

Apex Cam Review - Action Cameras For All Occasions

If you are a fan of action/adventure movies then you must have heard about the company called Apexcam. They have been making camcorders for more than 10 years now and till date, they have been able to provide people with a great deal of high quality action and adventure camcorder footage. Their latest action camcorder, the Ace Cam, is not only built to capture good video footage, but also comes with some pretty impressive features that are sure to impress any fan of this type of photography. We take a look at some of these amazing features.

The camera used on the Ace Cam has a very wide-angle lens, which is one of the best around. This helps to maximise the amount of area that the camera can cover. Because of this the lens captures a lot more area with each frame of the video capture resolution. This gives the effect of being able to capture everything from large scenes to close up action.

One of the main features of the Apexcam is its video capture resolution and the fact that it has a rechargeable battery. These two features make the camera extremely convenient to use and allow the user to carry out their activities wherever they want. The camera is also very easy to set up. A simple plug and play system allow the user to simply power the camera up using their USB cord and away it goes. A rechargeable battery is also included so that the user does not need to worry about running out of charge and can continue using the camera as long as they want to.

Another big plus of the Apexcam is the built-in wifi feature. With a built-in wifi feature, the user can upload the photos they have taken to their computer which allows them to share the experience with friends and family or just show off the awesome action cam they have captured. The built-in wifi makes for an extremely convenient portable wireless camera for all occasions.

The lens of the camera is an absolutely fantastic. Unlike many of the other waterproof action cameras, the Apex Cam uses an advanced lens which is more than adequately long enough to give the user a nice wider-angle image. This in turn gives the user better movement and clearer images with a higher resolution. The lens on this model is also relatively inexpensive, so it's easy to pick up one for under \$50 at Amazon. apex mountain web cam It's worth noting that the Amazon version does not include the built-in wifi so you will have to buy this separately.

One of the best selling features on the Apexcam is the superior image stabilisation. The image stabilisation of the camera is based on the patented ARRI image stabilisation technology. This technology has been heavily tested and proven to work with all types of cameras so this is a great advantage over many of the competitors.

It must be said that the images produced by this camera are quite sharp. Whilst they are not as high quality as those from the action cameras, they do offer a significantly better result when it comes to sharpness. The Apex Cam is also able to shoot at high frame rates so this is something to consider if you're looking for a cam with high frame rate images.

One of the best selling features of the Apexcam is its built-in wifi capability. With the built-in wifi you can capture footage from anywhere in the world and easily transfer it to your computer via wifi. You can also connect to the internet through your mobile phone and stream the footage directly to YouTube or other storage sites. There's no need to carry around a portable laptop for hours upon hours of recording footage because the camera can send the footage wirelessly to your computer.
