would extend for a twenty-year term with an expected commercial operation date of September 30th, 2015. The project's energy deliveries would offset MCE load and are projected to average 1,800 MWh per year during the term.

Marin Clean Energy – Integrated Resource Plan: 2015 Update

Approved by MCE Board of Directors on **10/15/2015**

Binford Storage Feed-In Tariff Project (PV Solar): renewable energy

A proposed building-integrated 990 kW PV project is under development in Novato, California. The agreement would extend for a twenty-year term with an expected commercial operation date of September 30, 2015. Energy deliveries from the project are expected to offset MCE load and are projected to average 1,800 MWh per year during the contract term.

May 19, 2016 (eight months after expected commercial operation)

Where's the solar farm?
