MX Medical is designed to provide real time information regarding eligibility, estimates and patient payments to Providers.

MX MEDICAL HAS FOUR MAIN SERVICES:

ONLINE BILL PAY – Used by Patients, no login required and payment options included echecks and credit/debit cards. Allows Providers to easily add a PCI-compliant and secure payment page to their website and take payments today. Payments are deposited directly to Provider's bank account and details routed to PMS for easy reconciliation.

PAYMENT MANAGER PORTAL – Used by Provider's front office clerks in connection with your PMS to easily find patients, check their eligibility in real time, build a visit summary and share an estimate regarding the patients payment responsibility. Allows Provider to quickly process payments of cash, credit, check or payment plan. The robust payment plan options allow you to configure plans that comply with practice policy and help patients pay what they owe.

PATIENT PAYMENT PORTAL – Used by patients to see all their billing history, set up payment plans, add payment methods for future bills and link family accounts. Patients can also see all provider communications and digital images of their print statement.

ADMINISTRATIVE PORTAL – Used by Provider's back office account payable team to speed the payment process through claim reconciliation, payment plan administration and financial assistance screening review. Within this portal Provider's can also add locations, add users and manage the patient portal.
