

A hope to get better return from the cultivation of Peas cultivation

Ram Baleshwar Sahini, from Maniyar pur Vrit is a secretary of Pragatisheel Kisan Club. He is a source of inspiration for many others farmers in his village. In past, he has done the cultivation of paddy, wheat and potato by taking suggestions and input from the agricultural scientist. This year he had cultivated peas in 0.20 acre of land and he has become the source of inspiration for this to farmers in his village.

The cost of cultivation is as follows:-

S. No.	Particular	Unit	Amount (Rs.)
1.	Seed	3 KG	600/-
2.	Irrigation	Rs. 250 X 4	1000/-
3.	Labour	Rs. 10 @100	1000/-
4	Urea	10 KG @12	120/-
5	Compost	-	300/-
Total			3020/-

The total cost of cultivation was Rs. 3020. The peas were sold in the local market called –‘Tetariya’ and the return on this investment were as follows:-

Total Production/Yield = 460 KG

Total Income = Rs. 8280

Total Profit = Rs. 5260/-

This profit has motivated other farmers too to do cultivation of peas so that they can maximize their profit in short span of time.
