

Minecraft Joins Super Smash Bros. Ultimate

Is this really happening? Are your eyes playing tricks on you? After pinching myself 74 more times, I can confirm that it hurt. This is neither a dream, nor an extremely belated April Fools' joke - Minecraft will be joining the cast of the critically acclaimed Super Smash Bros. Ultimate for Nintendo Switch. In the upcoming Challenger Pack Alex will be battling Steve and other mobs such the Enderman, the zombie, and other mobs in a blocky brawl.

While most of us here at Mojang Studios have been busy screaming in pure joy, Jens Bergensten, Chief Creative Officer, offered some words about this surreal, but magical milestone.

"Bringing Minecraft to Super Smash Bros. Ultimate is the result a remarkable collaboration with Nintendo. "As fans of the series and avid players at our studios, we couldn't be more excited to see Minecraft join Smash's already legendary lineup of characters."

You must be asking yourself many questions. When will the DLC be released? How effective is Mario at smashing Minecraft blocks? Minecraft Kirby says Steve tastes like a burger. And who does Jeb main? All your questions will be answered quickly, you'll be happy to learn. All you need to do is tune in to "Mr. Sakurai Presents Steve and Alex" this Saturday at 7:30 AM PT / 10:30 AM ET / 4:30 PM CET, followed by Minecraft Live, our live celebration of everything Minecraft, at 8:30 AM PT / 11:30 AM ET / 5:30 PM CET. You won't want to miss this live celebration of all things Minecraft in just two days.

Please excuse me. I need to seal this letter so that no one finds out that it was read.
