It's a dry compound. It'll dry you out of the water you're holding but if you gain 15 lbs on a superdrol cycle and 0 was fat I'd expect half of it to be glycogen and not actual muscle though. There's only so much muscle someone can gain in a month. Even on superdrol. Gained 8-10 lbs of ACTUAL muscle in a month would be incredibly good.

DONT LISTEN to people who say women shouldn't lift heavy just don't get me 🙄 started who even asked for their opinion.
