We are a Nonprofit making organization working for welfare of the society. From its inception, the organization had been in the field of Agriculture and education through its several educational programmes/activities. Since, the society believes strongly that it is through education that the details and other weaker sections can come to grips with their own rights and claim it legitimately.

We have been successful in our efforts to awake the people aware of their rights. he organization in the field of health through its several health programmes achieved.

The active involvement of board members as well as general member in the implementation of the programs has further contributed to the development of the organization. However, inability to fully mobilize the Potential of many other members has been seen as a weakness of the organization.

SECRETARY'S NOTE

I am happy to present our Annual Report for the period 2011-2012. Jan Nirman Kendra is a NGO working since

2009 in Muzaffarpur and East Chmparan districts in Bihar to bring qualitative and quantitative changes in the lives of the poor and marginalized section of the society. The year 2011-2012 has been of implementation, expansion and intensification of our different developmental programs with greater people's participation and realistic approach. The programs run by Jan Nirman Kendra has been able to reach to the people it strives for.

The impact of these programs has been positive. Through our programs, we have been able to reach needy children, poor women, unemployed youths and general community as a whole through various developmental and meaningful programs. Through these programs, we have been able to reach to those who are not being reached before. As we are a learning organization and is constantly innovating based on experiences that are being generated in the field. We will hope to continue doing that.

All these efforts and accomplishments would not have been possible without the support and collaboration of our donors, partners, local administration, community members and a highly committed Jan Nirman Kendra team. We wish to pay our gratitude to our donors – Grameen Development Services and Jamsetji Tata Trust and individuals for extending their valuable support and guidance to pursue our vision and mission.

We look forward to your comments and suggestions on this report and renew our commitment to work for effective development partnerships for better reach to the poor people of Bihar.

Thanking you,

Rakesh Kumar Singh
Secretary

Agriculture SRI Programme

Improvement in land crop productivity of small and marginal farmers resulting in increase food security and income to small and marginal farmers.

- To promote SRI and SWI among 400 small and marginal farmers.
- To increase paddy and wheat productivity.
- To increase food security and agriculture income.
- To develop a community cadre of 20 community resource persons (CRPs) for sustaining the knowledge and practice.

Achievements

- 300 Small and marginal farmers have done practice change to SRI –SWI and have increased crop productivity and improved the household food security.
- 20 community resource people are trained to provide continuous support to farmers towards practicing SRI way of farming.

Use of organic manures:

Organic matter is the food for life forms teeming in the soil. When organic matter is added the microorganisms in the soil multiply manifold. The microorganisms bring nutrients into available form and are made available to them as and when they are needed.

HEALTH AWARENESS PROGRAMME

The programme was conducted in Muzaffarpur district of Bihar state to ensure health awareness among the community at the lowest rung of the society on the economic ladder. To provide better health services, some of the key components of the Health training programme were to make the SHGs women have a perspective on life skill education and psychological interventions and ensure knowledge about RH issues, Health and hygiene habits etc.

The organisation organized Health & Family welfare programme for poor. The health of a nation is a sum total of health of its citizens and communities. To achieve this goal total participation of its Citizens, Communities, NGOs and the government is essential. There is a considerable challenge for optimising the exiting rural health infrastructure through the country. Health care is a matter of People. Let us make it matter to people through NGOs.

Towards building an enduring rural society, the breaking of the Vicious Cycle of malnutrition and ill-health necessitates formulation of a set of distinct but mutually related strategies to

combat the inextricably linked socio-political and economic factors that cause ill-health, and adversely affect the livelihood. Therefore, Critical Public policy making and Strategic programming, cast in partnership and network mode, can alone bring about overall health development of communities and individuals. The bottom line of all prosperity and health in future should be a development process and outcome that is essentially facilitated by development partnerships and networks, which nurture as well as further the goals of health and human development with focus on 'putting health into the hands of the people.'

The basic objectives of Health Care Programme, run by OUR society are:

- Develop and implement a community based, low cost primary health care programme for communities, supported by the partnership of private doctors, & referral services.
- Organize effective action oriented health workers, who will initiate and manage health care programme.
- Train the health workers, for the community.
- Nutritional feeding, health education and training, functional literacy and primary health care compliment each other.

The family welfare programme was started by the society with the objective of reducing the birth rate to the extent necessary to stabilize the population at a level consistent with the requirements of the National Economy.

Society organised family welfare programme in many places of Bihar state. The literacy rate of the states are very low and the need of aware of the people fact that a small family is a healthy one. The effectively couple protected.

About this programme main view of the society is to provide family planning services within the broader context of maternal and child health care. It disseminates information and education to enable couples to make voluntary informed choices regarding size of the family and spacing through contraception.

Rural Development Program

To promote self governance we have formed and strengthen 5 Farmer Club in the intervention area of the project. They have capacitated for accessing their rights in the community. Community people, stakeholders, service providers and parents have also sensitized on the issues. Inclusion in the society, cooperation, self governance & self decision for development are the main concern of this activity. Apart form this thrift and saving habit also promoted among disabled, parents and non disabled people. The grass root level organizations have to be integrated with Block and District level network for effective advocacy for realization of the rights to the PWDs. They have act for all aspects of rehabilitation such as accessibility, coordination, advocacy, and policy influencing for the PWDs. Capacity building training to SHGs Members and leaders organized on the purpose of group roles and responsibilities of each members for socio economic development of the members, leadership development, saving & credit, accounting and book keeping and on purpose of

group formation, role & responsibilities, role of good leaders, community development . These activities motivate the SHG and DPO leaders.

Plantation programme:-

The Organization conducted Environmental Purification awareness programme in which people were advised using of less polluted fuel, garbage- containers, environmental sanitation and plantation work in the using of environmental friendly goods. They also suggested to tree plantation in the societyThe Organization conducted Environmental Purification awareness programme in which people were advised using of less polluted fuel, garbage-containers, environmental sanitation and plantation work in the using of environmental friendly goods. They also suggested to tree plantation in the society.
