Winstrol - Stanozolol Cycles. Winstrol, or "Winny" as many call it, is a popular oral steroid that has been used for years by seasoned bodybuilders. Ask your friends that use steroids how often they've cycled with only Winstrol. Most will tell you they also incorporate Testosterone as the base compound. A fairly conservative oral dose of .2mg/kg of Winstrol has been shown to lower SHBG by close to 50%.

We can also see increased acne when men use Winstrol orally, but these effects are relatively minor when a 2mg/kg dose is being used to increase the effectiveness of other steroids in a cycle. It's frightening that a quick google search of autism and vaccines will bring you floods of articles telling you that there is no link, yet some people ignorantly insist that there is, or haven't yet learned about the fraudulent paper that sparked the debate (which is still, shockingly, pervasive).
