Trenbolone Acetate is officially classified as a veterinarian grade anabolic androgenic steroid. The Trenbolone hormone itself was first created in the late 1960's and the Acetate version would be sold under the names Finajet and Finaject. However, this is not the only Trenbolone compound.

Whether you're a professional baseball player, a weekend golfer, or an upright human, the health and longevity of your spine is EVERYTHING. We have 12 Thoracic vertebrae that run from the base of your neck (cervical), to the top of your low back (lumbar). As rotational athletes and human beings, we must maintain the mobility of our thoracic spine for movement efficiency and optimal power production. ••
