

When the Demand is strong, You Are Able to always find right Equipment online for Virtually Any Job

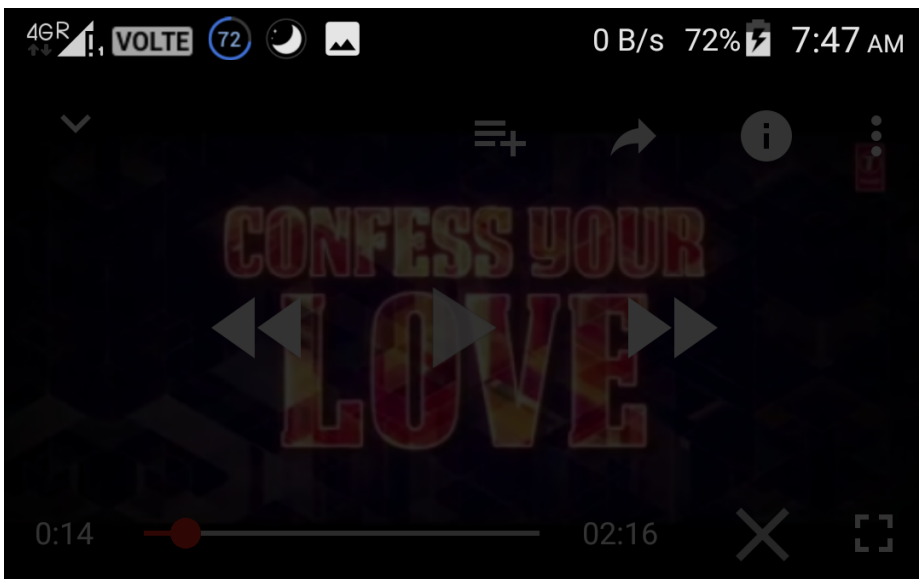

Hello and glad to be back. Today I'd love to tell you quite quick story about my efforts at greatness. I have to say, don't try to make something which others have many times more than perfected and created.

Always try to strive for yourself, even if it's a very popular and beaten up theory - to triumph with this, you always have to incorporate your personal, introduce some(item) special that is you and also the thing. . You know what I mean? It's hard and creative process sometimes forgets that imagination comes from within, that ally'all endeavors will probably sooner or later start copying parts of one another, incorporating, inter-looping and inter-connecting to eventually become one authentic great organism of your conscious efforts at greatness. .

Did I attempt? I definitely gave it my best!

That's what I say after my recent attempt to create my own location to upload and download youtube videos to your laptop and upload them into other networks and societal video platforms like Aparat, FC2, Weibo, Odnoklassniki, etc.. Cause video should circulate the Earth, you understand? It needs to immediately cross platforms without bounds stream into all the net connected libraries and entities, platforms and storage archives... It has to be preserved for its future generations. .

In any case, my efforts... Well... I had to drop them... There is too much work in it, an excessive amount of support needed. I did look to it, I need to be honest. . And moreover big number of servers and proxies involved, this will have to be rewarding, so after couple of months trying and losing several thousands of dollars on infrastructure, this section of my life is over.

So I use "their" Youtube downloader

Obviously "their" in this case means "someone else, not mine". . I don't know them, they do not know me. My favorite these days is Youtube downloader - it is super quick, it works good with Youtube and also 100s of different websites, and it's simply the nicest darkest portal to download videos that are online. There is no API, so my personal job of movie exchange between programs is postponed until I see that a fantastic enough support system. Nothing in the works at the moment, and after seeing how it all turned out, I understood better leave this to people who know what they're doing. . Here's how their website looks like: youtube

downloader front page with search hints

It is pretty cool, I love the darkness. . Try enter some search words - it provides popular localized search tags, pops out distinct suggestions so that you don't have to keep typing...

Conclusion

From now I just try to stick to my strengths, which will be many things but making these sites... download video Youtube mp4 Earning one is half of the work - the key is the service day in, day out...
