Remove the 5th speed engagement fork retainer screw

Straighten the caulking on the primary and secondary shaft rings. Then engage the 5th speed by hand.

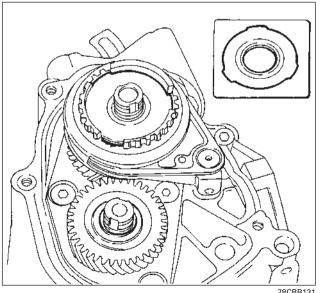

NOTE The gearbox primary shafts will be locked by engaging two gears at the same time. This operation is required to release the rings fastening the gears.

Remove the primary and secondary shaft 5th speed gear fastening rings

Take the sleeve to neutral position before removing the sleeve fastening ring to avoid losing the synchroniser rollers.

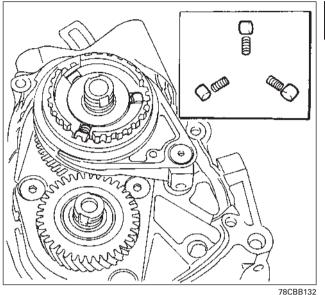

Remove the 5th speed synchroniser spring and roller retainer plate

Gearbox and differential

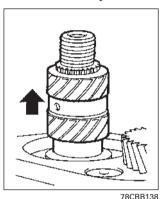

Bench disassembly procedures

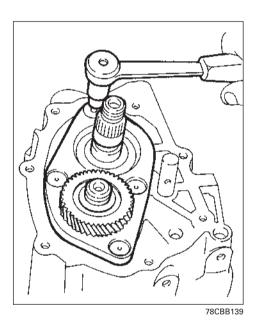

21-27.

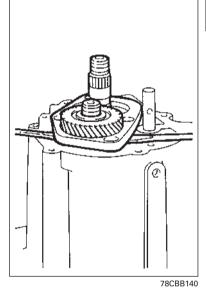

Remove the 5th speed gear bushing from the secondary shaft with tool 1845057000

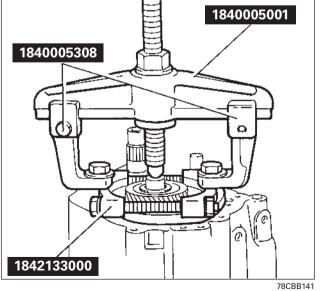

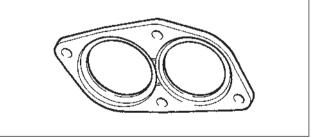

Proceed as follows to disassemble the 5th speed gear correctly:

- loosen the rear bearing plate fastening screws;
- use two levers to lift the plate and the gear to fit extractor 1842133000;

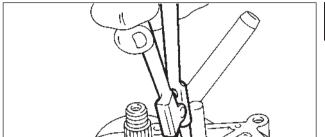

78CBB142

remove the 5th speed gear as shown in the figure and remove the rear bearing retainer plate.

Bench disassembly procedures 21-27.

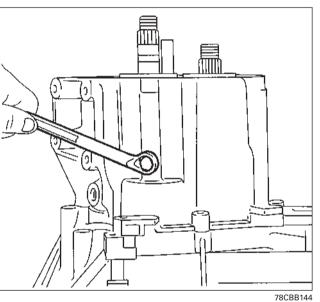

78CBB143

Remove the rear bearing snap rings

NOTE Arrange the snap ring openings as shown in the figure to remove the rings.

Remove the differential assembly

The arrow shows the magnet to be removed and cleaned of ferrous residues.

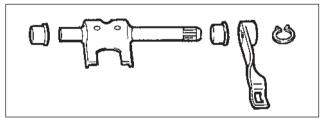

78CBB165

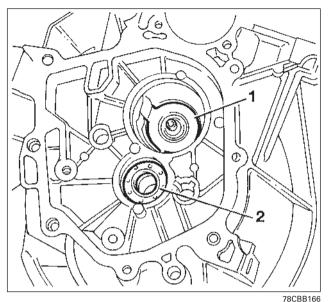

Remove the thrust bearing shaft

NOTE Replace the bearings if the thrust bearing shaft play is excessive.

Gearbox and differential

Bench disassembly procedures

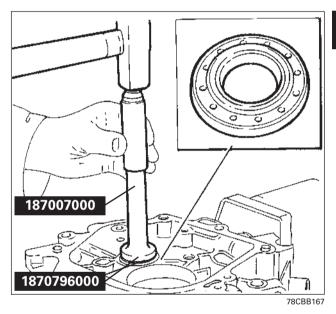

21-27

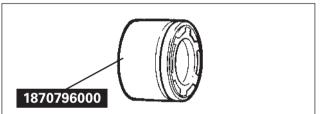

Removal of oil centring device and primary shaft seal

Remove part (1) using the universal extractive. Also uncalk the oil centring device; this operation is destructive, therefore always replace the oil centring device.

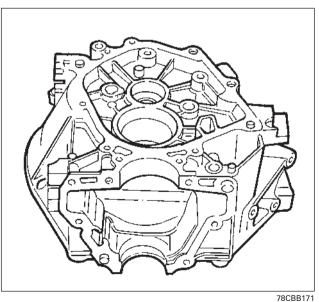

78CBB168

Fit the primary shaft seal

Before assembly, accurately fit the seal on the centring section of tool 1870796000 as shown in the figure.

Gearbox to engine mount (gearbox bell)

Gearbox and differential Bench disassembly procedures

Palio - Albea C.514.5.15

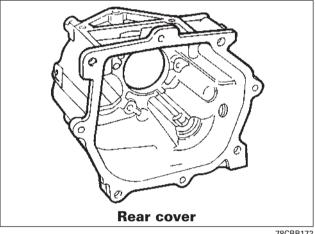

21-27.

Check the gearbox to engine mount, the central box, the rear cover and the differential cover

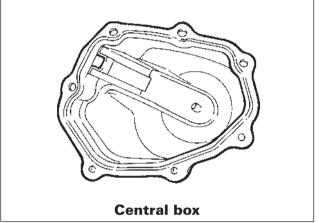

The box, the cover, the mount and the differential cover should not be cracked. The bearing and rod housings should not be worn or damaged.

The contact surfaces should be flat (use a fine file to correct minor imperfections).

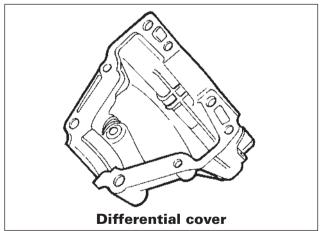

Check that the rear cover oil duct is not clogged up.

PRIMARY SHAFT DISASSEMBLY

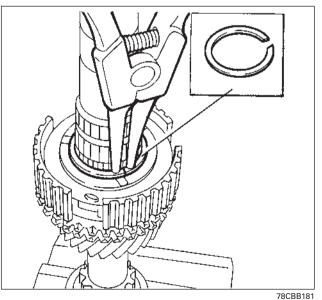

78CBB178

Remove the rear bearing and the 4th speed gear from the primary shaft

Remove the 4th speed synchroniser ring and 3rd-4th speed engagement sliding hub with springs and rollers from the primary

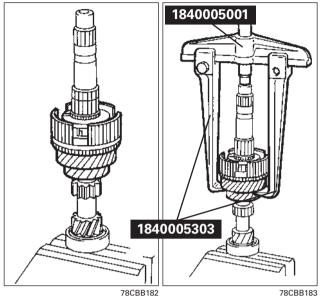

shaft

Remove the 3rd-4th speed engagement sliding sleeve hub snap ring

Gearbox

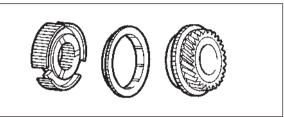

Palio - Albea C.514.5.15

21-27.

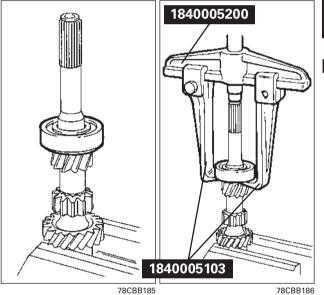

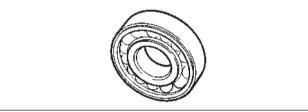

78CBB184

Remove the 3rd-4th speed engagement sliding sleeve hub, 3rd speed synchroniser ring and 3rd speed gear from the primary shaft

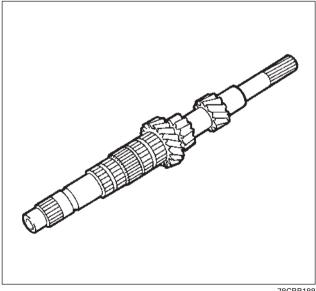

78CBB187

Remove the front bearing from the primary shaft

Check the primary shaft

Check that the gears are not damaged or excessively worn.

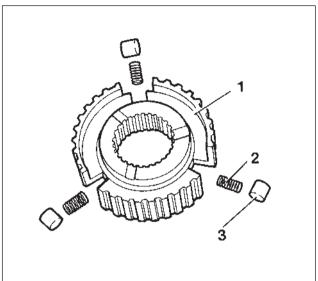

Following high mileage, it is good practice to replace all the secondary shaft gears when replacing the primary shaft.

Furthermore, check that the inner oil ducts are not clogged up.

Gearbox and differential

Gearbox

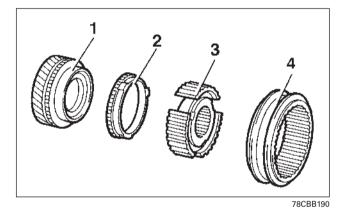

21-27.

BORG WARNER TAPER SYNCHRONISERS

- 1. Hub
- 2. Thrust spring
- 3. Roller

- 1. Synchronising surface of gear
- 2. Synchroniser gear
- 3. Sliding sleeve hub
- 4. Engagement sliding sleeve

Check the synchroniser assembly components

The inner surface of the synchroniser ring should not show signs of wear or ovalisation.

78CBB189

It is good practice to always replace the synchroniser.

Check that the hubs and the respective engagement sliding sleeves are not damaged. Check that they slide without excessive play or seizing. The inner sleeves should not be worn. Replace the sleeves if this is not so. Check the conditions of the thrust springs and the rollers. Replace them if required.

GEARS - BUSHINGS

The gears and the side engagements (synchroniser crown) should not be damaged or excessively worn. Furthermore, check that the inner surfaces of the gears do not show signs of seizure or abnormal wear.

HUBS - SLEEVES

Check that the hub and the respective 3rd-4th and 5th speed engagement sliding sleeves are not damaged. Check that they slide without excessive play or seizing. The inner sleeves should not be worn. Replace the sleeves if this is not so.

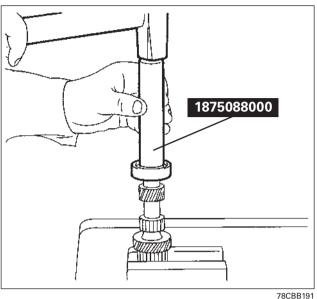

BEARINGS

Replace the bearings if they are scratched or if excessive play or wear are found.

Gearbox

Gearbox and differential

Gearbox

21-27.

SECONDARY SHAFT DISASSEMBLY

Proceed as follows to correctly remove the 4th speed gear and the rear bearing from the secondary shaft:

- position extractor 1842133000 as shown in the figure;

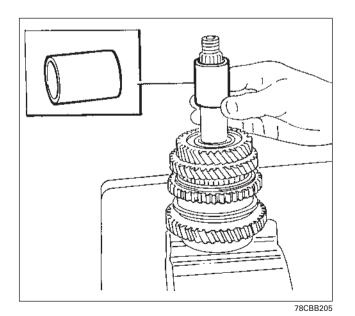

78CBB204

 use a universal extractor (arranged as shown in the figure) to remove the 4th speed gear and the respective bearing at the same time.

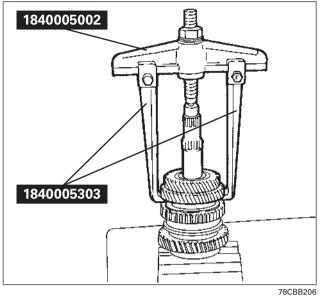

Remove the 3rd-4th speed gear shim

Palio - Albea C.514.5.15

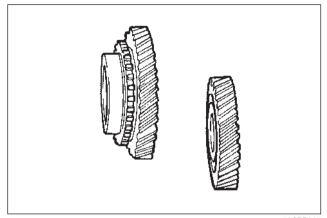

Gearbox

21-27.

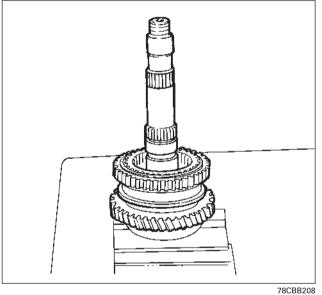

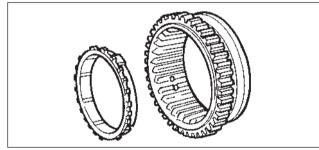

78CBB207

Remove the 2nd and 3rd speed gear from the secondary shaft

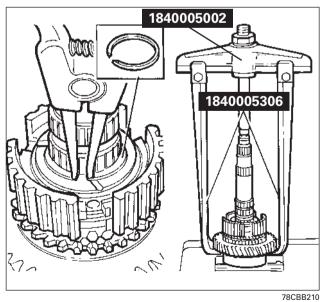

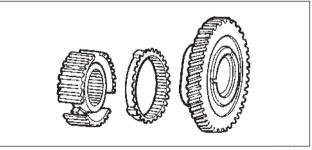

78CBB209

Remove the 2^{nd} speed synchroniser ring and 1^{st} - 2^{nd} gear engagement sliding sleeve with presynchronizer plugs

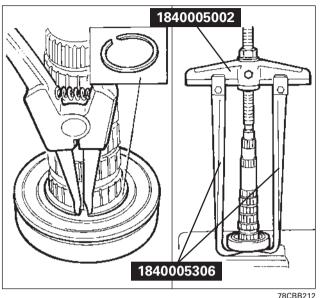

78CBB211

Remove the snap ring, the gear, the 1st speed synchroniser and the 1st-2nd speed engagement sliding sleeve hub

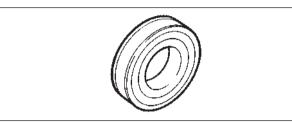

Gearbox and differential

Gearbox

21-27.

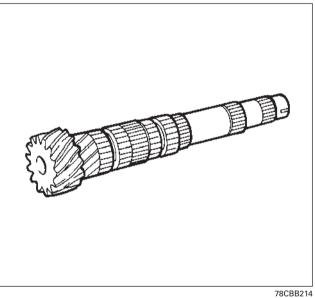

78CBB213

Remove the snap ring and front bearing from the secondary shaft

Spur gear secondary shaft-pinion

Check that the pinion is not damaged or excessively worn.

Furthermore, check that the inner oil ducts are not clogged up.

GEARS - BUSHINGS

The gears and the side engagement teeth (synchroniser crown) should not be damaged or excessively worn.

Furthermore, check that the inner surfaces of the gears do not show signs of seizure or abnormal wear.

HUBS - SLEEVES

Check that the hub and the respective 1st-2nd speed engagement sliding sleeves are not damaged. Check that they slide without excessive play or seizing. The teeth inside the sleeves should not be worn, otherwise, replace.

BEARINGS

Replace the bearings if they are scratched or if excessive play or wear is found.

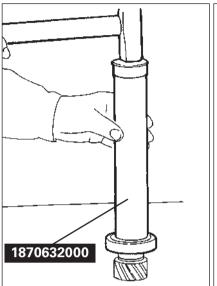

Gearbox

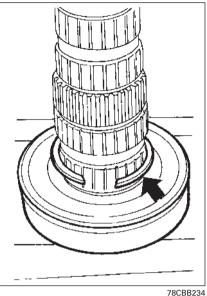

Palio - Albea C.514.5.15

SECONDARY SHAFT

ASSEMBLY

21-27.

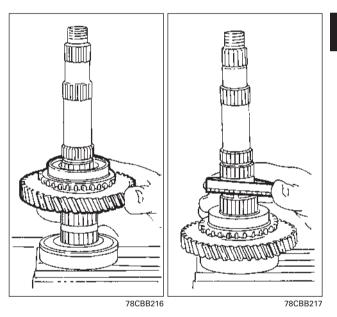

Apply gearbox oil to the concerned parts before assembly.

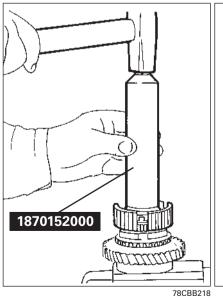

Fit the front bearing and respective snap ring on the secondary shaft

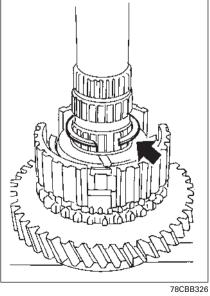

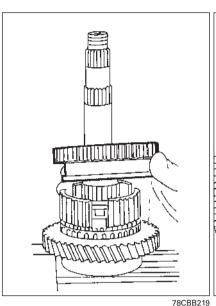

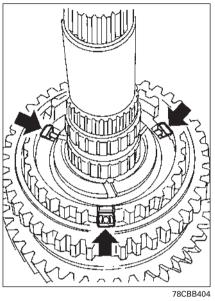

Fit the 1st-2nd speed engagement sliding sleeve hub and respective snap ring

Gearbox and differential

Gearbox

21-27.

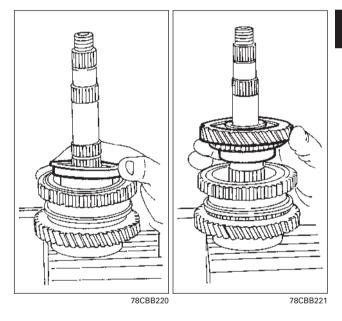

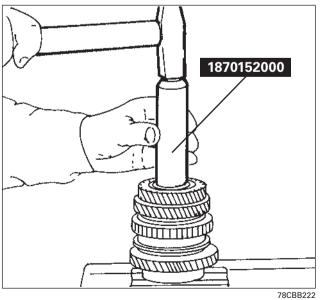

Fit the 1st-2nd speed engagement sliding sleeve and reverse gear (outer part)

Fit the three presynchronizer plugs (using a screwdriver) between the hub and the slots obtained on the 1st and 2nd speed engagement sliding sleeve.

Fit the 2^{nd} speed synchroniser ring and gear

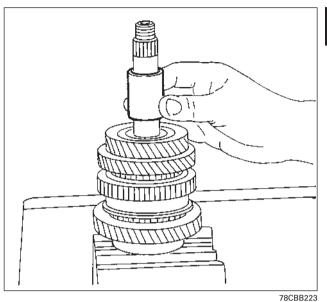

Fit the 3rd speed gear

Gearbox and differential Gearbox

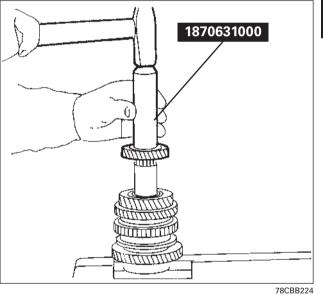

Palio - Albea C.514.5.15

21-27.

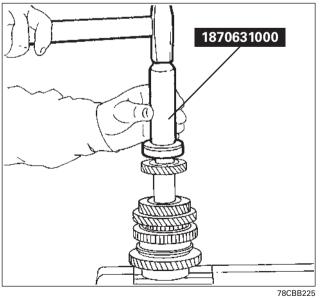

==

Fit the shim between the 3rd and 4th gear

Fit the 4th speed gear

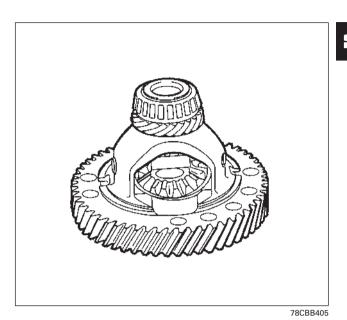

Fit the rear bearing

Gearbox and differential Differential

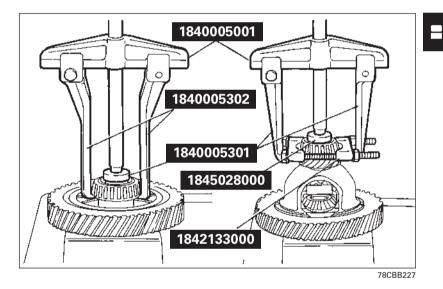

21-27.

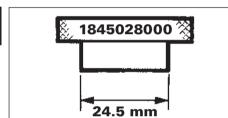

DISASSEMBLY

Differential carrier view

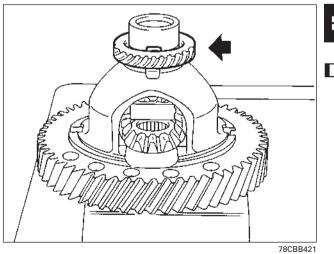

78CBB228

The diameter of the lower block 1845028000 must be reduced to 24.5 mm as shown in the figure.

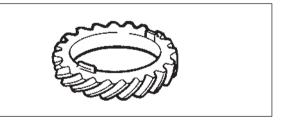

Remove the tapered roller bearings from the differential carrier

Replace the bearings if scratches, overheating or excessive wear is found.

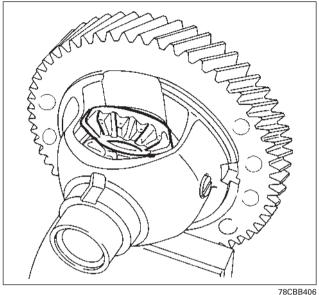

78CBB230

Remove the odometer gear

Gearbox and differential Differential

Palio - Albea C.514.5.15

21-27.

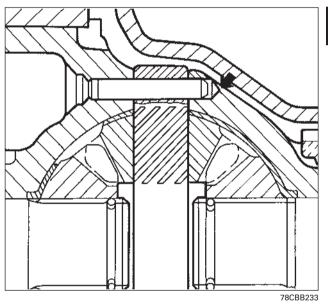

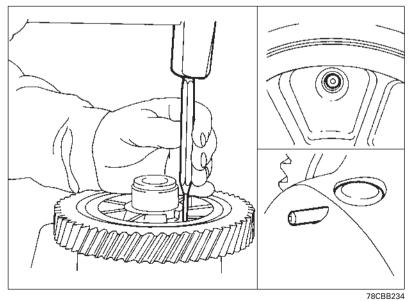

78CBB232

Remove differential carrier sun wheels

Crack the differential carrier wall with a chisel in the point shown by the arrow to remove the spring pin.

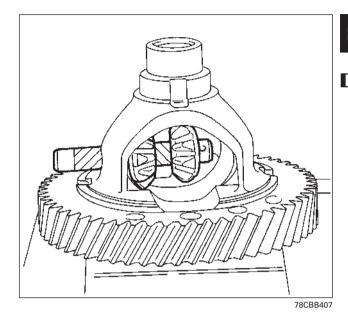

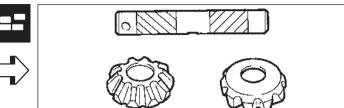

Remove the planet gear carrier spring pin

Use a steel punch (Ø 4 mm) for this operation.

Gearbox and differential Differential

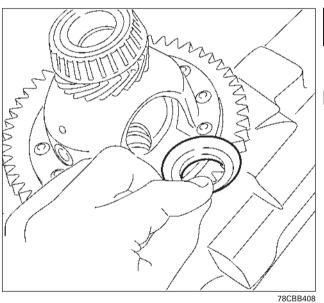

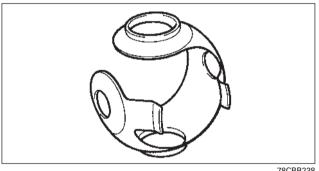

78CBB236

Remove the planet gear carrier and planet

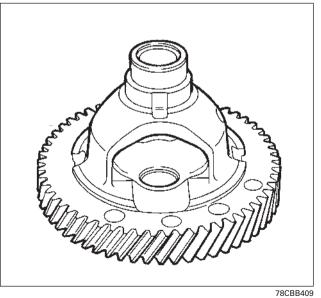

78CBB238

Removing spider and planet gear sheet metal shoulder shells

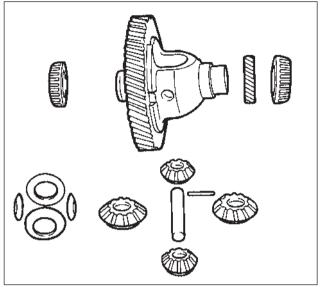

Differential housing-screwed spur crown gear assembly

Gearbox and differential Differential

Palio - Albea C.514.5.15

21-27.

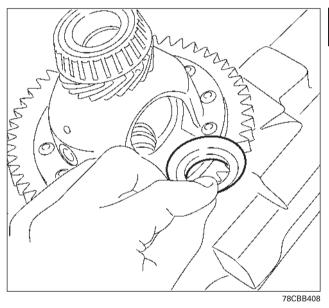

ASSEMBLY

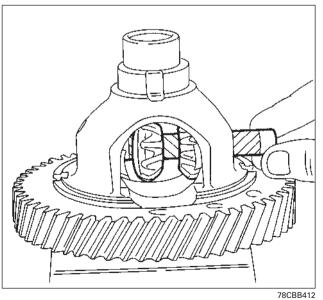

78CBB411

Differential assembly parts

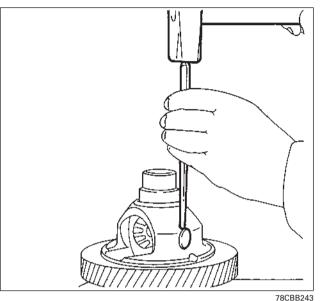

Fit the planet and sun wheel gear casing

Fit the planet gear carrier pin and planet gears

Gearbox and differentialDifferential

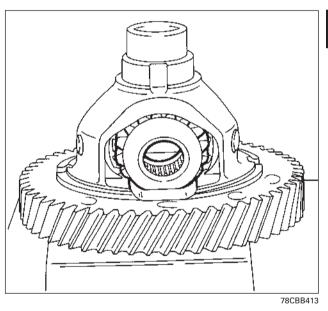

21-27.

Fit the planet gear carrier pin spring pin

Caulk the differential carrier after fitting to prevent losing the spring pin.

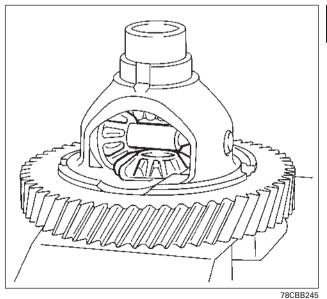

Fit the sun wheels in the differential carrier

Arrange the sun wheels on the planet gears, turn them on the planet gears and push them into the housing inside the differential carrier.

NOTE The sun wheels are fitted in the differential carrier without adjustment rings. Consequently, the play between planet gears and sun wheels cannot be adjusted.

Check play between sun wheel and planet gears

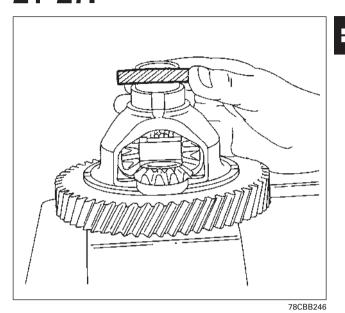

The coupling between sun wheels and planet gears is correct when the set turns without play and puts up a slight resistance.

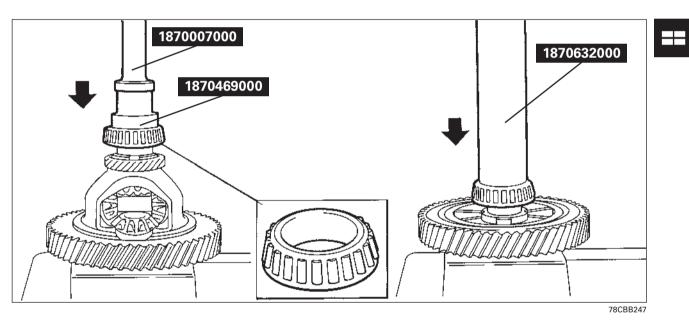

Gearbox and differential Differential

Palio - Albea C.514.5.15

21-27.

Fit the odometer gear on the differential carrier

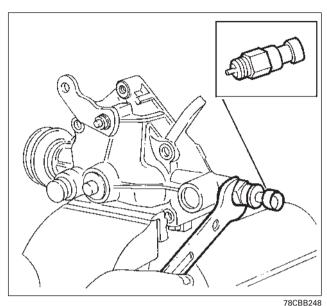

Fit the tapered roller bearings on the differential carrier

DETERMINATION OF THICKNESS OF ADJUSTMENT RING FOR DIFFERENTIAL INTERNAL **CARRIER BEARING PRE-LOAD**

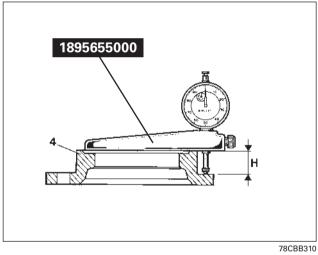

Defining "P"

Depth between cover surface and roller bearing outer race.

- 1. Gearbox
- 2. Tapered roller bearing outer race
- 3. Inner differential carrier

S = P - H + 0.12

"0.12" - Fixed number

Prescribed interference for differential inner bearing settling and pre-load.

Defining "H"

Cover height.

4. Cover.

"S" adjustment ring thickness (spare part):

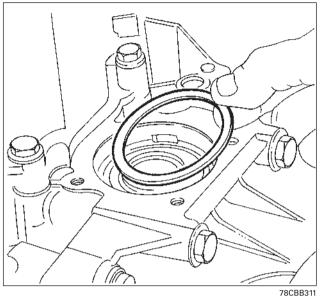

2.00 - 2.10 - 2.20 - 2.30 - 2.40 - 2.50 - 2.60 - 2.70 -2.80 - 2.90 - 3.00.

NOTE Define the exact thickness of the adjustment rings and find a spare ring as close as possible to the required thickness. If the value does not correspond to the available rings, fit the immediately thicker ring or rings.

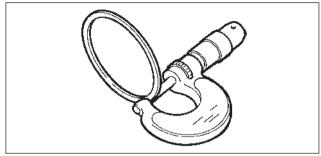

Gearbox and differential
