Dragon City MOD APK – Have you ever played a game in which you build a strong army to fight against other computers or real players in order to win the war? There are different armies of different players. Every player whether it's a computer player or a real player builds his castle to protect the inner structure and the king. He/she also build granaries to store food, stockpiles to store stone, wood, and iron, etc.

Towers are built for archers, horseriders prepare themselves to attack the other army. Hence, it's like a complete war game. A game similar to this is going viral nowadays and a huge number of players play it. Its name is Dragon City APK. It was developed a few years back for only Android devices, but later it got ported onto iOS as well.

The free version of Dragon City APK takes a very long time to fight different battles and complete different levels as your army doesn't win in every war. Also,

there are many items like food, gems, gold, arenas, dragons, etc which are paid and you have to win different war levels in order to get gems/gold and buy them. But, what if someone like me doesn't like to play all the levels to buy these items? Or what if he/she wants to have all the items already so that he can win every level easily? Don't worry, I have brought you the Dragon City MOD APK in which all of these items are unlocked and you don't have to wait longer in order to buy them. But, before downloading this mod apk, read the complete article to get more information about this MOD.

Dragon City is a fun, interesting, and evolving game. If you love battle games this is a great choice personally I just get involved with quest battle games. For newbies, in order to progress and unlock more features, you need "Gems" in this game. When I am playing I always look for ways to increase gems to unlock more buildings, upgrade food storage, grow my dragons and free some caged dragons.

With Gems you can do a lot, these are something's that I prefer. Gems are shown as purple gem numbers on top of the bar. You can collect these gems either through real money by purchasing or using free methods by playing. This is my list of methods on how to get gems in dragon city? Both paid and free methods will be discussed. Don't spend all over the place. I used these gems to unlock caged dragon, upgrade the hatching building "(Hatchery)."

This helps me to hatch more eggs, increase my dragon portfolios, and grow them to win in battles. Moreover, I used them to repair the golden tower (Midarian Tower) beside my island which increases gold production by 20%. So if you want a fast gaming experience or just need quick progress then go for buying gems with real money and spend these gems right.
